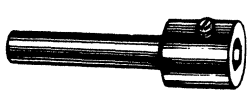
Flexible Shafts



Material: Phosphor bronze; non-rusting, non-magnetic shaft. Brass, nickel-plated hubs and couplers. **Fittings:** Hub end fits onto knob or coupler; coupler end attaches with set screws to shaft. Bearing types have coupler at shaft end; bearing and shaft at panel end. 1/4" hubs. **Application:** For remote operation of variable capacitors, potentiometers, and other controls. Turns freely at shaft; bends to 90° without backlash.

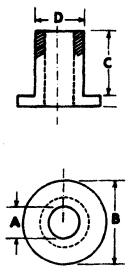
Nylon Spacer Bushings



Tough spacer bushings are molded of corrosion-resistant nylon. Non-conductive; ideal for use where insulation of electronic components is essential. Meet MIL-P-20683A specifications. Can be used for mounting variable capacitors above the chassis, for mounting sub-panels, etc. **Av. shpg. wt.:** 8 oz.

All GC Aerosols, except as noted, contain no ecology-damaging fluorocarbons.

Static-Free Chemicals

Contains a new generation of high purity chemicals that feature Zero Electrostatic Properties.

Static-Free Airjet

Static-free pressurized cleaner for blowing away dust accumulations. Not a solvent.
796-4200. 10-7055. 14 Avdp Oz. ..... **EACH 5.30**
796-4205. 10-7059. 22 Avdp Oz. ..... **EACH 6.12**

Static-Free Component Freeze

Static-Free Freeze — leaves no residue — safe for use in most circuits. Cools — 60.°
796-4210. 10-7007. 14 Avdp Oz. ..... **EACH 4.14**
796-4215. 10-7011. 22 Avdp Oz. ..... **EACH 5.72**

Static-Free Static Null

Neutralizes and prevents static electricity from reforming. May be used on circuit boards, printers, paper, carpeting, clothing etc. Non-greasy, non-flammable and non-toxic.
796-4220. 10-7180. 14 Avdp Oz. ..... **EACH 5.32**
796-4225. 10-7187. 22 Avdp Oz. ..... **EACH 7.70**

Static-Free Spra-Kleen

Static-free cleaner and lubricant. Dissolves contaminants and prevents oxidation.
796-4230. 10-7666. 12 Avdp Oz. ..... **EACH 3.50**
796-4235. 10-7669. 18 Avdp Oz. ..... **EACH 4.80**

Static-Free Contact Kleen (w/Anti-Oxidant)

Static-free cleaner with special blend of two synthetic anti-oxidants to clean and protect contacts. Will not cause drifting of R.F. signals.
796-4240. 10-7021. 12 Avdp Oz. ..... **EACH 4.10**
796-4245. 10-7027. 18 Avdp Oz. ..... **EACH 4.70**

Static-Free Contact Kleen NRF

Static-free high purity solvents attack contaminants quickly — will not harm plastics — leave no residue.
796-4250. 10-7031. 14 Avdp Oz. ..... **EACH 4.14**
796-4255. 10-7037. 22 Avdp Oz. ..... **EACH 4.80**

Static-Free Freon TF Cleaner

Static-free fast-drying solvent, removes lubricants, dirt and oil deposits. Leaves no residue, safe on plastics.
796-4260. 10-7100. 14 Avdp Oz. ..... **EACH 4.34**
796-4265. 10-7107. 22 Avdp Oz. ..... **EACH 6.18**

Static-Free Flux Remover

Static-free defluxers for use in production or repairs.
Moderate Strength Flux Remover
796-4270. 10-7507. 14 Avdp Oz. ..... **EACH 5.04**
796-4275. 10-7511. 22 Avdp Oz. ..... **EACH 6.64**

High Strength Flux Remover

796-4280. 10-7517. 12 Avdp Oz. ..... **EACH 4.18**
796-4285. 10-7521. 18 Avdp Oz. ..... **EACH 5.86**

Cements

Service Cement

Quick drying and waterproof clear cement. Use on porous or semi-porous materials such as metals, plastics, etc.
796-4320. 10-302. Btl. 2 Fl. Oz. ..... **EACH 2.07**
796-4325. 10-304. Btl. 4 Fl. Oz. ..... **EACH 2.85**

Rubber to Metal Cement

Bonds synthetic rubber, metal, wood, and plastic. Drys quickly and produces a lasting bond.
796-4330. 10-352. 2 Fl. Oz. ..... **EACH 2.20**

GC Bond

Thermoplastic cement. Produces a waterproof, resilient, and long-lasting flexible bond on metals and glass. Dries 15 to 30 minutes.
796-3640. 10-4302. 2 FL. Oz. ..... **EACH 2.58**

Type 10-347 Epoxy Glue. Specified by N.A.S.A. for use in its space program. Super grip, fast set. A drop holds tons. 2 oz. (57gms.) tubes of resin and hardener.
796-2098 ..... **EACH 8.50**

Type 10-4002 Acrylic Cement. Specially formulated to mend acrylic materials such as lucite and plexiglass. Forms an inseparable, usually invisible joint. 2 oz. (57gms.) bottle.
796-2060 ..... **EACH 2.02**

Adhesives

5-Minute Epoxy Cement

Clear, fast-curing two-part Epoxy. Handle in 8-12 minutes.
796-4290. 10-114. 2 Fl. Oz. Tubes. ..... **EACH 3.00**

Permabond 910

Methyl Cyanoacrylate. Bonds in seconds, metals, porcelain, plastics, glass, rubber, hardwood and other non-porous materials.
796-4295. 10-128. 1 Fl. Oz. ..... **EACH 12.80**

Gelweld

Gel Cyanoacrylate Adhesive
Alpha Cyanoacrylate super strength adhesive in a "gel" form-will not drip or run. Fills gaps well.
796-4217. 10-117. .101 Fl. Oz. Tube ..... **EACH 2.57**

GR-R-RIP

World famous alpha cyanoacrylate rapid bonding adhesive. Bond strength not affected by temperatures from -112°F to +212°F (-80°C to +100°C).
796-4219. 10-115. .075 Fl. Oz. Tube ..... **EACH 2.57**

Silicone Rubber Adhesive Sealant

Excellent elastomer cures to a tough rubbery solid. Resists weathering, vibration and exposure to oil, moisture, ozone and temperatures from sub-zero to 450°F. Cures in 20 minutes.
796-4305. 10-150. 3 Fl. Oz. Tube Clear ..... **EACH 4.22**

Permabond

Up to two tons holding power in seconds. Ready to use — no mixing, no clamping, no mess.
796-2010. Type 10-120. .105 oz. (3 gms.) tube ..... **EACH 2.57**
796-2012. Type 10-122. 1/3 oz. (9.4 gms.) ..... **EACH 6.20**
796-2013. Type 10-123. 1 oz. (28 gms.) ..... **EACH 11.32**

Type 10-324 Plastic Cement. Perfect for all plastics; acetates, butyrates, vinyls, phenolics. 2 oz. (57 gms.).
796-3630 ..... **EACH 2.20**

Type 10-140 Perma-Loc Wicking Adhesive. For controlled bonding of metal parts. Prevents loosening of screws, nuts, and bolts. Wicks down into assembled parts. Easy to use, no mixing, no mess. Sets in seconds. 1/5 oz.
796-2014 ..... **EACH 3.23**

Coatings

Q-Dope

Polystyrene, fast-drying. Leaves a clear protective coating.
796-4335. 10-3702. 2 Fl. Oz. Btl. ..... **EACH 2.02**
796-4340. 10-3704. 4 Fl. Oz. Btl. ..... **EACH 2.38**

Corona Dope

Quick-drying black lacquer of cellulosic resin. Excellent dielectric, arc and corona resisting properties and protects against moisture, atmospheric effects.
796-4345. 10-4702. 2 Fl. Oz. Btl. ..... **EACH 2.58**

Red X Corona Dope

Thixotropic polyester base red enamel. Excellent adhesion. Is oil and waterproof. Insulation of high voltage components especially in high humidity areas.
796-2068. 10-5002. 2 Fl. Oz. ..... **EACH 2.48**
796-3645. 10-5012. 12 3/4 Avdp Oz. ..... **EACH 5.66**

Red Glpt. Insulating Varnish

Alkyd based resistant to environmental extremes, including oils, water, acids and alkalis. Retains high dielectric strength even if wet.
796-3670. 10-9002. 2 Fl. Oz. ..... **EACH 2.72**

Printed Circuit Soldering Chemicals.

Type 22-201 Silver Print. Draw or repair printed circuits. Made of pure silver. Air drying. 1/2 troy oz. bottle.
796-2035 ..... **EACH 24.50**

Type 10-8665 Koloid-Clear Acrylic Plastic. Acrylic, ester resin base. 15 oz. (422gms.) aerosol.
796-8665 ..... **EACH 4.22**

All GC Aerosols, except as noted, contains no ecology-damaging Fluorocarbons.

Contact/Tuner Cleaners

Jif Action

General purpose silicone contact cleaner. Will not oxidize. Long lasting. Safe on any material including plastics. AEROSOL.
796-8670. 10-634. 6 Avdp Oz.....**EACH 2.18**

Spra-Kleen

Blend of solvents to eliminate noise caused by deposits of dust, dirt and corrosion. Cleans and lubricates. AEROSOL.
796-8666. 10-8666. 6 Avdp Oz.....**EACH 2.60**
796-8676. 10-8666-16 16 Avdp Oz.....**EACH 4.90**

Tuner Bath

A non-residue cleaner/degreaser. Eliminates dust, grime and foreign matter from tuners. Safe for all materials including plastics. Will not detune. AEROSOL.
796-4350. 10-901. 16 Avdp Oz.....**EACH 5.60**
796-4355. 10-903. 24 Avdp Oz.....**EACH 6.70**

Dry-Kleen

Excellent degreaser and solvent. For grease, dirt, ink and other contaminants.
796-8669. 10-8669. 16 Avdp Oz.....**EACH 4.50**

7

Type 10-8682 Relay-Kleen. Cleans relays, contacts, and other electronic devices. Excellent degreaser, general solvent for gummy deposits on all electrical gear. 6 oz. (170gms). AEROSOL.
796-8682.....**EACH 3.42**
796-8683. 10-8682-16. 16 oz.(450gms.). AEROSOL .**EACH 5.60**

Lubricants

Type 10-2302 Lubriplate. Grease type super lubricant reduces friction loss, prevents rust and corrosion. 1¾ oz. (50gms) tube.
796-2040.....**EACH 2.37**

Type 10-700 Formula 70. Formulated to penetrate rust and "free" frozen parts. Hundreds of applications. 16 oz. (450gms.). AEROSOL.
796-3605.....**EACH 3.30**

Thinners

Polystyrene Q-Dope Thinner. Thins polystyrene base dopes and cements.
796-4360. 10-4104. 4 Fl. Oz. Btl.....**EACH 2.07**

Cooling Sprays

Zero Mist Ckt Cooler

Longer cooling time (20-30 seconds) for use on heavy insulation penetration. Cools to -40°C(-40°F). AEROSOL.
796-8667. 10-8667. 16 Avdp Oz.....**EACH 3.90**

Extra Dry Super Freeze Mist

Extended cool time (20-30 seconds). For heavy insulation components. Non-toxic, odor free. Leaves no residue. Cools -60°C(76°F). Formulation 100% refrigerant 12. With 3-way flow valve. AEROSOL.
796-3610. 10-702. 15 Avdp Oz.....**EACH 3.90**

Type 10-8668 Super Freeze Mist. Cools circuits instantly. Pinpoints bad capacitors, transistors, oxidized joints. Non-toxic, non-flammable. Leaves no liquid residue. 6 oz. (170gms.). AEROSOL.
796-8668.....**EACH 2.44**

Cleaning Compounds

Chloro-Kleen

Dry cleaner. Leaves no residue. Harmless to all metals and most plastics. Also acts as a degreaser.
796-3680. 10-2136. 16 Fl. Oz.....**EACH 4.33**
796-4365. 10-2139. 1 Gal.....**EACH 19.22**

Clean Sweep

Compressed air. Removes dirt, dust, and grit that normally cannot be reached. Non-toxic, odor-free, leaves no residue. With 3-way flow valve. AEROSOL.
796-4370. 10-165. 15 Avdp Oz.....**EACH 5.50**

Freon TF Solvent

Fast-drying pure solvent. Removes dirt and oxide in seconds even when equipment is operating. Cleans plastics, elastomers film without damage. Excellent dielectric properties and resistance to electrical currents. AEROSOL.
796-3600. 10-620. 16 Avdp Oz.....**EACH 6.18**

Special Chemicals

EMI-RFI Shield

An extremely conductive graphite coating. Adheres to glass, plastics for protecting circuitry from external interference or containing low level signals.
796-4375. 10-4807. 12 Avdp Oz.....**EACH 5.10**

Silicone Heat Sink Compound

Zinc oxide filled silicone grease with heat transfer properties. Does not soften under elevated temperatures. Will not dry and harden.
796-8109. 10-8109. 1 Fl. Oz. Tube .....**EACH 5.62**

Silicone Compound

Soft inert Silicone Grease with excellent dielectric properties. Also lubricant for rubber and plastics.
796-8101. 10-8101. 1 Fl. Oz. Tube .....**EACH 5.80**

Type 44 Heat Sink Compound

Non-contaminating Synthetic-Ester based, capable of moving 46% more heat than other compounds. Passed Western Electric Std. KS-21343 and exceeds MIL performance Spec. MIL-C-47009.
796-4390. 10-8118. ½ Fl. Oz.....**EACH 5.62**
796-4395. 10-8120. 1 Fl. Oz.....**EACH 9.25**
796-4400. 10-8126. 1 Pound Jar.....**EACH 45.28**

Strip X

Enamel stripping compound. Removes enamel Formar, Formex and similiar wire insulations. Bottle.
796-3620. 10-2602. 2 FL. Oz. .....**EACH 5.62**

Type 22-270 Solder Flux Remover and Cleaner. Convenient, fast and easy to use. Removes all types of organic flux. Use within one hour of soldering. Simply spray and wash from top to bottom. 16 Avdp oz.(453.5gms.). AEROSOL.
796-2037.....**EACH 5.60**

Type 10-1207 Soldering Paste. Fast acting fluxing base for PC work. Non-corrosive. 1½ oz.(42gms.) can.
796-1207.....**EACH 2.20**

Non-Aerosol Cleaner

Isopropyl Alcohol (Annhydrous)

This extremely pure alcohol is frequently the recommended cleaner by manufacturers of tape heads, disc drives, etc. Does an excellent job of dissolving and removing oxides from recording heads, also an excellent degreaser. This pure alcohol contains no water, usually a problem with alcohols, and leaves no residue. This is not an aerosol, but an aerosol-style can with a snap top. Suggested for use with swabs, clean cloth, or by immersion.
796-1507. 10-1507. One Pint (16 fl. oz.) .....**EACH 2.95**

1,1,1 Trichloroethane

This is one of the more powerful cleaners/de-greasers available. Much stronger than CFCs. Removes most greases, even tar and waxes.
A good cleaner for controls, switch contacts, motors, etc. Dries quickly. Leaves no residue. A good PCB cleaner, too.
This cleaner will attack some plastics (specifically polystyrene, polycarbonate and acrylics) and will craze, even warp, them. 1,1,1, trichlorethane is non-flammable and is not a contributor to problems with the earth's ozone layer.
796-1517. 10-1517. 16 fl. oz. can. (NON AEROSOL)..**EACH 4.00**
796-0624. 10-0624. 22 oz. (AEROSOL).....**EACH 5.70**

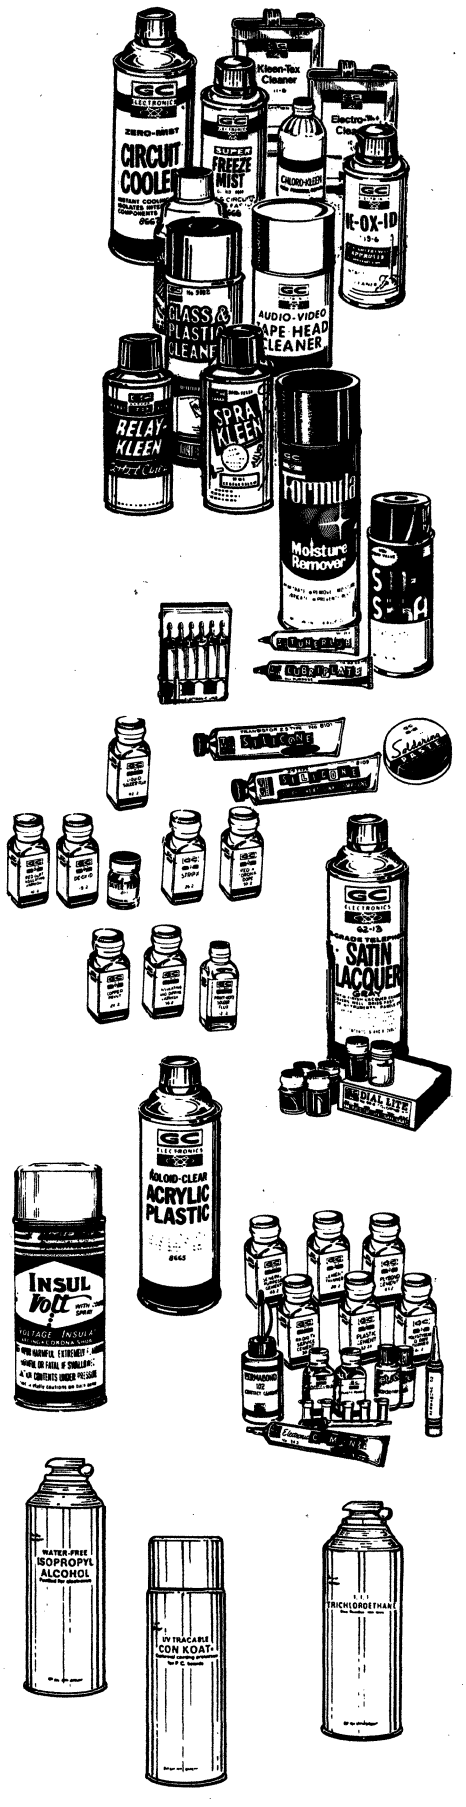
Conkoat® - Conformal Coating

UV Traceable

This is a tough, clear coating for the protection of PC boards and components; prevents exposure to moisture, contaminents in air, etc. UV Tracer permits easy visual inspection; any non-coated area will not fluoresce under UV light and strands out very noticeably.

Features
- **Superior moisture resistance.**
- **Meets the rigid MIL-I-46058C specification.**
- **Excellent adhesion, even to Teflon.**
- **Transparent.**
- **Silicon resin base, excellent dielectric properties.**
- **Tack free 2-3 hours, full cure - 24 hours (may be heated to accelerate: 20-30 min. at 125 C. degrees).**

796-8657. 10-8657 .....**EACH 13.14**



Anti-Static Products

Zero Charge Guardian Static Dissipative Treatment

Durable static-dissipative treatment for any surface. No carbon or metal fillers, non-sluffing, non-corrosive, ammonia-free. Will not fade, yellow, or shrivel paper or corrugated fiber. Use on cardboard storage or shipping boxes, paper, carpet, draperies, foam, clothing, smocks, packing material, plastic, glass, and metal.
Formula 1734: Spray, wipe, or dip on porous surfaces.
Formula 1736: Wipe or dip on hard surfaces for effective coverage.

1686 Zero Charge Anti-Stat

Zero Charge Anti-Stat is a Chloride-Free Industrial Grade topical Anti-Stat with no free amines. The extremely low surface tension provides excellent wetting to eliminate hot spots or voids. Safe on plastics. Will not attract dust or particulate contamination. Designed for use on any area or material where static buildup causes problems. **Meets or exceeds:** MIL-B-81705B and NFPA 56A.

907-1686. 1686-1Q.* 1 Qt. W/Sprayer .....EACH 8.98

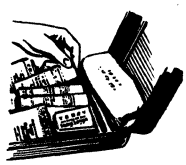
1687 Zero Charge Anti Static Screen and Keyboard Cleaner

For optical clarity and distortion free reading. Removes grease, dust, salts, grime, inks, finger prints, nicotine, syrups, soot and carbon paper residue. Safe on ceramics, plastic, glass, metal and elastomers. Use with Zero Charge Anti Static Techclean Swabs to clean hard to reach areas.

907-1687. 1687-1Q. 1 Qt.....EACH 6.24
907-2687. 1687-P. 100 Packet Box.....EACH 14.46

1708 Techclean Computer Care Kit



A selection of Tech Spray Computer Care Products in sizes suitable for the home computer or small office. Products included for removal of grease, finger prints, soot, carbon paper residue, nicotine, syrups, inks, salts, dust, printer debris, grime, disk oxide deposits. Also products included for control of static charge on equipment, personnel, flooring and peripheral areas. Packaged in handy form-fit carrying case that fits easily into a desk drawer.

907-1708. 1708. Kit.....EACH 29.35

1653 ETC

An anti-static cleaner for computer enclosures, plastic, glass and metal. Effectively removes dirt, nicotine, grease, oil, inks, dust, finger prints and grime. Non-Streaking, Non-Abrasive, Non-Flammable, Non-Scratching.

907-1653. 1653-16S. 14 oz. Aerosol .....EACH 5.41

1733 Zero Charge Anti-Static Mat and Table Top Cleaner

Anti-static, non-abrasive cleaner for general use in all areas. Leaves no film, non-streaking, non-flammable and non-scratching. Contains no alkali or ammonia. Will not leave a soap scum or hard water buildup that can cause an insulation barrier on static-sensitive areas. Can be used in conjunction with Techclean Wipers (No. 1705) or standard paper towels.

907-1733. 1733-1Q. 1 Qt.....EACH 7.06
907-2733. 1733-1G. 1 Gal.....EACH 21.16

1702 Zero Charge Anti-Static Hand Lotion

Specifically formulated to dissipate static charge from operators' hands and helps to eliminate electrostatic discharge on electronic components and equipment. Formulated with Aloe Vera for a deep, penetrating, soothing action. Contains no silicone or lanolin. Non-greasy, non-sticky odorless and fast absorbing.

907-1702. 1702-1G. 1 Gal.....EACH 33.20

1685 Zero Charge Anti Static Swabs

Zero charge anti static industrial grade swabs, 100% lint free, non abrasive, highly absorbent, highly resistant to chemicals and non-contaminating. May be used with or without solvents in order to remove dirt, grime, oxide deposits, dust and other soft debris. Especially useful for hard to reach areas like computer keyboards.

907-1685. 1685-50. 50 Swabs .....EACH 8.77

Solvents/Cleaners (Ozone Friendly)

1732 Flux Stripper WB

A synthetic water based cleaner which when added to water makes a non-foaming solution that easily removes flux residue. Contains no inorganic bases or phosphates and is non-aggressive toward copper. Biodegradable. In diluted form can be used with reactive metals. Contains a non-silicone anti-foam agent which is effective on the rosin soap produced in deionized water.

907-1732. 1732-1G. 1 Gal. .....EACH 16.83

1688 Flux Stripper W

Removes water soluble fluxes without removing protective coatings. Safe on most plastics.

Wondermasks (Liquid Temp. Solder Mask)

1715 Wondermask™ P

Peelable temp. solder mask for any wave solder system. Non-contaminating. Excellent resistance to polar and non-polar solvent systems. Can be used as a spot mask, mask prior to conformal coating, or as a protective storage or shipping shield. Self-leveling; quick film formation. Non-ammoniated.

1697 Wondermask W

A temporary protective water soluble masking agent. Easily and completely removed in normal hot water washing cycle. Leaves NO residue. Non Flammable — Non Corrosive — Non Contaminating — Non Dripping.

1694 Wondermask S

A temporary protective solvent soluble masking agent. For masking isolated or connected holes. Resists etch plating during gold finger fabrication and protects gold fingers after final testing prior to shipping. Formulated with OPTI/SCAN™ Easily removed by Freon® /alcohol, 1-1-1 Trichloroethane or during normal defluxing.

Wondermask S and W also available in tape and dots.

1703 Silicone Free Heat Sink Compound

Features exceptionally low bleed and evaporation characteristics. Will not harden, dry out, or melt; will not contaminate wave solder baths. Meets or exceeds KS 21343 and MIL-C-47113. Use with both metal and plastic.

907-0190. 1703-2. 2 oz. tube ..... **EACH 6.22**

1714 Fine-L-Kote Remover

For quick, easy removal of cured solder masks and conformal coatings. Removes acrylic, urethane, silicone, enamel, and lacquer resins, and some epoxy coatings. Contains an corrosion inhibitor. Self-leveling, skins easily. Non-corrosive; non-flammable; non-caustic; non-acidic. Biodegradable.

Adhesives

1602 Plyobond Cement

All purpose cement. Bonds anything to anything. When cemented, joint is tough, waterproof, and resistant to most chemicals. **Cements:** steel, glass, plastics, and rubber. Thin with Acetone. Brush in Bottle.
907-1602. 1602-2. 2 Fl. oz. Bottle ..... **EACH 2.86**

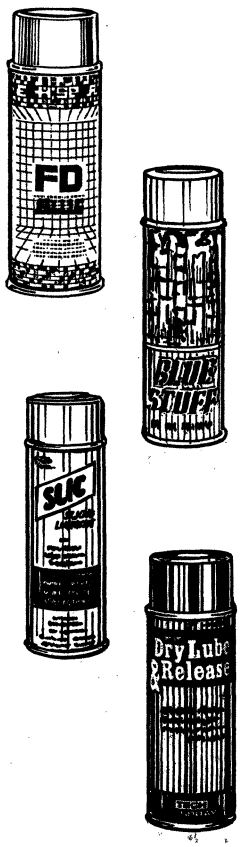
1601 Service Cement

Repairs speaker cones. Won't shrink and remains flexible. Cements plastics, cloth, metal, and wood. Thin with Acetone. Brush in bottle.
907-1601. 1601-2. 2 FL. oz. Bottle .... **EACH 2.86**

900 Tech Hold

General purpose cyanoacrylate adhesive. Bonds metals, rubber, ceramic, plastic, glass, wood, fabric, vinyl, cardboard, leather, Delrin® High strength, fast bonding.
907-0900. 900-3. 3 Gms. Bottle ..... **EACH 1.35**

Lubricants/Penetrants



1637 FD Plus

This blend of fluorinated solvents and electronic grade silicone cleans efficiently and deposits a thin molecular film that will not evaporate. Protects against moisture and corrosion. Meets or exceeds MIL-C-83360 USAF Cleaning and Lubricating Compound. Electrical Contact Cleaning Type 1. Non-flammable; safe on all plastics. Neutral, inert and safe for use in all environments and altitudes.
907-0175. 1637-16S. 14 oz. Aerosol... **EACH 8.21**

1639 Blue Stuff®

The finest tuner care product available. Its unique formula makes it the superior long-term protective material for tuner contacts. Cleans — Polishes — Lubricates if other portions or the tuner are dirty, flush with Blue Shower before applying Blue Stuff. It continues to clean and polish for months after it is applied.
907-1639. 1639-8S. 8 oz. Aerosol..... **EACH 8.21**

1646 Slic™

Excellent general purpose electronic grade silicone lubricant specifically formulated to Lubricate, Protect, and Waterproof rubber parts and electrical connections. Non-Sticky — Non-Flammable. USDA Accepted Product.
907-1646. 1646-8S. 8 oz. Aerosol..... **EACH 5.50**
907-2646. 1646-16S. 16 oz. Aerosol... **EACH 8.49**

1671 Dry Lube and Mold Release

Chemically inert universal dry lubricant and release agent, providing superior lubrication on all types of surfaces metal-glass-fabrics-rubber-plastics-wood-paper. Effective from −50°F to +500°F. Non-staining, non-corrosive, non-flammable, colorless, non-oily, non-contaminating, repels water, oil, and dirt. Meets or exceeds: MIL-L-60326 (MU)
907-1671. 1671-16S. 14 oz. Aerosol... **EACH 9.41**

1661 Zap It Light

Protects and lubricates metals, inhibits rust, stops corrosion and penetrates and loosens frozen parts. Harmless to rubber, paint, plastics, and fabrics. Resistant to salt spray, acid fumes, sulphur dioxide, and hydrogen chloride. Lubricates without attracting dust. Remove with any solvent or degreaser.
907-1661. 1661-7S. 7 oz. Aerosol ..... **EACH 4.23**
907-2661. 1661-16S. 16 oz. Aerosol ..... **EACH 6.20**

1662 Zap It Heavy

Protects and lubricates metals, inhibits and displaces water. Harmless to rubber, paint, plastics, and fabrics. Provides two-year protection against salt spray, acid fumes, suphur dioxide, and hydrogen chloride. Remove with any solvent or degreaser.
907-1662. 1662-16S. 16 oz. Aerosol ..... **EACH 6.25**

Chicago Miniature Brand

Wide variety of miniature and subminiature incandescent lamps for such applications as aircraft, annunciators, appliances, automotive, bicycles, coin machines, flashlights, marine, medical equipment, indicators, signs and house numbers, radio and TV, telephone, toys and novelties. These lamps offer extra-long life, reliability, low cost, high light output for the amount of current consumed. Low operating cost.

For Price And Availability On Larger Quantities Or Parts Not Listed, Contact The Allied Electronics Facility Nearest You.

B-3½

Single contact miniature flange. Approximately 7/16″ (11.1 mm) diameter.

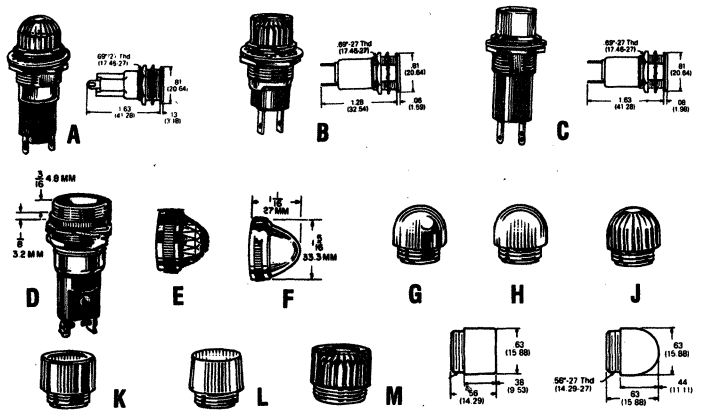
Indicators



U.L. and CSA recognized. Five choices of lenses. **5200-222** and **5100-822** accept T-2½ to T-3¼ miniature bayonet lamps from 2V to 120V. **5200-232** and **5100-832** contain a 22K resistor and use a B2A lamp for ¼W, 125V operation. **5200-242** and **5100-842** contain a 100K resistor and use a B1A lamp for ¼W, 125V or a B2A lamp for 250V operation. **5201-492** uses a T-2 short slide base pilot lamp for 6V-120V operation. Lamps not included. Lens figures K, L, N, Q, R, and S are transparent and are available in amber, clear, green and red. Figures M and N are translucent and are available in yellow, green, red and white. Green lenses are not recommended for use with neon lamps. **Series 5200** indicators mount in a .688″ hole.

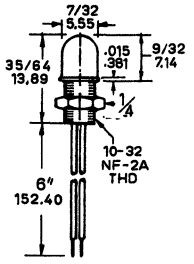
† High efficiency * @10 mA



Solid State "Astrolites"

Mounts in .193" diameter hole. .344" max. panel thickness. Chrome-plated bezel, nickel-plated nut. **Maximum DC current:** 50 mA. **Forward Voltage at 20 mA:** 1.7 VDC, red: 2.3 VDC, green and yellow. **Reverse Voltage:** 3.0 V, red; 5.0 V, green and yellow. Two 6" wire leads of #26 AWG insulated stranded copper, stripped and tinned. .250".

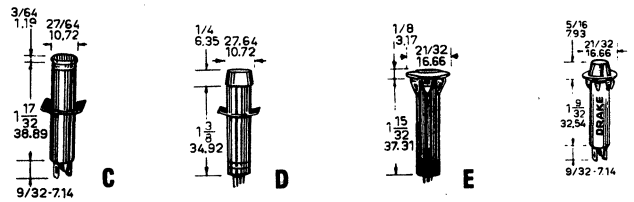
Neon "Glo-Lites"



"Glo-Lites." One-piece nylon body with built-in lens, high-brightness C2A neon lamp and resistor. Type 6063 mounts in .375" hole; type 6073 mounts in .500" hole. Two black, #22 AWG, 10" leads. Translucent nylon lens. **Lens Color:** red, white or yellow.

550 Series Circuit Board Indicators

- **►T-1¾, right angle LEDs are set in black plastic housings for consistent PC board spacing and high contrast background.**
- **► Standard LED colors include Hi brite red, yellow, green, and Standard red, yellow, and green.**
- **► 80° viewing angle.**
- **► Long life.**
- **► Solid state reliability.**
- **► Direct replacement for Dialight 550 series.**

The wide selection of miniature incandescent lamps fill the requirements of today's electronic design engineers. The lamps described are designed for applications where space is at a premium and where low power consumption and long life are rigid requirements. Four basic criteria govern the operating characteristics of miniature incandescent lamps. Voltage, Current, Luminous Intensity, and Life. Power consumption in relation to envelope size and environmental consideration are important and data relating to these perimeters are listed for ease in selecting the correct lamp. All lamps are identified by an industry standard number which indicates all physical and electrical characteristics including bulb type, design voltage, current, M.S.C.P., and rated life. Aging and selection for special tolerances and colored lamps are available on "Special Order" only. For additional lamp offerings or data, call your nearest Allied Sales Office at 1-800-433-5700. Sold in boxes of 10 only.

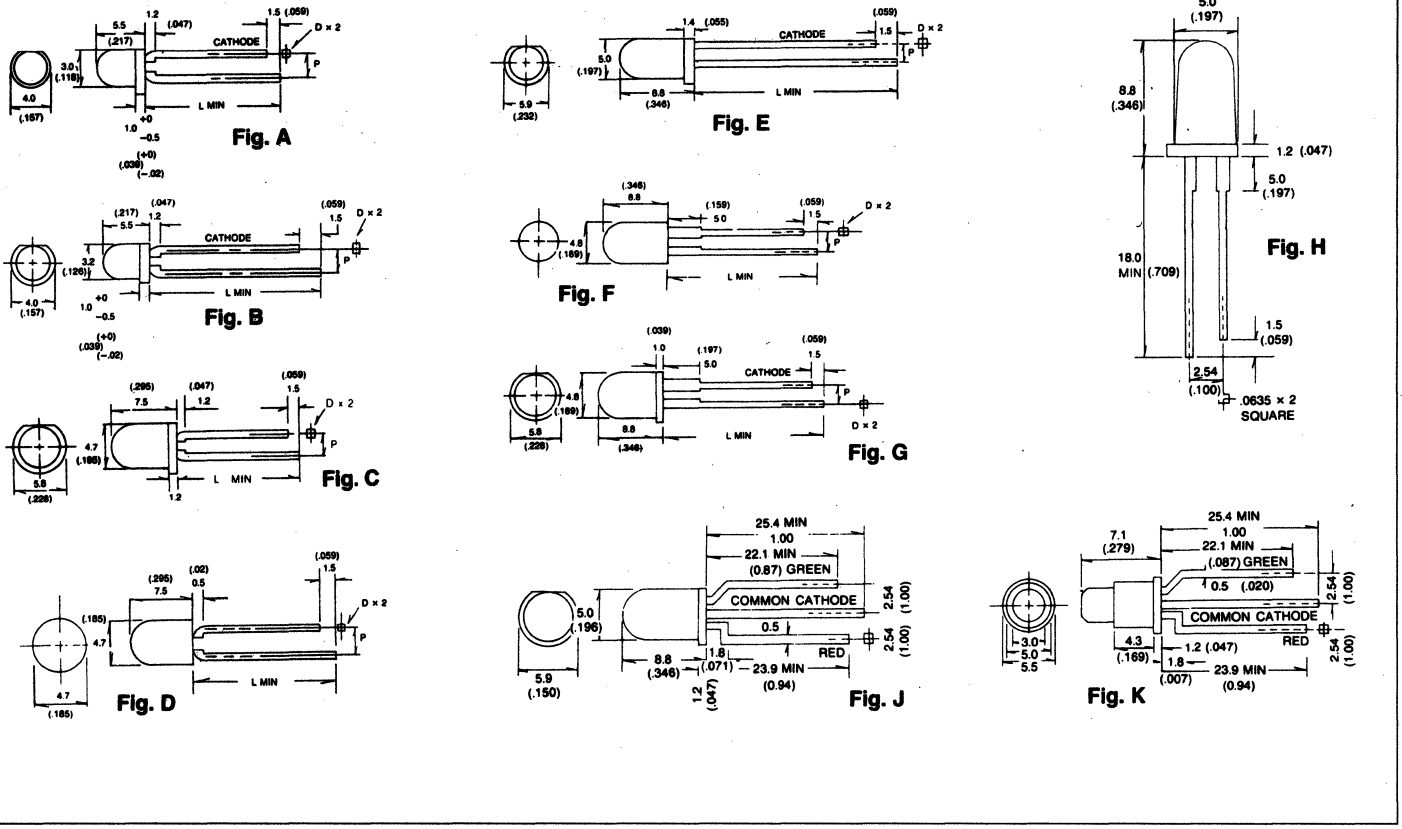
8



The low cost, variety and quality makes this device suitable for many applications such as indicators, panel illumination, logic status, binary data display and more. Colors are available in red, hi-red, green, yellow, orange, and multi-color. Styles in shapes of dome (low, high and medium profile), rectangular, square, cylindrical, pin point, convex and arrays. Call your nearest Allied facility for additional availability and data.

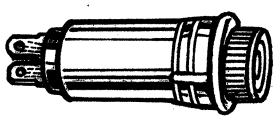
32 Series

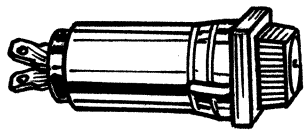
Specifications and Features

The 32 Series Snaplite indicator features a wide variety of lens shapes, colors and bezel variations. A white nylon housing is standard. Other colors are available on special order. The unit quickly snap fits into a .500″ (12.70 - 12.95mm) mounting hole. Adapter for .514″ - .519″ (13.05 - 13.18mm) mounting hole is available.

Snaplites are supplied with or without chrome bezels. Square lenses are always supplied with bezels.

The series is supplied with wire leads or .187″ (4.76mm) brass tab terminals. Dropping resistors for 125-250 volt neon and special incandescent lamps are built in. Standard wires 6″ long, stripped 1/2″.





1/2W, 125 V
1/3W, 250 V

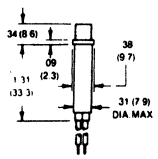
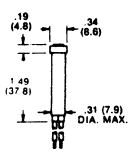
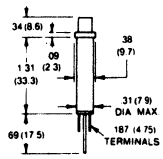
Glo-Dot Miniature Neon Pilot Lights Series 2150, 2110



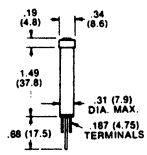
Series 2150A



Series 2110A



Series 2150QA



Series 2110QA

These miniature neon pilot lights are engineered for long service reliability. Rugged, unaffected by shock and vibration. Two lens shapes, flush and high-hat which are available in five colors: red, amber, white, clear and green. Green indicator incorporated G2B lamp and resistor. Mounting hole is .31″ minimum diameter. 4.4″/4.8″ wire leads, stripped 1/2″. **Average Operating Life:** 10,000 hours. UL recognized and CSA approved. 120 VAC. Supplied with push-on speed nut (SN1287). .187″ long tinned brass terminals.

Tiny-Mite Indicator Light Assemblies

Ordering Information: The complete assembly consists of socket plus lens plus lamp. All sold separately. **Mounting:** Model 4610 (without thread) supplied with push-on speednut — can be keyed to prevent rotation. **Lens:** Polycarbonate. **Bezel:** Polished stainless steel. **Socket:** Black nylon. Model 4611 (threaded) supplied with zinc finish hex nut and internal tooth lock washer.

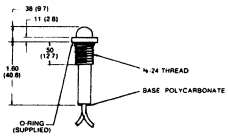
† With 4.4/4.8″ long wire leads, stripped .43/.57″. ‡ With .250″ tinned brass terminals. Speed nuts supplied.



Oil-Tight Series 6000

- **Fully gasketed construction**
- **Meets NEMA Specification ICS1-110.60**
- **Neon Models come with Built-In Current Limiting Resistor. LED Models Come With Built-In Current Limiting Resistor and a Rectifier Diode**
- **Solid State Models come with Built-In Current Limiting Resistor and Rectifier Diode.**

Mounting: Supplied with internal tooth lockwasher and hex nut; requires .38″ (9.65) min. dia. hole **Wire Leads:** No. 22 AWG (105°C), 4.4/4.8″ (11.8/121.9) long, stripped .43/.57″ (10.9/14.5) **Lens:** Polycarbonate; **Bezel:** Chrome Plated Brass; **Gaskets:** Buna-N; **Housing:** Black Nylon

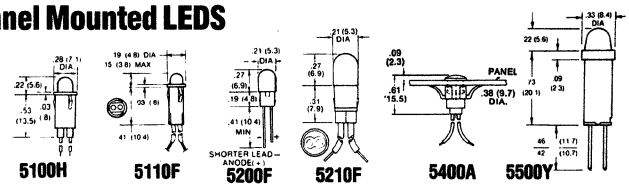
Engineer's Kit Model EK-3

You get 28 LEDs and LED assemblies. Twenty-one styles, three colors. Plain LEDs including Super-Brite and Extra Super-Brite, panel-mounted LEDs, P.C. board-mounted LEDs, complete assemblies including current-limiting resistors and rectifier diodes.
In addition 9 sockets and relampable incandescent lamp assemblies, and 13 incandescent and neon non-relampable assemblies. In all over a dozen styles, seven colors, five voltages, and five mounting hole sizes. Wire leads and terminal types.
679-7002. Model EK-3 ..... **EACH 25.00**

Panel Mounted LEDS



Series 5100H 1/4″ Diameter

Black nylon housing will snap-fit in .249/.254″ diameter hole in panels .031/.062″ thick. Leads are 24 AWG, 4.4/4.8″ long.

Stock No.	Lens Color	Equivalent to Dialight Part	EACH

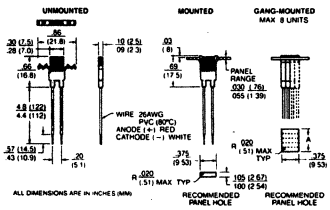
679-7182	Yellow	—	2.07	1.86	1.66

Panel Mount LED Assemblies Series 5220R



- **Ideal for Flush Mounted Panel Indicators**
- **Stackable for Bar Graph Configurations**
- **High Intensity Light Output Spread Uniformly Over Entire Front Surface**

Mounting: Will snap-fit into a .375 (9.53) by .100/.105 (2.54/2.67) rectangular hole in panels .030/.055 (.76/1.39) thick. **Wire Leads:** No. 26 AWG, 4.4/4.8 (111.8/121.9) long stripped .43/.57 (10.9/14.5). **Anode (+):** Red lead. **Housing:** Black Nylon.

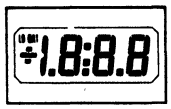
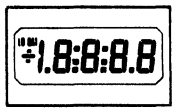
Liquid Crystal Displays

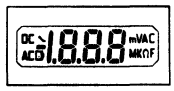
- Ultra-low Power Requirements
- High Contrast Ratio
- Long Life
- Easy Application
- Wide Viewing Angle
- Fast Response Time (30mms @ 25°C)
- Wide Temperature Range (–30°C to +85°C)
- CMOS Compatible
- High Stability Polarizers



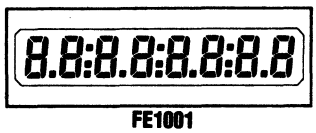
FE203



FE206



FE801



FE1001

Field Effect LCDs. Feature state-of-the-art construction and performance characteristics. Connector pins are phonsphor bronze, permanently affixed on both sides of display with conductive epoxy. This ensures contact and provides an excellent resistance to bending, warping, and lifting. High resistance to moisture penetration. Reflective aluminum foil pinned configuration, wide temperature liquid crystal material (–30°C to +85°C). High temperature/high humidity polarizer.

Other models available. Contact the Allied facility nearest you at 1-800-433-5700.

Parameter	Wide Temperature
Applied Voltage	10 V RMS
DC Drive Component	50 mV
Operating Temperature	–30°C to +85°C
Storage Temperature	–40°C to +85°C
Operating Frequency	+30 to +100 Hz

Standard Light Dependent Resistors

A Cadmium Sulfo-Selenide material with a peak spectral response of 615nm with 50% response at 550 and 725nm. This material combines the low resistance of a CdSe with the temperature stability of a CdS material. Well suited for low light level use or with a visible LED light source.

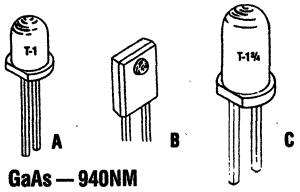
High-Power Infrared Emitting Diodes



This series of Infrared emitting diodes (REDs) consists of two standard chips in packages which provide a broad range of mountings, lens, and power output options. Both end and side radiating cases, as well as narrow and wide-angle emitters, are part of the series. All these IRED devices use high-efficiency GaAs or GaAlAs liquid phase epitaxial chips mounted P side down for highest output. This process produces chips with over ten times the power of chips made by the diffusion process.

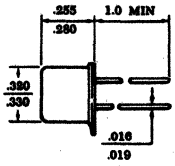
TO-5 LED/Vactrol



These devices combine a solid-state light source (a lighting emitting diode LED) with a photoresistor to provide I/O isolation. These devices have four-lead TO-5 hermetically-sealed cases; all elements are isolated from the cases. Can be operated in the ON/OFF mode or in proportional control circuits with a wide range of resistance control. The life of these devices is virtually unlimited when operated within their respective ratings. The VTL2C1 are best for photochoppers; the VTL2C2 have high stability and low temperature coefficient; the VTL2C3 have good stability and fast response; the VTL2C4 are low in resistance and fast light adapting.

LED Axial-Lead Vactrols

Combine a solid-state light source (LED) with a photoresistor to provide input-output isolation. Sealed in an axial plastic package. Use for photochoppers, linear isolators, SCR and Triac firing, logic circuit inputs, noiseless switching, proportional control circuits. External Current Limiting Resistor Required.

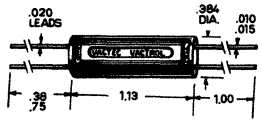
Axial Vactrols



These low-cost Vactrols provide a broad range of input lamps, both neon and incandescent. Various photoconductors are available as output elements. Together they provide a broad range of transfer characteristics and all are of axial construction; this construction provides high input/output voltage isolation. Typical applications for these couplers, are SCR and Triac turn-on, for telephone interconnect circuits, for noiseless audio switches, remote low voltage control, and automatic gain control. Both neon and incandescent models have 0.020" leads on the photocell end; neon models have 0.015" and incandescent models have 0.010" leads on the lamp end.

VTB Blue Enhanced Ultra High Dark Resistance

This series of P on N silicon diodes is primarily intended for use in the photovoltaic mode but may be used with a small reverse bias. The diodes have excellent response in the UV region and units with UV transmitting windows are characterized at 200 nm. All diodes have very high shunt resistance to provide very low offset in high gain transimpedance connected op-amp circuits.

VTP Fast Response High Dark Resistance

This series of P on N silicon diodes is primarily intended for use with reverse bias but may be used in the photovoltaic mode. These diodes have excellent response in the IR region and are well matched to IR LEDs. Due to the low capacitance, these devices may be used with high load resistance and still have a fast response time. The low dark current under bias minimize DC offsets in transimpedance connected op-amp circuits.

VTS-2 Low Capacitance Large Area Photodiode

This series of P on N large area silicon diodes is intended for use in the photovoltaic mode but may be used with a small reverse bias. They have excellent response in the infrared region and are well matched to IR LEDs. The low capacitance of these units permits fast response time when high load resistances are required. These cells have moderate shunt resistance which provides low offset gain in transimpedance op-amp circuits.

General Purpose Vactrol

This general purpose vactrol combines incandescent lamps in a low cost aluminum case with .040 inch diameter tin plated pins. It may be operated in the ON-OFF mode or in proportional control circuits with a wide range of control. Applications include photochoppers, DC isolators, noiseless switching, automatic gain controls, audio limiting and comparison SCR and TRIAC firing, audio effects and computer interfacing. Maximum cell power of 200 mW. 500 volt isolation. Lamp voltage is 6.0 volts at 40 MA. Photocell resistance in "ON" position—30 ohms typically when dark adapted; 60 ohms maximum when light adapted. "OFF" position—10^7 ohms; photocell response of 50 mSec. Ascent typically with 350 mSec. Decay to 100 K. Cell voltage 100 V max.

980-0822. Model VTL9A2. ..... **EACH 5.99**

Neon Vactrol VTL110

This VACTROL optical coupler utilizes a 70 VDC breakdown neon lamp as the input element and a light dependent resistor (photoconductor) as the output. This device is particularly suited for telephone ring detectors and other high volume applications where low breakdown voltage is desirable. Neon lamp requires an external current limiting resistor, 50VAC, max.; 1.6 mA, + 65°C. Input/output isolation voltage 30000 VAC for 1 min.

980-2535. Model VTL 110. **1-99** ..... **EACH 1.99**

Slotted Photo Switch VTL10G1

This series of interrupter type optical switches combine a GaAs LED with a Light Activated Circuit in a one piece seamless IR transmitting plastic case. The IC contains all the circuitry necessary for providing on/off operation. Standard industry mounting. Light activated IC output. TTL compatible. Based on an isolated vane passing through the slot at a slow rate. Detection width depends on rate of movement and propagation delay of LED forward current. Indicated detection width must be blocked or opened for typically 25 µS to cause a state change. Interruption rates of 5-10 kHz can be achieved. Polysulfone case is opaque but IR transmitting will block light from fluorescent lights. **Supply Voltage Range:** 4.0 min. to 5.0 typ. **Supply Current:** 3.2 mA. **Forward current for output at high state:** 2 typ. to 4 max. **Low level output:** 300 mV typ. to 500 mV max. **Output Rise/Fall Time:** 200 nS. **Detection Width:** 0.09" (2.3 mm).

980-2545. Model VTL10G1. **1-99** ..... **EACH 5.29**

Slotted Photo Switch VTL10D1/2

- ► 3.2 mm (0.125 in.) slot
- ► Industry standard mounting
- ► Phototransistor output (D series)
- ► Photodarlington output (E series)
- ► Totally sealed units with or without flying leads
- ► No openings on sensing surfaces
- ► TTL compatible
- ► Apertures, 0.005, 0.010, 0.020 In
- ► Opaque housing with opening over device lens

This series of interrupter type optical switches combine a GaAs LED with a phototransistor or photdarlington in a one piece seamless IR transmitting plastic case. Debris cannot accumulate in the light path on these units. Optional models have internal apertures fitted on the detector and emitter. Printed circuit board lead spacing variations and flying leads are included in this series. A series using a totally opaque housing is available. VTL10 is sealed on upper surface only.

980-2550. Model VTL10D1 ..... **EACH 2.06**
980-2555. Model VTL10D2 ..... **EACH 2.24**

Retro Photo Switch VTR16D1

This series of reflective type optical switches combines a GaAs LED with an NPN phototransistor in a one piece sealed IR transmitting plastic case. Debris and moisture cannot degrade operation. Units are available with PC Board mounting leads, and 12 inch AWG #26 leads with or without a four position connector attached. Dark current is measured with part totally shielded from ambient light. With 2150 lux (200 fc) from a cool white fluorescent lamp perpendicular to the sensing axis will result in approximately 50 µA in the detector. Equivalent light from an incandescent lamp will result in significantly greater currents. Cross talk is measured with 20 mA of forward LED current and no reflecting surface. Cross talk is typically less than 3 µA.

980-2560. Model VTR16D1 ..... **EACH 3.42**

Retro Photo Switch VTR22D

A Retro Photo Switch normally sees no light. When an object passes within the field to view, it reflects IR light from the LED to the Detector and the reflectance of the object. The VTR22D Series consists of a GaAs LED with an NPN PHOTOTRANSISTOR mounted with each optical axis perpendicular to the face of the retro package.

Infrared emitter maximums ratings: reverse voltage—3.0V; continuous forward current—50 mA; forward drop voltage—1.6 V. **Photo detector maximum ratings:** V_{BRCEO}—30 V; V_{BRECO}—5.0 V; power dissipation—75 mW. .20 mA minimum light current. .20 µA maximum cross talk. 100 nA maximum dark current.

980-2565. Model VTR22D1 ..... **EACH 2.24**

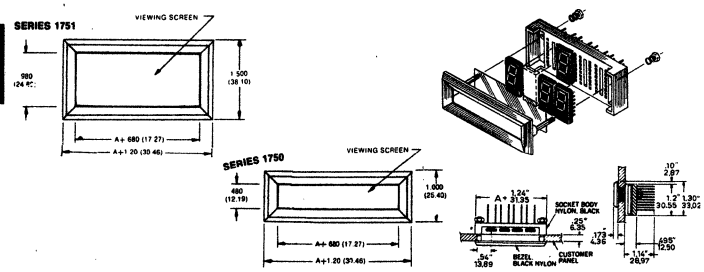
Mounting Hardware For LED Displays



Model 1750 and 1751 Mounting Hardware

For any 14-16 pin DIP package with .3" row spacing. One-piece bezel. Series 23441 bezel assembly and socket assembly combined equal Model 1751. Series 22463 bezel and socket assembly combined equal Model 1750. Any standard 14 or 16 pin LED display automatically centers itself. Eliminates individual DIP sockets but allows easy removal of individual LEDs. Assembly consists of a black nylon bezel requiring a single rectangular panel cutout, a red circularly polarized viewing screen, and a universal socket body ready for wire wrap of PCB insertion. **Oper. temperature:** 0° to +70°C. Display brightness is inversely related to oper. temp. Max. natural air convection around the display should be provided. *Last two numbers in Mfr.'s Type are decades per assembly.
Construction: Viewing screen is a circular polarized red laminated cellulose acetate butyrate plastic which reduces unwanted reflections. The laminated screen construction consists of a linear polarized and a 1/4-wave retardation plate. Bezel and socket bodies are glass-filled nylon. Socket contacts are tin plated phosphor bronze.

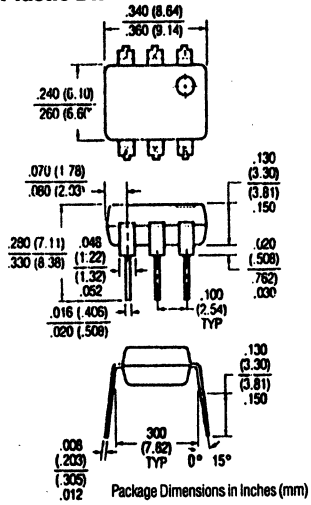
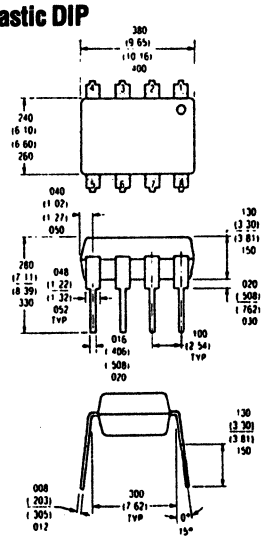
Optocouplers

6 Pin Plastic DIP



Package Dimensions in Inches (mm)

8 Pin Plastic DIP



Package Dimensions in Inches (mm)

Siemens offers couplers in single, dual, quad, and small outline surface mount packages. In addition to our true surface mount couplers, most of the standard couplers can be ordered with optional gull wing, surface mount butt lead bends. Among the couplers offered are high reliability, high voltage, and high current transfer ratio types All couplers are Underwriters Lab approved #E42744 and most VDE approved #0883.

High gain. **5** = Photodarlington output. Low cost. Industry standard Single channel 6 pin DIP. * IF = 1 mA.

Intelligent Display® Devices

Siemens introduced Intelligent Display devices in 1977. These are LED alphanumeric displays with built-in CMOS drive circuitry for easy interface with microprocessors.

Readout Tubes

Incandescent Digital Readout Tubes

Bright, low-voltage devices may be used in DC or multiplex mode. Rugged, single-plane unit construction for high reliability and 100,000 hour life. Up-front display surface for wide viewing angle, with display of free residual images. Brightness adjustable with voltage controls, zero to 7000 fl; free of induced or radiated interference. **Power Required:** 108 mW/seg. **Segment Current:** 24 mA. **Voltage:** 4.5 VDC.

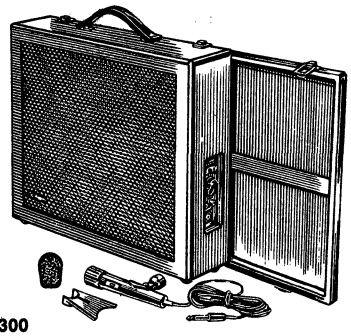
Executive III Portable Sound System

Model Number EX-300. Cabinet: Briefcase type case in textured black vinyl finish. Detachable lid opens to provide easy access to microphone storage and battery compartment. Space provided for carrying written materials and for the installation of an optional Power Pak accessory. **Speakers:** Two 6″ high efficiency speakers for full voice and music amplification. Designed to provide a controlled pattern for greater sound projection. **Microphone:** Low impedance dynamic cardioid type, includes 15 ft. cable, windscreen and stand adapter. Pick-up pattern helps reduce howl and squeal from feedback. **Power Supply:** Uses one standard 12-volt lantern battery with binding post terminals. Replacements are readily available at your local hardware store. Unit can use rechargeable battery. . .see instructions. (Battery is not included.) For 120 VAC operation a user installable Power Pak is available. (See SDP-126 accessory.) **Amplifier:** Modern solid state integrated circuitry delivers 15 watts continuous power rating. EIA Standard RS-234G. **Controls:** On/Off switch and master volume control. **Inputs:** 1 for low impedance mic., 1 for tape, radio, systems expander, etc. **Output:** 2 for recording program material (Aux and Mic. level), 1 for using systems expander. **Size:** 15″ high × 17½″ wide × 5″ deep. **Shipping Weight:** 15 lbs.



EX300

Model Number EX-300A. Same as EX-300 but with Shure high performance unidirectional dynamic cardioid microphone (Argos MDM-3). Includes microphone stand adapter.

Model MSD-1060 60-Watt Sound Column

Designed for high power areas, such as auditoriums or large convention halls. Proven quality performance where multiple horns, baffles, and ceiling speakers failed. Can be used for both voice and music in many varied applications. **Frequency Range:** 70 to 15,000 Hz. **Power Capacity:** 60 Watts RMS. **Nominal Impedance:** 16 Ohms. **Vertical Sound Projection Angle:** 30°. **Horizontal Sound Projection Angle:** 130°. **Sound Pressure Level:** 91 dB at 30′. 60 Watts. **Speakers:** Six 8″ special design. **Dimensions:** 50½″H × 10¾″W × 8¼″D (128.2 × 27.3 × 20.9 cm). **Shipping Wt.:** 52 lbs. (23.4 kg). Walnut woodgrain vinyl finish.

503-2005 ..... **EACH 192.90**

Model SD-1064 30-Watt Sound Column

Designed to provide clarity — use where acoustics or microphone placement causes feed-back or reverberations. For churches, meeting rooms, restaurants, clubs, or lobbies. Low-frequency roll-off of 6 dB per octave for minimal reverberation. **Frequency Range:** 200 to 10,000 Hz. **Power Capacity:** 30 Watts RMS. **Nominal Impedance:** 16 Ohms. **Vertical Sound Projection Angle:** 30°. **Horizontal Sound Projection Angle:** 120°. **Sound Pressure Level:** 94 dB at 30′. 30 Watts. **Speakers:** Six 5¼″ special twin cone design. **Dimensions:** 32⅞″H × 6⅝″W × 3¼″D (82.3 × 16.8 × 7.9 cm). **Shipping Wt.:** 12 lbs. (5.4kg). Wood housing finished in walnut clearguard vinyl with matching caned fiber grille.

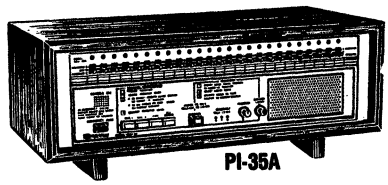
537-2015	PB-K	Designer-styled microphone boom attachment swivel for use with 5/8″dia. tubing.	12.60
537-2016	AD-16	Mounts any paging speaker onto 5/8″ or 7/8″ dia. stands.	11.05
537-3014	SS-70X	Heavy-duty, multi-purpose stand for stage monitor and loudspeaker cabinets, portable lighting, instrument and industrial. Height: 55″ to 100″. Tubing dia:1 3/8″.	114.00
537-3015	SSA-2	Bar-mount adaptor for surface mounting to speaker cabinet, control equipment, portable lighting, bar/assembly or Atlas Sound projector horns.	10.83
537-3016	SSA-4	Platform mount adaptor for surface mounting of Bose or loudspeaker cabinet or control equipment.	17.45
537-3017	SSA-5	Recessed flange-adaptor for flush-type loudspeaker cabinet mounting.	25.50

Other Styles also Available.

PI-35A and SI-35A

- ► Instant Two-Way Communication with Master Station
- ► Color Coded for Easy Operation
- ► Instant EMERGENCY / ALL ROOM Announcements
- ► Separate 35-Watt Program Channel



PI-35A

These models are handsome, executive-style units designed to serve the high-power intercom paging requirements of business, industry, school, and institutions. Both have built-in 20-Watt intercom and 35-Watt program amplifiers, enabling instant communication with any station without interrupting program distribution to others. Calls from a remote station equipped with the CA-10 Call-in switch are announced by light annunciation and tone signal. These models are enclosed in compact consoles, finished in an attractive simulated walnut veneer. **Specifications. Output:** Balanced 25 VCT line. **Power Requirements:** 120 V, 60 Hz AC; 100 W maximum.

Model PI-35A. Provides facilities for communicating with up to 25 remote locations equipped with loud speakers. Capable of distributing program material from external sources such as microphones, tuner, cassette player, or "piped in" background music sources.

MODEL SI-35A. Provides communication, paging and program distribution serving 25 to 75 remote speakers and custom flexibility in a space-saving design.

CM-805

CM-810

Administrative Intercom System

The CM-Series Administrative Intercoms are versatile intercommunication devices designed to operate as an all-master system, or as a single-master/multiple remote system. Each station in an all-master system can selectively call any other station(s). The single-master/multiple remote configuration lets the master station call any remote and any remote call the master station. All-master systems use the Model CM-805 or CM-810 master station for capacity of up to 6 or 11 stations, respectively. Each master has push-on/push-off call buttons to select a station and sound an electronic call tone. A privacy feature alerts the parties when their conversation has been joined by sounding the call tone at both stations. A single power supply (Bogen Model RF-12) is required for each installation.

Stock No.	Mfr.'s Type	Description	Dimensions	EACH
733-4100	CM-805	Master Station (6)	5.46 × 7.09 × 1.67	135.30
733-4110	CM-810	Master Station (11)	5.46 × 7.09 × 1.67	163.35
733-4120	CM-801	Remote Station	5.46 × 7.09 × 1.67	29.35

Multi-Channel Interphone/Paging System

The **TP-20CN** and **TP-30CN** are digitally controlled interphone systems with a capacity of up to 20 or 30 stations, respectively. The system features three fully private talk-paths for multiple simultaneous conversations, and all-station paging through a built-in speaker. The Bogen Model RF-24 regulated power supply provides operational voltage. One power supply is recommended for each ten interphones in the system. Interconnection of stations is through junction boxes, simplifying installation.

IH-8A

RF-12/RF-24

Selective Ring-Common Talk Interphone/Paging System

The **TP-2XP, TP-6XP** and **TP-10XP** are selective ring, common talk interphones providing two-way and conference call communication, and all-station paging in systems of 2, up to 6, or up to 10 stations, respectively. Each interphone has a push-button keypad to select and ring the desired station(s). Paging is easily defeated at any station where this feature is not desired. A two-position high/low switch is provided at each station to control the volume of page announcements and the electronic calltone. Each station has a built-in amplifier, permitting the addition of an external loudspeaker (such as the Bogen IH-8A) to any station. A single power supply (Bogen Model RF-24) is required for each installation.

C Series

The C Series are versatile, reliable, economical and among the most widely used P.A. amplifiers. Offering a choice of rated output power from 10 to 100 watts, they can operate continuously even at extreme temperatures. Thermal and electrical circuit breakers protect the amplifiers against abnormal heat build-up and short-circuited or overloaded outputs. They may be rack mounted using optional accessory brackets, RPK-50 (for C100A, C60A, C35A) or RPK-35B (for C20A, C10A). C100A, C60A, C35A mix 3 inputs; C20A, C10A mix 2 inputs; GA6A 6-watt amplifier mixes 2 inputs.

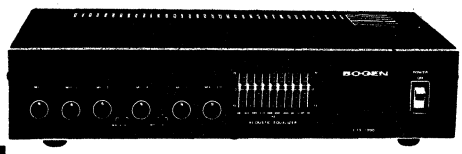
CTS Series



The Bogen Models CTS-1035, CTS-1060, and CTS-1100 are public address amplifiers designed for use in high-quality sound systems. They combine advanced solid-state design with versatile operating features and the flexibility to meet a wide range of application requirements.

Each CTS-Series amplifier mixes five input signals; either five low-impedance microphones, or a combination of microphone and auxiliary inputs. Microphone input is via screw terminal strips; standard Hi-Z phono jacks for the auxiliary inputs accept a tuner, tape/cassette player, line-matching transformer, or tone generator.Switches are used to select MIC 4/AUX 1 and/or MIC 5/AUX 2 operation. An internal jumper configuration activates a phantom power supply for condenser microphones.

Precedence circuitry is provided for the MIC/AUX channels (requires customer-supplied contract closure). The RVC-CTS accessory permits remote volume control of the master output level from distances up to 2000 feet without loss of gain or tone quality. Automatic Level Control (ALC) circuitry compensates for differing microphone techniques and assures a uniform output level. A 2/3-octave equalizer permits boosting or attenuating any of 10 selected frequencies to provide antifeedback and tone control circuit.

9

► Mix up to five inputs: microphones or a combination of microphones and auxiliary inputs.
► Built-in microphone precedence circuit
► Input-and output- matching to a telephone line, using WMT-1A accessory
► Ten frequency equalizer filters with slide controls provide antifeedback and tone control circuit
► Phantom power supply for condenser microphones
► Integral automatic level control (ALC)

Mixer/Preamplifier

Add all the microphones you need, easily and economically with Bogen's Mixer-Preamplifiers. **Model CAM** offers four microphone inputs, plus master volume control. It also has one auxiliary input with individual volume control. Its units may be interconnected for more MIC inputs. Plus it has integrated circuits, and an illuminated, calibrated VU meter. **Model CDM** provides six transformer-isolated inputs, each preceded by a switch-selectable attenuator pad to allow channels one through four to accept 0 dBm, 600 ohm line or microphone level inputs. A built-in circuit provides precedence over channel five and six, it may also be used for remote control. Also features an illuminated VU meter.

Power Amplifiers

The BPA and HTA Series are designed to fulfill power amplification requirements with high quality and reliability. Inputs are high impedance, unbalanced, convertible to low impedance, balanced or unbalanced, with optional TL600 transformer. Designed for continuous heavy-duty operation. The amplifiers are thermally protected to prevent damage due to excessive temperatures. Accessory rack panel kits permit mounting in a 19-inch equipment rack. (RPK-53, RPK-54 for BPA-60, BPA-125, respectively.)

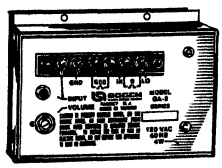
733-2330.....**EACH 37.95**

Model AH-5A. Amplified horn speaker for use outdoors or in high noise locations. 5 Watts output, operates on 24 VDC and is equipped with a volume control and mounting bracket. **Dimensions:** 8 × 8 × 9". **Weight:** 4½lbs.
733-2435.....**EACH 105.60**

9

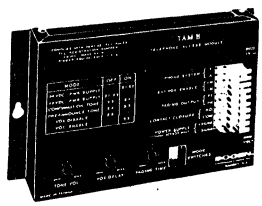
GA-2 Music-On-Hold Amplifier



Compact, reliable, 1½ Watt amplifier. Excellent for feeding "music-on-hold" to a telephone system. It has a high-impedance input that is available at both a phono jack and screw terminals. 8 Ohms or 600 Ohms output. Only 50 mV input is required for full output. **Power Consumption:** 4 W, 120 V, 60 Hz. **Dimensions:** 5½ × 4⅛ × 2¼". **Weight:** 1 lb.

733-1113. Model GA-2 .....**EACH 82.50**

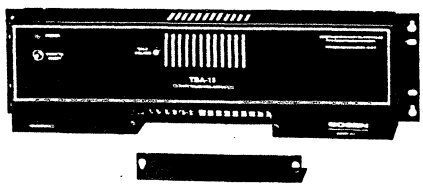
Telephone Access Module



- **Dual-mode, Station Port or Trunk Port paging access**
- **Compact, wall-mount design**
- **24- or 48-volt operation (Trunk Port model)**
- **Compatible with most standard telephone systems**
- **Calling-party-controlled disconnect**
- **Volume-adjustable preannounce or splash tones**

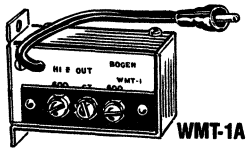
733-2281. Model TAMB .....**EACH 165.00**

TBA-15A Paging/Talkback Amplifier

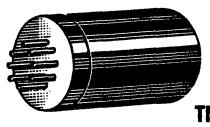


Designed for talk-back applications, the TBA-15A senses and continually switches direction of conversation from telephone to remote speakers automatically, without use of moving parts. Switching function recovery time is adjustable, ensuring intelligible flow of conversation. **Outputs:** 25 V and 70 V balanced. **Power Output:** 15 Watts. **Power Requirements:** 120 V, 60 Hz or 24 VDC @ 1.8 A, positive or negative ground. **Dimensions:** 19 × 3½ × 5⅛". **Weight:** 13 lbs.
733-2270. Model TBA-15A .....**EACH 371.25**

Microphone and Line Plug in Transformers



WMT-1A



TM-200A

WMT-1A may be used as input-matching transformer to connect telephone systems to aux. input of most Bogen public address amplifiers for telephone paging. It may also function as output-matching transformer in feeding special program material over 500/600 ohm telephone line for transmission to a local broadcast studio. May be used with any amplifier having a 25-Volt output terminal. **TM200A** will provide a low impedance microphone input for CHS-A or CT series amplifiers.
733-1107. WMT-1A .....**EACH 22.80**

FM/AM Tuners

Model TP-50A and **TP-100A** tuners offer precise tuning and superior signal quality for FM and AM mono reception, and the TP-100A offers FM-Stereo reception as well. Both incorporate excellent sensitivity, image rejection, and frequency response. Each is extremely compact, 10¼ × 7¼″ and requiring only 1¾″ of height when rack-mounted with the optional **RPK-46** panel kit. **Shpg. Wt.:** 7 lbs.

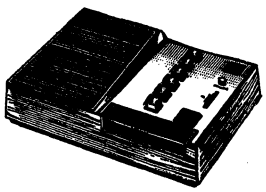
Executive and Director Intercom Systems



'Executive' Intercom Systems are 7-station systems that provide a full range of any combination of master-to-master or master-to-remotes, including paging horns. Features private or 'hands free' conversations. Over one watt power output for station-to-station calls; 4 watts of reserve power for paging. Reduces to normal wattage level automatically through talk-back power. Can accommodate cable runs of 1,000 feet or more. Quiet performance; no cross-talk. Includes a Busy Light (to indicate stations in use), Privacy Switch, Monitor Light (to indicate call or eavesdropping in non-private position (switchable option in Master), Paging,* and All Call (to call all remotes simultaneously.)** **Cable requirements.** All Master System—interconnecting cable requires one more pair of wires than total number of Master stations in the system; shielded wires not required. Intermix System (Masters and Remotes)—interconnecting cable requires one more pair of wires than total number of stations (Masters and Remotes) in system PLUS one shielded pair between each Remote and its Master.
790-4000. Executive 7 Master. 7-station capacity; 9½″ × 6¾″ × 3½″; weighs 2½ lbs ..... **EACH 149.95**
790-4002. Executive 1 Remote. single station; 6¾″ × 6¾″ × 3½″; weighs 2 lbs ..... **EACH 37.50**

'Director' Wired Intercoms for All Master or Master to Remote systems. All Master System handles up to 7 Director-7 master stations. Permits any station to communicate with any other station or group of stations in the system. Holds up to 3 simultaneous conversations at one time. Also excellent for conferences between stations. Can use a one-station selector switch to connect the masters to a PA system with PR-15B paging/talk-back relay. Master to Remote System allows one Director-7 master to connect with up to 6 Director-1 remotes. Remotes can converse only with the Master 'hands free' (conversation with other remotes not possible); can operate either private or non-private using the privacy switch . 1 watt power; stations can be up to 500 feet apart. Master features volume control on/off switch, talk/listen switch with locked position, and UL listed power supply for 110-120V AC. **Cable requirements.** One more wire than the total number of stations in system. Add one shielded wire for PR-15B.

FM Wireless Intercom Systems

- **Two Way 'Hands-Free' Voice (vox) and Manual Operation.**
- **Operates room-to-room or between houses on same AC electrical wiring. No installation is required.**
- **Any number of stations may be operated on same line.**
- **Each intercom unit is plugged into an AC outlet and uses the house or office electrical wiring as a message path.**
- **Ultra-sensitive FM circuitry with separate microphone and speaker provides dependable clarity of voice transmission.**
- **Solid state circuitry permits instant 'ON' operation assuring dependable service; no warm-up time required.**
- **All stations are equipped with 'call' button for signalling, lock buttons for continuous monitoring of baby, sickroom, etc.**
- **All modes are fully compatible with each other.**
- **Can be used on desk, table, counter or wall mounted.**
- **Cabinets are of high impact plastic with woodgrain and charcoal brown colors; 6″W × 5″D × 2″H dimensions.**

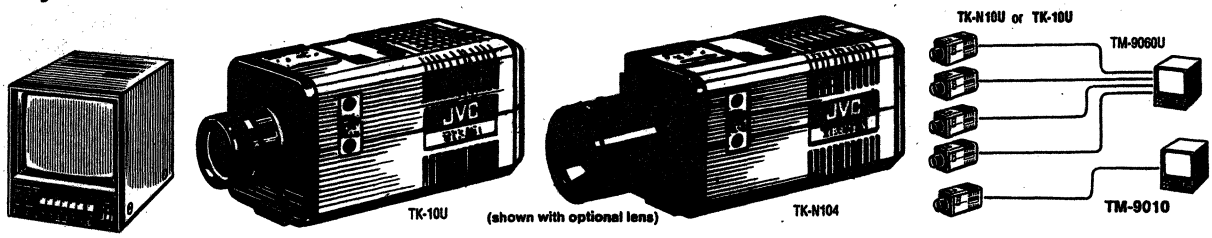
JVC CCTV System



- **Designed for connection of up to six cameras (TK-10 or TK-S1304)**
- **Built-in CCUs for camera operation control**
- **Motion detector circuit for Camera-1 input whose video sensor position marker has variable size (1/30 to 1/3 of screen) and position (H and V)**
- **Electronic buzzer with variable volume**
- **Camera power ON/OFF switches are provided**
- **Camera-1 signal direct output for connection of another monitor**
- **Terminals for video recorder recording/playback**
- **Auto-manual scanning with variable duration (0.5 sec to 30 sec)**
- **Standby function which works when a picture is required only when motion detector circuit or external alarm circuit is activated**
- **Selected video output terminal for all cameras**
- **Alarm input/output terminal**
- **External timer input terminal**
- **Timer output terminal.**

JVC TK-885U Color Camera

- **1/2″ CCD with a 330-line resolution**
- **High sensitivity and high S/N ratio**
- **1/1200-second high-speed electronic shutter**
- **TTL auto white balance adjustment**

A high-resolution CCD camera designed for use where limited space is a major factor.

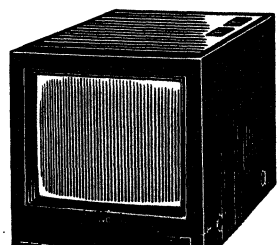
JVC TM-9U, 9-Inch and TM13U, 13-Inch Color Video Monitors



- **Medium-high resolution CRT reproduces a remarkably high-quality picture.**
- **A set of audio (RCA) and video (BNC) terminals make bridge connections possible.**
- **A round speaker is provided.**
- **Sleek, space-saving design with scaled-down dimensions unique to color monitors of this caliber.**
- **Two TM-9U units can be mounted in the optional EIA-standard double-unit rack (RK-9U). It can also mount one TM-9U unit together with a WFM using the optional rack adapter (ADP-9U).**
- **Metal cabinet minimizes interference.**

JVC's **TM-9U** or **TM-13U** is a space-saving color video monitor with a 9-inch or 13-inch, medium high resolution CRT that delivers the best picture reproduction in its class. It's designed to handle a whole range of applications in the industrial, commercial and communication fields. Including that of an editing monitor when used in combination with a second unit. **Type:** Color video monitor. **Color system:** NTSC system. **CRT:** TM-9U — 9-inch (diagonally measured); TM-13U — 13-inch medium-high resolution CRT. **Power Requirement:** AC 120V, 60 Hz. **Audio Output:** TM-9U — 1W; TM-13U — 1.2 W. **Speaker:** TM-9U — 3 1/8″ (8 cm) round × 1; TM-13U — 4″ (10 cm) × 1. **External input terminal:** Video (BNC) — 1.0 Vp-p, 75 ohms; Audio (RCA) — 390 mVrms (– 6 dBs), high impedance. **Bridge output terminal:** Video (BNC) — 1.0 Vp-p, 75 ohms; Audio (RCA) — 390 mVrms (– 6 dBs), high impedance (termination switch is provided). **TM-9U exterior dimensions:** Width — 8 4/5″ (22.3 cm), Depth — 13 1/2″ (34.3 cm), Height — 8 15/16″ (22.7 cm). **TM-13U exterior dimensions:** Width — 14 3/4″, Depth — 16 1/8″, Height — 14 3/8″. **Weight:** TM-9U — 17.6 lbs (8.0 Kg); TM-13U — 24.7 lbs.

Minilert Model MCP320B2 Electronic Audible Signal

► **Extremely Low Power Consumption in Comparison to Electromagnetic Buzzers**
► **Contact-Free Design Insures Long Life and No Electrical Noise Problems**
► **Compact Design, Yet Produces High Sound Pressure with Minimum Voltage**

The Minilert Model MCP320B2 is a high-performance, low-cost piezoelectric audible signal comprising an audio transducer and all the driving electronics contained in a small attractive package. This unit is designed to be mounted on the printed circuit board. Applications include fire alarms, smoke detectors, intrusion systems, call buzzers, car alarm systems, clocks, and cash registers. **Specifications. Resonant Frequency (KHz):** 2.5 ±0.5 KHz. **Sound Pressure (dB/40 in.):** 70 db Min. @ 12 VDC. **Rated Voltage (VDC) @ 25°C:** 3 to 20 VDC. **Current (mA):** 10 mA Max. **Operating Temperature:** – 20 to 60°C. **Storage Temperature:** – 25 to 70°C.

Sonalert® Solid-State Audible Warning Device

Emits penetrating signal at min. current. Solid-state circuit—no arcing—no RF noise, no mechanical wear, lowest failure rate with max. efficiency. Compact, lightweight, versatile—consumes less current than normal indicator light. Ideal for use as safety device. Alerts to mechanical malfunctions in cars, communications, computers, fire signals, medical electronics, etc. Sonalert signals may be powered by many electrical sources ranging from single cell batteries to industrial power lines. Little electrical power is required making them ideally suitable for portable battery operated equipment. This low power feature allows the Sonalert signal to be turned on or off with a low power transistor, SCR, or integrated circuit. Completely solid state with no moving parts, no arcing, and no mechanical wear, the Mallory Sonalert signals should give you many years of trouble-free service. **Temp. range:** – 20°C to + 65°C. Self-extinguishing black nylon case, 1.687″ dia. (lgth. in table). **Weight:** 8 oz.

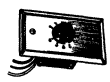
Wall Mount Autotransformer Attenuators

QC-10



QC-45

The Quam wall mount autotransformer controls the output level of a single or group of loudspeakers totaling wattage shown without the high power dissipation of resistive devices. QC-10 offers 10 steps of attenuation. QC-45 has 14 steps plus an 'off' position. Units feature silver-plated switch contact, brushed stainless wall plates.

100-Watt Amplifier with Anti-Feedback Control

- ► Features 1/4" Mike Jacks and XLR-Type Connectors for Using "Pro" Mikes
- ► Power Meter Monitors Output Level
- ► In/Out Jacks for Equalizer and Reverb
- ► Monitor Overall Mix from Headphones
- ► Mix Bus Jack for Stacking Extra Amps
- ► Spring-Loaded Speaker Terminals
- ► Convenient Cord Storage Posts

Model MPA-90. The performance, portability and power you want in a professional PA amplifier! Perfect for large, spacious auditoriums— great for live bands. Four hi/lo impedance mike inputs, each with aux input and Glide-Path® level controls. Two magnetic phono inputs let you mix and fade two turntables. Anti-feedback control eliminates speaker squeals and howls. Master volume control with memory ring, lighted power meter, LED clipping indicator. Overload protected. Metal Case. U.L. listed. **Specifications. Frequency Response:** 30-20,000 Hz. **Power:** 100 watts rms at 4 ohms. **Outputs:** Mix bus, EQ in/out, quick-connect terminals, two 1/4" jacks for 4 to 16-ohm speakers, 1/4" headphone jack. **Power Requirement:** 120VAC, 60 Hz, 200W. **Size:** 4 3/8 × 12 1/2 × 10 1/2".
910-2120. Type 32-2024 ..... **EACH 199.95**

35-Watt PA Power AMP with Built-In EQ

- ► Remote Priority Override for Easy Paging in Businesses and Warehouses
- ► Three-Band Graphic EQ
- ► Built-In Mixer

Realistic MPA-40. Superb performance at low cost! Three Glide-Path faders control inputs for two mikes and phono/aux. Built-in equalizer for tailoring sound to room acoustics and reducing feedback. Priority terminals permit Channel-1 to override all other channels, really handy for interrupting music for paging or emergencies. Built-in preamp for magnetic cartridge phono. Features master volume control with 'memory ring' for marking desired level, LED power 'on' indicator and ventilated metal case. UL listed AC. **Specifications. Frequency Response:** 70-15,000 Hz + 1/ – 3 dB. **Power:** 35 watts rms at 8 ohms. **Outputs:** 4, 8, 16 ohms; 70 V line; terminals for adding optional SPST switch for remote priority switching. **Power Requirement:** 120VAC, 60 Hz, 120 W. **Size:** 4 1/2 × 10 1/2 × 7 1/2".

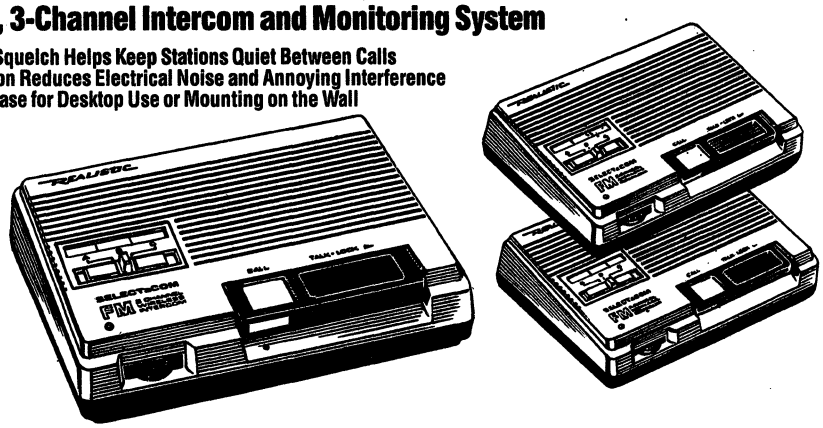
3-Station, 3-Channel Intercom and Monitoring System

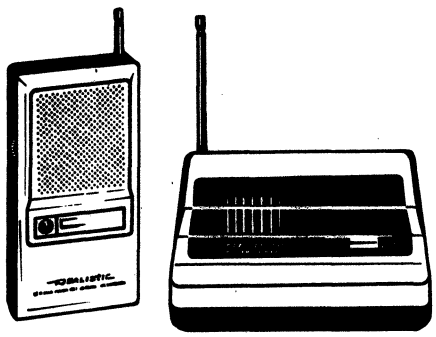
- **Automatic Squelch Helps Keep Stations Quiet Between Calls**
- **FM Operation Reduces Electrical Noise and Annoying Interference**
- **Universal Base for Desktop Use or Mounting on the Wall**



Model 43-218. Plug 'n talk FM wireless intercoms. Three station intercom system for room-to-room communication or continuous monitoring. Enjoy hands-free conversation in the home or office—from kitchen to bedroom, or office to boardroom—wherever you desire. Each station has three channels to select from—talk to one station without disturbing the third. Has call-tone button to signal other stations. Automatic squelch helps to keep the stations quiet between calls. No extra wiring necessary; simply plug into AC outlet at desired locations. The FM operation reduces electrical noise and annoying interference. Each station comes equipped with volume control, locking talk-bar, channel selector, and power-on LED indicator. Designed for desktop use or mounting on the wall. **Dimensions:** $1^{5}/_{8} \times 5^{13}/_{16} \times 4^{1}/_{8}$". U.L. listed. 120VAC.

910-0187. Model 43-218 ..... **3-Station Set/99.95**

Portable FM Cordless Room Monitor



Battery-powered receiver clips to your belt or pocket, or save battery power and use the U.L. listed AC adapter included. Switchable 2-channel operation helps eliminate noise and interference. **Transmitter:** $2 \times 5^{1}/_{4} \times 4^{3}/_{8}$". **Receiver:** $5 \times 2^{1}/_{2} \times 1^{1}/_{8}$"; requires 9V battery for portable operation.

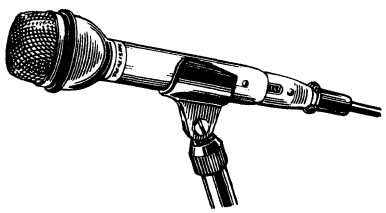
Microphones and Accessories

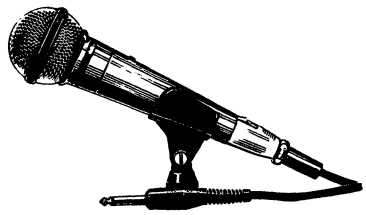


Super Omni Dynamic Mike

Model 33-1070. Wide 40-17,000 Hz ± 3dB response mike is perfect for music recordings or hand-held vocals. Rugged all-metal body with built-in windscreen. Rubber shock ring, XLR-type connector, low impedance (500 ohms) balanced or unbalanced. 16.4" cable with 1/4" phone plug. Includes carry case and stand adapter.

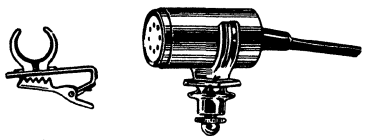
910-0021 ..... **EACH 44.95**

Highball Dynamic Mike



Model 33-984. Rugged, high-performance mike has 80-15,000 Hz response with emphasis on "presence" for clean, articulate, natural sound. Ball windscreen minimizes breath "pops" and rubber anti-shock ring withstands rough handling. Unidirectional pattern helps control unwanted sounds and feedback. On/Off switch. High (10K) and low (600 ohm) impedances with balanced low Z capability. With XLR-type connector, 16' heavy-duty cable, and stand adapter.

910-0017 ..... **EACH 57.95**

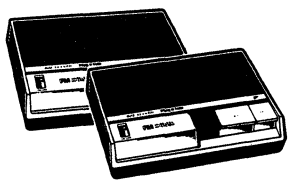


Electret Omnidirectional Tie-Pin Microphone

Model 33-1063. Professional ultra-mini size is ideal for uses when your hands must remain free. Clips to necktie, and the omnidirectional pickup pattern lets you turn your head without loss of audio pickup. Great for TV, interviews, stage work. Wide 30-12,000 Hz frequency response. Impedance, 600 ohms. With 10-foot cord. 1/4" phone plug, mini-plug adapter, battery. **Size:** $^{9}/_{16} \times 1^{1}/_{2}$". 1 lb.

910-8053 ..... **EACH 27.95**

Wireless 2-Station FM Intercom System



Just plug them into AC and talk. Press lighted Talk-bar to speak or lock for hands-free monitoring.

910-0012. 43-212 ..... **PAIR 69.95**

Chassis Mount Socket and Mike Plug

Chassis Mount Socket

Type 274-002. Mates with 4-pin plug.

910-2070 ..... **EACH1.29**

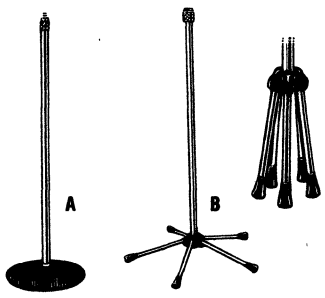
PZM Microphone

- **Eliminates "Echo" Effects Caused by Reflected Sound**
- **Dramatically Increases Clarity and Range**

Radio Shack's Pressure Zone Mike reacts to sound in much the same way as the human ear. Just put the PZM where you hear the best sound and you'll capture it! Provides superior coverage in large rooms and on stages. 20 to 18,000 Hz. 600 ohms. On/standby/off switch lets you go from "standby" to "on" without producing a "pop". Electret element is mounted on a metal plate, $5^{1}/_{2} \times 4^{7}/_{8}$". Includes 18 ft. cord with 1/4" plug. Requires "AA" battery.

910-2119. Model 33-1090 ..... **EACH 49.95**



Portable Folding and Cast-Base Mike Stands

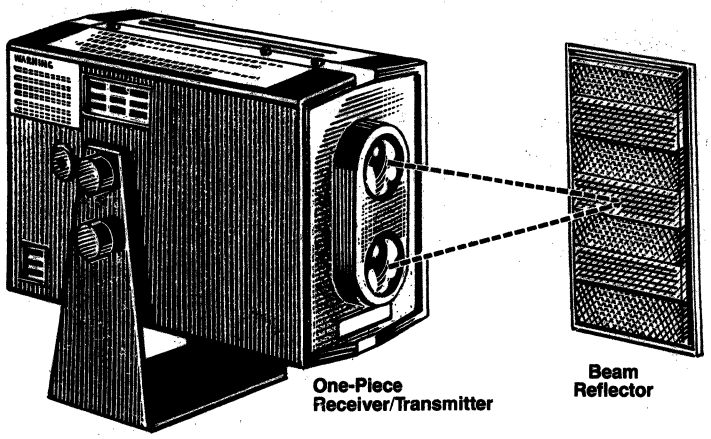
A. Type 33-320. Heavy-duty chromed tube adjusts quickly from 34" to 64". Low-profile black cast-iron base has protective rubber feet. Standard $^{5}/_{8}$"-27 thread.

910-2117 ..... **EACH 19.95**

B. Type 33-325. Ideal for portable PA or recording mikes. Positive action clutch adjusts instantly from 32" to 57". Folding legs with protective rubber feet. Standard $^{5}/_{8}$"-27 thread.

910-2118 ..... **EACH 21.95**

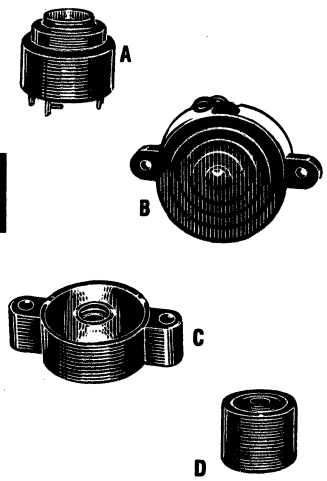
Announcer with Invisible Infrared Pulse Beam



Works as an Announcing System for People Entering a Given Area — Activates Built-in Buzzer When Beam is Broken

Round-the-clock protection at a low price! Shoots a beam of invisible infrared light across a space of up to 50 feet to the reflector, which bounces back. When the beam is interrupted, the alarm is triggered. Alarm can be set to sound momentarily, continuously with manual reset, or sound for ten seconds after beam is broken, then reset. Features LED test alignment indicator and built-in buzzer plus output for connection of optional 12VDC bell or siren. 4 1/8 × 3 × 7 1/4". With adjustable mounting bracket. U.L. listed AC operation.
910-2110. Model 49-307 ..... **EACH 69.95**

Efficient Piezo Buzzers and Elements

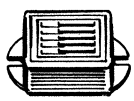


A. Pulsing/Continuous Piezo Buzzer. Great for alarm systems, vehicle backup alerts. May be panel mounted. Three screwdriver terminals, one is common positive. Negative terminals select mode. Approx. 2800 Hz pulsed at 1.2 Hz. **Output:** 90 dB at 12VDC. 4 to 28VDC, only 10mA at 12VDC. Fits 11/16" diameter hole. With threaded mounting ring.
910-2105. Type 273-068 ..... **EACH 7.95**
B. Pulsing Piezo Buzzer. Approx. 2800 Hz. 95 dB. 3 to 28VDC: 12mA at 12 volts. Mounting hole centers 1 15/16" apart.
910-2104. Type 273-066 ..... **EACH 3.99**
C. Pulsing Piezo Buzzer With Leads. Piercing 3.6 kHz signal. 4 to 38VDC. 5mA at 12V. Mounting hole centers 1 3/4" apart.
910-2101. Type 273-060 ..... **EACH 3.29**
D. PC Board-Mount Piezo Buzzer. 3 to 20 VDC. 11/16 × 15/16" dia.
910-2103. Type 273-065 ..... **EACH 2.49**
Fixed-Frequency Piezo Element. Three-wire type. Up to 90 dB at 6.5 kHz. Requires external driver circuit. 1 1/8" mounting centers. With data.
910-2102. Type 273-064 ..... **EACH 1.79**

Buzzers

DC Buzzer in Metal Case

Type 273-051. Low current—ideal for battery circuits. 1 1/2" dia. by 1 3/8". With leads. 12VDC.
910-5245 ..... **EACH 2.19**



Mini DC Buzzers

Small enough to hide, loud enough to demand attention! 1 1/16" mounting centers. With leads.

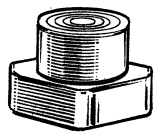
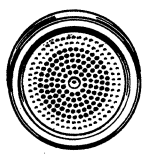
Mini Pulsing Buzzer



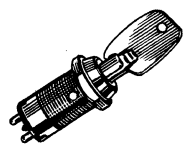
Type 273-058. Extra-loud 80 dB output with 2 Hz pulse rate. Requires 12VDC at 20mA. **Mounting holes:** 1 1/4" apart. 4 3/4" leads.
910-2107 ..... **EACH 3.49**

Two-Sound Indoor Siren

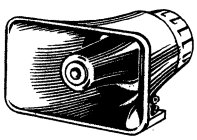


Type 49-490. Super loud steady or rise-fall sound. Ceiling or wall mount. 12VDC, 1/2 amp.
910-2109 ..... **EACH 14.95**

High-Security Round Lock Switch

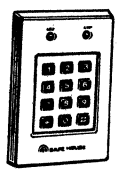


Type 49-511. Key removes in 'on' or 'off'. Two keys.
910-2111 ..... **EACH 9.95**
Type 49-523. As above, but momentary contact.
910-2112 ..... **EACH 9.95**



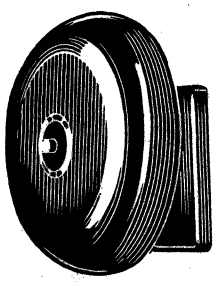
Hi-Power Two-Sound Siren

Type 49-525. Loud rise-fall or steady sound. 1A at 6 to 12VDC. Adjustable base. Weatherproof.
910-2108 ..... **EACH 41.95**



Digital Key Switch

Type 49-535. Secret code arms or disarms system. Red and green LEDs show status. 10,000 combinations you can set. Use as a panic button. Requires 10-16VDC at 70mA. For use with most alarm systems, indoors only.
910-2113 ..... **EACH 22.95**

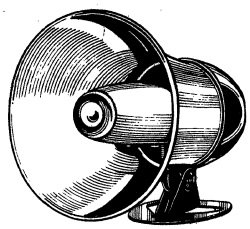


8" Underdome Alarm Bell

- **Ringing Can Be Heard for Blocks**
- **For Burgular and Fire Alarm Systems**
- **Operates on 6 Or 12 VDC**

Type 49-498. Ideal heavy-duty underdome bell has a variety of applications. Can be used in homes, schools, factories, boats, or cars. Produces a loud shrill ringing noise, which really gets attention and can be heard for blocks. Great for burglar or fire alarm systems. For 6 or 12VDC-low current drain. Weatherproof. 8" dia. mounting bracket.
910-5295 ..... **EACH 31.95**

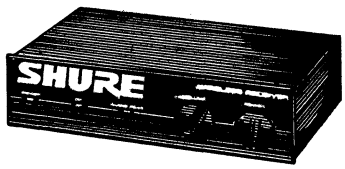
Electronic Whooper

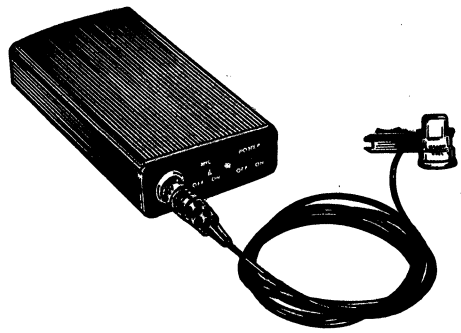


Type 49-488. Produces rousing, repetitive 'yelping' or 'whooping' sound that can be heard for blocks. Similar to that used in police and fire vehicles. Ideal for fire alerts, alarms in schools, businesses, and industrial plants. Can be used indoors and outdoors. It's weatherproof and waterproof. Perfect for boats, cars, homes. Attaches to swivel steel mtg. base. Mounting is quick and easy. Draws less than 750 mA, 12VDC low power drain. Of spun-aluminum construction. Includes hardware and screws. **Size:** 6 × 5 1/4 × 5 1/4" (152.4 × 133.3 × 133.3mm).
910-5265 ..... **EACH 19.95**

Wireless Microphone System LS 13/839

New





L1 Body-Pack Transmitter.
- ► **Extended dynamic range.**
- ► **Precise system compatibility.**
- ► **Rugged durability.**
- ► **Freedom from interference.**
- ► **Noiseless muting.**
- ► **LED status indicator.**
- ► **High power.**

L3 Non-Diversity Receiver.
- ► **Sensitive, interference-free operation.**
- ► **Noise-reduction circuitry.**
- ► **Superior ultimate quieting.**
- ► **Rack-mountable with optional kit.**
- ► **Professional antenna, removable.**

839W Condenser Microphone.

Wide-range frequency response makes it ideal for lavalier/wireless systems.
- ► **Outstanding 'natural' sound.**
- ► **Detachable from transmitter.**
- ► **Inconspicuous.**

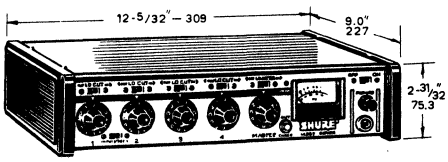
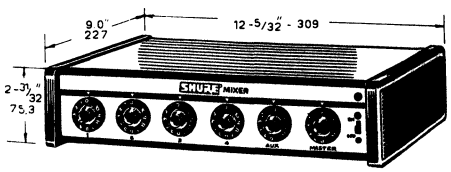
M267 Microphone Mixer



Compact, lightweight professional microphone mixer. Features include peak program limiter, simplex (phantom) power (30 VDC open-circuit 3.3 kilohms series resistance, input switches in MIC position only), built-in battery pack (uses 9V batteries), LED peak indicator, headphone level control, gold contact headphone amp/line switch, automatic muting circuit, active gain controls, electronic power supply regulation, gold contact Mic/Line switches on each XLR supply input/output, battery check function, low distortion (under 0.35% THD from 30 to 20,000 Hz at + 15 dBm output), low noise, front panel headphone jack, gold contact tone oscillator switch, transformer balanced inputs and outputs, mix bus, VU meter, low cut filters, and low RFI and line noise susceptibility. **Specifications. Frequency Response:** ± 2 dB from 30-20,000 Hz. **Operating Voltage:** 120 or 240V, 50/60 Hz, internally switchable. **Dimensions:** 2 31/32 × 12 5/32 × 9″ (75.3 × 309 × 227mm). **Weight:** 5 lbs., 2 oz. (2.3kg). UL Listed, CSA Certified.

944-4870. Model M267 ..... **EACH 475.00**

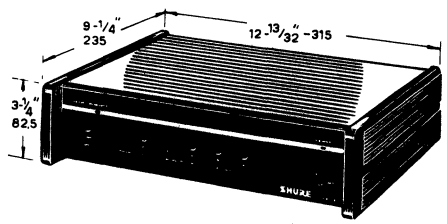
M268 Microphone Mixer



5-channel microphone mixer. Features include mix bus, simplex (phantom) power (30VDC open-circuit, 3.3 kilohms series resistance), automatic muting circuit, active gain controls, electronic power supply regulation, low distortion (under 0.2% THD from 40-20,000 Hz at 18 dBv output), wide gain and dynamic range, low hum and noise, 4 transformer coupled low impedance balanced line microphone inputs, 4 high impedance phone jack input, high level auxiliary input, individual volume controls, and master volume control. Ideal as an add-on unit to the M267 Mixer. **Operating Voltage:** 105-125V, 50/60 Hz. **Dimensions:** 2 31/32 × 12 5/32 × 9″ (75.3 × 309 × 227mm). **Weight:** 4 lbs., 2 oz. (1.9kg). UL Listed, CSA Certified.

944-4871. Model M268 ..... **EACH 257.00**

FP16 Distribution Amplifier



1-input, 6-output self-contained unit. Features include wide-range frequency response (± 2dB from 30-20,000 Hz), low noise and hum (output is -75 dBv), low distortion (under 0.40% THD from 30-20,000 HZ at + 15 dBm output), transformer-coupled input/outputs, phantom power (30VDC nominal, 3.3k series resistance) at input for condenser microphones, and link input/output jacks. All inputs/outputs are individually switchable to microphone or line level. **Operating Voltage:** AC 120 or 240 VAC, 50/60 Hz; DC 3 internal 9V batteries. **Dimensions:** 3 1/4 × 12-13/32 × 9 1/4″ (82.5 × 315 × 235mm). **Weight:** 6 lbs. 1 oz., (2.75kg).

944-4868. Model FP16 ..... **EACH 456.00**

PA Amplifier

PAT-120. Output Power: 120 Watts Music Power, 50 Watts RMS @ 5% THD. **Frequency Response:** 50-20,000 Hz. **Output Impedance:** 4, 8, 16 Ohms, 25 and 70 Volt Line. **Power Source:** 117 V AC 50/60 Hz, 220/240 V AC. **Inputs:** Mic-2, (LO-Z) 2 mV/600 Ohms, Mic-3, Mic-4 (HI-Z) 2 mV/50K Ohms, Aux-1 200 mV/100K Ohms, Aux-2 200 mV/100K Ohms. **Controls:** Mic-1, Mic-2, Mic-3, Mic-4, Volume (Master), Bass, Treble, Aux, On/Off Power. **Size:** 5½" (H) × 17" (W) × 14" (D). **Weight:** 22 lbs. **Features:** 117 V AC or 220 V AC applications, headphone jack for monitoring, fused AC line, fused output protection, inputs for microphones-tuners-phonos-tape decks-etc., very attractive silver panel with black accents, dark grey cabinet, output impedances for all applications and installations.
958-0120. PAT-120 ..... **EACH 399.95**

Wall Mount Line Alternators

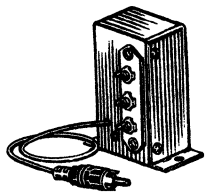
Model WAT-10. 10 Watt, 10-Step Speaker Line Alternator, Single gang plate mounting alternator for 25 V and 70 V line transformer.
958-8037. 1-24 ..... **EACH 17.45**
25-Up ..... **EACH 14.45**

Model WAT-35. 35 Watt, 10-Step Speaker Line Alternator. Dual gang plate mounting alternator for both 25 V and 70 V line transformers.
958-8038. 1-24 ..... **EACH 22.95**
25-Up ..... **EACH 18.90**

Amplified Extension Speaker

Model AES-4. Amplified Communications Speaker. An economical extension speaker with 10 Watts of amplified power. Ideal for mobile or base 2-way. ABS plastic enclosure with soft-padded grille and all-angle swivel bracket. Includes 10' cord and 3.5 mm mini plug. **Specifications. Voltage:** 12 VDC. **Input Impedance:** 4 to 80. **Wattage:** 10 W amplified.
958-8036 ..... **EACH 48.28**

TLT-1 Input Matching Transformer



Input Matching Transformer to connect telephone systems to aux. input of SPECO Public Address Amplifiers for telephone paging. It also allows you, when used with the SPECO PAFM-45, to put a "Music on Hold System" to your telephone system. Resistance ohms 500/600 (line). It can be used with any 25 volt terminal of P.A. Amplifier.
958-0010 ..... **EACH 19.95**

Ready-to-Install, Quality 8" Speakers

G810CPP 25-Watt, 10-oz. Magnet
- **Weatherproof 8"**
- **Polypropylene**
- **With 3" Tweeter**
- **Air Suspension Coaxial**

Model G8CF6W. 10 Watt Dual-Cone, Full-Range Speaker. Ideal for office music systems and paging. Ready for transformer installation (pre-drilled). **Specifications. Frequency Response:** 85-15,000 Hz. **Magnet Weight:** (ceramic) 6 oz. **Power:** 10 W max. **Voice Coil:** 1" high-temp. **Impedance:** 8 ohms. Good performance at an economical price.
958-8041. 1-19 ..... **EACH 11.95** **20-Up** ..... **EACH 9.95**

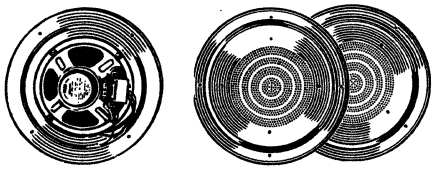
Model G810CPP. 25 Watt Weatherproof, Coaxial, Air-Suspension, High-Compliance Speaker. Superior performing polypropylene speaker for outdoor or high-humidity applications. Has 3" tweeter. Pre-drilled for easy line transformer installation. **Specifications. Frequency Response:** 50-50,000 Hz. **Magnet Weight:** (ceramic) 10 oz. **Power:** 25 W max. **Voice Coil:** 1" high-temp. **Impedance:** 8 ohms.
958-8043. 1-19 ..... **EACH 24.75** **20-Up** ..... **EACH 21.95**

Model G8CA10W. 10 Watt Air-Suspension, High-Compliance Speaker. Built to deliver continuous dependability in sound installations. **Specifications. Resonance Frequence:** 108 Hz. **Frequency:** 50-15,000 Hz. **Magnet Weight:** (ceramic) 10 oz. **Power:** 10 W max. **Voice Coil:** 1" high-temp. **Impedance:** 8 ohms.
958-1020. 1-19 ..... **EACH 15.95** **20-Up** ..... **EACH 13.95**

Model G8CA10C. 15 Watt Moaxial, 2-Way, Air-Suspension, High-Compliance Speaker. High-quality for Hi-Fi installations. Has 3" tweeter and capacitor crossover. **Specifications. Frequency Response:** 50-15,000 Hz. **Magnet Weight:** (ceramic) 10 oz. **Power:** 15W max. **Voice Coil:** 1" high-temp. **Impedance:** 8 ohms.
958-8039. 1-19 ..... **EACH 19.95** **20-Up** ..... **EACH 17.60**

Model G8CA20C. 40-Watt Coaxial, 2-Way, Air Suspension, High-Compliance Speaker. Suitable for heavy-duty Hi-Fi applications requiring superior performance. Has 3" tweeter and capacitor crossover. **Specifications. Frequency Response:** 50-18,000 Hz. **Magnet Weight:** (ceramic) 20 oz. **Power:** 40 W max. **Voice Coil:** 1" high-temp. **Impedance:** 8 ohms. A good system speaker for build-in entertainment installations.
958-8040. 1-19 ..... **EACH 26.50** **20-Up** ..... **EACH 22.95**

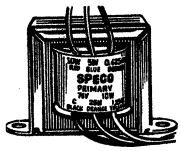
8" Speaker and 12" Speaker Grilles



Model G12W. White round metal grille. Fits within 12" ceiling tile for an attractive flush-mount speaker assembly. Fits 8" speaker. Dispersed concentric perforation pattern. All mounting hardware furnished.
958-8017. 1-9 ..... **EACH 5.75**
10-24 ..... **EACH 6.30** **25-Up** ..... **EACH 4.60**

Model G86FT70GW. 8" speaker with 70-volt watt 5-tap line transformer mounted and wired. Ready for mounting in ceiling installations using G12W white grille. Dual cone 8 ohm speaker with 6 oz. ceramic magnet. Has 70 V, 10 W transformer, 1" voice coil. 15-15,000 Hz.
958-8018. 1-9 ..... **EACH 24.60**
10-24 ..... **EACH 22.40** **25-Up** ..... **EACH 17.95**

10-Watt 70-Volt Line Transformer with Color-Coded Leads

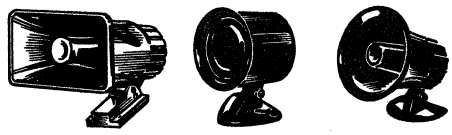


Type 17010. 10-watt primary. Taps at 10, 5, 2.5, 1.25 and .62 watts. **Secondary impedance:** 4 or 8 ohms. For driving speakers at various power levels from the same 70-volt line, simply charge the transformer taps to achieve the power level you desire. **Size:** 1.6 × 1.6 × 1.0". **Shipping weight:** 1½ lbs.
958-0013 ..... **EACH 5.75**

Deluxe Megaphone with Siren

Model ER-370. 16 Watt Megaphone/Siren. Efficient solid-state amplifier for a maximum effective range of 800'. Built-in, switch selectable electronic alarm siren. Pistol grip with trigger press-to-talk switch. Convenient volume control and shoulder strap. Durable weatherproof construction. Uses 6 "C" cell batteries (not included). **Size:** 7⅞ × 13⅞"; 3 lbs.
958-8009. 1-5 ..... **EACH 124.95**
6-Up ..... **EACH 96.50**

Alarm Sirens



SA-15RP **SA-3P** **SA-5P**

Model SA-15RP. 5 × 8", 30 Watt DC Siren. Made of weatherproof ABS plastic. Tamperproof, concealed cable. Dual tone—warbling and steady; 120 dB. Operates on 6 to 12 VDC.
958-8010. 1-5 ..... **EACH 38.50** **6-Up** ..... **EACH 34.50**

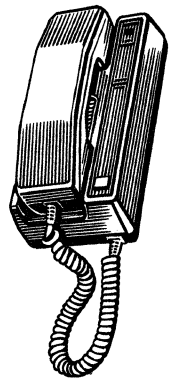
Model SA-3P. 3", 15 Watt DC Siren. Electronic Piezo type—provides warbling tone; 120 dB. Black all-weather ABS plastic. Concealed cable. Operates on 6 to 12 VDC.
958-8011. 1-5 ..... **EACH 14.95** **6-Up** ..... **EACH 12.95**

Model SA-5P. 5", 20 Watt DC Siren. Provides sharp, loud warbling tone; 115 dB. Black weatherproof ABS plastic with horn design. Operates on 6 to 12 VDC.
958-8012. 1-5 ..... **EACH 15.95** **6-Up** ..... **EACH 13.95**

Communications Extension Speaker

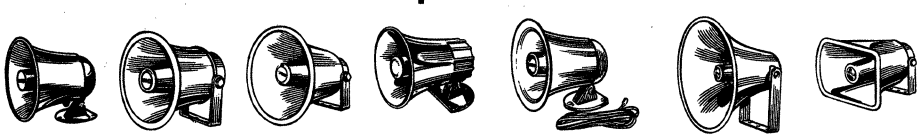
Model CBS-240. 4", 5 Watt 8 Ohms, enclosed extension voice communication speaker. Multi-angle 180° mounting bracket; 10' cord and 3.5 mm mini plug. ABS plastic enclosure.
958-7090 ..... **EACH 13.95**

FMTD Telephone Type FM Wireless Interphone



Model FMTD. FM wireless interphone with built-in paging feature. Allows full duplex-simultaneous conversation. Just plug into AC outlet. Ideal in home, office, factory, hospital, restaurant, school, store, etc. Specially designed interference rejecting circuitry reduces noise on line. "Hang-Up" style receiver/mike provides full privacy in conversation. Use on desk top or wall mounted (bracket included). Operates on 110-115 VAC, 50 to 60 Hz standard AC line. UL listed.
958-8014. 1-5 ..... **PER PAIR 99.95**
6-Up ..... **PER PAIR 85.64**

ABS Plastic and Aluminum Series Speakers



SPC-8 **SPC-10** **SPC-15** **SPC-6P** **SPC-5P** **SPC-30** **SPC-15R**

All the SPC-series aluminum and ABS plastic PA speakers are fully weatherproof and of rugged design to assure durability. All are furnished with hookup wires and mounting bracket. The SPC-10 is also available in 4 Ohms (SPC-10/4) at the same prices shown below. Frequency response and sensitivity may vary slightly with each individual speaker.

Model SPC-8. 5" Aluminum Weatherproof PA Speaker. **Specifications. Frequency Response:** 30-15,000 Hz. **Power Rating:** 12 W Nom. 15 W Max. **Sensitivity:** 105 dB/1 W/1 M. **Impedance:** 8 ohms. **Size:** 5 × 5".
958-8005. 1-5 ..... **EACH 14.95**
6-Up ..... **EACH 11.89**

Model SPC-10. 6" Aluminum Weatherproof PA Speaker. **Specifications. Frequency Response:** 250-15,000 Hz. **Power Rating:** 10 W Nom. 15 W Max. **Sensitivity:** 105 dB/1 W/1 M. **Impedance:** 8 Ohms. **Size:** 6 × 6".
958-7098. 1-5 ..... **EACH 28.95**
6-Up ..... **EACH 24.95**

Model SPC-15. 8" Aluminum Weatherproof PA Speaker. **Specifications. Frequency Response:** 200-15,000 Hz. **Power Rating:** 15 W Nom. 25 W Max. **Sensitivity:** 110 dB/1 W/1 M. **Impedance:** 8 Ohms. **Size:** 8 × 8".
958-8006. 1-5 ..... **EACH 34.95**
6-Up ..... **EACH 29.95**

Model SPC-6P. 5" White ABS Weatherproof PA Speaker. **Specifications. Frequency Response:** 300-15,000 Hz. **Power Rating:** 15 W Max. **Sensitivity:** 105 dB/1 W/1 M. **Impedance:** 8 Ohms. **Size:** 5¼ × 6".
958-8015. 1-5 ..... **EACH 13.95**
6-Up ..... **EACH 11.20**

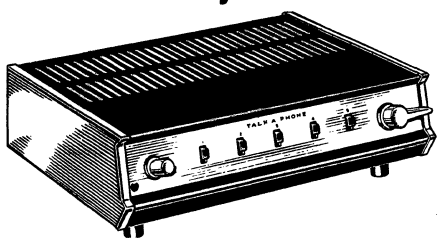
Model SPC-5P. 5" White ABS Indoor/Outdoor PA Speaker with 10' cord and mini plug and stainless steel hardware. **Specifications. Frequency Response:** 300-15,000 Hz. **Power Rating:** 8 W Nom. 12 W Max. **Sensitivity:** 105 dB/1 W/1 M. **Impedance:** 8 Ohms. **Size:** 5 × 5".
958-7097. 1-5 ..... **EACH 13.95**
6-Up ..... **EACH 11.20**

Model SPC-30. 15" Aluminum Weatherproof PA Speaker. **Specifications. Frequency Response:** 130-15,000 Hz. **Power Rating:** 40 W Nom. 75 W Max. **Sensitivity:** 120 dB/1 W/1 M. **Impedance:** 8 Ohms. **Size:** 15 × 13".
958-8007. 1-5 ..... **EACH 87.95**
6-Up ..... **EACH 68.50**

Model SPC-15R. 5 × 8" Aluminum Weatherproof PA Speaker. **Specifications. Frequency Response:** 200-15,000 Hz. **Power Rating:** 15 W Nom. 25 W Max. **Sensitivity:** 110 dB/1 W/1 M. **Impedance** 8 Ohms. **Size:** 5 × 8 × 8".
958-8008. 1-5 ..... **EACH 36.95**
6-Up ..... **EACH 28.50**

Please See Page 6 for Local Allied Facility Addresses and Phone Numbers

Deluxe Intercom Systems



All Master System. Allows several separate conversations without interference. Complete privacy. Stations can be located up to 1000′ apart. Operates on 110-120 Volts AC-DC. Instructions included. Transistorized. **Finish:** Charcoal Gray and brushed chrome. Size: 10 1/2 × 8 3/4 × 3 1/8″; 7 lbs.

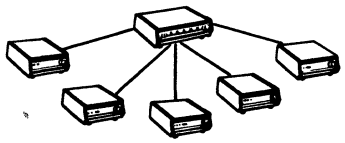
Model K-LS-5. For 5 stations.
734-1025 ..... **EACH 161.00**

Model K-LS-10. For 10 stations.
734-1030 ..... **EACH 194.00**

Hi-Volume Master. Same as the All Master System but with 10 times the volume output. 120 VAC. Can't be intermixed with other Masters.

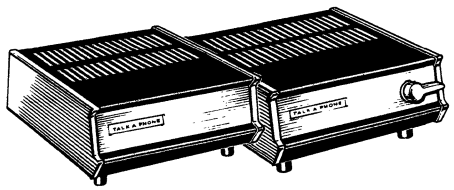
Model K-AC-505. 5 stations.
734-1075 ..... **EACH 199.00**

Interconnecting Cable



Type 5506. 6-conductor. For K-LS-5 or K-AC-505.
734-1080. Per foot ..... **EACH .21**

Type 9911. 11-conductor. For K-LS-10.
734-1085. Per foot ..... **EACH .38**



2-Station System. Master Station (10 1/2 × 8 3/4 × 3 1/8″) and substation (7 1/2 × 8 3/4 × 2 7/8″) with 50′ cable. Transistorized. For 110-120 Volts AC-DC. **Shipping Weight:** 12 lbs.

Model K-LC-2-System.
734-1035 ..... **EACH 168.50**

Type 6303. 3-conductor shielded cable.
734-1045. Per foot ..... **EACH .10**

Master Selective Station. One Master station and one to ten substations. Master plugs into electrical outlet. Transistorized. For 110-120 Volts AC-DC. Operates on 120 Volts, AC only. **Size:** Master 10 1/2 × 8 3/4 × 3 1/8″ 7 lbs; Substations 7 1/2 × 8 3/4 × 2 7/8″, 4 1/2 lbs. **NOTE:** Only one Master can be used in each system.

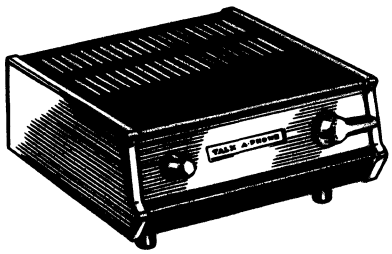
Model K-ML-5. Master for up to 5 substations.
734-1105 ..... **EACH 161.00**

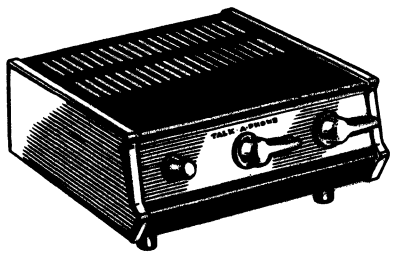
Model K-ML-10. Master for up to 10 substations.
734-1190 ..... **EACH 194.00**

Model K-LR-3M. Substation.
734-1110 ..... **EACH 56.20**

Model K-LR-3W. Substation for flush wall mounting. Hermetically sealed push-button origination switch. Indoor/Outdoor. **Wall Opening:** 4 1/8 × 6 1/2 × 2″. Stainless steel front panel measures 4 13/16 × 7 3/16″.
734-1185. ..... **EACH 67.40**

Combination Systems





For using 1 or more Masters. Substations need not originate cells. Master to Master, and Master to Sub communication, as well as Master to one or more substations. Instructions included. Transistorized. Masters operate on 110-120 Volts AC-DC electrical current. **Size:** Master—10 1/2 × 8 3/4 × 3 1/8″, 7 lbs.; Sub—7 1/2 × 8 3/4 × 2 7/8″, 5 lbs.

Model K-CL-5. Master for 5 stations.
734-1090 ..... **EACH 186.00**

Model K-CL-10. Master for 10 stations.
734-1095 ..... **EACH 229.00**

Model K-LR-2. Substation in matching finish.
734-1100 ..... **EACH 67.00**

Model K-LR-2M. Substation; ingrained baked enamel finish.
734-1050 ..... **EACH 52.50**

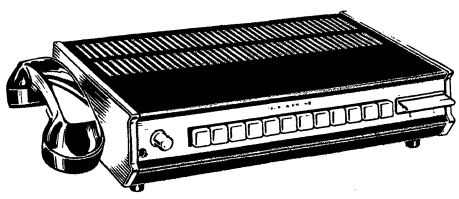
Model K-LR-2R. Substation for flush wall mounting.
734-1055 ..... **EACH 52.50**

Type 6210. 5-pair cable for K-CL-5.
734-1060. Per foot ..... **EACH .35**

Type 6226. 13-pair cable for K-CL-10.
734-1065. Per foot ..... **EACH .85**

Type 6202. 1-pair cable for substations; overall jacket. For KLR-2, KLR-2M, KLR-2R.
734-1070. Per foot ..... **EACH .09**

Chief Master Station

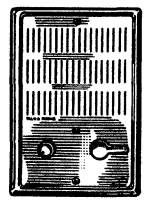


Model K-C-4906. 6 stations, full intermix of masters and remotes. Master to Master communication and to Staff stations. Staff can reply to all Masters; call one or two private Masters. No AC power needed for Staff stations. All stations can override busy signal. Masters operate on 120 VAC. Built-in power supply. **Master Size:** 14 1/2 × 3 1/8 × 8 1/2″. **Shipping Weight:** 15 lbs. UL Listed.

Model K-C-4906
734-1000 ..... **EACH 282.00**

Model K-C-4912. 12 station capacity.
734-1180 ..... **EACH 317.00**

Chief Staff Stations



Model K-C-42. Staff originates call to 2 Masters. Gray leatherette and brushed chrome. 7 1/2 × 8 3/4 × 2 7/8″; 5 lbs.
734-1010 ..... **EACH 104.00**

Model K-C-41R. Originates to 1 Master. Gray leatherette and brushed chrome. For flush wall mounting. **Wall Opening:** 4 1/8 × 6 1/2 × 2″. Stainless steel front panel measures 4 13/16 × 7 3/16″. **Weight:** 5 lbs.
734-1020 ..... **EACH 71.50**

Model K-C-41. Originates calls to 1 Master. Gray leatherette and brushed chrome. 7 1/2 × 8 3/4 × 2 7/8″; 5 lbs.
734-1005 ..... **EACH 83.00**

Staff stations may be connected privately or nonprivately. Does not require electrical outlets.

Additional Accessories For Combination, Chief, and Master Selective Systems

Model K-HP-3. Hi-power staff station for wallmounting. 2 times the volume of standard substations. Charcoal gray metal case. 9 lbs.
734-1135 ..... **EACH 68.50**

Model K-HP-3V. Same as K-HP-3 with added feature of built-in volume control.
734-1140 ..... **EACH 81.00**

Model K-C-20. 9″ weather re-entrant horn. Charcoal gray. Over 4 times the volume of standard substations.
734-1145 ..... **EACH 88.00**

Model K-C-20V. Same as K-C-20 but with added feature of built-in weather resistant volume control.
734-1150 ..... **EACH 107.50**

Model K-S-100. Wall switch for call origination through K-C-20 or K-HP-3 with Master Selective System.
734-1155 ..... **EACH 19.79**

Model K-LR-3R. Substation for flush wall mounting in Master Selective System.
734-1160 ..... **EACH 56.20**

Model K-SM-L. Surface mounting accessory for K-LR-3R, K-LR-3W, or K-C-41R.
734-1165 ..... **EACH 16.30**

Model K-SM. Surface mounting accessory for K-LR-2R.
734-1195 ..... **EACH 14.40**

Type 6303. 3-conductor shielded cable.
734-1175. Per foot ..... **EACH .10**

Cable and Accessories For Chief Series

Type 6202. 3-pair cable for connecting K-C-20, K-C-41, K-C-42, and K-HP-3 with call originating.
734-1115. Per foot ..... **EACH .18**

Type 6214. 7-pair cable to interconnecting K-C-4906 Masters.
734-1120. Per foot ..... **EACH .38**

Type 6226. 13-pair cable for interconnecting K-C-4912 Masters.
734-1065. Per foot ..... **EACH .85**

Model K-W-1. Wall mounting brackets for K-C-41 and K-C-42.
734-1130. Per pair ..... **EACH 1.50**

FMR-25 Wireless Microphone System

FMR-25 system includes Model HT-100/10 handheld mic/transmitter, Model FMR-25 single antenna receiver, Model WT-25 beltpack transmitter with attached condenser lapel microphone. The FMR-25 is rugged, compact and rack mountable. System is AC/DC so it can be remotely powered by a DC power pack. Model HT-100/10 features power switch, mic mute switch, internal compander switch and battery condition light. WT-25 beltpack transmitter has wired-in microphone with mic mute. FMR-25 receiver features multiple system operation, single antenna with 500 feet system range. 4 stock frequencies available (171.905, 171.045, 170.245, 169.505) 9 volt battery required on HT100/10. Specify frequency when ordering.

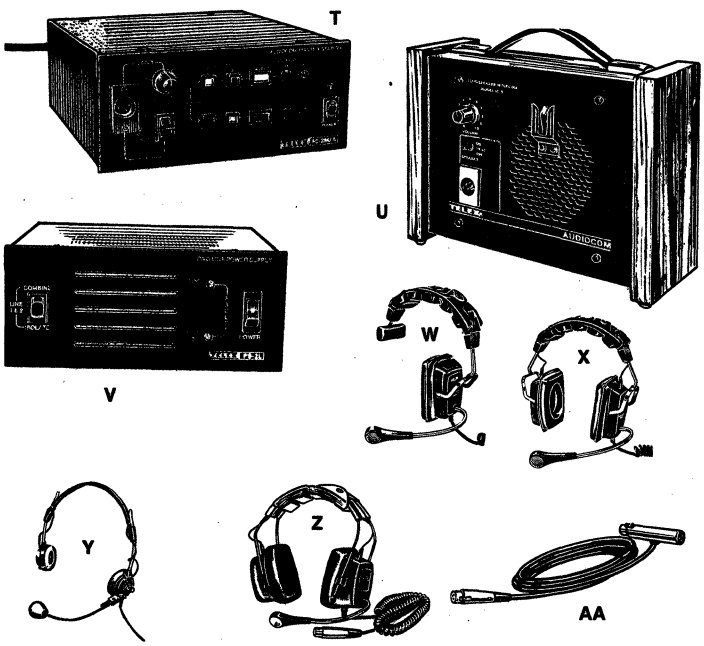
Intercom Systems



T

T IC-2MAX Master Station. A two channel master station with full duplex audio system for simultaneous talk and receive functions. Interrupt feedback button allows live broadcast cueing during on-air program monitoring. Includes 20 KHz light signaling and built-in power supply.

969-1105. Model IC-2MAX ..... **EACH 665.00**

U

U IC-S/LS Single-Channel Portable Speaker Station. 2 Watt speakers for paging or 2-way communication. Hooks up with microphone, handsets, or headsets. Features include volume control, automatic mute, and selection switch for On, Off, or dB attenuation. Comes with male connectors (XLR-4M) and microphone hanging bracket, and both male and female intercom line connectors (XLR-3 type) for "daisy chaining". Operates on power from intercom system line or separate power supply.

969-4040. Model IC-S/LS ..... **EACH 350.00**

V

V PS-2L. Audiocom Power Supply. Two line power supply powers up to 100 belt-pack headset stations per line, enabling isolated or "party line" communications. Includes short circuit and overload LED for each line.

969-1110. Model PS-2L ..... **EACH 335.00**

W

W PH-1 Headset. Single-sided. Dynamic, monaural earphone — foam-filled, polyurethane covering. Dynamic microphone attached to adjustable ball joint boom. Coil cord, female (XLR-4 type) plug.

969-1015. Model PH-1 ..... **EACH 120.00**

X

X PH-2 Headset. Dual muff. Circummuaral foam ear cushions. Dynamic monaural earphones, dynamic microphone on ball joint boom. Coil cord, female (XLR-4 type) plug.

969-1020. Model PH-2 ..... **EACH 147.00**

Y

Y PH-4 Headset. Lightweight, dual-sided. Monaural dynamic earphones. Condensor microphone on pliable boom. Straight cord, female (XLR-4 type) plug.

969-1025. Model PH-4 ..... **EACH 150.00**

Z

Z HD-3A Headset. High noise attenuating dual muff dynamic headset.

969-1115. Model HD-3A ..... **EACH 157.00**

AA

AA ME-25 Cable. For intercom connections between portable and flush mount stations. 25' (7.6m), black. Male and female (XLR-3 type) connectors.

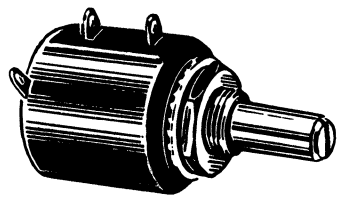
MW22-10 Turn or 3 Turn Pots (2 Watts)



1,000,000 turns life, 2 watts, 7/8" diameter × 3/4" long. Features extremely smooth rotation, long life. **Resistance range:** 100 ohms to 100 K ohms— ± 5%. **Independent Linearity:** ± .25%. **Operating temperature range:** – 55°C to + 105°C. Wirewound. **Temperature Coefficient:** ± 20 PPM/°C. Slotted shaft.

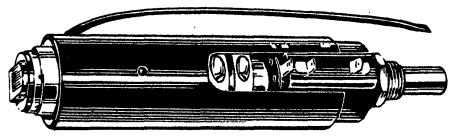
Model MC20-1 Motor-Controlled 10-Turn Potentiometers



Type MC20-1 (Formerly Model 9). Motor-Controlled 10-Turn Potentiometer gives the design engineer new latitudes in speed controls and temperature and valve positioning. This single-ganged, ten-turn pot operates from 6 or 12 VDC input, from an operational amplifier or external power supply. Some of the more common and readily available Op-Amp types are: 301, 741, 748; and, where dual amplifiers are needed, 1458. The Model MC20-1 may be knob-adjusted during motor off time. Panel mounts in a .407″ diameter mounting hole. **Operating Current:** approx. 12 mA. **Clutching Current:** approx. 20 mA. **Potentiometer RPM:** 1, 3, 10 and 18, obtained by a precision gear train driven by an 11,000 to 20,000 RPM motor depending upon input voltages. **Potentiometer Power Rating:** 3 watts at 70°C. **Rotational Life:** 2,000,000 turns. **Additional units available in both 6 and 12 volts with different speed and resistance values. Allow 2-8 weeks delivery. Call for pricing.**

Model MACR Motorized Rheostat

These Motorized Rheostats have a friction clutch for manual adjustment. The Rheostat is all porcelain vitreous-enameled, silicon-ceramic for smooth action and electrical control. Cannot smoke, char, shrink, or shift. 1/4″ shaft. Mounts on panels up to 1/4″ thick. Furnished with nut and lockwasher. 3/8-32 threaded bushing. Unit has 115 VAC reversible motor furnished with starting capacitor. Requires 5″ behind panel spacing. Other Resistance values available. **Allow 8-10 weeks delivery on special order items. Call for pricing.**

Linear Motion Potentiometer—Conductive Plastic 1/2" to 4"

Series LCP12 conductive plastic linear motion potentiometers feature essentially infinite resolution and long life, and electrical strokes from 1/2 to 4". Choice of 4 standard shaft styles. Also features high precision, output smoothness less than 0.1% input voltage, and contact resistance variation less than 2%. Wirewound or hybrid elements also available.

Linear Motion Open Frame Potentiometer

Series LCPL open frame linear motion potentiometers feature high resolution conductive plastic elements and 10,000,000 strokes life. Also features excellent high-speed tracking ability, ±0.5 independent linearity, and power ratings from 2 to 6 watts (depending on size).

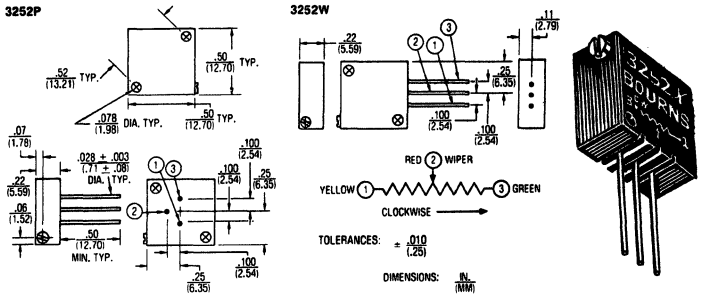
Table B—Important Ordering Information

To Order: Complete the Stock Number by placing the designated Resistance code for Ohms Value where XX appears in the Stock Number. For example, LCP12 potentiometer with 1/2" Stroke, type P shaft, and desired Resistance of 2K would appear as 522-0132.

Value	XX	Value	XX	Value	XX	Value	XX
100	21	1K	29	10K	41	100K	57
200	22	2K	32	20K	44	200K	61
500	23	5K	38	50K	53	500K	65

Please contact Allied for available application assistance, custom and special designs.

Models 3252 Multi-Turn, Cermet



Stable, infinite resolution cermet element. Listed on the DESC QPL for style RJ22 per MIL-R-22097. Low Temperature coefficient ±100 ppm/°C over entire temperature and resistance range. High temperature, all plastic case. Superior humidity-proof performance under the most severe conditions. **Temperature Range:** – 65°C to + 150°C. **Power Rating:** 1 watt at 70°C. **Resistance Tolerance:** ± 10%.

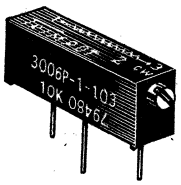
Model 3006 15-Turn/Cermet



1/4" high, low cost cermet trimmer offers infinite resolution, low temperature coefficient 100 PPM/°C over −55°C to +125°C. Sealed to withstand wave soldering and immersion cleaning. **Load Life:** 1000 hours, 0.75 Watt at 70°C. ±10% tolerance. 15 turn nominal travel. **Suffix:** P,W and Y styles. **Dimensions:** 3/4 × 0.19 × 0.25". See drawings below for pin configurations. **Weight:** .04 oz.

Model 3082P-1 Multi-Turn, Cermet

Multi-turn industrial type. Sealed to withstand wave soldering and immersion cleaning process. Mounts on 0.100" grid. 10-Turn Cermet Trimmer with infinitely variable resistance and resolution. **Small space saver size:** 0.100" × 0.150" × 0.500". **Resistance Tolerance:** ±10%. **Power Rating:** 0.6 Watt @ 25°C (400 volts max). **Extended Temperature Range:** −65°C to +150°C. **Temperature Coefficient over entire Temperature & Resistance Range:** ±100 ppm/°C. **Torque:** 2.0 oz-in max. **Mechanical Stops:** Wiper Idels. **Mechanical Life:** 200 Cycles. **Weight:** .01 oz. approx.

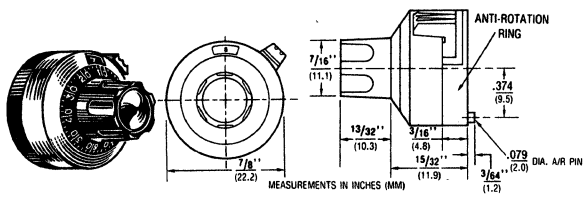
H-800 Trim Bin™ Kit

- **Multiturn, Wirewound and Cermet**
- **Multiturn, Cermet, Square**
- **Single-Turn, Cermet and Wirewound**
- **Open Frames, Cermet**

This kit contains over 125 parts representing 50 varieties of resistance and pin styles. You are able to select the size, shape, type of element and method of adjustment to suit your applications from these popular styles of trimming potentiometers. Also included in the package are adjustment tools and the latest product literature.

754-0001. Model H-800 .....**EACH 104.95**

Model H-507-6, Turns Counting Dial



Model H-507-6. Used with precision potentiometers or other rotating devices for up to 15 turns. 50 dial divisions per turn. 2 parts in 1000 readability. White on black marking; clear finish. 7/8" dia.; fits 1/4" shaft. Fits panel thickness; 3/32" (2.0mm) min. 3/16" (5.0mm) max. High quality, rugged construction.

Model 3640S KNOBPOT®

10 turn; 2.5 watt; 1 1/4" dia. Integral clock face readout. Cost saving; pre-phased; Highly readable. Easy mounting; drill two holes, install and secure with lock washer and nut. **Temperature Range:** −65°C to +85°C. **Power Rating:** 2.5 watts @ +25°C. **Tolerance:** ±3%. **Temperature Coefficient:** ±20 ppm/°C.

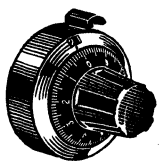
H-490 Series Turns Counting Dials



1" dia. turn counting dials for use with precision potentiometers or other rotating devices up to 30 turns. Simplified mounting, no special holes required, uses only 1" dia. panel space. No backlash, mounted directly to shaft. Excellent legibility. Available with or without brake. Two set screws standard on all models. **Temperature Range:** −15°C to +85°C.

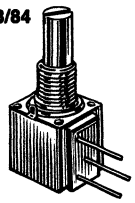
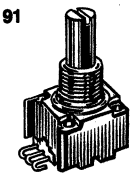
Model 83/84



Model 91



Modular Potentiometers

Model 81. Combines design versatility and advanced modular construction with factory assembeled reliability and quality assurance. The net result is a consistently high quality 5/8" square panel control. **Temperature Range:** -55°C to +125°C. **Temperature Coefficient:** ±1000ppm/°C. **Running Torque:** 0.3 to 1.502". 1000VAC dielectric with standing voltage @ sea level. **Minimum Resistance:** 2 Ohms. **Infinite resolution:** Single turn.

Model 83/84. The only 10 turn precision modular control in the industry. **Resistance Tolerance:** ±5%. 1000VAC dielectric withstanding voltage @ sea level. **Temperature Range:** -55°C to +125°C. **Temperature Coefficient:** ±55ppm/°C. **Load Life:** 1000 hrs. Moisture resistant. Infinite resolution. Compatible with all Model 80 Series.

Model 91. Construction features include a one-piece molded shaft and rotor. The one-piece rotor shaft provides virtually infinite electrical circuit isolation. **Temperature Range:** -55°C to +125°C. **Temperature Coefficient:** ±1000ppm/°C. **Load Life:** 1000 hrs. 1000VAC dielectric wtihstanding voltage @ sea level.

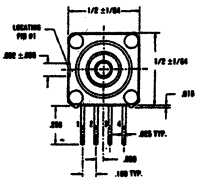
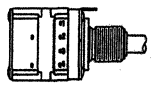
OUTLINE DIMENSIONS





TERMINAL LAYOUT

DESCRIPTION	SECTION	
	SENSOR	LED
"B" OUT	1	-
+ 5 VOLTS	2	2
"A" OUT	3	-
GROUND	4	4

Series 688 Controls are manually-operated, rotary, incremental optical encoders that output two square waves in quadrature at a rate of 64 pulses per channel per revolution as standard with other resolutions down to 20 pulses available as special order items. The outputs are TTL compatible. Features 1/2 in. miniature, dust-free, modular size. 1 million revolutions minimum. Cost effective by eliminating A/D converters. Can be expanded to include push-push, push-pull, and/or momentary switches. Shaft rotation is continuous in either direction with 300 RPM maximum. **SPECIFICATIONS:** 5 VDC @ 30 Ma MAX; 64 pulses/revolution per channel; two separate output channels in quadrature, 90° ± 45°; High level output 2.4 volts minimum with 10K Ohm load to ground; Low level output .4 volt minimum. 1/8" dia. × 7/8" FMS plain round shaft.

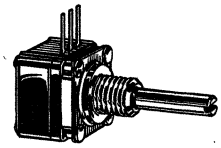
388E Mechanical Encoders



Only one half inch square, the Series 388E is a direct digital, contacting, mechanical encoder for low resolution limits in such applications as sensing, cursing, scanning or robotics. Meets those requirements for a digital output component for limited space applications. **Bushing:** 1/4 × 1/4 inches. **Shaft:** 1/8 dia. × 3/4 in. FMS lg., screwdriver slotted. **Terminals:** .875 in. lg., P.C. Pins. **Locating Pin:** 9 o'clock.

- **TTL Compatible All Models.**
- **Only 1.125" Diameter × .484" Deep.**

SPECIFICATIONS. Input Power: 5 volts DC ± 5% @ 30 MA max. plus external requirements. **Output Rate:** 128 pulses/revolution per channel-standard; Other pulses/revolution between 60 and 128 are available. **Channels:** Two separate output channels in quadrature, 90° ± 45°. **Output Voltage:** High level voltage – 2.4 volts min. with 10 KΩ load to ground. Low level voltage – .4 volt max. **Operating Temp:** – 20°C to + 65°. **Vibration:** 10 to 2000 Hz, 15 G peck; MIL-STD-202 method 204 test C. **Shock:** 100 G @ 6 ms MIL-STD-202 method 213 condition 1.

The series 600 controls are manually operated, rotary, optical encoders that output two square waves in quadrature at a rate of 128 pulses per channel per revolution as a standard with other resolutions down to 60 pulses available. The outputs are TTL compatible. The variation in this series is in the terminal configuration: either pin leads or cable leads.

MECHANICAL CHARACTERISTICS. Shaft Rotation: Continuous in either direction. **Operating Speed:** 300 rpm max. **Rotational Life:** 10 million revolutions. **Rotational Torque:** 1.5 oz. in max. **Shaft:** 1/4 diameter standard, stainless steel. **Bushing:** 3/8 diameter standard, brass, nickel plated. **Terminals:** P/C Type: 0.25 by 0.12 thick brass, gold plated to facilitate soldering. Cable Type: Four lead ribbon cables, color-coded, with .050 spacing, 28 AWG stranded copper wire, 0.39 diameter. **Strength:** Terminals withstand 2 lb. push and pull and a 90° bend. **Mounting Hardware:** For 3/8 bushing, hex mounting nut 3/8 × 32 thread, 1/2 across flats, 3/32 thick; internal tooth lockwasher 11/16 O.D. by .022 thick. **Seals:** Mounting seal and shaft seal available. Controls are not sealed for board washing. **Weight:** P/C type or cable type. 1 in. FMS shaft and 3/8 bushing-.046 lb. (21 G). **Loc. Pin (NOT STANDARD):** Single pin located 17/32 from center can be supplied.

No. 600EN-128-CBL (Cable Style) a four lead ribbon cable ± color coded with .050 spacing, 28 AWG stranded copper wire. 039 diameter. Length 7.5".

753-0060 ..... **EACH 25.00**

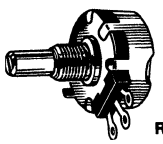
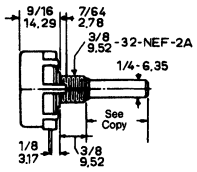
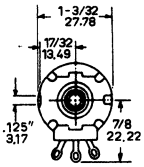
MIL-R-94 RV4 2-Watt Conductive Plastic Potentiometer



RV4N





Crafted of the finest materials available to insure long, reliable service. Provides extra long life with very low noise level. Rated 2 watts. Precision construction is completely enclosed. Carbon-ceramic element. RV4L designates 5/8" screwdriver slotted shaft FMS with 1/2" split locking bushing provided. RV4N indicates 7/8" screwdriver slotted shaft FMS. 3/8" long bushing has 5/8-32-NEF-2A thread. **Av. shpg. wt.:** 4 oz. 1/4" diameter shaft.

Specifications. Resistance tolerance: 1 meg ±10% over 1 meg ±20%. **Rotation:** 312° ±3%. **End Resistance:** Per MIL-R-94. **Working Voltage:** 500 VDC across end terminals. Linear Taper. ±20% Tolerance. 1/4" Shaft.

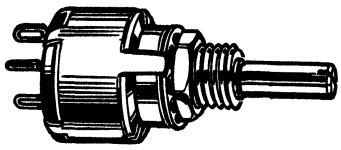
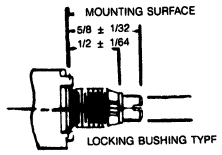
RV6 Series 1/2-Watt MIL Potentiometers





Military Potentiometer—RV6 Series 1/2-Watt conductive plastic. The RV6 series is a high resolution, highly stable unit suitable for applications requiring miniaturization and reliability. 1/8" dia. shaft (7/8" long on STD; 3/8" long on locking).

Specifications. Resistance Tolerance: ±10%. **Power Rating:** 0.5 watt @ 70°C. Derated to zero power @ 120°C.. **Electrical & Mechanical Rotation:** 295° ±3°. **Effective Rotation:** 265° +0° −10°. **End Resistance:** 5 max. up to 750 10 max. above 750. **Functional Output:** Linear. **Dielectric Strength:** 750 VAC for 60 seconds @ ATM. 350 VAC for 60 seconds. 3.44 in H.G.. **Working Voltage:** 350 VDC maximum, but power not to exceed rating. Available with standard or locking type bushing. **RV6L:** locking bushing. **RV6N:** standard bushing.

Claroknobs

JD

DD

DDS

HD

The Claroknob is a high quality knob fabricated from machined aluminum. Manufactured to enhance products, the Claroknob comes in a variety of styles for your requirements. HD series is a control knob with a sawcut indicator. JD series is a straight knurl with top and side indicator. DD series is a straight knurl with side indicator. The DDS series is a straight knurl with arrow on skirt. Stainless-steel setscrews are standard. One setscrew for HD series and two setscrews for JD, DD, DDS series. For use with 1/8" or 1/4" diameter shafts. Anodized in clear or black, gloss or matte finishes.

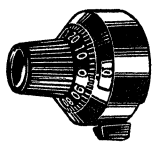
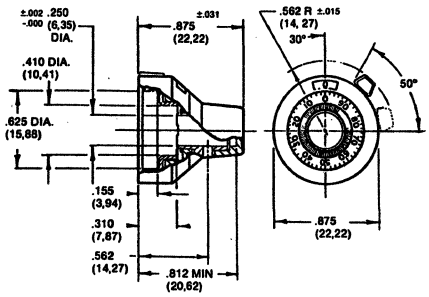
Clarodials





A high quality concentric scale dial designed to be used in conjunction with the **73JB** multiturn potentiometer, the series **316** is available in clear brushed metal design or black anodized metal with white numerals at slightly higher cost. Price inducements are available when the **73JB** and **316** dial are purchased together as a set.

Readout and Operation: Unit shall register a total count of 15 turns. The number in the window (0-14) indicates completed number of turns of the drive sleeve. Graduated circular dial indicates the percent of a partial turn of the drive sleeve. **Transfer Point:** The number in center of window shall change as graduated dial rotates between 94 and 0. **Rotation:** Readout shall increase wth clockwise and decrease with counterclockwise rotation. **Brake Lever Operation:** 1st Position (15° movement of Brake Lever) operates a high torque system for fine adjustment; 2nd Position (15° additional movement of Brake Lever) actuates brake. **Accuracy:** Backlash shall be zero between graduated dial and drive sleeve. **Mounting:** Install mounting bracket between panel and panel nut. Clarodial shall mount directly to shaft with No. 2-56 spline socket set screw, located adjacent to No. 50 on graduated dial. **Numeral Size:** 0.075 high. **Graduation Size:** Numeral graduations .045 long (1,14) intermediate graduations .030 long (0.76). **Finish:** Exposed metal parts—Brushed metal finish; Turning knob and brake lever knob—Black plastic. **Numerals:** Graduated Dial—black; Turns Counter—white on black background. **Weight:** 0.7 oz. max. (19.84 gm).

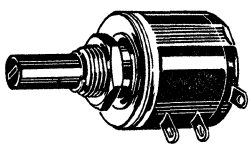
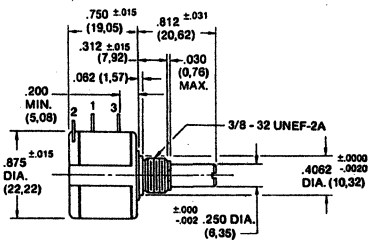
Precision 10 Turn — 2 Watt Potentiometer





Series 73JB is the economical version of **73JA** offering all the electrical features of the latter but employing a long life nylon shaft construction. When paired with the low cost concentric dial series **316**, the savings are substantial.

Resistance Tolerance: ± 5%. **Electrical/Mechanical Rotation:** 3600° + 10° − 0°. **Effective Rotation:** 3600° nominal. **Working Voltage:** 500 volts max. **Independent Linearity:** 100 ohm to 100K ohms, ± 0.25%. **Rotational Life (Max):** 50,000 cycles. **Power Rating:** 2 watt at 70°C. **Shaft Length and Size:** 13/16 FMS screwdriver slotted, black, glass filled nylon material. **Bushing Style:** 5/16 Plain. **Torque Range:** 0.5 oz. in. minimum. **Stop Torque:** 75 oz. in. (static). **Insulation Resistance:** 1000 Megohms minimum. **NOTE:** Locating pin supplied only as special order.

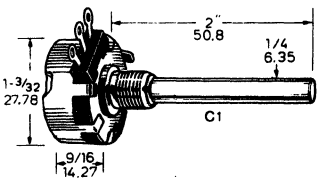
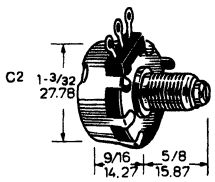
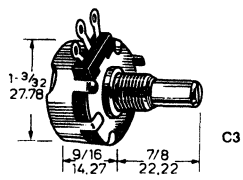
2-Watt Series 380 Thick Film Conductive Plastic Called the "Quiet Ones"







These quiet, precision-made potentiometers are made by a controlled process that virtually insures a reliable, homogeneous and strain-free resistance element with 1% dynamic noise and 5% independent linearity. All have stainless steel shafts. **Type C1** has 2" round shaft FMS. 3/8" long bushing with 3/8" × 32. NEF-2A thread.

Type C2 has 5/8" screwdriver slotted shaft FMS with a 1/2" split locking bushing. **Type C3** has 7/8" screwdriver shaft FMS 3/8" long bushing with 3/8" × 32-NEF-2A thread. Resistance Tolerance, up to 1 megohm ± 10%, above ± 20%. Dielectric strength, 1000 VAC. Wt. 1 oz.

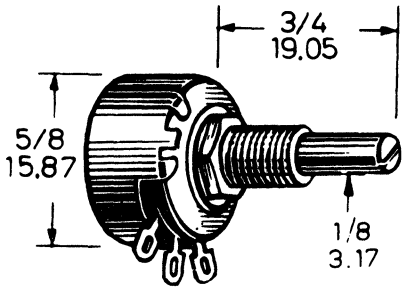
Series 381 1-Watt 5/8" Diameter Thick Film Conductive Plastic



- **Precision Machined from Corrosion Resistant and Non-Magnetic Materials**
- **Rotational Life 100,000 Cycles Under Load**
- **Homogeneous, Strain-Free Thick-Film Resistance Element with 1% Dynamic Noise, 5% Independent Linearity**
- **Meets Stringent MIL-R-94 Specifications**

Construction: plain 1/4" long bushing (L-Types are Locking Bushing) with 1/4-32 NEF-2A thread; brass nickel plated shaft 3/4" long; dust and splash proof housing; cover to base epoxy sealed; terminals molded into base and sealed for solderability per MIL-STD-202, Method 208B, Resistance tolerance; Linear up to 500K ohms ± 10%, above 500K ohms ± 20%.

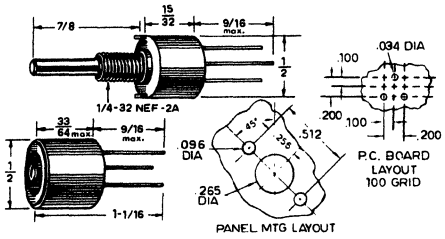
Series 392 Immersible 0.5 Watt Potentiometers



Economical potentiometer designed to meet wave soldering applications for mounting to PC boards. Meets flow solderability and washability test requirements. MIL-R-94 standards apply where applicable. **Resistance Tolerance:** Linear, up to 1 megohm ± 10%, 2.5 megohm to 5 megohms ± 20%. Tapers, up to 100KOMEGA ± 10%,100 KOMEGA to 5 megohms ± 20%. **Resistance Range:** 100 Ω to 5 megohms, linear; 500 Ω to 2 megohms, tapered. **Power Rating:** 0.5 watt maximum continuous power rating for linear taper, but voltage not to exceed rating. **Working Voltage:** 350 VDC across end terminals, but power not to exceed rating. **Linearity:** ± 5% Independent. **Torque Range:** .20 to 2.0 oz. in. **Shafts, Standard:** .125" dia. **Solvent Resistance:** Housing resistant to trichlorethylene, chlorethene, NU Freon TMS, Freon TMC, carbon tetrachloride, toluene, MEK ethyleacetate and gasoline.

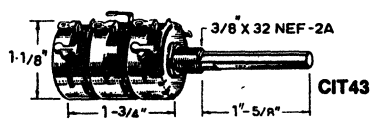
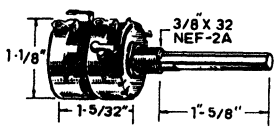
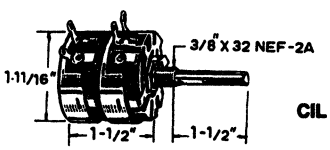
Constant Impedance Attentuators and Audio Controls



CIT43



CIL43



CIL

4 Watt Audio L-, T-, and Bridge T-Pads. Ratted 2 Watts DC; will handle up to 4 Watts audio. **Specifications.** Attenuation range of 0-30 dB over 90% of rotation, 60 dB in remaining 10%. Increases approximately linearly to 30 dB with counter-clockwise rotation. Insertion loss less than 0.5 dB. Input impedance within ± 20%. Pads have 3/8 × 32 3/8" bushing. 1/4" diameter shafts, 15/8" beyond bushing. Shafts and bushings are insulated from the circuit elements. All pads come with bar knob and dial plates.

Series 200-P

2-Watt Solid Molded Element Conductive Plastic Potentiometer

Single Turn 2-Watt Conductive Plastic, Bushing Mount Potentiometer
The raised resistance track is molded to the nonconductor base. Unique contact design minimizes track contact wear, resulting in rotational life far exceeding conventional film type potentiometers. Material selection insures trouble-free operation in applications where oil, dust, moisture and other contamination is present. Rated 2 watts at 40°C. **Resistance Tolerance:** ±20%. **Operating Temperature:** −55°C to 105°C. **Independent Linearity:** ±2%. Bronze bearings. **Life expectancy:** 20,000,000 revolutions at 40 rpm. **Model 200-P445.**

Single Turn 2-Watt Conductive Plastic Servo Mount Potentiometer
The molded raised track and special wiper material combine to create a quality potentiometer with a minimum life expectancy of 100,000,000 revolutions at 40 rpm. Rated 2 watts at 40°C. Provides trouble-free operation in applications where oil, dust, moisture and other contamination is present. **Resistance Tolerance:** ±10%. **Independent Linearity:** ±0.5%. **Operating Temperature:** −55° to 105°C. Stainless steel ball bearings. **Model 200-P446.**

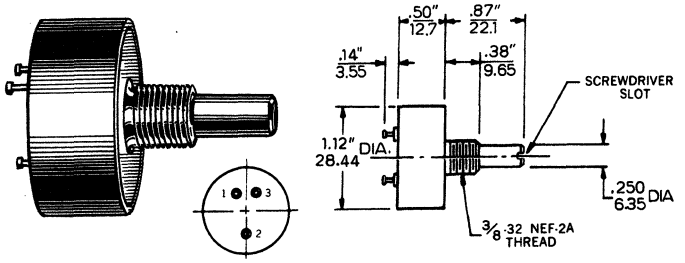
Series 112-P16 1-Watt Solid Molded Element, Single Turn, Conductive Plastic, Bushing Potentiometer



Unit has infinite resolution, with a mechanical life of 20,000,000 revolutions at 40 rpm. Economical. This size is the workhorse for a multitude of military and industrial applications where its relative small size and reliability have been proven. Gold plated terminals, beryllium copper wiper spring, stainless steel shaft, machined bushing. Rated 1 watt at 40°C. **Resistance Tolerance:** ±20%. **Operating Temperature Range:** −55°C to 105°C. **Independent Linearity:** ±2%.

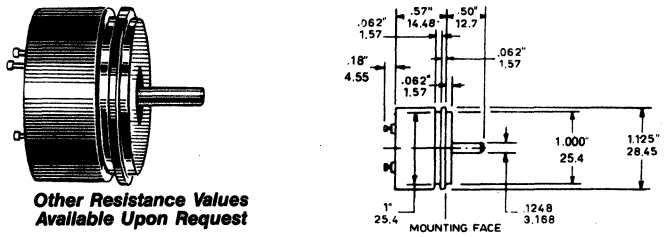
Series 112-P19 1-Watt Solid Molded Element, Single Turn, Conductive Plastic, Servo Potentiometer



Other Resistance Values Available Upon Request

Series 112-P19 features infinite resolution and a minimum life expectancy of 100,000,000 revolutions at 40 rpm. The molded raised track and special wiper material form a unique quality that results in rotational life far exceeding that of conventional film type potentiometers. Gold plated terminals, beryllium copper wiper spring, stainless steel shaft. Impervious to moisture, gases and oils. **Operating Temperature Range:** −55°C to 150°C. **Total Resistance Tolerance:** ±10%. **Independent Linearity:** ±0.5%. **Starting Torque:** .3 oz.-in. Stainless steel ball bearings. **Weight:** 1 ounce.

Joysticks With Potentiometers

JSP Series joystick controls are designed with long life conductive plastic potentiometers (P Series). Available with dual or triple axis control, internal or external moisture-proof boot. All metal construction for strength and reliability. **Specifications:** Spring return to center. **Knob Torque:** 12 ounce-inches. **Life:** 2,000,000 cycles. Limiter plates available to limit direction of knob. **Voltage Repeatability:** ±0.2%. **Resistance Available:** 10K ±20%. **Power:** .5W at 25°C. Wipers phased at center of voltage. **Temperature Range:** −30° to +105°C.

Induction-Type Joystick

The JSE 2304 non-contacting inductive joystick control offers extremely long life, infinite resolution and zero noise. The unit is protected from moisture and dust by a shaft boot. Anodized aluminum case seals the electronic circuitry. **Specifications. Operating Voltage:** 4.5-15 VDC. **Current:** 15 mA at 10 VDC. **Output Impedance:** 1800 ohms (Signals). **Center Tap Impedance:** 340 ohms. **Temperature Range:** −30° to +105°C. **Center Tap Voltage:** 50% of input voltage. **Resolution:** Infinite. **Life:** 20,000,000 cycles. **Leads:** 6" standard length, color coded. Knob has spring return to center.

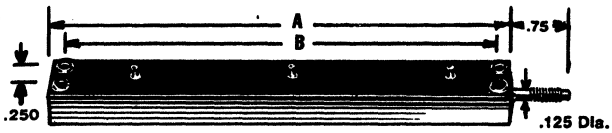
M1326



The M1326 linear motion wirewound potentiometer enjoys a unique position. It combines the best electrical characteristics in the smallest size at the lowest cost. A solid precious metal contact, engaging the precision wirewound mandrel, produces exceptional linear and resolution characteristics. For applications where forces are limited, such as in instrumentation, the M1326 is ideal because of its low shaft frictional force as well as small size and light weight. Nylon bearings.

The P1613 linear motion conducive plastic potentiometer is designed with simplicity in mind. It combines all the excellent features of the more expensive transducers yet is the smallest available in the market as well as the least costly. The molded raised track, combined with the special formulated contact, results in phenomenal life—the life expectancy at 60 inches/min. is 50,000,000 strokes. **Total resistance tolerance:** ± 20%. **Operating Temperature Range:** – 55° to 105°C. Nylon bearings.

Conductive Plastic Slide Potentiometer Type P2333

This slide action linear motion potentiometer was developed for applications requiring high reliability, infinite resolution and long life. The range of electrical strokes is 1 to 4 inches. Repeatability is 0.2%; taper is linear. The combination of a raised molded resistive track and a compatible formulated contact, make this unit practically impervious to dust, oil or moisture. It therefore is suitable for use in the hostile environment often found in a steel mill, tire factory or mining operation. In addition, this construction makes possible the exceptionally long life of 5,000,000 cycles. With the knob removed, the lever arm may be attached to machinery to monitor the position of any linear motion.

Vitreous-Enameled Rheostats

► **Choose from 12½ to 300 Watts in a Wide Range of Resistances** ► **U.L. Approved**
► **Highly Reliable and Economical**

All porcelain vitreous-enameled, silicon-ceramic for smooth action and electrical control. Choose from 12½ to 300 watts in a wide range of resistances. Rheostats are highly reliable and economical; cannot smoke, char, shrink or shift. Metal-graphite contact brushes, varied to fit current and resistance. Ratings at full setting. U.L. approved 25 watts and up. **Less knobs; see knobs, dial plates and handwheel below. Other resistances available as special order items.**

25 Watt—Type R25

Wiper tracks on this rheostat are buffed and polished to assure smooth rotation and uniform wiper contact. A high strength ceramic hub is used to insulate the shaft and bushing from live parts. The wiper design assures minimum backlash. A vitreous enamel bonds core and base together for uniform heat dissipation and structural integrity. Cores on the larger sizes are enameled prior to winding to increase core strength and improve bond between wire and core. UL approved. ¼" dia. shaft. **Resistance Tolerance:** ± 10%. **Running Torque:** .25 to .5 inch-pound. **Rotation:** 300° ± 5%. **Mounting for Panels:** up to ¼". **Standard Resistance:** 1-10K ohms. **Shpg. wt.:** ½ lb.

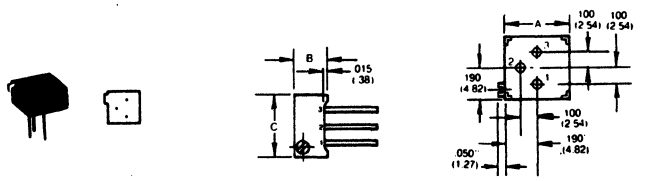
Type 752-10 3/8" Square Cermet Multi-Turn Trimmer Potentiometers



These low-cost, high-performance industrial/commercial trimmers come in a space-saving package for miniaturized circuit board requirements. Nonflammable (to U.L. ratings) plastic case assures precision operation in high-temperature environments. Easy 24-turn adjustment for precise electrical setting. Impact-resistant case and Metal Glaze® Cermet element assure long life. Designed to meet, or exceed, applicable environmental requirements of MIL-R-22097. **Specifications. Power Rating:** 0.5W at 70°C; **Standard Resistance Range:** 20Ω to 2MΩ; **Resistance Tolerance:** ±10% std.; **Temperature Coefficient:** ±100ppm/°C max.; **Contact Resistance Variation:** 3Ω or 3% (W.I.G.); **Operating Temperature Range:** −55° to +125°C. **Dimensions. Type 170 1/4" Round Single-Turn Trimmer Potentiometers

Miniature industrial trimmer potentiometers are sealed to withstand hot water immersion. Tested MIL-R-22097 Characteristic C. **Tolerance:** ±10%. **Power rating:** 0.5 watt at 85°C. **Operating temperature:** −55°C to +150°C. **Temperature coefficient:** ± 100ppm/°C. Built-in standoffs permit washing and flux removal. Metal Glaze® element for infinite resolution. For printed circuit board mounting.

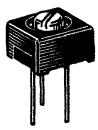
Type 181 1/4" Square Cermet Single-Turn Trimmer Potentiometers.



Meets MIL-R-22097, Characteristic F. Impact-resistant, nonflammable plastic case assures precision operation in high-temperature environments. Readily solderable pins make wave soldering easier while built-in standoffs permit more effective boardcleaning. **Power Rating:** 0.5W at 85°C. **Resistance Tolerance:** ±10% std. **Temp. Coefficient:** ±100ppm/°C max. **Dielectric Strength:** 900 VAC. **Contact Resistance Variation:** 3Ω or 3% (W.I.G.). **End Resistance:** 2Ω or 2% (W.I.G.). **Insulation Resistance:** 1000MΩ. **Absolute Min. Resistance:** 2Ω or 1% (W.I.G.). **Operating Temp. Range:** −55 to +150°C. **Total Adjustment Turns:** 1. **Operating Torque:** 5.0 oz.-in. max. **Mechanical Stops:** solid. **Dimensions (Case):** A—.267" (6.78 mm); B—.180" (4.57 mm); C—.267" (6.78 mm). **Leads:** diameter—.018" (.45 mm); length—.187" (4.75 mm) min.

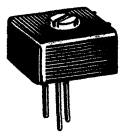
Type 780-12P 3/8" Square Cermet Single-Turn Trimmer Potentiometers



Environmentally-sealed units meet environmental and life requirements of MIL-R-22097, Characteristic F. **Power Rating:** 0.5W at 85°C. Impact-resistant, nonflammable plastic case. **Resistance Tolerance:** ±10% std. **Temp. Coefficient:** ±100ppm/°C max. standard. **Contact Resistance Variation:** 3Ω or 3% (W.I.G.). **End Resistance:** 2Ω or 2% (W.I.G.). **Dielectric Strength:** 900 VAC. **Insulation Resistance:** 1000MΩ. **Operating Temp. Range:** −55°C to +150°C. **Total Adjustment Turns:** 1. **Operating Torque:** 4.0 oz.-in. max. **Mechanical Stops:** solid. **Dimensions:** A—.375" (9.53 mm); B—.191" (4.85 mm); C—.370" (9.40 mm). **Leads:** diameter—.020" (.508 mm); length—.187" (4.75 mm).

Type 780-42H 3/8" Square Cermet Single-Turn Trimmer Potentiometers

Meets MIL-R-22097, Characteristic F. High-performance, space-saving package for miniaturized circuit board requirements. Withstands wave soldering and immersion cleaning. Exclusive Metal Glaze® Cermet element assures longer life, more infinite resolution. Low profile for closer board spacing. For specifications, see Type 780-12P at upper left of this page. **Dimensions:** A—.375" (9.53 mm); B—.370" (9.40 mm); C—.191" (4.85 mm). **Leads:** diameter—.020" (.508 mm); length—.187" (4.75 mm).

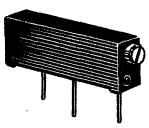
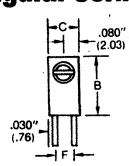
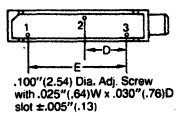
Series 961 3/4" Rectangular Cermet Multi-Turn Trimmer Potentiometers







Meets MII-R-22097, Characteristic F. Industrial/commercial trimmer is a sealed unit protected against moisture and dust. **Power Rating:** 0.75W at 70°C (300V max.). **Resis. Tolerance:** ± 10%. **Temp. Coefficient:** ± 100ppm/°C max. **Dielectric Strength:** 1000 VAC. **Operating Temp. Range:** −55° to +125°C. **Total Adjustment Turns:** 20 nominal. **Mechanical Stops:** wiper assembly idles. **Dimensions. Case:** A—.750" (19.05 mm); B—.250" (6.35 mm); C—.160" (4.06 mm). **Pin Spacing:** D—.200" (5.08 mm); E—.500" (12.75 mm); F— .100" (2.54 mm). **Leads:** diameter—.018" (.46 mm); length—.187" (4.75 mm) min.

Big-Value Resistor Kits

Work Station Engineering Resistor Kit
Never be without a resistor to install in the circuit you are troubleshooting. Resistor Kit **WS-1** contains 195 carbon composition and complex oxide insulated resistors. Consists of 39 values, five pieces each; thirteen values per wattage rating. Includes 65 1/2-Watt resistors from 2.7 Ohms through 20 Megohms; 65 1-Watt resistors, .22 Ohms through 100 K Ohms; and 65 2-Watt resistors, .22 Ohms through 470 K Ohms. This selection is housed in an attractive 40-drawer steel-framed cabinet with carrying handle.
840-9000. WS-1. Resistor Kit ..... **EACH 34.95**

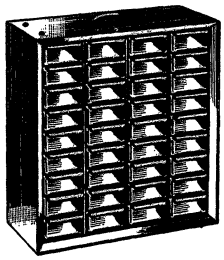
1/8-Watt Carbon Film/Carbon Composition Designer Resistor Kit
Resistor Kit **CF-8** contains 480 1/8-Watt resistors, 5% tolerance. Contains a balanced assortment of 48 popular values. Ten pieces per value. Packaged in a steel-framed 24-drawer cabinet with carrying handle.
525-0001. CF-8. Resistor Kit ..... **EACH 39.95**

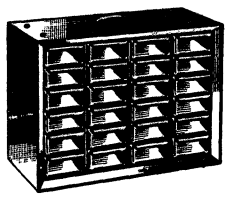
1/4-Watt "Super" Carbon Film Resistor Kit
Contains 8,000 pieces of 5% tolerance resistors in 80 values. One hundred pieces each, 1.0 Ohm through 10.0 megohms. 40-drawer steel-framed cabinet with handle.
525-1000 ..... **EACH 140.00**

1/4-Watt Design Engineer Carbon Film Resistor Kit
Kit contains 800 pieces of a balanced assortment of popular values of high-performance, high-reliability 1/4-Watt carbon film resistors for applications requiring superior performance. 80 values, 10 pieces of each. Low noise resistors feature welded cap and lead construction. **Tolerance:** ± 5%. Values are color-banded per EIA specs. Conformal coating exceeds requirements of MIL-R-11F. Packed in 40-drawer metal-framed cabinet with carrying handle.
525-1100 ..... **EACH 39.95**

1/2-Watt Design Engineer Carbon Film Resistor Kit
This 600-piece kit includes a balanced assortment of popular values of high-performance, high-reliability 1/2-Watt carbon film resistors in 60 values (10 resistors of each value). Low noise with welded cap and lead construction. **Tolerance:** ± 5%. Values are color-banded per EIA specs. Conformal coating exceeds requirements of MIL-R-11F. Housed in 40-drawer metal-framed cabinet.
525-2200 ..... **EACH 39.95**

50/50 1/4- and 1/2-Watt Resistor Assortment Kit
Contains 800 resistors in 40 values of 1/4-Watt from 1.0 Ohms through 10 Megohms and 40 values of 1/2-Watt resistors from 1.0 Ohms through 20 Megohms. Ten resistors of each value. Housed in a 40-drawer steel-framed cabinet with carrying handle.
525-3300 ..... **EACH 39.95**





Type RN60 1/2-Watt Precision Metal Film Resistor Kit
200 pieces of RN60C, 1% tolerance, 50 PPM commercial equivalent resistors in 40 values. Values range from 49.9 ohms through 499 K ohms. Five resistors each value in a balanced assortment. Packaged in 40-drawer steel-framed cabinet with carrying handle.
831-2000 ..... **EACH 29.95**

1/4-Watt Precision Metal Film Resistor Kit
Contains 200 pieces of RN-55C 1% tolerance 50 PPM commercial equivalent resistors in 40 values. Values range from 49.9 Ohms through 499 K Ohms. Five resistors of each selected value in this balanced assortment. Housed in a 40-drawer steel-framed cabinet with carrying handle.
831-6000 ..... **EACH 39.95**

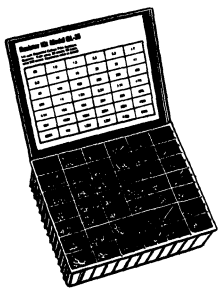
2-Watt Complex Oxide Resistor Kit
Resistor Kit **CC-2** contains 120 complex oxide resistors rated at 2 Watts. Resistors have tin-coated lead wires for superior soldering. Contains a balanced assortment of popular values. Consists of five each resistors in 24 different values. Packaged in 24-drawer steel-framed cabinet with carrying handle.
840-9004 ..... **EACH 39.95**

1-Watt Complex Oxide Resistor Kit
Resistor Kit **CC-1** contains 120 5% tolerance resistors rated at 1 Watt. A balanced assortment of popular values. Contains 4 each of 24 different resistance values. Resistors are packaged in a 24-drawer steel-framed cabinet with carrying handle.
840-9013 ..... **EACH 33.50**

1 to 11-Watt Power Resistor Kit
Contains 240 pieces of wirewound, vitreous enameled and silicone-coated power resistors in 24 values, ten pieces per value ranging from 1 Ohm through 25 K Ohms. 1%, 3%, and 5% tolerances. Resistors housed in a 24-drawer steel-framed cabinet with carrying handle.
767-3004. PWK-2. Power Resistor Kit ..... **EACH 39.95**

10

Resistor and Diode Kits



Model GL-25 Resistor Kit. Quantity of 1050 (25 of each value) 1/4W deposited carbon film resistors in 42 resistance values from 0.68 ohms to 4.7 M ohms. 0.250" L, 0.095" diameter. ± 5% tolerance. Conformal multi-coating, solder coated lead wire, EIA std. color coding. For minicircuits. Exceeds MIL-R-11F performance characteristics.
777-0025. GL-25 ..... **EACH 42.95**

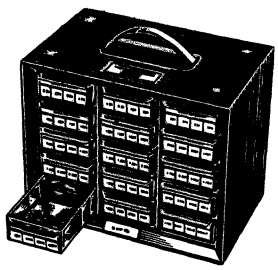
Model RC-1200 Resistor Kit. 1/8W 5% highly reliable metal glazed chip resistors. 60 resistance values from 2.7 ohms to 2.2 M ohms—20 pieces of each value, total of 1200 pieces. Miniature size, wave flow solderability. Mount on either side of PC board. With X8/X16 magnifying glass and chip-designed tweezers.
777-1200. RC-1200 ..... **EACH 189.95**

Model CEC-136 Diode Kit. Silicon rectifier and fast-recovery diodes—7 types each of 1 amp, 3 amp, and 6 amp rectifier, and 1 amp and 3 amp fast-recovery, and 6 types of 6 amp fast-recovery—10 pieces per type, total of 410 pieces. 50-1000V PIV.
777-0136. CEC-136 ..... **EACH 174.95**

Model EMF-55 Resistor Kit. 1/4W 1%, 50 ppm metal film resistors. 12 pieces of each value, with 111 values from 10 ohm through 1 M ohm, for a total of 1332 resistors.
777-0055. EMF-55 ..... **EACH 165.95**

Model CEC-215 Economy LED Kit. 210 pieces, 44 different types, high quality LEDs.
777-0215. CEC-215 ..... **EACH 174.95**

Model CEC-484 Deluxe LED Kit. 349 pieces, 116 different types, high quality LEDs and panel mounts.
777-0484. CEC-484 ..... **EACH 295.95**



Model CEC-640 Diode Kit. Quantity of 640 zener diodes—14 400 mW types, 22 1W types, 28 500 mW types (10 pieces per type). From 3.3. to 30 V nominal voltage.
777-6400. CEC-640 ..... **EACH 184.95**

Quick Pick Resistor Organizer
Featuring top quality deposited carbon film resistors. 60 resistance values from 2.2 ohms through 4.7 ohms. Cabinet measures 10 × 8 × 6.5".

Model 1815. 1/8W 5% resistors. 25 pieces of each value for a total of 1500 pieces.
777-1815. 1815 ..... **EACH 150.00**

Model 2515. 1/4W 5% resistors. 25 pieces of each value for a total of 1500 pieces.
777-2515. 2515 ..... **EACH 109.95**

Model 2530. 1/4W 5% resistors. 50 pieces of each value for a total of 3000 pieces.
777-2530. 2530 ..... **EACH 139.95**

Model 5015. 1/2W 5% resistors. 25 pieces of each value for a total of 1500 pieces.
777-5015. 5015 ..... **EACH 116.95**

Model CEC-450-1W. 450 pieces, 45 values, 10 pieces each value. 1 watt. 5% CF resistors, 4.7 ohms-1.0 M ohm.
777-4501. CEC-450-1W ..... **EACH 136.95**

Model CEC-450-2W. 450 pieces, 45 values, 10 pieces each value. 2 watt. 5% CF resistors, 4.7 ohms-1.0 M ohm.
777-4502. CEC-450-2W ..... **EACH 132.95**

Resistance Tolerance
Below 100 ohms . . . . . ± 2 ohms
100 ohms to 5 megohms . . ± 2%
Above 5 megohms . . . . . ± 5%

Isolated, Bussed and Dual Termination types available in Low, Medium and High Profile Models. Low Profile type is compatible with DIP packages. High Temperature solder lugs ensure compatability with all popular board soldering techniques, including VAPOR PHASE. Copper leads for superior dissipation. Gold epoxy provides excellent marking contrast. Laser marked for permanent identification. **Operating Temperature:** – 55°C to + 125°C ambient. Conforms to UL 94V-flame test. **Voltage Coefficient:** ± 100ppm/V typical by decode values. Power Rating at 70°C; 4300S-101 0.30 Watt; 4300S-102 0.20 Watt; 4300R-104 0.20 Watt.

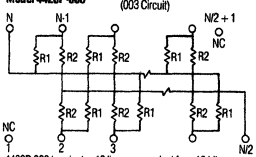
Model 4416P-003
Model 4420P-003 Dual Terminator (003 Circuit)



4420P-003 terminates 16 lines, convenient for a 16-bit computer bus.

Resistance Tolerance
Below 100 ohms . . . . . ± 2 ohms
100 ohms to 1.0 megohm . . . . . ± 2%

Power Rating Per Resistor
003 Circuit at 70°C . . . . . 0.115 watt

Uses board footprint identical to medium body (.220 wide) "SO" Gull Wing. Has compliant leads to reduce solder joint fatiguing. High temperature solder suitable for all popular soldering techniques. Copper leads used for superior heat dissipation and resistance to corrosion. Laser marking for permanent identification. 50 volts max. Bulk only stocked. Tape and reel available (1000 pieces per reel) as special order.
Governing dimensions are in inches. Dimensions in parentheses are metric (MM) and are approximate.
Terminal centerline to centerline measurements made at point of emergence of the lead from the body.

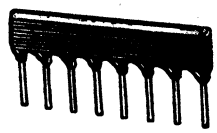
Model 4600 Conformal Single-in-Line Packages



Isolated, bussed and dual terminator types available in low, medium, and high profile models. Low profile is compatible with DIPs. High temperature solder ensures compatibility with all popular board soldering techniques, including vapor phase, copper leads for superior heat dissipation and resistance to corrosion. Gold Epoxy provides excellent marking contrast. Laser marked for permanent identification. **Operating Temperature:** –55°C to +125°C. **Conforms to UL94V-0 Flame Test:** 100 Volt max. TCR Tracking, 50 PPM/°C max. **Power Rating at 70°C:** 4606X—3/4 Watt; 4608X—1 Watt; 4610X—1 1/4 Watt. (Available 4 through 15 Pin).

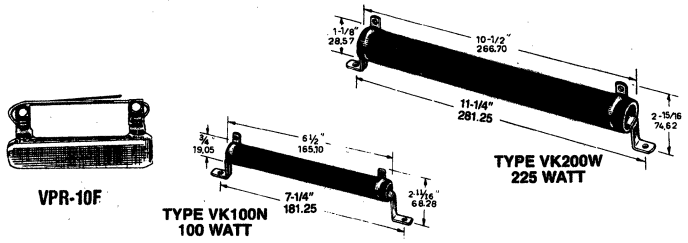
Bracket-Mounted Wirewound Vitreous Enamel Resistors

Fixed Power Resistors



Fixed Types. These precision wirewound resistors are especially designed to meet a wide variety of military, industrial and general consumer applications. They offer long life and extremely reliable service. For use as voltage droppers, bias resistors and bleeders in applications where resistance need not be varied. Feature fine alloy wire, wirewound on quality ceramic cores and covered with vitreous enamel coatings—the best conductor of heat for a material which must also be a good electrical conductor. **Resistance Tolerance:** ± 5% for values 1 ohm or higher. Wattage ratings are for use in free air. **Average Shipping Weight:** 5-50 watts, 1.1 oz. 100 watts and up, 7.5 oz. **See Table B (Below) Before Ordering. Mounting brackets sold separately.**

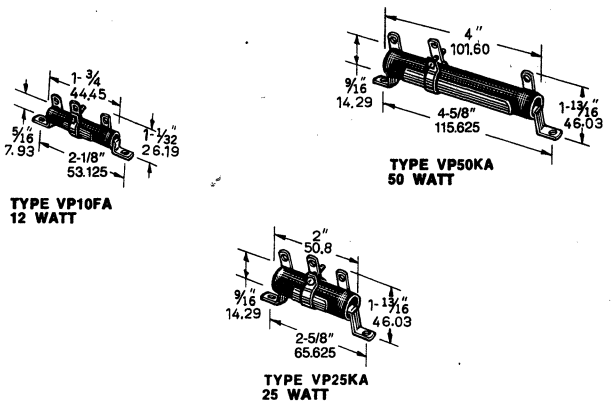
Adjustable Resistors



Adjustable Type. For voltage dividing networks, power supplied, transmitters—anywhere adjustable resistance is required. These resistors feature fine alloy wire, precision wound on high quality ceramic cores and insulated by vitreous enamel coatings. Slider lug included with each resistor. Resistance tolerance is ± 10% of the total resistance value. Wattage rating applied only when the entire resistance is in the circuit; with adjustable lug at intermediate point, rating is reduced in the same proportion. Wattage ratings are for free air mounting. **Important—See Table (below) Before Ordering. Average Shipping Weight:** 5-50 watts—4 oz.; 100 watts and up—1 lb. **Mounting brackets sold separately.**

Silicone Coated—SC Series

The Clarostat SC Series of precision silicone coated power resistors is manufactured in complete accordance with all applicable portions of MIL-R-26. These precision resistors provide an outstanding degree of reliability and stability in ratings of 1, 3, and 5 watts. All standard precision resistors are offered with a 1% tolerance and in standard MIL Styles RW70U, RW79U, and RW74U. **SC1A Terminal Strength:** Pull Test 7 Lb. Max., Approx. Weight .33 Grams. **SC3D Terminal Strength:** Pull Test 15 Lb. Max. Approx. Weight 1.3 Grams. **SC5E Terminal Strength:** Pull Test 15 Lb. Max. Approx. Weight 4 Grams. All resistors have Copperweld, Tinned leads and solderability conforms to MIL-R-26E.

CSC Series is commercial equivalent of above with 3% tolerance. **NOTE:** Not all values available in all wattages or types.

Standard Specifications. Power Rating: 5-50 watts depending upon style. 275°C maximum hot-spot at 25°C ambient. Conforms to MIL-R-18546. 1% maximum Δ R in 1000 hour load life. Proper heat sinks as follows: CMC-5 and CMC-10—4 × 6 × 2 × 0.040 aluminum chassis; CMC-25 and CMC-50—5 × 7 × 2 × 0.040 aluminum chassis. **Temperature Range:** −55°C to +275°C. **Standard Temperature Coefficient of Resistance:** < 1 ohm = ± 90 ppm; > 1 ohm to < 10 ohms = ± 50 ppm; > 10 ohms = ± 20 ppm. **Construction:** Windings are wound on ground ceramic cores. Terminals are electronically welded to end caps for maximum strength. A high temperature silicone encapsulant is used to mold the wound assembly. **Standard Terminal Material:** Copperweld, tinned (Material Code 9) 5-50 watt sizes. **Standard Resistance Tolerance:** ± 1.0% order code F. **Dielectric Withstanding Voltage:** 1000 volts for CMC-5 and CMC-10; 2500 volts for CMC-25 and CMC-50. **Note:** Not all resistance values available in all wattages.

Silicone Coated Series 100 Wirewound Resistors

The RCD 100 Series of precision silicone coated power wirewound resistors is manufactured to provide highly reliable continuous operation under MIL-R-26 and MIL-R-39007. Load life stability after 1000 hrs. is typically below ± 0.25% ΔR at full rated power. Improved performance results from single layer, tension free windings of premium grade resistance wire. Special ceramic cores feature optimum thermal conductivity, resulting in a reduced temperature rise over conventional wirewounds. The coating is resistant to most solvents but should not be brushed while wet. 125 Terminal Strength: Pull test 7 lb. max., approx. weight: .33 Grams. 135 Terminal Strength: Pull test is 15 lb. max., approx. weight: 1.3 grams. 160 Terminal Strength: Pull Test 15 lb. max., approx. weight 4 grams. All resistors have tinned leads and solderability conforms to MIL-R-26E. Non-inductive, extended resistance range, and radial leads available on special order. Call for price quote and availability.

Series 600 High Power Resistors

RCD Series 600. Compact power wirewound resistors offer continuous high-power dissipation. These devices are molded in high density aluminum heat sink for a maximum heat dissipation. Maximum environmental protection provided by a hard anodized housing (per MIL-A-8625 Type 2). Inside the rugged housing, accurate concentricity of the resistive element allows a high level of voltage protection. Other features include complete welded construction (terminal to terminal), oxide-free premium grade resistance wire windings, low noise and thermal EMF. Meets or exceeds MIL-R-18546 requirements.

- ►Excellent Long-Term Stability
- ►Outperforms Carbon Comp MIL-R-11
- ►Flame Retardant Coating And Color-Banding
- ►Resistant To Industrial Solvents

Series CF resistors provide improved performance over industry standards without increasing costs. Load life stability at a typical 1000 hours is less than 0.25%ΔR. These quality standards are achieved through strict process controls and the highest grade materials. Cores are high thermally conductive ceramic, creating superior heat dissipation and overload capability which allows reduced sizes unavailable until now. Specially electroplated leads for faultless soldering, even after lengthy storage times. Industrial solvent-resistant multilayer epoxy coating and color-banding. **Note:** 1/8 Watt and 1 Watt available from factory in 1000 piece multiples.

- ► Equivalent to MIL Wirewound Sizes
- ► Exceptional Stability and Overload Dissipation
- ► Negligible Noise and Inductance
- ► Extremely Durable and Insensitive to Temperature Extremes
- ► Flameproof Coating Resists All Industrial Solvents (Should not be Brushed When Wet)
- ► Price Savings Over Conventional Resistors
- ► Excellent Replacement for Carbon Composition, Commercial Wirewound, Carbon Film, Metal Oxide and Metal Film Resistors

Special construction of the Series RSF resistors allows performance characteristics previously unavailable in film resistors and reduced sizes which are interchangeable with wirewound resistors. Designed specifically for increased power and surge dissipation. Proprietary film is a thick complex-oxide material deposited on high grade ceramic for optimum heat dissipation, negligible inductance, low temperature coefficient and long-term stability. Exceptional insensitivity to high temperature and thermal shock. Terminations are welded for increased durability and negligible noise levels. Marking is stamped or color banded. Detailed performance report available. **Note:** 1/4, 1/2, 3, 5, and 7 Watt available from factory in 1000-piece multiples.

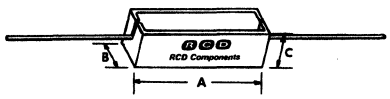
Types PW5/5-Watt And PW10/10-Watt Resistors



Axial lead resistors. Welded cap to lead for improved noise levels and long term stability. Precisely wound element with glass fiber core and sealed in rectangular ceramic case. **Tolerance** ±5%. **Wide resistance range:** .1Ω to 5K. **Improved TCR:** ±200 PPM Typ. (Values above 1Ω). **Power rating:** 25°C ambient. **Maximum operating temperature:** 275°C. Other wattages and values available in 1000-piece multiples.

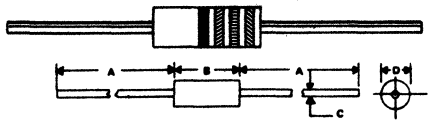
See the Wide Selection of Value-Priced Resistor Kits for Prototyping, Repair or Maintenance Uses on Page 351.

MIL-Type RC Carbon Composition Resistors



These 1/4 and 1/2 watt composition resistors meet or exceed all requirements specified by MIL-R-11 and RS-172. Heavy coating of 90/10 tin on lead wires for superior soldering characteristics even after extended storage. Operation at full wattage rating at 70°C without derating. ± 5% tolerance. 1/8 watt available in 1000 piece minimum and multiple only.

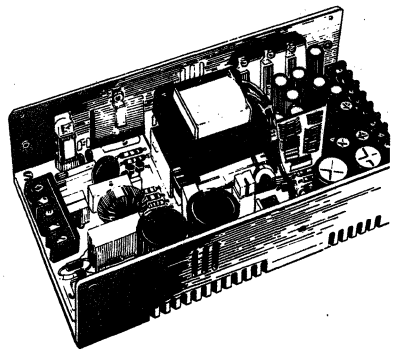
"Classic" Series

Standard Features

- ► Big Power in a Small Package
- ► Classic input capability 90-132/180-264 VAC. 47-63 Hz (400 Hz operation — consult factory)
- ► Field selectable for 115 or 230 VAC input
- ► High temperature burn-in
- ► Built-in OVP on main 5V level
- ► Main 5V level adjustable
- ► 20 millisecond minimum hold-up time at nominal line
- ► Calculated MTBF at 25°C, >50,000 hours
- ► EMI Suppression
- ► In-rush current limiting



150 and 200 Watts DC Power

A highly reliable, state-of-the industry design, the Classic Series is available in two catalog series with six popular outputs.

A 150 watt convection-cooled power supply and a 200 watt fan-cooled design, both come with overvoltage/overcurrent protection, a "U" channel chassis, made of 0.125" thick aluminum alloy with a clear chromate finish and mounting on sides.

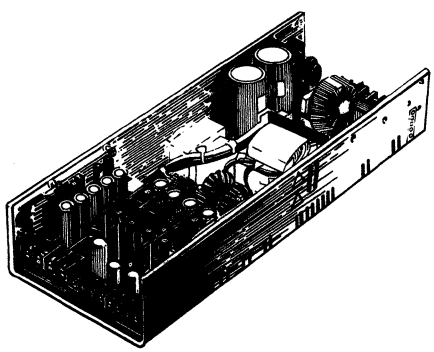
400A "Spectrum" Series



- ► 4-Wide Band Adjustable Outputs Plus 5V Primary
- ► Perfect for R & D Work and Production Use!
- ► 120 power supplies in one

Standard Features

- ► All auxiliaries wide band adjustable
- ► Power fail/remote inhibit
- ► Compact size 2.5" × 5.0" × 13.0"
- ► All outputs current limited
- ► All outputs floating
- ► Worldwide input capability 95-132/190-264 VAC, 47-63 Hz
- ► 300 VDC operation — consult factory
- ► Field selectable, for 115/230 VAC input
- ► High temperature burn-in
- ► 20 millisecond minimum hold-up time at nominal line
- ► In-rush current limiting
- ► Remote sense on main 5V output
- ► Built-in OVP on main 5V output
- ► Calculated MTBF at 25°C, >50,000 hours

Blue-Line "Open-Frame" Series

Standard Features

- ► 15 to 350 Watts of Linear Power
- ► Adjustable output voltage
- ► Floating outputs — most models
- ► Selectable power input
- ► AC input 115/230 Vac selectable
- ► Most models UL recognized

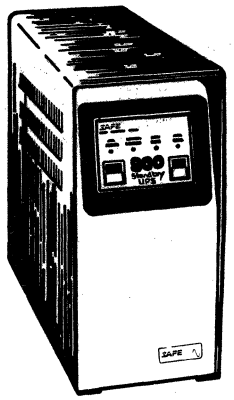
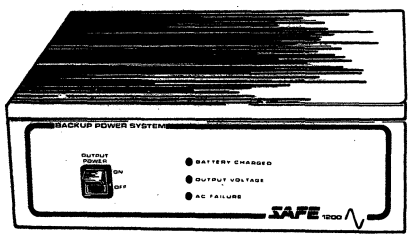
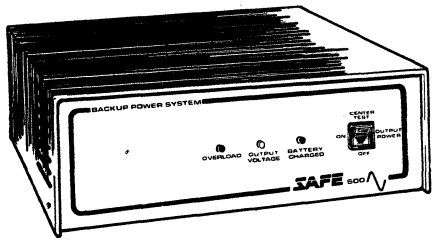
SAFE Standby Power Supplies







- Fast transfer time.
- EMI/RFI surge/spike protection.
- Multiple output receptacles to protect more than one piece of equipment.
- Simple on/off switch operation.
- Pulsing signal alerts user of power failure; burst tone sounds within 1 minute of depletion.
- Portable, compact design.

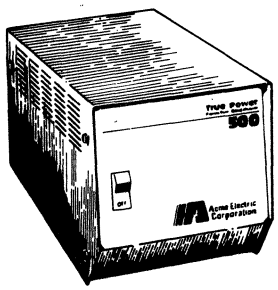
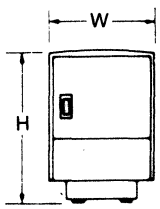
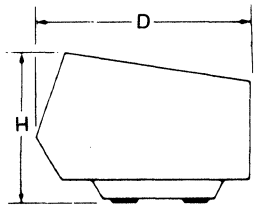
True-Power® Power Line Conditioners

11 For Precise Voltage Regulation With Excellent Transient Suppression

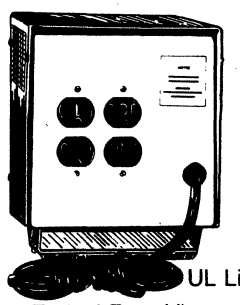




Front View



Side View



UL Listed

Typical Rear View

Models 250 to 2000 VA

Standard Features

- Reliable, regulated output voltage when input voltage varies, even to brownout levels.
- Noise rejection effectively suppresses transients, spikes and surges.
- Rapid response to line and load changes.
- Inherent overload and short-circuit protection without thermop protectors, fuses, or circuit breakers.
- Sinusoidal output features less than 3% total harmonic distortion.
- Five sizes available — 250 VA thru 2 kVA.

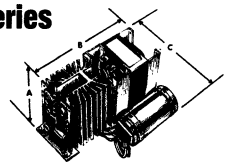
Single Output High Power Brute Series

Size Chart (Inch/mm)

Model	A	B	C
Brute I	6.75/171.5	11.00/279.4	7.66/194.5
Brute II	6.75/171.5	12.00/304.8	7.66/194.5
Brute III	10.00/254.0	14.00/355.6	11.12/282.6



The Brute series with remote sensing provides well regulated high current DC that is continuously adjustable over either a 2 to 25 or 5 to 50 volt range. They can be set for either constant voltage or constant current operation. Brute can be used as a battery charger. Adjustable damping for inductive loads makes Brute attractive for driving relays, solenoids, and motors. Reliable SCR regulators are used to provide precision regulation (± 0.1%) with maximum efficiency (75%). A series inductance and a capacitor filter circuit provide low noise operation over all load and line conditions. **AC input:** 105-130/210-260 volts AC, 1 phase, 47-63 Hz. **Regulation (line and load):** ± 0.1% or 50mV. **Ripple:** 1% or 500mV rms max. **Overload Protection:** by adjustable current limiting. **Controls:** current limit adjust 0 to 100%; output voltage adjust 10 to 100%.

External Power Conversion

Use of external power conversion products in future designs can:

- ► allow size and weight reduction of the end product
- ► eliminate hazardous voltages, heat and magnetic interference from the end product
- ► reduce the time and cost needed to obtain agency approvals
- ► enhance MTBF values of the end product

Case Dimensions - Inches (mm)

Size No.	Width (W)	Length (L)	Height (H)
3	2.20 (55.9)	1.88 (47.8)	1.96 (49.8)
5	2.55 (64.8)	2.89 (73.4)	1.88 (47.8)
7	2.67 (67.8)	4.72 (119.9)	2.22 (56.4)
7-D	2.67 (67.8)	4.73 (120.1)	2.22 (56.4)

External Linear Power Supplies

Ault's Linear Power Supplies provide regulated, filtered DC outputs performing the total power conversion necessary for the electronics of today. Either wall plug-in or desk top models are all UL and CSA approved. Output channels are provided by screw terminals or output cord with connector. Typical applications include modems, microprocessor based systems, computer peripherals, telecommunication products, security systems among others.

Applications

- ► Modems
- ► Telecommunications Products
- ► Computer Peripherals
- ► Security Systems
- ► Data Communications Products
- ► Teller Terminals
- ► Microprocessor Controlled Systems
- ► Test Equipment
- ► Multiplexers

Advantages

- ► Keeps hazardous line voltage out of your product
- ► Makes product changes possible without having to resubmit to safety agencies
- ► Increases space for other components in your product
- ► Improves aesthetic appearance and portability
- ► Reduces size and weight of your product
- ► Keeps power supply heat out of your product for increased life
- ► Tamperproof power source
- ► Reduces product design time
- ► Allows for world-wide uniformity

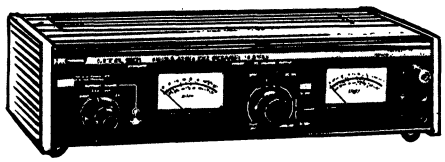
Model 1601 Multi-Purpose

NEW

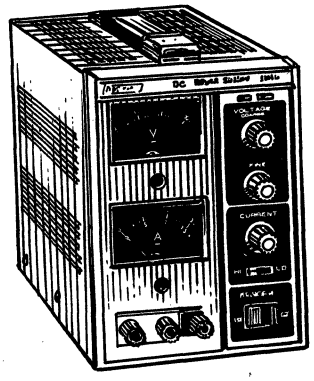


► Isolated 0-50 VDC, Continuously Variable; 0-2 A in Four Ranges
► Fully Automatic Shutdown, Adjustable Current Limit
► Perfect for Solid State Servicing

Specifications. Input Voltage: 105-125 VAC, 60 Hz, 210-250 VAC, (50/60 Hz version available as special order item). **Output Voltage:** 0-50 VDC, continuously variable; two meter ranges, 0-25 and 0-50 VDC. **Output Current:** 0-2 A in four ranges—0-50 mA, 0-0.2 A, 0-0.5 A, 0-2 A. **Load Regulation:** Minimum, 0.05%; maximum, 0.1%; typical, 0.07%. **Line Regulation:** 0.02% typical from 105 to 125 VAC with output of 50 VDC and 2 A. **Ripple:** 5 mV peak-to-peak. **Temperature Coefficient:** .002% of output voltage per °C at 50 volts. **Dimensions (H × W × D):** 3.8″ × 14.1″ × 10″ (9.8 cm × 36 cm × 25 cm). **Weight:** 11 lbs. (5 kg). CSA approved.
731-1601. Model 1601 ..... **EACH 485.00**

Model 1630

NEW



► Excellent Regulation
► Low Ripple Characteristics
► Regulated Outputs—Constant Volt or Constant Current
► Two Current Ranges on 1610 and 1630
► Pre-Regulator—Limits Internal Dissipation for Higher Reliability
► Isolated Output—Either Polarity May Be Floated or Grounded
► Overload Protection—Fully Adjustable Current Limiting (from 5% to 100% of Maximum Output Current) Protects Circuit Under Test and Power Supply
► Reverse Polarity Protection—Prevents Damage to Power Supply from External Voltage of Reverse Polarity
► Parallel or Series Connection Flexibility—Two Models Can Be Hooked Up to Provide 0-60 V 1A or 3 A, or 0-30 V 2 A or 6 A Outputs

Applications: Electronics servicing, electronics manufacturing, design lab, education, battery charging. Monitors current and voltage simultaneously. Can be used for battery replacement, test and adjust modules or sub assemblies, incoming inspection, breadboards, experiments, or as a battery charger for lead-acid, nickel-cadmium or some alkaline types. **Specifications. Output Voltage:** 0 to 30 VDC, coarse and fine adjustment. **Output Current:** HI Range—0 to 3 A; LO Range—0 to 1.5 A. **Constant Voltage Operation. Voltage Regulation Line (110-130 V):** ≤ 0.02% + 2 mV. **Load (no load to full load):** ≤ 0.02% + 3 mV. **Recovery Time:** ≤ 200 μs typical. **Ripple Voltage:** Peak-to-Peak—≤ 2 mV; RMS—≤ 1 mV. **Temperature Coefficient:** (0° to + 35°C), 5 mV/°C typical. **Constant Current Operation. Adjustable Current Limits:** 5% to 100%, (0.15 A to 3 A). **Current Regulation:** Line (110-130 V)—≤ 5 mA typical, ≤ 9 mA max; Load—≤ 5 mA typical, ≤ 9 mA max.; Current Ripple—≤ 3 mA typical. **Protection:** Reverse polarity protection, Current limiting. **Metering. Voltmeter Range:** 0 to 32 V. Accuracy: ± 2.5%. **Ammeter:** HI Range—0 to 3.2A; LO Range—0 to 1.6 A. **Accuracy:** ± 2.5%. **Power Requirements:** 110/120/220/240 VAC ± 10%, 50/60 Hz. **Power Consumption:** Approx. 170 W or less at full load. **Temperature Range. Operation:** 0° to + 40°C. **Storage:** – 15° to + 70°C. **Dimensions (H × W × D):** 6 3/4″ × 4 11/16″ × 12″ (172 mm × 119 mm × 305 mm). **Weight:** 11 lbs. **Accessories Supplied:** Hook-up leads, 1 red, 1 black, Spare Fuse, Instruction Manual, Schematic Diagram and Parts List.

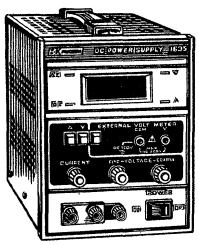
Model 1650 Triple Output Power Supply



Triple output—functions as 3 separate supplies. Fully automatic, current-limited overload protection. Features an exclusive tracking circuit, fixed output 5 VDC, 5 A, and two 0-25 VDC outputs at 0.5 A. All three outputs may be connected in series or parallel, and both positive and negative terminals of each are fully isolated in all models. **Specifications. Input Voltage:** 105-125 VAC, 60 Hz. **Output Voltage:** 5 V Supply—5 VDC – 0/ + 2%; A and B Supplies—0 to 25 VDC. **Output Current:** 5 V Supply—5 A max.; A and B Supplies—0.5 A current limited. **Regulation (No Load to Full Load):** 5 V Supply—Less than 3% (150 mV); 25 V Supplies—Less than 0.1% (25 mV). **Noise Ripple:** 5 V Supply—Less than 10 mV rms; 25 V Supplies—Less than 5 mV rms. **Meter Accuracy:** ± 5% of F.S. **Dimensions:** 3.8 × 14.1 × 10″. **Weight:** 11 lbs. CSA Approved.

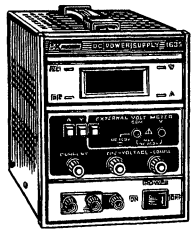
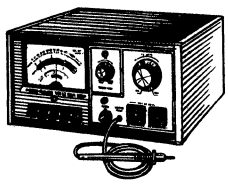
Model 1635 General Purpose Power Supply



► Excellent Regulation
► Low Ripple Characteristics
► Regulated Outputs—Constant Volt or Constant Current
► Built-in Metering—Digital on 1635
► Pre-Regulator—Limits Internal Dissipation for Higher Reliability
► Isolated Output—Either Polarity May be Floated or Grounded
► Overload Protection—Fully Adjustable Current Limiting (From 5% to 100% of Maximum Output Current) Protects Circuit Under Test and Power Supply
► Reverse Polarity Protection—Prevents Damage to Power Supply from External Voltage of Reverse Polarity

Specifications. Output Voltage: 0 to 30 VDC, coarse and fine adjustment. **Output Current. Range:** 0 to 3 A. **Constant Voltage Operation. Voltage Regulation:** Line (110-130 V)—≤ 0.02% + 2 mV; Load (no load to full load)—≤ 0.02% + 3 mV. **Recovery Time:** ≤ 200 μs typical. **Ripple Voltage:** Peak-to-Peak—≤ 2 mV; RMS—≤ 1 mV. **Temperature Coefficient:** (0° to + 35°C), 5 mV/°C typical. **Constant Current Operation. Adjustable Current Limits:** 5% to 100%, (0.15 A to 3 A). **Current Regulation Line (110-130 V):** ≤ 5 mA typical, ≤ 9 mA max. **Load:** ≤ 5 mA typical, ≤ 9 mA max. **Current Ripple:** ≤ 3 mA typical. **Protection:** Reverse polarity protection, Current limiting. **Metering. Type:** 3 1/2 digit LED Display 0.5″ high. **Functions:** Volts, Amps, External Volts. **Voltmeter Range:** 0 to 199.9 V. **Voltmeter Accuracy:** ± (0.5% + 2 digits). **Ammeter Range:** 0 to 19.99 A. **Ammeter Accuracy:** ± (0.5% + 2 digits). **Power Requirements.** 110/120/220/240 VAC ± 10%, 50/60 Hz. **Power Consumption:** Approx. 175 W or less at full load. **Dimensions (H × W × D):** 6 3/4″ × 4 11/16″ × 12″. **Weight:** 11 1/4 lbs. **Accessories Supplied:** Hook-up leads, 1 red, 1 black, spare fuse, instruction manual, schematic diagram and parts list.
731-1635. Model 1635 ..... **EACH 349.00**

Model 1655 Isolated-Variable AC Power Supplies

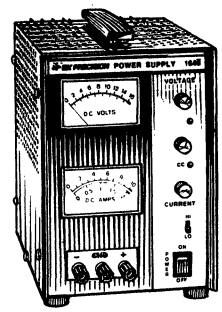


NEW

► Power Line Leakage Tester
► Variable-Isolated Output—0-150 VAC
► 3 Amp Continuous, 4 Amp Intermittent Output
► Built-In Solid State Soldering Iron Temperature Control
► Expanded Leakage Scale
► Circuit Breaker Overload Protection
► Displays Volts, Amps, VA, Leakage
► Two Volt-Amp Ranges (0-240, 0-480) for Convenient Load Requirements

Performance testing at normal, low and high line voltages. Troubleshooting equipment that blows fuses at normal line voltage. Bench testing and repair of equipment which operates at other than 120 VAC (e.g. 24 VAC Class II industrial control equipment). Troubleshooting of defects that occur only at low or high line voltages. Testing excessive or normal current drain in equipment. Incoming inspection of equipment to verify its electrical load specification. **Specifications. Voltage Adjustment Range:** 0-150 VAC, with input at 120 VAC. **Output Isolation:** leakage less than 0.1 mA (25°C, 50% relative humidity). **Current Ranges:** 0-2 A, 0-4 A. **Maximum Current (Isolated):** 3 A continuous, 4 A intermittent (0-130 V). **Peak Current (Inrush):** 30 A max. (inrush limited to one cycle at 30 A). **Voltage/Current Sensing:** Sine wave average, calibrated in RMS. **Volt-Amp Ranges:** 0-240 VA, 0-480 VA (voltage set at 120). **Leakage Range:** 0 to 5,000 microamps (expanded in 100-500 microamp portion, compressed to 5 mA full scale). **Meter:** 4 1/2″ multicolor scales, overrange protected. **Meter Accuracy:** ± 5% full scale (volts and current) ± 5% at 500 microamps (leakage). **Solder Iron Temperature Control:** 70%-99% of power line (100 W max.). **Power Requirements:** 120 VAC ± 10%, 60 Hz, 600 VA at maximum output. **Dimensions (H × W × D):** 12″ × 6″ × 11″ (30.5 cm × 15.2 cm × 28.0 cm). **Weight:** 22 lbs. (10 kg).
731-1655. Model 1655 ..... **EACH 449.00**

Model 1646 0-16 VDC, 0-10 A, Single Output Power Supply



NEW

► Continuously Variable Voltage
► Continuously Variable Current
► Operates in Constant-Voltage and Constant Current Modes
► Analog Meters for Voltage and Current Monitoring
► 2 A and 10 A Current Range Limits
► Ideal as Bench Source for Servicing High-Performance Car Audio Equipment, Land Mobile Radio, CBs, Radar Detectors, Circuit Boards

Specifications. Constant Voltage Mode. Output Voltage: 0 V - 16 V, continuously variable. **Load Regulation:** ± (0.04% + 2 mV). **Line Regulation:** ± (0.2% + 2mV), 108-132 VAC. **Noise and Ripple:** ± 1 mV rms (8 mV pp). **Constant Current Mode. Current Limit:** 10 A Range—0.5-10 A adjustable; 2 A Range—0.1-2 A. **Load Regulation:** ± (0.4% + 5 mA). **Line Regulation:** ± (0.4% + 5 mA). **Noise and Ripple:** 1 mA rms (8 mA p-p). **Metering (2 Meters provided). Voltmeter Range:** 0-17 VDC. **Accuracy:** ± 5% of Full Scale. **Ammeter (2 ranges, switch-selectable):** 2 A Range—0 to 2.1 A; 10 A Range—0 to 11 A. **Accuracy:** ± 5% of full scale. **General. Protection:** Protection against reverse polarity, overvoltage, short circuit. Current limiter, fused primary. **Power Requirements:** 100, 126, 220, 240 VAC 50 60 Hz, 350 W. **Dimensions:** 8 3/4″H × 5 7/8″W × 11 3/4″D (22.2 cm H × 15 cm W × 29.8 cm D). **Weight:** 18.75 lbs. (8.5 kg).

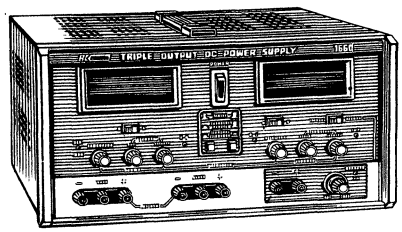
Model 1660 Triple Output Power Supply



► Excellent Regulation
► Low Ripple Characteristics
► Two 0-30 VDC, 2 A Sections Capable of Independent or Tracking Operation (Master & Slave)
► One 4-6.5 VDC, 5 A Section
► Switchable Series/Parallel Operation—30 V Sections
► Adjustable Current Limit Controls—30 V Sections
► Two 3 1/2 Digit LED Displays—One Reads Volts or Amps of "Slave" Supply—One Reads Volts or Amps of "Master" Supply or 4 V-6.5 V Supply
► Constant Current and Constant Voltage Indicators—30 V Sections

Specifications. Output Voltage Range: 0 V (+ 0/ – 30 mV) to 30 V + (3% to 7%) (Master & Slave). **Output Current Limit Range:** OA (+ 0/ – 30 mA) to 2 A + (3% to 7%) (Master & Slave). **Load Regulation:** (Constant voltage) ≤ 0.01% + 3 mV (Master & Slave). **Line Regulation 108-132 V:** (c.v.) ≤ 0.01% + 3 mV (Master & Slave). **Load Regulation:** (Constant current) ≤ 0.2% + 3 mA (Master & Slave). **Line Regulation 108-132 V:** (c.c.) ≤ 0.2% + 3 mA (Master & Slave). **Ripple Current (at 108 V):** (c.c.) ≤ 3 mA RMS (Master & Slave). **Master/Slave Tracking:** (Series) ± 0.2% + 10 mV. **Output Voltage Adj. Range:** (4-6.5 V) from 4 V ± 5% to 6.5 V ± 5%. **Load Regulation:** (Constant voltage) ≤ 10 mV (4-6.5 V), (0-5 A Load). **Line Regulation 108-132 V:** (c.v.) ≤ 10 mV (4-6.5 V). **Ripple & Noise:** ≤ 2 mV RMS (4-6.5V). **Over Voltage Protection Threshold:** 6.8 V to 7.3 V. **General. Power Requirements:** 110/120/220/240 VAC ± 10%, 50/60 Hz. **Power Consumption:** Fully loaded approx. 320 W. **Protection:** Reverse polarity and current limiting. **Dimensions (H × W × D):** 12.4 × 15 × 6.5″. **Weight:** 10 lbs. **Accessories Supplied.** Two (2) 5 A, 250 V fuses (spares). Three (3) sets of leads. Manual. Schematic & Parts List.

UL and CSA Listed Plug-In Power Outlet Strips

Grounded, pre-wired outlet boxes can be plugged in anywhere to give a convenient source of power. For use in home, office, shop or laboratory. Ready to use; easy snap-on mounting. Units are grounded electrically and mechanically. Built-in circuit breaker for overload protection. Underwriters Laboratory Listed 977E. Rated 15 amps at 125 volts. Non-corrosive extruded aluminum housings with baked-on silver gray (chip-proof) P.P.G. enamel; equipped with snap-on adjustable mounting hardware. LC-Series is U.L. Listed. Type LC4 is 10 × 2 × 1¾″; mounting center is 9″. Type LC6 is 13 × 2 × 1¾″; mounting center is 12″. Types UL207 and UL2064 have a pilot light. All types except UL100 and UL205 have a built-in switch. Units are 1¾ × 1⅝ × 9½″long except UL204 and UL207, 1¾ × 1⅝ × 12″; UL2064, 1¾ × 1⅝ × 72″; UL401, 1¾ × 1⅝ × 48″. Boxes have 6 or 15 foot cord attached (see table).

Standard-Line Plug-In Outlet Strips

Just plug in anywhere- these handy outlet boxes give you the power you require. All are ready to use in the shop, laboratory, office or home. Cases are made of heavy duty aluminum, finished in gray. Units are mechanically grounded and come with fuse or circuit breaker protection, except Type 100 which has ground outlets only. All are 3-wire grounded. Rated 15 amps, 125 volts. Types 100 and 101 are 8⅝ × 2 × 1¾″; mounting centers are 8¼″. Types 204 and 207 are 13⅝ × 2 × 1¾″; mounting centers are 12⅜″. All boxes have attached 6 or 15 foot cord (see table).

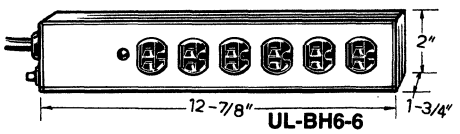
*15' Cord

Hospital Grade Electrical Outlet Strips

Brooks hospital grade electrical outlet strips are designed for use in hospital and laboratory environments. Units have hospital grade receptacles and plugs. Each has a built in circuit breaker and a 14/3 SJT cord. Units feature aluminum housing with a baked on white enamel and snap-on slide-off mounting. Maximum electrical rating is 15 amps 125 volts, 60 Hz, and 1875 watts. 6 foot cord. U.L. listed.



Stock No.	Mfr.'s Type	No. of Outlets	Dimensions			EACH	
			L	W	H	1-9	10-49

533-7203	UL-BH6-6	6	12 7/8"	2"	1 3/4"	52.35	48.35

Above units also available with 15' cord.

Surge Stoppers

Surge stopper features easy installation, parallel hook up to prevent power interruptions during a failure mode, fast response time, 4 or 6 outlets, 15 amp circuit breaker, beige noncorrosive aluminum housing, and master combination switch pilot light. UL listed 1449. Meets IEEE A and B specifications.

Models VCN4-6, VCN6-6, VCN4-15 and VCN6-15
Surge Specification. Maximum Surge Voltage: 6000 V. **Clamping Surge Voltage:** 325 V. Maximum Surge Dissipation. 70 Joules, one time; 25 Joules repeated usage, self restoring. Common and normal mode. **Noise Specifications:** 100 kHz-30 Mz, 10-40 dB normal mode.

*Switch/pilot light located on 44" remote

Models BN4-6, BN6-6, BN4-15 and BN6-15

Surge Specification. Maximum Surge Voltage: 6500 V, clamping level (constant) 200 volts, 1 nanosecond response time. **Peak Surge Current:** 20,000 amperes. Common and normal mode protection indicator light to show surge suppressor is functioning properly. UL approved. **Noise Specifications:** 100 kHz-30 Mz, 10-60 dB common and normal mode.

FAX Protector

Incorporates either VCN or BN Series protection with a FAX Protector.
Specifications
Internal crossover type connection, can be used with standard telephone lines and most telephone systems. Universal type connector with 2 pins to 8 pins, also accepts keyed type. **Clamping:** Normal mode—330 volts @ 1 ma max. Tip-ring—500 volts @ 25 amps max. Common mode—165 volts @ 1 ma max. Tip or ring to ground—250 volts @ 25 amps max. **Maximum surge:** Waveform—8 × 20us non repetiive. Max voltage—10,000 volts. Max current—2,500 amps. Joule rating—16 joules with a 10 × 1,000 us waveform. Noise interference—100HZ to 1 MHZ = 20 DB, 2MHZ to 20 MHZ = 60 DB, 25MHZ to 80 MHZ = 40 DB.

PAC Series

► VDE, IEC, U.L. and CSA Approved
► FCC Class B and VDE 0871 Class B Conducted and Radiated EMI Filtering
► Worldwide AC Input Ranges 90-132/180-264VAC with Auto-Switchover - No taps or Switches

These fully enclosed switching power supplies have a safe, ultra-compact design. Their extremely versatile output configurations are made for your tough and varied applications. The IEC AC input connector and VDE approved On/Off switch mean that no additional AC system wiring is required. Other features include an internal fan for full system cooling, high peak current disk drive outputs (as well as 3 terminal type closely regulated outputs), full load burn-in and a 2-year warranty. Plus, with the PAC Series, agency approvals are very easy since all critical parameters are controlled within the supply. There is an optional remote turn-on for add-on applications such as hard disk sub-systems. AC powerfail signal is provided on 150 and 185 watt units. **DIMENSIONS. 85/105 Models:** 5.75 × 3.70 × 4.20″; 2.1 lbs. **150/185 Models:** 10.00 × 4.00 × 4.10″; 3.0 lbs. **SPECIFICATIONS. AC INPUT:** 90-132/180-264VAC with fully automatic switch-over (no switches or taps required), 47-63 Hz, single phase. Input connections are made through standard IEC320/CEE-22 international type input connector. **AC SWITCH:** The input AC is controlled by a standard VDE approved DPST rocker switch. In addition, a remote turn-on option is available which allows the unit to be switched on by the application of a + 5V logic signal. It is particularly useful for add-on systems (hard disks, etc.) where the remote turn-on line is simply connected to the + 5V of the main computer.

PAC 85/105 **PAC 150/185**

Notes:

A: Full regulated output. Voltage adjustable from 4.5V to OVP trip point. Initial setting of + 5.0V is ± 1.0%.

B. Quasi-Regulated output requires 20% minimum load to regulation specs. An additional cross regulation factor of ± 3.0% must be added in those applications where the main + 5V output varies ± 25%.

C: Fully regulated output utilizing fixed, 3 terminal regulator.

D: Fully isolated output. May be connected in series with other outputs for higher voltage applications. May be connected in parallel with another output if both outputs are the same voltage and quasi-regulated.

Options:

1. Mating AMP output connectors with pins are available.
MODEL 18-30234-0013. For PAC 85 and PAC 105.
744-0002 ..... **EACH 7.00**

MODEL 18-30234-0016. For PAC 150 and PAC 185 (these power supplies require 2 output connector kits).
744-0003 ..... **EACH 10.00**

2. A mating IEC 320/CEE-22 type AC input plug and cord set is available. This 6 ft. cord set comes with a standard 3-prong ground plug.
744-0004. MODEL 20-30793-0001 ..... **EACH 6.00**

3. Remote turn-on: This remote turn-on option allows the unit to be switched on by the application of a + 5VDC logic signal. 'ON' = 2.4 to 5.5VDC @ 25mA (5V). 'OFF' = 0 to 0.8VDC. This feature is particularly useful in add-on disk systems where the remote turn-on line is simply connected to the + 5V of the main computer. Add suffix 'R' to the mfr.'s part number for this non-stock option.

Value Line Switching Power Supplies

These VDE, IEC, UL and CSA approved switching power supplies feature full load burn-in and a 2-year warranty. V-Series types have high peak current disk drive outputs, as well as 3 terminal type closely regulated outputs. An internal AC fuse is provided on all units for input protection. All outputs are protected against the Class A conducted EMI filtering. **Dimensions. VFA Types:** 7.75 x 1.90 x 4.25″; 1.5 lbs. **VHA Types:** 8.40 x 2.20 x 4.60″; 1.6 lbs. **VKA Types:** 10.40 x 2.20 x 4.60″; 1.9 lbs. **VCA Types:** 6.3 x 3.90 x 1.65″; 14 ozs. **SPECIFICATIONS. AC Input:** 90-132/180-264VAC user selectable, 47-63 Hz single phase. **Overload Protection:** Fully protected against output overload and short circuit. Automatic recovery after removal of fault. **Reverse Voltage Protection:** All outputs protected against inadvertant application of reverse voltage. **Input Protection:** Internal AC fuse provided on all units. **Current Limit Adjustment:** Built in potentiometer factory set to begin current limiting at the following peak power output minimum under nominal line conditions. **VFA Series:** 130 Watts. **VHA Series:** 140 Watts. **VKA Series:** 155 Watts. **VCA Series:** 55 Watts. **Efficiency:** 70% ± 5% depending on model and load distribution. Measured at 100% of rated power. **Overvoltage Protection:** Built in on + 5V outputs with firing point set at 6.2V ± 0.6V. **Output Noise and Ripple:** 0.5% rms, 1.5% p-p maximum on all outputs.

*Ratings of these negative outputs assume that other negative output is at no load. Total combined loading cannot exceed 100%; that is, if one negative output was running at 70% of rated load, then the other negative output cannot exceed 30% of rated load.

Notes: A: Full regulated output. Voltage adjustable from 4.5V to OVP trip point. Initial setting of + 5.0V is ± 1.0%. B: Quasi-Regulated output requires 20% minimum load to meet regulation specs. An additional cross regulation factor of ± 3% must be added in those applications where the main + 5V output varies ± 25%. C: Fully regulated output utilizing fixed, 3 terminal regulator. D: Fully isolated output. May be connected in series with any output, and may be connected for (–) or (+) output. May be paralleled when same output voltage and reg. type. (Quasi-Reg. and 3-pin outputs will not share loads if connected together.) E: Dual sensed regulated output. + 5V and + 12V outputs are sensed in combination to provide tighter regulation of the + 12V output. An additional cross regulation factor of ± 2.0% must be added in those applications where the main + 5V output varies ± 25%. Initial setting of + 5V output is ± 1.0%.

SDM/SDS International Specifications

SAFETY SPECIFICATIONS: SDM and SDS Series Safety Design Parameters. **Safety Spacings:** Primary to secondary circuitry 8.0 MM; primary to ground circuitry 4.0 MM; Secondary to ground circuitry 4.0 MM. **Leakage Current:** Input to ground 0.5 MA RMS. **Dielectric Withstanding Voltage:** Input to output 4000VAC RMSf; Input to ground 4000VAC RMS; output to ground 500VAC RMS. These safety design parameters meet or exceed the requirements of the following international safety specifications: IEC 435,Class 1 and 2; VDE 0730 Part 2P, Class 1 and 2; VDE 0806, Class 1 and 2; UL 478; UL 1012; BPO STD #26; CEE-10 Part 2, Class 1 and 2; CSA 22.2, No's 143 and 154; ECMA-57, Class 1 and 2; and IEC 380, Class 1 and 2. **EMI Specifications:** SMD and SDS Series EMI Design Parameters. All Condor International Series Switching Supplies are designed with built-in EMI filters on the input line to reduce conducted emissions to the following maximum levels: 150 KHz to 450 KHz, 54 DB V; 450 KHz to 30 MHz, 48 DB V. These EMI design parameters meet or exceed the requirements of the following EMI specifications down to 150 KHz, FCC 20870, Class A and B (V Series Class A only); VDE 0871, Class A and B. The level B specifications are the most stringent in the industry.

A-suffix models with quasi-regulated secondary outputs for high peak current capability are ideal for powering multiple floppy disk and Winchester systems. B-suffix units have tightly regulated secondary outputs—perfect for applications such as video display units and other linear applications. Versatility is unsurpassed on several models, since their isolated + 12V can be stacked with their existing + 12V to provide 24V. For very high + 12V peak loading applications, the floating 12V can be paralleled with the dedicated + 12V on several models.

Notes

A. Full regulated output. Voltage adjustable from 4.5V to OVP trip point. Initial setting of + 5.0V is + 1.0%.

B. Dual sensed regulated output. + 5V and + 12V outputs (*) are sensed in combination to provide tighter regulation of the + 12V output. An additional cross regulation factor + 2.0% must be added in those applications where the main + 5V output varies + 25%. Initial setting of + 5V output is + 1.0%.

C. Fully regulated output utilizing fixed 3-terminal regulator.

D. Quasi-regulated output requires 20% minimum load to meet regulation specs. An additional cross regulation factor of + 3% must be added in those applications where the main + 5V output varies 25%.

E. Fully isolated output. May be connected in series with any output, and may be connected for (–) or (+) output. May be paralleled with the same output voltage and reg type. (Quasi-Reg and 3-pin outputs will not share loads if connected together).

F. The total current for + 5V* and + 12V* outputs must not exceed 10A (14A PK).

G. The total current for + 5V* and + 12V* outputs must not exceed 13A (17A PK).

H. The total current for + 5V* and + 12V* outputs must not exceed 15A (20A PK).

J. The total current for + 5V* and + 12V* outputs must not exceed 20A (28A PK).

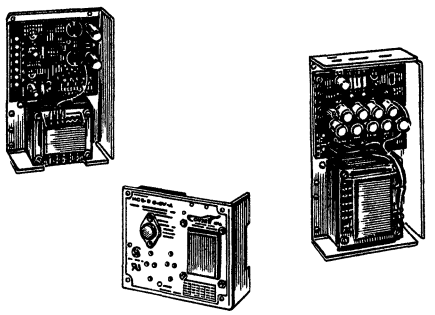
International II Linears



Features

- ► World-Wide AC Input Ranges
- ► World-Wide Safety Standards
- ► Industry Standard Packages
- ► VDE/IEC Transformer Construction
- ► UL Approved
- ► TUV Approved
- ► CSA Approval Pending
- ► 2-Hour Burn-In with Cycling
- ► 2 Year Warranty
- ► Capacitors Have Highest C/V and Ripple Current Ratings in Industry
- ► Anti-Latchup Circuit on Duals and Triples
- ► MTBF of Over 100,000 Hours per MIL Hndbk 217D on Most Units

Specifications

AC Input: 100/120/220/240 VAC + 10%, – 13%. 47-63 Hz. Tolerance for 230 VAC operation is + 15%, – 10%. Derate output current 10% for 50 Hz operation. **DC Ouput:** See charts. **Adjustment range:** ± 5% minimum. **Line Regulation:** ± .05% for a 10% change. **Load Regulation:** ± .05% for a 50% load change. **Output Ripple:** 2 to 15 V unit—5.0 mV PK-PK maximum; 20 to 200 V unit—.02% PK-PK maximum. **Transient Response:** 50 microseconds for 50% load change. **Short Circuit and Overload Protection:** Automatic current limit/foldback. **Overvoltage Protection:** Built-in on 5 V models, set at 6.2 V ± .4 V. Other models use optional overvoltage protection. **Remote Sensing:** On all models 3 Amps and above; open sense lead protection built-in. **Stability:** ± .05% for 24 hours after warm up. **Temperature Rating:** 0°C to 50°C, full rated, derated linearly to 40% at 70 C. **Temperature Coefficient:** ± .01%/ C maximum. **Efficiency:** 5V units – 45%; 12 V and 15 V units—55%; 20 V and 24 V units—60%. **Vibration:** Per MIL-STD-810B, Method 514, Procedure 1, curve AB (to 50 Hz). **Shock:** Per MIL-STD-810B, Method 516, Procedure V.

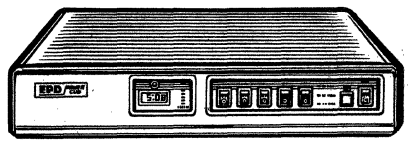
Power Cub (Standby Power Supply)

Features
- ► Slimline design to fit between the CPU and monitor
- ► Power director controls power to CPU and four other peripherals
- ► Capacity load and overload LEDs
- ► System status LEDs with alarm
- ► LCD clock
- ► Emergency light illuminates keyboard when power fails
- ► Surge and EMI / RFI protection
- ► Modem protection
- ► Data Save Software automatically stores data through RS-232 port for MS DOS 2.0 or higher systems
- ► ≤ 4 ms transfer to battery
- ► 10 minute back-up at full load



The Power Cub standby power supply offers unique user-friendly features in an attractive slimline design. The slimline packaging enables installation between the computer and monitor while providing immediate and complete protection of data resulting from blackouts, brownouts, power sags and surges.

When power is lost, the Power Cub transfers to battery in less than 4 ms and alerts the user both visually and with an audible alarm. An emergency light illuminates the keyboard enabling the user to continue operation or perform an orderly shutdown. If the terminal is unattended, the Power Cub will signal the CPU through the serial port, activating the Data Save software which automatically takes the appropriate action to store the data and shut down the system. And it's available in either 300 or 550 Watt rating for 10 minutes of backup power.

The Power Cub's unique features also include: a power director which controls power to the computer and four other peripherals, surge protection, modem protection, LCD clock, and load capacity LEDs.

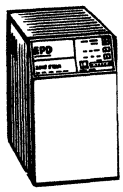
Line Star® (AC Line Conditioner)



The Line Star is a microprocessor-controlled electronic AC line conditioner that protects sensitive electronic equipment such as mini/microcomputers, terminals or test equipment from virtually all AC power problems except total power failure. The attractive, compact design and quiet operation is ideal for the office but rugged enough to endure installation in harsh environments.

The Line Star constantly monitors the AC line and corrects for voltage fluctuations ranging from 84 VAC to 138 VAC while maintaining a constant 120 VAC ± 6 percent output to the load. In addition, the Line Star will handle high inrush currents and crest factors (up to 3.0) with virtually no distortion or voltage drop. Exceptional noise reduction capabilities (130 db common-mode and 60 db normal-mode noise attentuation) is also provided to isolate the critical load from damaging power transients.

Available in 300 VA to 3000 VA. Other unique features include: status and load indicators, audible alarms when the input or output voltages exceed safe operating parameters, automatic shut down when the output voltage exceeds 134 VAC or drops below 106 VAC and full load operating efficiencies greater than 90 percent.

Dimensions (W × D × H). LS-300: 11″ × 17½″ × 6½″; weight—30 lbs. **LS-500:** 11″ × 17½″ × 6½″; weight—34 lbs. **LS-1000:** 11″ × 17½″ × 6½″; weight—52 lbs. **LS-2000:** 16″ × 19½″ × 9¼″; weight—95 lbs. **LS-3000:** 16″ × 19½″ × 9½″; weight—119 lbs.

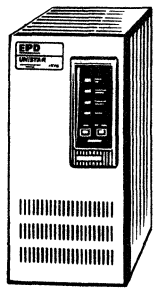
Unistar® (On-Line UPS)



The Unistar uninterruptible power supply represents total and complete power protection for minicomputers and other critical systems. Advanced, 20 kHz transistor pulse width modulated inverter technology provides exceptional line/load regulation and performance usually found in larger more expensive systems.

Ideal for the multiuser and networked computer systems, the Unistar provides a new dimension in power protection. Housed in an attractive space-saving vertical configuration, Unistar has an extremely small footprint and produces very little audible noise (less than 55 db) making it perfect for installation in office environments.

Available from 1000 VA to 3000 VA, Unistar's features include: 8 to 15 minutes of battery backup, complete status indicators with audible alarms, and a static switch that automatically transfers to the utility source upon internal fault or overload.

The one KVA model weighs only 99 pounds, and measures 19″H × 8½″W × 20¼″D. The two and three KVA models weigh 240 pounds, and measure 26¾″H × 10¾″W × 24½″D. This unique tower design is attractive as well as functional, minimizing floor space for installation.

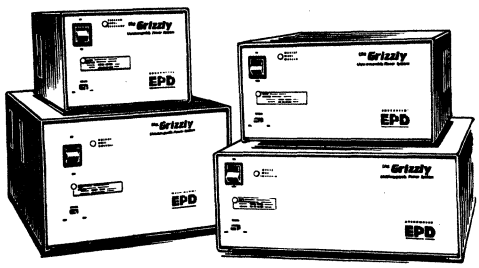
"The GRIZZLY™" Uninterruptible Power Systems



► **The GRIZZLY™—The one species that never hibernates!**

An uninterruptible power supply (UPS) which gives you battery backup power in the event of a slight brownout or a complete power failure. When your power goes down, the GRIZZLY gives you immediate full power while it alerts you with light and a sonar alarm. You'll have adequate time to calmly shut down your system and avoid critical data loss. You'll also have a warm, fuzzy feeling knowing that the GRIZZLY also gives you complete surge protection. **Battery:** rechargeable sealed maintenance-free lead calcium. **Cooling:** convection. **Input Connection:** 6 ft. power cord. **Operating Temperature:** 0 to + 40°C. UL Listed.

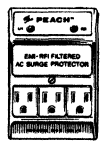
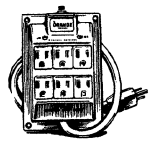
Personal and Professional Series Surge Protectors





EPD's complete line of surge protectors utilize advanced high speed semiconductor technology and metal oxide varistor circuitry to protect your equipment by absorbing over-voltages smoothly, completely and effectively. All products offer LEDs for visual verification that surge circuitry if functioning properly, and, unlike many other low priced surge protectors, provide line-to-line as well as line-to-ground protection. Designed to meet IEEE (Institute of Electrical and Electronic Engineers) standards, EPD's personal and professional series is a complete product line that offers convenient, cost effective power protection for every need.

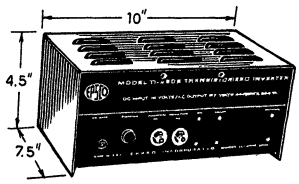
Transistorized Inverter



A dependable source of power to operate standard 117 V, 60 Hz AC equipment. Its 250 VA output is ample for portable TV sets, radios, soldering irons, portable electric tools, CB equipment, PA systems and many other appliances. Features automatic electronic overload protection. When output is accidentally shorted or overloaded, inverter turns off instantly; turns back on when short is removed. Relay in circuit assures 100% reverse polarity protection, unit and battery. Indicator light gives low battery charge warning; warns when output is shorted or overloaded. **Input Voltage:** 12 VDC. **Output Voltage:** nominal 117 V, 60 Hz. **Voltage Regulation:** 15% max., no load to full load constant battery voltage. **Frequency Regulation:** 4 Hz max., no load to full load. **Input Terminals:** for connecting 12 VDC source (battery) to inverter (connecting leads included). **Fuse:** 30 amps. **ON-OFF Switch:** controls DC voltage to inverter. **Output Receptacle:** for appliance plugs. **Size:** 4½″H × 10″W × 7½″D. **Weight:** 13 lbs.

PS-1000 Heavy Duty Industrial Power Supply
DC Output (continuously variable): PS-1000-32—0-32 VDC, 0-30 A; PS-1000-55—0-55 VDC, 0-20 A; PS-1000-125—0-125 VDC, 0-8 A. **Ripple (at max. rated current):** less than 1% rms. **Load Regulation (no load to full load):** PS-1000-32—0.2 V/A; PS—1000-55—0.5 V/A; PS-1000-125—1.0 V/A. **DC Impedance (no load to full load):** PS-1000-32—0.2 ohms; PS-1000-55—0.5 ohms; PS-1000-125—1.0 ohms. **AC Input:** 117 V, 60 Hz. **Overload Protection:** primary fuse, output circuit breaker. **Panel Components:** voltage control knob. Primary fuse, output circuit breaker. On-off switch. Pilot light. 5-way binding posts. Two meters: PS-1000-32—0-50 V, 0-30 A; PS-1000-55—0-75 V, 0-30 A; PS-1000-125—0-150 V, 0-10 A. **Cabinet:** 9¾″H × 14¼″W × 19¼″D. 18 gauge steel, blue hammerloid finish. **Weight:** 113 lbs.

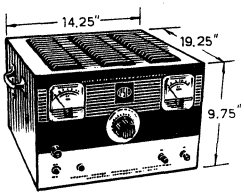
Model EC-1 DC Power Supply
New space-saving design can be used vertically or horizontally. Use the EC-1 for ″warm-up″ and ″check out″ or as a low cost power source for FM and AM radio demonstrations. Features adjustable DC output range, very low ripple, full 5-amperes output, and patented conduction cooling. **DC Output:** 12 VDC, adjustable. **Ripple:** only 0.5% rms at 5 A. **Load Regulation:** output voltage changes only 1.4 volts for each ampere of load current change from no-load to full load. **DC Impedance:** 1.4 ohms, no load to full load. **AC Input:** 117 V, 60 Hz. 6′ line cord with three prong molded plug. **Panel Components:** 3-position voltage adjustment (plus ″off″ position) switch. Pilot light. Wing nut output terminals. **Cabinet:** 10¾″H × 4¾″W × 6½″D. Heavy gauge steel, two-tone gray enamel finish. Rubber feet and carrying handle. **Weight:** 11 lbs.
780-6309. Model EC-1 ..... **EACH 119.50**

Model EC-2 DC Power Supply
Features continuously variable DC voltage, low ripple and a combination voltmeter/ammeter edge-view meter. Patented conduction cooling. Model EC-2 can be used for all auto radio and transistor portable servicing needs. **DC Output:** 0-16 VDC continuously adjustable. **Ripple:** 0.5% rms at 5 A. **Load Regulation:** output voltage changes only 1.8 volts for each ampere of load current change from no-load to full load. **DC Impedance:** 1.8 ohms (no load to full load). **Overload Protection:** secondary circuit fuse. **AC Input:** 117 V, 60 Hz. 6′ line cord with three prong molded plug. **Panel Components:** continuously variable voltage control. 0-20 V/0-10 A combination edge-view meter function switch. Pilot light. On-off switch. 5-way binding posts. **Cabinet:** 10¾″H × 4¾″W × 6½″D. Heavy gauge steel, two-tone gray enamel finish. Rubber feet and carrying handle. **Weight:** 11 lbs.
780-2100. Model EC-2 ..... **EACH 185.50**

Models PS-30, PS-50



General purpose power supplies feature primary fuse overload protection and an 8-position tap switch for flexible voltage adjustment. **DC Output:** PS-30—12 VDC up to 30 A continuous duty; PS-50—12 VDC up to 50A continuous duty. **Ripple:** PS-30—less than 1% rms at max. rated current; PS-50—0.5% rms at max. rated current. **Load Regulation:** PS-30—output varies 0.12 volts/ampere with load change from 6 A to 30 A; PS-50—output varies 0.17 volts/ampere no-load to full load. **DC Impedance:** PS-30—0.27 ohms, no load to full load; PS-50—0.17 ohms, no load to full load. **AC Input (both models):** 117 V, 60 Hz. 8′ heavy-duty line cord with 3-prong molded plug. Cabinet is 18-gauge steel with blue hammerloid finish. Solid carrying handles. Rubber feet. **Size:** PS-30—9¾″H × 14½″W × 14¼″D; PS-50—9¾″H × 14½″W × 19¼″D.
780-6200. Model PS-30. 68 lbs ..... **EACH 557.50**

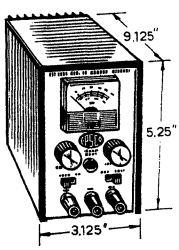
Models PSR-12-25 and PSR-12-50



Regulated transistorized 0.01% load regulation and only .0001 volts ripple. Solid state circuitry throughout including IC Op Amp. **DC Output:** PSR-12-25—0-25 VDC at 0-500 mA; PSR-12-50—0-50 VDC at 0-250 mA. **Impedance:** DC-1 kHz, 0.05 ohms; 1kHz-50 kHz, 0.5 ohms; 50 kHz-500kHz, 3 ohms. **AC Input:** 105-125 V, 50/60 Hz. 6′ heavy-duty line cord with 3-prong molded plug. **Panel Components:** voltage control knobs. 2% accuracy D'Arsonval meter calibrated for two ranges; output voltage and output current. Meter range switch. DC output terminals and chassis terminal. Neon pilot light. On-off switch. Fuse on rear panel. **Overload Protection:** primary fuse, current-limiting. **Cabinet:** 5¼″H × 3⅛″W × 9⅛″D. Recessed panel. 18-gauge steel. Black textured finish. **Weight:** 6 lbs.

Features

- **Engineered for greater reliability**
- **Designed to comply with UL 478 and CSA 22.2 specifications for Data Processing equipment**
- **Multi AC primary input: 100/120/220/240 VAC 47-63 Hz (user selectable)**
- **User replaceable ICs**
- **Remote sensing on all models**
- **Fold back current limiting**
- **Lo-flux transformers for minimum magnetic interference with CRT screens**
- **Industry standard frame sizes for simplified second sourcing**
- **Delivery from stock**
- **Unconditionally guaranteed for two years**
- **Manufacturing and serviced in the U.S.A. and Canada**

Specifications. Input: 100/120/220/240 VAC 47-63 Hz. **Line Regulation:** 0.05% over entire operating range. **Load Regulation:** 0.15% for no load to full load current. **Output Ripple & Noise:** 1 mV peak-to-peak typical DC to 100 kHz. **Remote Sensing:** Standard on all models. **Overload Protection:** SCK crowbar on SV units. Optional on other models (factory installed). **Temperature Co-efficient:** .02%/°C, 0.002%/°C typical. **Over Voltage Protection:** Optional. **Cooling:** Convection cooled. **Isolation:** Floating outputs must not exceed 500 VDC to ground. **Ambient Operating Temperature:** Full rating from 0°C to 50°C. Derate to 50% full rating @ 70°C. **Mounting:** Multi-surface mounting with 8-32 captive hardware. **Package size:** See dimensions below. **Construction:** Heavy gauge aluminum. **Finish:** Clear anodized aluminum.

NOVELL LABS TESTED AND APPROVED NetWare Compatible NOVELL

ITT PowerSystems' VIP™ Series is a culmination of the innovation and experience gained through building quality power products for over 50 years. The VIP™ Executive product line is designed to meet the power protection needs of small to medium business computer systems, local area networks, private business telephone systems and point of sale applications. These high quality units provide from 400VA to 1250VA of true on-line, sinusoidal power. And, each one is backed by the proven experience and resources of ITT, one of the world's largest corporations. **Colors/Finish:** Off white and gray, textured. **Audible Noise:** Less than 46 db. Low battery protection.

Standby Power Systems

300 VA, 500 VA, 800 VA, 1200 VA
- ► **Switches to Backup Power in Less Than 1 Millisecond**
- ► **Protects Against Data Loss Caused by Sudden Line Fluctuations**
- ► **Novell Labs Tested and Approved**
- ► **High Grade Surge Suppressor(480 Joules) to Protect All Three Modes on the Power Line**
- ► **Protection So Complete that Surge Suppressors and Noise Filters are Rendered Obsolete**
- ► **Highline and Lowline Transfer for Output Regulation**

ITT Power Systems' Standby Power Systems (SPS) guarantee information networks the ability to withstand power disturbances and keep their databases in perfect order. With ITT's SPS as an integral part of your network, you can count on effective power in every situation.

The SPS emulates the features of an online UPS while avoiding the high cost, noisy operation, and extensive space requirements generally associated with such units. The ITT PowerSystems' SPS has virtually no restrictions—it can protect any computerized equipment or system from any type of power disturbance. **Transfer Time:** Less than 1 millisecond.

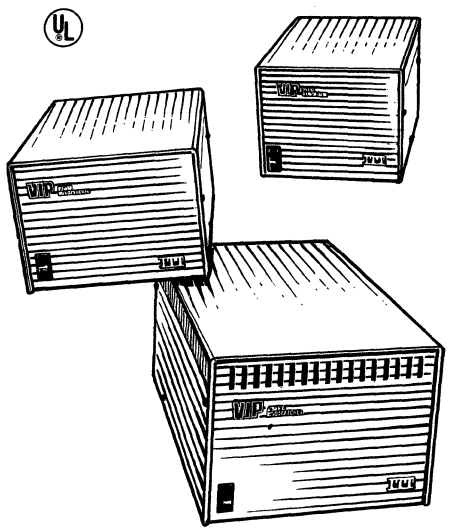
VIP™ Power Conditioners

150VA, 300VA, 450VA, 600VA, 800VA, 1000VA, 1200VA

NEW

- ► **Comprehensive Protection Against Spikes, Noise, and Brownouts**
- ► **Available in a Range of Sizes to Meet Your Specific System Requirements**
- ► **Unconditionally Guaranteed/One-Year Warranty**
- ► **Backed by a Comprehensive Nationwide Support Network**



To protect your system from the ill effects of "dirty power," ITT Power Systems has designed VIP™ Power Conditioners. At a remarkably low cost-per-system, VIP™ Power Conditioners protect against **all** potential power problems except the total loss of the Utility.

The VIP™ Power Conditioner reduces voltage spikes to harmless levels, preventing system damage. All voltage fluctuations are smoothed by VIP™ Power Conditioners—even fluctuations to brownout levels. The result is an effective shielding of systems from "dirty power," including protection from surges, transients and other electrical noise.

Specifications. Output Voltage: 120 VAC. **Regulation:** ± 5%. **Noise Rejection:** Common mode 120 db; transverse mode 60 db. **Response Time:** Instantaneous. **Power Interruption:** Full power maintained up to 3 milliseconds. **Short Circuit Protection:** Approximately 200% of load current—no damage will occur. **Harmonics:** Less than 3%. **Output Receptacles:** NEMA 5-15R; 150 VA, 300 VA—4; 450 VA to 1200 VA—6. **Input Voltage:** 95 to 130 VAC. **Frequency:** 60 Hz.

Multiple Outlet Strips

Industrial multiple outlet strips are ideal for auxillary work stations, assembly line, maintenance and repair, machine shops, test stations, and much more. U.L. listed models distribute power safely and conveniently. Overload protected, built-in 15 amp circuit breaker shuts off power here, not down the line. Rated 1875 watts, 125V, 15 amps. U-ground outlets with electrically-wired ground; phosphor bronze, dual wiping contacts. Double insulated #14/3 'SJT' line cord. Top is baked-on silver paint over a zinc phosphate undercoating, resulting in a hard, corrosion resistant surface. Sides are zinc dichromate and have thick (14 mil) black mylar panels, providing added protection, plus handsome appearance.

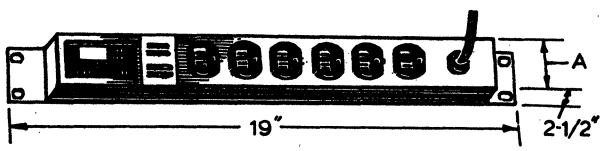
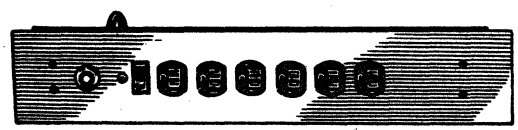
Industrial Rack Mount Outlet Strips U.L. Recognized



J06B0



J60A0

Ideal for computer stations, laboratory test equipment, power control center, rack and cabinet equipment. Fronts are baked-on silver hammerstone paint over a zinc phosphate undercoating resulting in a hard, corrosion resistant surface. Rated 1875 watts, 125V, 15A. Overload protected, built-in 15 amp circuit breaker shuts off power here-not down the line. Mounts in standard 19″ cabinet racks. Double-insulated #14/3 'SJT' line cord on back of unit. All units have on/off switch, indicator light and circuit breaker reset on front plate. U-ground outlets; phosphor bronze, dual wiping contacts. **NOTE: These strips also available from the factory in black.**

Hospital Grade Industrial/Scientific/Medical Outlet Strips

This industrial/scientific/medical series of multiple outlet strips is specifically designed for high-abuse applications. Plugs and receptacles meet or exceed these "Hospital Grade" U.L. tests: Abrupt removal of plug, ground pin retention, terminal strength, assembly security, face impact, ground contact temperature, ground contact resistance, fault current test and mold stress relief. All units have 6-foot double-insulated #14/3 "SJT" line cord. All are overload protected by a built-in 15 amp circuit breaker.

Surge Suppressor Outlet Strips

All Perma Power® Surge Suppressors provide protection to sensitive equipment against both normal mode surges (line to line) and common mode surges (line to ground). Perma Power Surge Suppressors feature single-stage filtering, provided by three metal oxide varistors. Provides protection on all three conductors in a typical 120 VAC circuit. Extended Life models feature four-element, two-stage filtering, provided by a uniquely engineered combination of metal oxide varistors and silicon avalanche diodes. These models assure you of both normal and common mode surge protection, and of an almost unlimited operating life. All models feature a unique positive shutdown mechanism to prevent inadvertent operation of unprotected equipment in the event of a suppression element failure. A visual indication of shutdown is provided by the pilot lamp. Strip models have a 6-foot double-insulated #14/3 "SJT" line cord, master switch and indicator light and act as a power control center. **Case Style and Color (prefix):** P-tan plastic case. R-Tan baked enamel on steel. K-silver and textured black plastic on steel. J-Rack mount baked enamel on steel; black front, silver back. 12 foot power cord on Models 891-1007 and 891-2007. Standard models. Lifetime warranty.

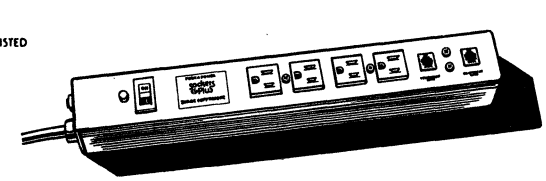
Model RTD410 Communications Surge Suppressor

Now for protection of facsimile, computers with modems and electronic telephones is the Communications Surge Suppressor. It is UL listed for both Surge Suppression (1449) and Secondary Protectors (497). The Surge Suppression portion features the Fail-Safe Automatic Shutdown, and the Telephone Surge Suppressor is dual stage to suppress telephone line surges to a safe, low value. 1800 Watts; 15-amp resettable circuit breaker; 1 nanosecond response time.

891-9110. RDT410 ..... **EACH 72.60**



Perma Power® SPS-500 And SPS-1200

Standby Power Protection System
For mini, micro, and LAN applications. The SPS-500 is the total solution to power line related computer problems with the economy of a standby power system. Protects against blackouts, brownouts, high voltage, transient surges, RFI/EMI noise, and overload. **Safe:** Circuit analyzes the AC line before connecting it to the computer. Features constant monitoring- if the load exceeds the unit's rating during standby, backup is automatically disabled, and a warning is given. Automatic reset and rapid or trickle charge panel LEDs, and audible alarm. **Panel Controls:** Output Power and Backup Power/push to test. **Panel Indicators:** Power Line Normal, Power Line Outrage/Low, Power Line High, System Ready, Rapid Charging, System Overloading, and Surge Suppressor Failed. **Audible Indicator:** Intermittant buzzer for backup, overload, and surge suppressor worn or burned out. Constant buzzer during last 2 minutes of backup time.

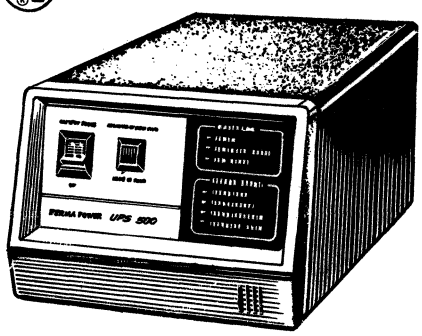
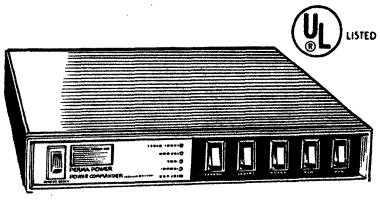
891-9400. SPS-1200 ..... **EACH 1190.00**

SPECIFICATIONS. Backup Rating: 500VA (400W) maximum; 125VA (120W) minimum. **Output Voltage During Backup (125-500VA):** 117 VAC (±10%). **Output Energy During Backup (Rated Loads):** Sine wave RMS equivalent by pulse width modulated square wave. **Inverter Frequency:** 60 HZ (+0Hz/–.7Hz). **Backup Time:** 8 minutes at 500VA; 10 minutes as 400 VA; 25 minutes at 300VA; 40 minutes at 200 VA. **Transfer From Line To Battery:** Less than 1ms total sense and transfer. **Transfer From Battery To Line:** Less than 1ms transfer time. **Battery Type:** Rechargeable sealed maintenance-free lead calcium. **Recharge Time:** 3.5 hours maximum. **Protection Modes:** Normal (lines/neutral); common (line/ground); common (neutral/ground). **Energy Dissipation:** 420 joules (total of components). **Response Time:** 1ns (manufacturer's specification for the intrinsic component material). **Noise Suppression:** 20 dB, 50 KHz-100 MHz **Dimensions:** SPS-500 — 6 × 8 × 16; SPS-1200 — 6 × 8 × 23. **Weight:** SPS-500 — 37 lbs; SPS-1200 — 62 lbs.



Power Commanders™



Two models, RS 562 and RS 562-4. Power Commander Power Control Centers for data equipment protection against transient power line surges and EMI/RFI noise reduction. Provides five outlets for simple hook-up of computer, monitor, and printer plus two auxillary peripherals. Can be controlled by individual component controls or by single master switch. Both RS 562 and RS 562-4 feature Extended Life Surge Suppression for protection of normal and common mode power lines and Fail-Safe Positive Shutdown for prevention of inadvertent operation of unprotected equipment in case of suppressor element failure. **Model RS 562-4** includes additional features — Tele-Line Surge™ protection to protect against phone line transients; Static-Safe™ Touchplate for safe discharge of potentially damaging static electricity; Automatic Overvoltage Shutdown for automatic disconnection within 2 cycles of overvoltage conditions; and Power Minder™ Line Voltage Monitor for visual warning of power line under-and overvoltages. **SPECIFICATIONS Overload Protection:** 15 amp circuit breaker. **Dimensions:** (W × H × D) 12 × 2¼ × 13″ (30.48 × 5.715 × 33.02cm). **Surge Suppressor Specifications. Clamping Threshhold:** 225 Volts. **Response Time:** 5 Pico seconds. **Let-Through Voltage:** 400 Volts peak. **Maximum Transient Voltage:** 6000 Volts. **Power Rating(load of 1875 watts):** 125 Volts, 60Hz. Noise Filtering (better than 20 dB):2-100 MHz.

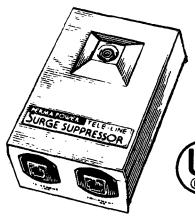
Tele-Line™ Surge Suppressor

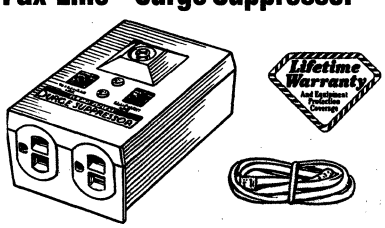


PD 200 protects data communications equipment from transient voltage surges on telephone lines. The Tele-Line™ Surge Suppressor utilizes a 3-element gas tube and 3 Metal Oxide Varistors (MOV) in a coordinated circuit for complete protection. **SPECIFICATIONS. Connectors:** Two RJ-modular Tele-Line™ jacks; 7′ jumper wire included. **Indicator Light:** Earth ground. **Dimensions:** 3⅛″W × 4¾″H × 2¼″D. **Protection Modes:** Normal/metallic (line-to-line); Common/longitudinal (lines-to-ground). **Clamping Voltage:** 180V. **Let-through Voltage[1]:** 350 V. Peak. **Response Time:** 1 nanosecond. **Pulse Life[2]:** 10,000 cycles. **Warranty:** One year. **TEST WAVES.** 1. FCC Docket 19528 (Part 68, Subpart D). 2. I.E.E.E. Standard 587 (8 × 20 μs., 500A., unipolar current wave)
891-9200. PD 200 ..... **EACH 39.00**

Cable-Line™ Surge Suppressor

Protects TV, VCR, Stereo and Satellite from surges on the cable or antenna line and the power line.
Television sets and VCRs manufactured after 1984 usually incorporate sensitive electronics, which are highly susceptible to damage from transient voltage surges during thunderstorms and electric company switching. Additionally, satellite dish systems are highly vulnerable to damage from power surges and lightning, even several miles away. Such surges can pass through to your equipment from its connection to a cable, antenna, or satellite dish as well as through the power line.
Connecting your electronic equipment to a Perma Power CABLE-LINE Surge Suppressor will protect sensitive equipment from surge damage.
891-1115. PTC209 ..... **EACH 59.90**

Fax-Line™ Surge Suppressor



Prevent damage and erratic operation from transient surges on the power line and on the telephone line. Meets the new (July 1987), more stringent UL standards. 1 year warranty.
Specifications. Electrical and Power Line Surge Suppressor. Electrical Rating: 1800 watts. **Energy Dissipation:** 80 joules each mode; 240 joules (total). **Response Time[1]:** 1 nanosecond. **Clamping Voltage (Nominal):** 156V RMS; (220V Peak). **Protection Modes:** Normal (lines/neutral); Common (line/ground); Common (neutral/ground). **Resettable Circuit Breaker:** 15 amperes. **Let-Through Voltage[2]:** 600 volts. **Pulse Life[3]:** 10^6 cycles. **Pulse Life[4]:** 10^4 cycles. **Steady State Power:** 1 watt. **Peak Current[5]:** 6000 amperes. **Maximum Transient Voltage[6]:** Greater than 6000 volts. **Dimensions:** 3⅛″W × 4¾″H × 2¼″D. **Suppression Failure Protection:** Fail Safe Cut Off plus Indicator Light.
Tele-Line Surge Suppressor Connectors: Two Miniature 6-position jacks (For use with RJ-11 connection). **Protection Modes:** Normal/metallic (line-to-line); Common/longitudinal (lines-to-ground). **D.C. Breakdown Voltage:** 140 Volts. **Let-Through Voltage[7]:** 300 volts Peak. **Response Time[1]:** 1 nanosecond. **Pulse Life[8]:** 10,000 cycles. **Jumper Cord:** 7′.

Regulated Linear Dual and Triple Output Series

Features split bobbin transformer design for maximum isolation of outputs from primary (2500V hi-pot tested). Versatile packaging allows vertical or horizontal mounting. Designed for both bench and rack use. Other features include integrated circuit regulation, constant voltage, remote sensing/programming, fully isolated independent outputs for either positive or negative operation, reverse voltage protection, and convection cooling. **Source and load effect combined (regulation-line and load):** ±0.1%. **Periodic deviations (ripple):** 0.01% rms. Completely protected short circuit proof; automatic foldback current limiting. Series of parallel operation. Full rated output 0° to +55°C, ambient. 120/240 VAC, 50/60/400 Hz source. U.L. recognized.

Low cost DC power supplies give you a precise integrated circuit regulator with superior drift characteristics. U.L. recognized to Spec. 478 and 414. Features short circuit protection, automatic foldback current limiting, automatic reset, and isolated, floating output. Low noise and ripple (pard). Designed for both bench and rack use. **Specifications. Source (Input) Voltage Range:** 104-127 VAC; 208-254 VAC (15 watt types, 104-127 VAC only). **Source Frequency Range:** 50-400 Hz. **Source and Load Effect (regulation-line and load) combined:** ±0.1%. **Pard (ripple and noise):** 0.1% pp. **Periodic Deviations (ripple):** 10mV rms; 30, 60, 120 watt (with either positive or negative terminal grounded). **Temperature Effect Coefficient:** 0.03%°C. **Polarity:** may be used positive or negative. **Short Circuit Protection:** automatic circuit protects the power supply if the output is shorted continuously. Automatic return upon removal of short circuit. **Operating Ambient Temperature:** 0°C to +55°C; with typical mounting and natural convection cooling, all units derate linearly to zero amps out at 85°C. **Storage Ambient Temperature:** −40°C to +85°C. **Overvoltage Protection:** available for all models as an option. Provides both transient and power supply malfunction protection.See below. **Recovery Time:** less than 20 μsec., 1/2L to FL. **Output Voltage Adjustment:** ±5% minimum.

Overvoltage Protection
This low cost option for 81 and 83 types (sold above) is easily added. If the output voltage rises 10% or 2 volts (whichever is greater) above the nominal voltage, an SCR crowbar is fired which will reduce the output to below the nominal setting in 10 microseconds.

Solid Power Supplies

Printed Circuit Mounting

Series Regulated Solid Power Supplies are designed for printed wiring board mounting and point of use regulation. Single, dual or triple tracking outputs are available. Solid power supplies feature automatic overload protection, Operation at rated load from −25°C to 50°C ambient. Fully tested and 'burned-in' three times. **SPECIFICATIONS. Source (Input) Voltage:** 115VAC ±10VAC (50 to 400 Hz); **Output Voltage Accuracy:** ±2%; **Operating Ambient Temp.:** −25°C to 50°C; **Temp. Effect Coefficient:** 0.02% per °C; **Storage Temp.:** −25°C to 85°C; **Source (Input) Isolation:** 50 megohms; **Source (Line Regulation):** ±.02% or 2.5mV. U.L. Recognized.

Chassis Mount Power Modules

The 85-Series Direct Chassis Mount Modular Power Supplies are designed for applications where printed circuit mounting is impractical or undesirable. Total epoxy encapsulation is an advantage where high vibration or adverse atmospheric conditions exsist. The convenience of threaded insert mounting and terminal strip connections allows easy prototyping and efficient one-shot design work. Single, dual or triple outputs are available. Single output models come with overvoltage protection. Overvoltage crowbar, set to trip at 6.2V nominal. Specifications for chassis mount models are the same as those for printed circuit mount models.

Sola Silver Line Linears

Features

- Tight Regulation, 0.10% line and load combined
- Full Output Ratings to 50C
- Built-in OVP on 5V models (optional on 12V, 15V, 24V)
- Foldback current limiting
- 100% Four-hours Burn-in
- Warranted for 1 full year
- UL recognized, CSA and TUV
- These models are form, fit and function replacement for most major manufacturers

Specification Summary

- Input AC voltage selectable 100/120/220/230/240
- Input Frequency 47 to 440 Hz
- Ripple 3.0MV maximum p-p
- D.C. output adjustment ±5% minimum
- Transient response time, 50U sec for 50% load changes
- Remote sensing
- Operating Temperature 0 to +50C
- EM/RFI meets FCC Class B and VDE 0871 for Class B
- Shock/Vibration per Mil-STD-810C

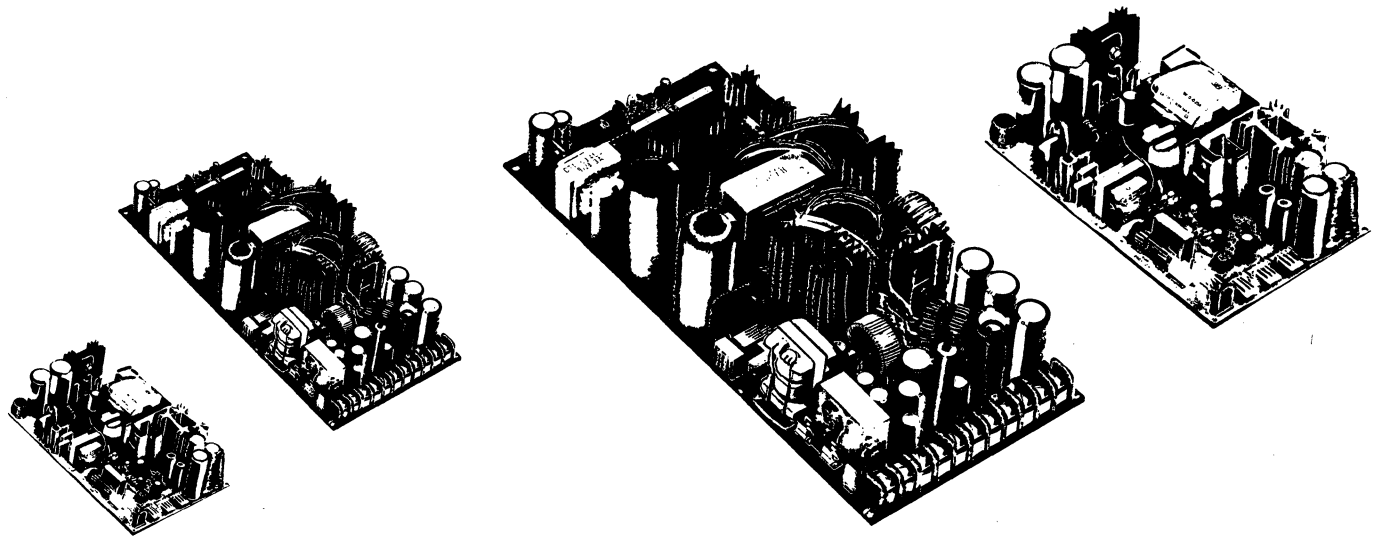
Low Wattage Single and Multi Output Switchers

Designed to provide the industry with a quality power supply at competitive prices.



Features
- ► High Efficiency
- ► Built in EMI Filter
- ► UL Recognized
- ► CSA Certified
- ► VDE Certifications in Process (except 50 watt single output)
- ► Industry Standard Packages
- ► Meets FCC and VDC Class A Emissions
- ► 100% Burn in for 24 hrs.
- ► Dual Input Voltage 115/230 VAC
- ► Over Voltage Protection on +5V Outputs
- ► Short Circuit Protection

Applications
- ► CRT Monitors
- ► Disk Drives
- ► Terminals
- ► Peripheral Equipment
- ► Testing Equipment
- ► Microprocessor Based Systems

Specifications Summary
- ► All Unit Voltage Selectable 90-130 VAC/180-260 VAC; Except for 50 Watt Single Output
- ► AC input Frequency -47-440 Hz
- ► 65% Efficiency Typical
- ► Overcurrent Protection on all outputs
- ► ISMS Hold uptime @ full load
- ► MTBF Greater than 50k hrs. @ full load
- ► In Rush current 40/50 30 Amps/115 VAC 60 Amps/230 VAC 65/90 10 Amps/115 VAC 20 Amps/230 VAC All @ 25°C Ambient Cold Start-Single 50 Watt 20 Amps/115 VAC

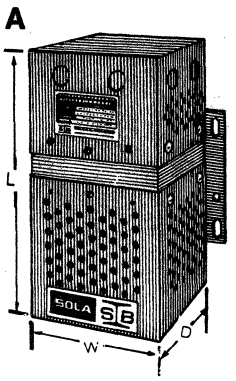
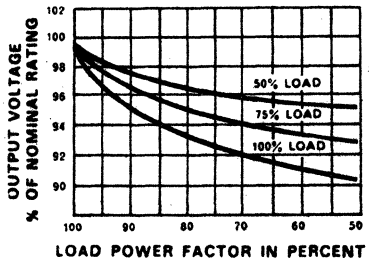
Type CVS (Constant Voltage) Transformers to Solve Any Voltage Problems





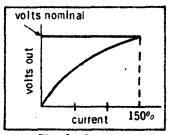


Fig. 2. Overload

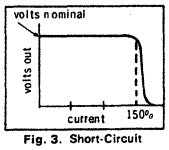

Fig. 3. Short-Circuit

Brown-outs are due to low line voltage caused by power cutbacks; increase of power line transients from lighting or switching of power or equipment; increased speed and sensitivity of new EDP equipment and computers. These factors create the necessity of achieving consistent reliable power—and the constant voltage transformer below can solve that problem. These compact, rugged, versatile voltage transformers can eliminate voltage variations. Static-magnetic voltage regulators accept input variations up to ± 15% and regulate to ± 1%. Response time 1½ Hz(25 msec) or less. CVS: less than 3% harmonic distortion at full load; newer CVS delivers sine wave output; recommended for all AC applications. No moving parts, nothing to service or replace. Figure A exposed core, end housings, screw type terminals in outlet box. See below for cord and receptacle adapter kits for 'A' structures.

Load Power Factor

'Median' value of output voltage will vary from nameplate rating if load has power factor other than that for which the transformer was designed. Load regulation will also be relatively greater as inductive load power factor is decreased. However, resulting median values of output voltage will be regulated against line changes at any reasonable load of power factor. **Change in 'Median' Output Voltage Versus Load Power Factor**

Current Limitation

As a load is increased beyond the rated value, the output voltage drops rapidly to zero. At short-circuit, the output current is limited to approx. 125-200% of rated value. Units can be operated indefinitely at short-circuit without damage.

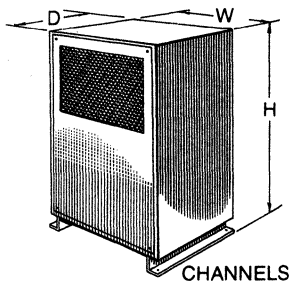
11



1. Minimum clearance behind cabinet, 10" for air flow.
2. Minimum clearance above unit, 16" for air flow.
3. Cable entry from bottom or side.
4. Front and rear panel screened.
5. Channel mounting feet must be used for air flow.
6. Front and rear base must be kept clear for air flow.

Solatron/Acuvolt for Computers

The computer Line Solatron/Acuvolt is designed to meet stringent requirements of data processing equipment. It provides tighter regulation, faster response time to dynamic line and load changes, and most importantly, it clips and filters noise from the incoming line. It is available only in a 3 phase configuration and will regulate loads in a Delta or a WYE configuration. All units are UL Listed and are capable of supplying either Delta or WYE loads. Units contain neither motor nor moving parts, so maintenance is required. Solatron/Acuvolts are available in various sizes from 10-300 KVA.

Specifications

Input Voltage. Nominal 208 to 230 volts 3 line-to-line. **Range:** + 10 – 20% of output setting. **Output Voltage. Nominal:** 208/230 Volts. **Regulation:** ± 1% for any combination of line, load, thermal drift, warm up & frequency. Capable of remote sensing. **Frequency:** 57 to 63 Hz. **Output Voltage. Adjustability:** From 208 to 230 volts. **Transient Response Time:** Starts immediately. Typically complete within 5 cycles. **Power Efficiency (Watts):** 95% typical. **VA Efficiency:** 75% typical. **Load Power Factor:** With little derating—.75 lagging to .95 leading. Without derating—.95 lagging to unity. **Regulation:** Line Regulation ± 1/4%. Load Regulation ± 1/4%. Line & Load ± 1/2%. **Typical Harmonics:** Balanced line & load 3%. Unbalanced line and/or load 6%.

Power Line Monitor

Power Line Monitor identifies dangerous or disruptive power line disturbances that can cause sensitive electronic equipment to malfunction, lose memory or even crash. The monitor pinpoints power failures, low line voltage, high line voltage, voltage spikes, voltage drops or high frequency noise. After the audible alert sounds, flip the monitor over to find the probable causes and solutions for the indicated problem. Can be used to examine potential sites for electronic equipment or to monitor power already being fed to microcomputers, P.O.S terminals, medical and test equipment, word processors or communications systems. The unit is completely portable. To install simply plug into any standard power outlet.

Standard Printing Monitor. Connections: One 3-wire ground input cord plug. **Controls:** 'Clear'. 'test', 'lock', 'alarm', 'printer', 'paper feed', 'clock advance', and 'set'. **Indications:** Eight red LEDs indicating power failure, low line voltage, high line voltage, voltage spike, voltage drop, high frequency noise, high line frequency and low line frequency, audible alarm, thermal printer and external alarm contacts. **Size:** 11 1/8 × 3 3/4 × 3 3/8". **Weight:** 6 1/2 lbs.

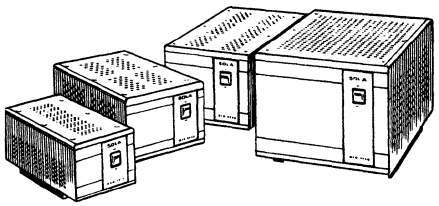
Portable Mini/Micro Computer Regulators

Listed to UL 1012
CSA Certified to C22.2 No. 66
Meets UL 478
Suppresses ANSI/IEEE C62.41-1980 CLASS A and B Waveforms to Safe Levels
Formerly IEEE 587-1980



► **Designed for Micro/Mini Computer Equipment**
► **Protects Against Overloads and Isolates the Load**

These units may be installed in any protected environment. Allow 60cm above and 30cm on either side of the installation. Dimensions of the portable regulators are given below. The line cord has a 3-wire pigtail, therefore the plug is user installed. Designed and built per VDE 0550 and 0805 and 0806 specifications (compatible with IEC 380/435).

Especially designed for office type environment, these minicomputer regulators are quieter than similar models, below normal office levels, and are rated at 45 dB. Common mode noise rejection of 120 dB. Useful in computer applications where noise and transients cause errors; or low voltage and short duration disruptions can cause loss of memory. Regulators are completely portable and easy to install, simply plug regulator in and it's ready to go. Effective capacitance less than 0.1 μfd. Brownout protection is an additional bonus feature. Input line variations of ± 15% are regulated to ± 3% variation on output. Operating range from – 20°C to + 50°C. Full load efficiency of 85%. Includes on-off switch and dual output receptacles. UL listed. (60 Hz meet the intent of IEEE Specs.)

Hard-Wired Mini/Micro Computer Regulators-60 Hz

Listed to UL 1012-CSA-Certified to C22.2 No. 66

The Hard-Wired Minicomputer Regulator provides ultra isolation from both transverse and common mode noise for any type of load. It suppresses transients, protects against over loads and serves as a portable dedicated line. Output voltage is instantaneously regulated to ± 3% for voltage variations as great as ± 15%, supplying excellent brownout protection. The output waveshape is sinusoidal with less than 3% total harmonic distortion. Hard-wired models are designed for wall mounting. Regulator is built around a constant voltage sinusoidal transformer.

PC Regulators

Especially designed for PC applications, this series offers an economical advantage to power conditioning. These units have the same 120 dB common mode noise regulation and 60 dB transverse mode of the mini computer regulators. Suppresses transients, protects against overloads and serves as a portable dedicated line. Output voltage is instantaneously regulated to ± 5% for input voltage variations as great as ± 15%. Output wave is sinusoidal with less than 3% total harmonic distortion. Includes on/off switch and output receptacle. U.L. listed.

EPC Series

► **The EPC provides triple stage filtering and meets ANSI and IEEE 587 category A and B specifications for withstanding surge voltages.**

► **Low output impedance is ideal for switching power supply loads, such as micro and mini computers.**

► **Response time for voltage correction is typically one cycle for a wide input voltage variation.**

► **The EPC has surge current capability for non-linear loads and disk drives.**

► **Typical AC to AC efficiency is 95%.**

► **The EPC has lighted indicators for system status monitoring.**

► **All EPC models conform to stringent UL, CSA and FCC requirements.**

The newest addition to the Sola power conditioning product line is the EPC series of electronic power conditioners, in sizes from 500 VA to 2kVA.

The EPC series features a **micro-processor** based design that maintains output voltage regulation to ±5% with an input variation of +15/−25%. To achieve dynamic regulation, along with common mode and transverse mode noise rejection, the system combines state-of-the-art electronic sensing and control with an isolated transformer.

Specifications

Compact Size. Measuring just 8.75″H × 8.5″W × 12″D, the EPC is available with output capacities of 500, 1000 and 2000 VA. All EPC models are UL-listed, CSA-certified, conform to FCC Class B requirements and feature a limited one-year warranty. The units are available in 60 Hz models rated for nominal outputs of 120, 208, and 240 volts. **Protection. Over/Under Voltage:** Automatic shutdown when input voltage exceeds +24/−40% of nominal line. **Overtemperature:** Automatic shutdown due to high temperature conditions. **Noise Rejection. Noise Band Range:** 1kHz to 1 mHz. **Common Mode Noise:** 140 db. **Transverse Mode Noise:** 60 db. **Warranty:** A limited 1-year warranty covers defects in material and workmanship. **Input. Voltage:** 120 Volt AC. **Frequency:** 60 Hz. **Input Voltage Range:** +15% to −25%. **Control:** AC enable switch with input protection. **Output. Nominal Voltage:** 120 Volt AC. **Frequency:** 60 Hz. **Voltage Regulation:** ±5%. **Distortion:** Less than ½% added to input line. **Power. Efficiency:** 95% typical. **Response Time:** 1 cycle typical. **Overload Capacity:** 1400% One cycle, 700% 10 cycles, 500% 1 second. **Crest Factor Loading:** Maximum 3% peak voltage drop with 3.0 crest factor load. **Dynamic Response:** Output voltage measured continuously and corrected every ½ cycle. **Surge Suppression. IEEE 587-80:** The EPC meets the intent of category A & B, 6000 volt spikes are suppressed to safe levels. **Status Indication. Front Panel Switch Off:** Red. **Over/Under Voltage Protection Activated:** Red. **Overcurrent:** Red. **Overtemperature:** Red. **Turn On Sequence in Process:** Yellow. **Input Voltage Below Specified Range:** Yellow. **Input Voltage Above Specified Range:** Yellow. **System Normal:** Green. **Environmental. Operating Ambient:** 0 to 40°C. **Storage Temperature:** −40°C to 75°C. **Relative Humidity:** 0-95% non-condensing. **Acoustical Noise:** Less than 45db at one meter. **Altitude:** 0 to 8,000 ft.

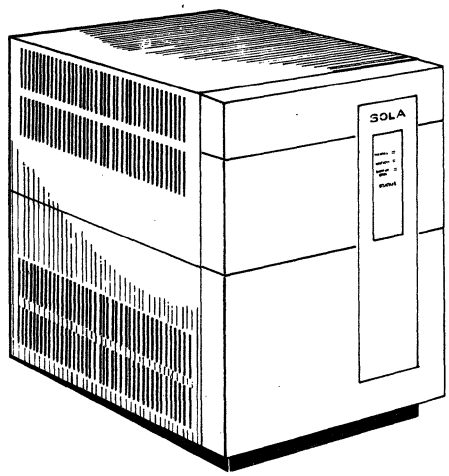
SOLA EPC Series 5-15 KVA

Specifications on 5-15 KVA Units are the same as shown above except as noted below. All 5-15 KVA Units are hardwired using a circuit breaker for input protection. Output connections are by terminal block.



Specifications

Input. Voltage: 120,208,240,480 V. **Frequency:** 60 Hz. **Input Voltage Range:** +15%/−25%. **Protection:** Input circuit breaker. **Connection:** Hardwired (terminal block). **Output Voltage:** 120, 120/208/240 V. **Frequency:** 60 Hz. **Voltage Regulation:** ±5%. **Distortion:** <1% THD added. **Output:** Hardwired (terminal block) or optional output receptacle panel. **Power Efficiency:** 96%. **Response Time:** 1 cycle typical. **Overload Capacity:** 1400%-one cycle, 700%-ten cycles, 500%-one second, 300%-ten seconds. **Crest Factor Loading:** Max. 3% peak voltage drop with 3:1 crest factor load. **Dynamic Response:** Output voltage corrected every half cycle. **Power Factor Range:** 0.6 leading or lagging. **Protection Over/Under Voltage:** Automatic shutdown when output voltage is over +12% or under −25% of the nominal voltage (manual restart). **Overtemperature:** Automatic shutdown for high temperature. **Overload:** Automatic shutdown if 125% overload 5 minutes. **Loss of Regulating Capability:** If unit loses its regulating capability the output will automatically bypass the internal regulating circuit without loss of isolation or filtering of spikes and surges.

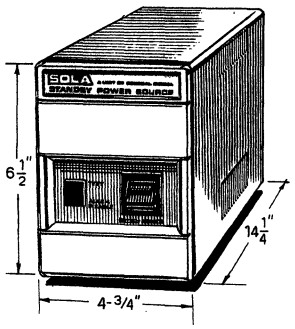
***Other units also available having optional output panels.**

Off Line Power Source

Economical off line power systems are designed to protect personal, micro, and minicomputers from AC line disturbances and failures. They provide clean, regulated AC power to critical loads when the commercial AC line fails or drops 15% below normal. The units contain a sealed, maintenance-free battery that will operate the inverter until the AC returns, or until you complete your computer activity.

When the AC is present, it supplies filtered power to the load and maintains the batttery in a charged condition. Equipped with 6-foot power cord with NEMA 5-15P plug for 60Hz, European or British standard for 50 Hz, and NEMA 5-15R duplex receptacle.

SPS-300 and SPS-450A Desk Top SPS



Designed specifically to protect desk top computers from blackouts, providing from 7 to 45 minutes of backup, more than ample for an orderly computer shutdown. Also provides primary protection against noise, surges, sags, and brownouts when on line. Lighted power on/off switch. **TEST/ALARM DISABLE switch** intermittant tone on fault, continuous tone prior to low-battery shutdown. Operates efficiently for light loads as well as its full 300VA rating. **Backup Time:** 5 min. at 200W, 15 min. at 100W, 30 min. at 60W, and 45 min. at 40W. Battery recharge time is 10 hrs. **Dimensions:** 6½″H × 4¾″W × 14¼″D. **Shipping weight:** 24 lbs. Four receptacles on back. 6 ft. line cord provided. Beige color. **Operating temperature:** 0-45°C; 0-10,000 ft. above sea level; 0-95% relative humidity. 3 Amp fuse, 80 joule 6500 Amp surge suppressor protection. 1 Amp DC charger. 120VAC/60 Hz single phase, 3 wire power cord (Nema 5-15P). **Battery and Charger:** 12 volt, 6 Amp hr., maintenance free sealed lead acid battery with 0.5 Amp maximum charging current. 13.7 volt DC charge float voltage (fully charged battery). 8-12 hr. typical recharge time. 30 Amp DC fuse; low-battery shutdown and battery overcharge protection.

SPS-400, 800, 1200VA Units

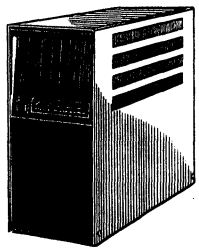
- **Noise and Transient Protection when the AC line is present. (40 dB minimum at 100 kHz)**
- **Fast Response, ¼ to ½ cycle, when the AC line fails.**
- **Inverter Overcurrent Protection, even into a short circuit.**
- **Simplified Installation and Operation, just plug it in and turn it on.**
- **Compact, Lightweight Design, with hands-off operation, including Maintenance-Free Battery.**
- **Relay Contact and Audible Alarm for user annunciation of AC line failure.**
- **U.L. listed.**
- **EMI/RFI Attenuation: Units meet FCC Docket 20780, Part 15, Subpart J, Class B (60 Hz units): VDE 0871, Level B (50 Hz units) conducted and radiated emmissions standard. (800VA and 1200VA units)**

The Sola SPS is an economical Off Line System designed to protect personal, micro, and minicomputers from AC line disturbances and failures. It provides clean, regulated AC power to your critical load when the commercial AC line fails or drops 15% below nominal. The unit contains a sealed, maintenance-free battery that will operate the inverter until the AC returns, or until you complete your computer activity. When the AC is present, the unit supplies filtered power to the load and maintains the battery in a charged condition.

SPECIFICATIONS. Mechanical. Operating Temp.: 0°C to 40°C. **Operating Humidity:** 0% to 95%, without condensation. **Operating Altitude:** 0 to 8000 ft. **Dimensions:** 15″H × 7″W × 18.5″D. **Alarm Relay:** Dry form C contacts through a ¼″ phone jack.

Dimensions

VA Types	Inches H	W	D
800VA	15	7	18.5
1200VA	16	8	19.5



Weight

800VA — 100 lbs.
1200VA — 110 lbs.

The SPS has three modes of operation:
1. Normal: The load is supplied by the primary AC line. The rectifier/charger derives power from the primary AC line to float charge the battery.
2. Standby: The load is supplied by the inverter during a primary AC line failure. The battery supplies power to the inverter.
3. Recharge: The load is supplied by the primary AC line after its restoration. The rectifier/charger supplies DC power to recharge the battery.

Electrical. 120VAC Input: +10%, −15%, 60 Hz ±10%. **220/240VAC Input:** +10%, −15%, 50 Hz ±10%. **Output: 120VAC Output:** ±3%, 60 Hz ±1%. **220/240VAC Output:** ±3%, 50 Hz ±1%. **Sine Wave:** less than 5% T.H.D. 130% overload for 3 seconds. Current limited inverter for short circuit protection. Line to inverter transfer, 4 to 10 milliseconds at −15% of nominal voltage. Inverter to line retransfer, 2 to 4 milliseconds at −10% of nominal voltage. Noise attenuation at 10 kHz and above, 40 dB minimum at 100 kHz.

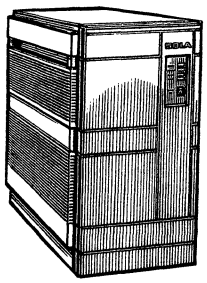
* Equipped with British type plugs and outlets. ** Equipped with European type plug and outlet. *** SPS-120A is CSA certified to C22.2 No. 107. † Set for 240VAC instructions included for 220VAC. ‡ Designed exclusively for IBM, AT&T computer models.



SPS/R Series Regulating Standby Power Source

- **Regulation even when utility power is available.**
- **Computer interface (RS 232 or relay contacts).**
- **Suppresses ANSI/IEEE Class 'A' and 'B' waveforms to safe levels.**
- **Meets FCC emissons requirements.**
- **Transfer time of 1 millisecond typical.**
- **UL Listed, with CSA certified models available.**

SPS/R utilizes the latest technology and combines the functions of an **EPC** regulator and a Standby Power Source. It protects personal, micro, and minicomputers from virtually every type of power problem, from electrical noise to blackouts. While ordinary standby power sources "pass through" noise, frequency errors, and brownouts, the **SPS/R** has built-in regular to clean and adjust power before it reaches equipment. If the regulator can't adequately condition the power, the battery and inverter quickly take over.

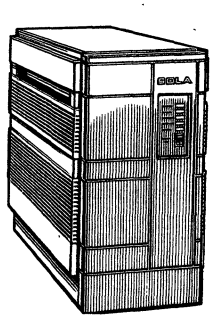
Mini-Ups/2 Uninterruptible Power Supply

- **"True" on-line no-break UPS. (Inverter is on-line at all times)**
- **40,000 hours mean time between failure.**
- **Computer interface (RS232 or relay contacts).**
- **Suppresses ANSI/IEEE 587 Class "A" and "B" waveforms to safe levels.**
- **Meets FCC emissions requirements.**
- **UL Listed, with CSA certified models available.**
- **Low output impedance inverter can power full crest factor loads with minimum distortion and no output waveform "flat-topping."**
- **Attractive, modern, versatile enclosure matches officed decor.**



The Sola **MINI-UPS/2** is a self contained solution to **all** potential power problems. It stands between your critical load and the power line. It features a "no-break" static bypass to start high inrush loads. The internal circuitry is designed to operate with any type of load with minimal distortion, even with the switching power supplies found in personal computers. There is no need to "oversize" the unit for computer-type loads. This sophisticated, but conservative design is rated at 40,000 hours mean time between failure (MTBF). Both 500 and 1000 VA **MINI-UPS/2** models can be attached to external batteries for extended back-up time.

Stock No.	Mfr.'s Type	Description	VA	Input Plug (NEMA)	Four Output Receptacles (NEMA)	Gross Weight	EACH

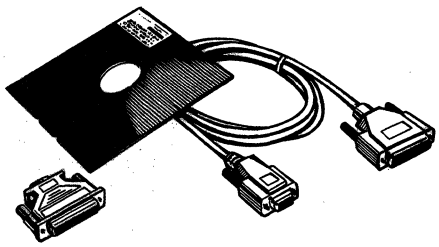
Software

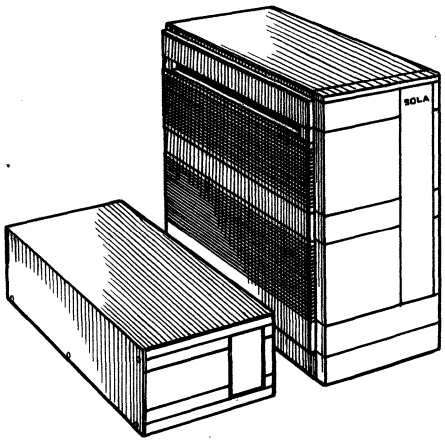


Sola's innovative new software allows your personal computer to directly communicate, via the RS-232 interface and optoisolator interface, with the 1 KVA and 1.5 KVA SPS/R models and the 1 KVA Mini-UPS/2. Providing you with on-screen information about power conditions, your PC becomes a real-time powerline monitor capable of warning you about potential problems. A special optoisolated interface with Sola software provides basic communication capabilities for the 500 VA SPS/R and UPS/2 models.

For 1 KVA and 1.5 KVA models
The RS-232 PC Interface Kit is a 5.25" floppy disk and an RS-232 cable with connectors to fit the 25-pin RS-232 port on the UPS/2 or SPS/R and the 9-pin RS-232 port on your PC. A 9-pin to 25 pin adapter is also included to allow compatibility with PC's. Three different programs are provided to handle communications with the Sola units. **WINDOW** is a program which runs in the background while you are using other PC software. **TERMINAL**, a terminal emulation program which allows you to check the operating conditions of the SPS/R or UPS/2 by typing in short commands which are sent out on the RS-232 interface (BV- battery voltage, IV-input voltage, etc.). **SOLASTAT**, retrieves a complete status report from the UPS/2 and the SPS/R in one transmission.
Stock 921-1310. Model 999-848 ..... **EACH 79.00**

For 500VA Units
The Optoisolator Kit allows an SPS/R 500 or Mini-UPS/2 500 to communicate with PC compatibles. Although the 500 VA models of the SPS/R and the Mini UPS/2 do not have RS-232 interfaces, the special cable and software provides a simple means to connect them to the serial port on your PC. A resident program, **SOLAMON**, displays the status of the UPS/2 and SPS/R in the corner of your screen. The Optoisolator PC Interface Kit includes a special interface cable compatible with 9-pin serial ports, a 9-pin to 25-pin connector adapter (for PC's which use 25-pin RS-232 ports), and the SOLAMON program disk (5.25" floppy).
Stock 921-1315. Model 999-849 ..... **EACH 79.00**

Battery Packs



Auxiliary battery packs for the SPS/R Series and the Mini-UPS/2 Series can be important additions to enhance your overall power protection. These free-standing battery packs greatly extend the total reserve time and thereby increase the level of safety for highly critical loads. The total operation time while under battery power demands as well as the charge present on the batteries when line power failure occurs. Choosing the optimum battery pack for your installation should take into account the frequency of power outages as well as the time necessary to backup the data files which must be protected. For extended operation, the largest battery packs (912-6028-1) can be 'daisy chained' together. Both battery packs have attractive housings which match the SPS/R and UPS/2 designs. The necessary cable to connect to the SPS/R or UPS/2 is included. Each model is UL Listed.

Specifications

Charger
912-6010-1: Charged by SPS/R or UPS/2.
912-6028-1: Built-in 300 W charger. This pack has a 6-foot line cord and a 5-15P plug

Voltage/Capacity
912-6010-1: 60 VDC/10 amp-hr
912-6028-1: 60 VDC/31 amp-hr

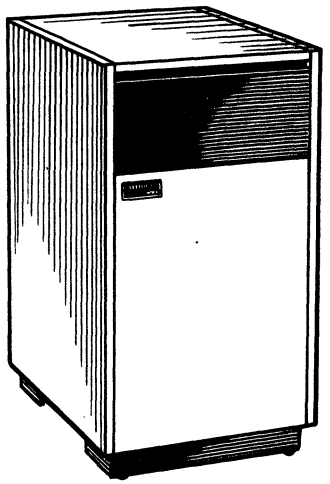
Electronic UPS 57 Series



Ranging in capacity from 5 KVA to 10 KVA, the Electronic 57 Series are true, "no break" UPS designs which derive their power from batteries at all times. Although reliable power protection is obviously the most important feature, the significant advantages of the Electronic 57 become obvious when selecting and sizing the proper unit to be installed. Unlike most power protection systems, the Electronic 57 can handle a wide range of input and output voltages.

Specifications
Voltage: User selectable, 120/208/240 V 1ϕ(5 KVA model), 120/208/240/480 V 1ϕ(8 KVA & 10 KVA models). **Voltage Range:** + 15%/ – 20%. **Frequency:** 60 Hz ± 3 Hz (for phase lock), 60 Hz ± 6 Hz without bypass. **Power Factor:** 0.8 minimum (high power factor). **Protection:** AC input circuit breaker. **Voltage:** 120/208/240 V. **Voltage Regulation:** ± 1%. **Dynamic Load Response:** ± 10% maximum voltage change for 100% load step, recovery within two cycles. **Output Power Factor:** 5,8, or 10 KVA at 0.8 PF. **Output Distortion:** 5% THD, 3% maximum, any single harmonic. **Overload Capacity:** 110% continuous. **Common Mode Noise Rejection:** 140 dB, 10 Hz to 1 MHz. **Transverse Mode Noise Rejection:** 60 dB at 100 KHz (even in bypass). In the UPS mode the transverse mode noise rejection is much greater. **Protection:** The current limited inverter is fully protected against shorts and overloads. The inverter is also protected from thermal overloads and disconnects the battery at low DC voltages. **Battery Type:** Maintenance-free, sealed lead acid. **Battery Recharge Time:** Approx. 10 times the discharge time. **DC Voltage:** 105-135 VDC (5 KVA), 200-270 VDC (8 KVA &10 KVA). **Maximum DC Inverter Current at Full Load and Low DC Voltage:** 5 KVA: 44 amps. 8 KVA: 36 amps. 10 KVA: 45 amps. **Protection:** Battery circuit breaker. **Charger Current Rating:** 5 A charge, 100 mA to 1 A trickle charge. **Protection:** Electronic overload and short circuit protection. **Standard Interface Alarm Contacts:** 'C' contact closure for UPS on battery or AC input failure, UPS on bypass, or low battery. A bypass fault contact is included on the 8 KVA and 10 KVA models. Contacts are rated at 24 VDC or 24 VAC at 1 A. **Optional Interface** Full RS-232 interface. See the Interact 57 Series standard interface and controls. **Environmental Operating Temp:** 0°C to 40°C **Storage Temp:** – 25°C to 70°C **Battery Temp:** 18°C to 28°C for optimum life and performance. **Humidity:** 0-95% relative humidity without condensation. **Altitude:** 0-10000 feet. **Acoustic Noise:** 55 dBA at 5 ft. from the front of the UPS. **Heat Dissipation (worst case, including battery charger at full output): 5 KVA:** 3420 BTU per hour. **8 KVA:** 5470 BTU per hour. **10 KVA:** 6840 BTU per hour. **Conformance.** UL Listed to 1012. Meets FCC docket 20780, Part 15, Subpart J, Class A for conducted and radiated emissions. Exceeds the intent of ANSI/IEEE C62.41 1980 class A and B (formerly IEEE 587-1980).

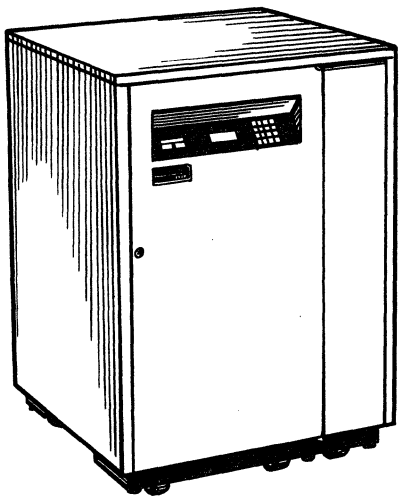
Notes: 1. Internal to the UPS. Must be ordered with the UPS; Sola will install. 2. Attaches to the side of the UPS. Must be ordered with the UPS; Sola will install. Adds 8 inches of width, making the UPS cabinet dimensions 32" × 33" × 46". Adds approximately 575 lbs.



Interact 57 Series—10 to 25 KVA

The Interact 57 Series is easily the most advanced new UPS design to be introduced in years. No other true UPS can match it in power efficiency or advanced features. Designed around a patented online bidirectional PWM converter/inverter, the Interact 57 Series is rated to handle sensitive, three phase loads from 10 KVA to 25 KVA. The converter works interactively with a built-in electronic line conditioner to maintain the output voltage regulation at an exceptional ± 2% while subtracting just enough power to keep the batteries at full charge. This translates to an AC-to-AC operation efficiency as high as 95%!

Specifications
Voltage: Nominal 208Y/120 3ϕ, + 10%/ – 20%. **Frequency:** 60 Hz ± 3 Hz. **Power Factor:** 0.9 minimum (high power factor). **Distortion:** Input current distortion is exceptionally low; less than 5% with full resistive load. **Protection:** AC input circuit breaker. **Output Voltage:** 208Y/120 3ϕ, 120 1ϕ from any phase to neutral. **Voltage Regulation:** ± 2%. **Dynamic Load Response:** ± 5% maximum voltage change for 100% load step, recovery within two cycles. **Output Power:** 10, 18.75, or 25 KVA at 0.8 PF. **Output Distortion:** 5% THD (even with full crest factor load), < 3% any single harmonic. Approx. 2% THD with resistive load. **Overload Capacity:** 115% (continuous), 300% (10 seconds), 1000% (one half cycle). **Common Mode Noise Rejection:** > 140 dB, 10 Hz to 1 MHz. Total magnetic isolation through a shielded isolation transformer. **Transverse Mode Noise Rejection:** > 60 dB at 100 KHz. **Protection:** The current limited converter/inverter is fully protected against shorts and overloads. There is also thermal protection and a disconnect for low DC voltage. **Battery Type:** 912 Series batteries are sealed, maintenance-free, lead acid. **Battery Recharge Time:** Approx. 10 times the full load discharge time. **DC Voltage:** 200-270 VDC. **Maximum DC Inverter Current at Full Load and Low DC Voltage: 10 KVA:** 46 amps. **18.75 KVA:** 86 amps. **25 KVA:** 115 amps. **Protection:** Low DC voltage shutdown and battery circuit protection. **Charger Current Rating:** 5 A charge, 100 mA to 1 A trickle charge. **Protection:** Electronic overload and short circuit protection. **Standard Interface Alarm Contacts:** 'C' contact closure for UPS on battery or AC input failure, UPS on bypass, or low battery. A bypass fault contact is included on the 8 KVA and 10 KVA models. Contacts are rated at 24 VDC/24 VAC at 1A. **RS-232C:** Serial computer interface via RS-232 connector on the UPS. **Environmental Operating Temp:** 0°C to 40°C. **Storage Temp:** – 25°C to 70°C **Battery Temp:** 18°C to 28°C for optimum life and performance. **Humidity:** 0-95% relative humidity without condensation. **Altitude:** 0-10000 feet. **Acoustic Noise:** 57 dBA at 5 ft. **Heat Dissipation: 10 KVA:** 1745 BTU per hour. **18.75 KVA:** 3270 BTU per hour. **25 KVA:** 4355 BTU per hour. **Conformance** UL listed to 1012. Meets FCC docket 20780, Part 15, Subpart J, Class A for conducted and radiated emissions. Exceeds the intent of ANSI/IEEE C62.41 1980 class A and B (formerly IEEE 587-1980).

Stock No.	Mfr.'s Type	KVA Rating	Output Voltage[4] 3ϕ/Line to Neutral	Input Voltage[3, 4] 3ϕ/Line to Neutral	Maximum Input Current[2] (amps, line to neutral)	L×W×H (inches)	Approx. Wt. (lbs)	EACH

Notes: 1. The input to the UPS **must** be a Wye (A phase, B phase, C phase, and neutral). 2. This is worst case input current. The installer must feed the UPS with the proper size ampacity source, taking into consideration the maximum input amps and applying this to local and national electric codes. 3. Since the UPS regulates line-to-line neutral as well as phase-to-phase, the UPS can be loaded simultaneously with 120 V single phase loads, 208 V single phase loads, and 208 V three phase Wye loads. For 208 V three phase delta loads with or without combination loads(any one or more of 120 V single phase loads, 208 V single phase loads, and 208 V three phase loads), the UPS output must be balanced 4 Special units with 480 Wye/277 input or 480 Wye/277 output are available at extra cost, contact factory for information.

921Q1397	912-2515	25.00	15	Note 5	**5190.00**

Notes: 1. The 912 Series battery cabinets listed are seismic rated for California installations. 2. The reserve times stated are approximate with full resistive load, at room temperature, with a fully charged battery. 3. Factory installed on side of 10 KVA UPS. Adds 8 inches in width and 570 lbs. Must be ordered with UPS. 4. Factory installed on side of 18.75 KVA UPS. Adds 8 inches in width and 570 lbs. Must be ordered with UPS. 5. Matching battery cabinet that is separate from the UPS. Dimensions are 32" × 25" × 46" and the approximate weight is 1000 lbs. (each 912-2515).

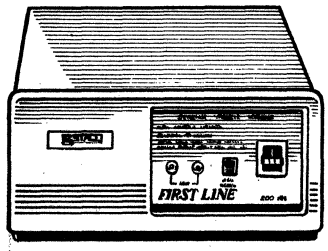
Standby Power Systems

Battery back-up protection against power outage and blackouts

- ► For personal Computers and Microcomputers
- ► Three Convenient Sizes
- ► Attractive, Portable, Compact Design
- ► Economical
- ► Easy installation
- ► Multiple Outlets
- ► Quiet Operation
- ► Simple Status Lights
- ► Audible Alarm

300 VA POWER OUTPUT. Model Number: SPS-111-600-3. **Electrical Input. Voltage (±10%):** 120 VAC. **Frequency:** 60 Hz*. **Electrical Output. Normal Voltage:** 120 VAC. Noise filter and surge suppressors limit noise and transients. **Critical Bus Voltage (±5%):** 115 VAC. **Frequency:** 60 Hz ± 1%. **Waveform:** Step Wave. **Maximum Load:** 300 VA. **Minimum Load:** 30 VA. **Controls and Indicators. Normal Operations:** Green LED. **AC Power Failure:** Red blinking LED and pulsing sonic alarm. **Low Battery:** Continuous red LED and continuous sonic alarm* for one minute prior to total loss of battery power. **Battery. Transfer time:** 1/2 cycle or 4 to 8 mSec (typical). **Battery:** Rechargeable, sealed Lead-Calcium, maintenance free. **Battery Life:** 3 years (typical). **Battery Reserve. Quarter Load:** 60 minutes. **Half Load:** 30 minutes. **Three Quarter Load:** 20 minutes. **Full Load:** 15 minutes. **Mechanical. Size (inches):** 12 × 5.5 × 16. **Weight (pounds):** 36. **Connectors. Input:** 6 foot, 3 conductor, 18 AWG, plus NEMA, 5-15P. **Output:** 3 NEMA, 5-15R Receptacles.

500 VA POWER OUTPUT. Model Number: SPS-111-600-5. **Electrical Input. Voltage (±10%):** 120 VAC. **Frequency:** 60 Hz*. **Electrical Output. Normal Voltage:** 120 VAC. Noise filter and surge suppressors limit noise and transients. **Critical Bus Voltage (±5%):** 115 VAC. **Frequency:** 60 Hz ± 1%. **Waveform:** Step Wave. **Maximum Load:** 500 VA. **Minimum Load:** 50 VA. **Controls and Indicators. Normal Operations:** Green LED. **AC Power Failure:** Red blinking LED and pulsing sonic alarm. **Low Battery:** Continuous red LED and continuous sonic alarm* for one minute prior to total loss of battery power. **Battery. Transfer time:** 1/2 cycle or 4 to 8 mSec (typical). **Battery:** Rechargeable, sealed Lead-Calcium, maintenance free. **Battery Life:** 3 years (typical). **Battery Reserve. Quarter Load:** 40 minutes. **Half Load:** 20 minutes. **Three Quarter Load:** 13 minutes.



SPS-111-600-3

Full Load: 10 minutes. **Mechanical. Size (inches):** 12 × 5.5 × 16. **Weight (pounds):** 51. **Connectors. Input:** 6 foot, 3 conductor, 18 AWG, plus NEMA, 5-15P. **Output:** 3 NEMA, 5-15R Receptacles.

1000 VA POWER OUTPUT. Model Number: SPS-111-601-0. **Electrical Input. Voltage (±10%):** 120 VAC. **Frequency:** 60 Hz*. **Electrical Output. Normal Voltage:** 120 VAC. Noise filter and surge suppressors limit noise and transients. **Critical Bus Voltage (±5%):** 115 VAC. **Frequency:** 60 Hz ± 1%. **Waveform:** Step Wave. **Maximum Load:** 1000 VA. **Minimum Load:** 100 VA. **Controls and Indicators. Normal Operations:** Green LED. **AC Power Failure:** Red blinking LED and pulsing sonic alarm. **Low Battery:** Continuous red LED and continuous sonic alarm* for one minute prior to total loss of battery power. **Battery. Transfer time:** 1/2 cycle or 4 to 8 mSec (typical). **Battery:** Rechargeable, sealed Lead-Calcium, maintenance free. **Battery Life:** 3 years (typical). **Battery Reserve. Quarter Load:** 32 minutes. **Half Load:** 16 minutes. **Three Quarter Load:** 11 minutes. **Full Load:** 8 minutes. **Mechanical. Size (inches):** 12 × 5.5 × 16**. **Weight (pounds):** 80. **Connectors. Input:** 6 foot, 3 conductor, 18 AWG, plus NEMA, 5-15P. **Output:** 3 NEMA, 5-15R Receptacles.

*50 Hz available upon request. **Total package size of two identical modules. **Specifications subject to change without notice.**

FR Series Computer Grade Portable Line Conditioners

Used On:

- ► Word Processors
- ► Electronic Cash Registers
- ► Point-of-Sale Terminals
- ► Communications Equipment
- ► Micro Computers
- ► Emergency Medical Equipment
- ► Mini Computers
- ► Electronic Scales
- ► Electronic Security Systems
- ► Micro Processors
- ► Data Terminals

Lightweight and user friendly with 6′ 3-wire ground plug for simple installation. These UL listed, convection cooled units are suitable for small offices, retail business and labs. Ferroresonant line conditioners protect your sensitive electronic equipment against those costly and adverse effects of power line noise, transients, voltage fluctuations and brownouts (i.e. system malfunction, memory loss, erroneous data, and unexplained errors.)

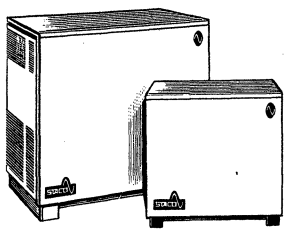
EVR Series Line Conditioners



Reliable, accurate, and highly efficient electronic line conditioners for instant response to voltage fluctuations. Protects computer systems and electronic equipment from voltage surges, sags, and brownouts. Each EVR includes a control assembly, power module, tapped autotransformer, and input circuit breaker, all packaged in an attractive, compact enclosure. Choose from three series, depending on level of protection needed. **SPECIFICATIONS. Efficiency:** 98% minimum. **Line Voltage Regulation:** ±3.3% EVR 300 Series; ±5.0% EVR 500 Series; ±7.0% EVR 700 Series. **Load Regulation:** Less than 1% from no load to full load. **Response Time:** 1/2 cycle typical. **Output Impedance:** Less than 2% full load impedance. **Output Distortion:** No spikes; adds less than 0.1% total harmonic distortion. **Operating Frequency:** 47-63 Hz. **Operating Temperature:** 0°C to 50°C. **Surge Rating:** 100% overload for 10 seconds; 500% overload for 10 cycles.

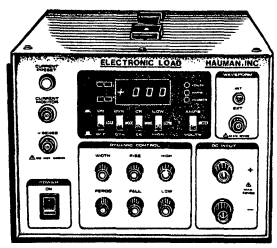
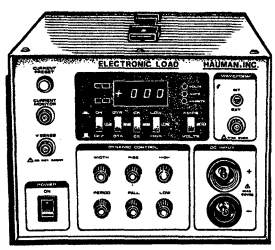
Multi-Function Electronic Loads

Features

- **Static and dynamic loading operation**
- **Constant resistance (CR) and constant current (CC) modes**
- **Presettable dynamic current waveform with independent control of rise and fall time, pulse width and period high and low current levels.**
- **3½ digit LED voltage and current display**
- **0-5 V proportional current waveform monitor**
- **Optional digital I/O control interface**
- **External, arbitrary waveform input (2 A/μS slew rate maximum, DC-20 KHz)**
- **Remote voltage sensing capability**
- **Protections against over-power, over-current, over-voltage over-temperature, and reverse polarity**
- **Multiple units paralellable to increase power/current capacity**
- **Advanced power MOSFET design**
- **Bench use**





The series consists of four models **EL-100, EL-150, EL-200, EL-250** with maximum current ratings of 20 A, 30 A, 40 A, 50 A, respectively. Operating input voltage range is 3-60 VDC for all models. Voltage and current values are displayed on a 3½ digit, autoranging panel meter. LED indicators show complete state of the instrument. Front panel controls allow the user to preset input static current, or dynamic current with fully independent adjustments of period and width, rise and fall time, high and low current levels. Operating mode can be in Constant Current or Constant Resistance. The instrument is fully protected against over-power, -voltage, -current, -temperature, and reverse voltage. Current monitor connector provides the user with a mean of displaying the current waveform response on an oscilloscope. Multiple loads can be paralleled for increased power requirement.

External analog control is possible with a 0.5 VDC arbitrary waveform input of 0-20 KHz and maximum slew rate of 2 A/μS. Digital I/O option allows full control of mode settings, current setting, load on/off, fault reporting.

BC Series Battery Backup Systems (LAN Compatible)

- ► 2 Millisecond Synchronized Phase Locked Transfer
- ► Brownout Protection
- ► No Installation Required
- ► Larger Batteries for Longer Backup Times
- ► Built-in Spike and EMI + RFI Suppression
- ► Audible AC Line Failure Alarm

Economical Battery Backup Systems designed to protect desktop computers and other sensitive electronic equipment from power failures, low voltage and AC transients. Inverter is synchronized and phase locked to incoming AC power. This allows the smoothest possible crossover to and from inverter power. All units feature maintenance free battery, audible alarm, brownout protection @ 103 VAC and built-in spike and line noise suppression. **2 Year Warranty. Made in USA.**

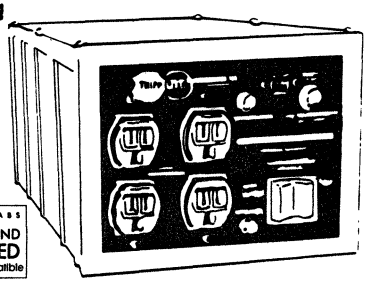
BC450 LAN



NOVELL LABS TESTED AND APPROVED NetWare® Compatible

LAN Specific Battery Backup

- ► Supports LAN systems UPS monitoring function to allow unattended system shutdown
- ► Larger batteries for longer shutdown times
- ► ISOBAR surge and noise filters built-in
- ► Ideal for unattended file servers
- ► 2 year warranty

All Tripp Lite battery backup systems are compatible with local area networks. With units from 200 to 4000 watts, there's a perfectly sized unit to back-up your file server and work stations. In addition, LAN specific battery backup systems feature interface port and cabling to support your network's UPS monitoring function and provides for orderly, automatic network shutdown. Approved for use with Novell, Altos, 3Com, UNIX. **Transfer Time msec.:** 2. **Alarm with Reset:** Yes. **Battery Charge Rate:** 2A.

Omnipower

Battery Backup and Line Stabilizer in One Package

Unlike most backup systems that switch to battery power during low voltage conditions, OMNIPOWER automatically adjusts low voltage to 120 VAC. Regulation feature eliminates nuisance equipment shutdowns caused by brownouts. OMNIPOWER also contains BC Series battery backup (see above) for emergency power in the event of a total power loss. Built-in AC spike and noise filter completes the protection. 2 Year Warranty. **Transfer Time msec.:** 5. **Alarm with Rest:** Yes. **Battery Charge Rate:** 2A.

IBAR 6

ISOBAR Surge/Noise Suppressors

Exclusive individual filter banks and "cascade design" provide excellent noise filtration as well as protection from transient spikes and surges. Both common and transverse mode spikes (of either polarity) up to 13,000 volts clamped to safe values. A 15-amp thermal circuit breaker (models 4 and 8) capable of interrupting up to 1,000 amps fault current provides total overload protection. **Specifications. High Voltage Spike Protection:** 13,000 amp spikes. Starts suppressing spikes at 140 volts AC RMS, 140 watt second capacity. **Transient Response Time:** Within 5 nsec. **High Frequency Noise Suppression:** Greater than 20 dB @ 50kHz; Greater than 40 dB @ 150 kHz; Greater than 60 dB @ 1 MHz; Greater than 30 dB from 6 MHz to 1000 MHz. **Input:** 125 VAC. **Load Handling Capacity:** 1575 watts maximum (total); 15 amps per outlet. All have on/off light. UL Listed. **Lifetime warranty.**

*Remote power switch on 6' cord. †Console design mounts under monitor. 1 master switch with 5 individual switches for peripherals. ‡Console design w/RJ11 Receptacles for modem/fax protection. **4 outlet ISOBAR with RJ11 receptacles for modem/fax protection.

Rack Mount ISOBAR and Voltage Regulator

IBR-12 and LCR-2400 Common Specifications. High Voltage Spike Protection: Handles up to 13,000 amp spikes. Starts suppressing spikes at 140 volts AC RMS. 210-Watt-second capacity. High voltage spike protection works between ground and neutral, neutral and hot, and hot and ground. **Transient Response Time:** Less than 5 nanoseconds. Transient amplitude reduction occurs faster than the clamp response of the varistors because of the high rejection rate of the Isobar filter networks. **High Frequency Noise Suppression:** Greater than 20 dB at 50 KHz; greater than 40 dB at 150 KHz; greater than 80 db at 1 MHz; greater than 30 db from 6 MHz to 1000 MHz.

IBR-12 ISOBAR Surge Suppressor

Features
- ► 12 ft. 14 gauge AC cord
- ► 12 outlets
- ► 2 isolated filter banks
- ► 15 AMP circuit breaker (on front for easy access)
- ► Superior spike filtering and line noise attenuation
- ► Isolated filter banks prevent equipment interaction

575-3212.....EACH 149.00

LCR-2400 Voltage Regulator with ISOBAR Surge Suppressor

Features
- ► Full 20 AMP (2400 watts) voltage regulation
- ► 12 ft. 12 gauge AC power cord (universal plug fits both 15 and 20 AMP receptacles)
- ► 14 outlets
- ► 2 isolated filter banks
- ► Built-in ISOBAR Surge Suppression features larger torrodial chokes and capacitors to better filter lower audio frequencies

575-3400.....459.00

PV Series DC-to-AC Power Inverters

Solid state electronic power inverters change 12 VDC into 117 VAC. Inverters operate wherever 12 VDC batter power is available to power small appliances, lighting, small power tools, etc. Frequency-controlled models should be used for tape recorders, test equipment, ambulance equipment, video tape equipment, office machines, computers, etc. Some models are available with 220 VAC. 50 Hz output. Available load wattage ratings from 100 to 4000 watts continuous; intermittent duty, plus 10%. Units come complete with 117 VAC outlet and convenient ON/OFF switch. Units connect to batteries with heavy gauge wire (not supplied). Inverters are transistorized, solid state for long life and quiet operation. Square wave output voltage varies directly with input voltage, and is inversely proportional to load.

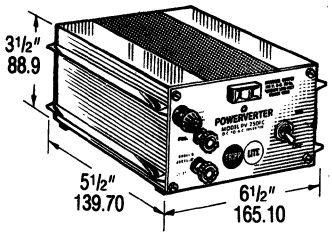
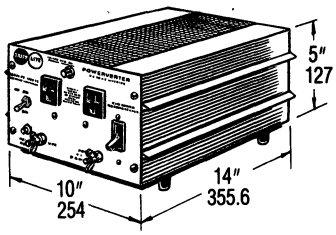
*Cigarette Lighter Plug-In. †Frequency Controlled (± 1/2 Hz). ‡With 10-Amp Battery Charger.

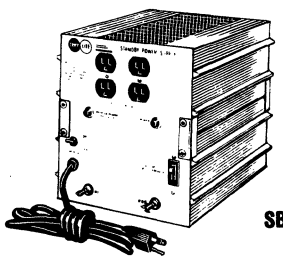


PV200



PV1000FC

Inverter Application—Convert 12 VDC to 117 VAC Anywhere You Need It
Model and Device. PV-100: Small fluorescents, miniature hand tools, shavers, FAX machines (with C16 cord). **PV-200:** Same as PV-100 plus small and medium (12" and 18") TVs, 1/4" drills, small hand tools, small home appliances, typewriters, adding machines and large fluorescents. **PV-250FC*:** Same as PV-100 and PV-200, plus ideal for VCR/TV use, tape recorders, phonographs, test equipment (where frequency control is necessary), and certain personal computers. **PV-400:** Large B + W (24") TVs, small (12") color TVs and 3/8" drills. **PV-550:** Large TVs, several items at once. **PV-550B:** Same as PV-550 plus battery charger feature. **PV-550FC*:** Same as PV-100, PV-200, PV-250FC, PV-400, PV-550 and PV-550B, plus large frequency sensitive devices, 1/2" drills, "XT" class personal computers, etc. **PV-1000FC*:** Same as PV-100, PV-200, PV-250FC, PV-400, PV-550, PV-550B and PV-550FC, plus video tape recorders, mobile laboratories, "AT" class personal computers; provides maximum torque from power tools. **PV-1000FC/24:** Semi Tractor AC Accessories. **Note:** Not recommended for use with capacitor start motors (as found in conventional refrigerators). *FC feature assures your equipment will receive a constant 60 cycles of power and motorized devices run at proper speed.



SB4000

SB Series Battery Back-Up Systems

- **Automatic Load Transfer Switch—Rugged Square Wave Inverter**
- **Circuit Breaker Protected on DC Line**
- **Status Indicators with Test Switch—Multiple Receptacles**
- **Frequency Controlled ±1/2Hz (Not Included on SB200 or SB400)**
- **Full Isolation of AC Line Power from Inverter Power**
- **Uses External Batteries for Unlimited Back-up Time***

Automatically supplies 117 VAC current during power failures instantly and economically. Designed for a variety of applications such as computers, telephone systems, paging and answering systems. Back-up time is determined by amount of battery power you connect to it. Batteries not included. Automatic transfer switch time is 8-10 ms. **All models come with:** Two year warranty, regulated battery charger with a float charge, over voltage protection, system test switches, front panel indicator lights, rugged square wave inverter.

PR Series Precision Regulated Power Supply

- **Model PR-10**
- **UL Listed AC Cord and Plug Type SPT-2**
- **Heavy Duty Power Transformer for Complete Line Isolation**

Converts 120 VAC to 13.8 VDC ±0.5 VDC. Solid-state integrated circuitry, high-quality filtering, and current limiting electronic feedback for automatic overcurrent protection. Output voltage maintained up to 95% of no load value. Heavy-duty transformer for complete isolation. Also features ON/OFF indicator light and ON/OFF switch on face plate, and a 3-conductor grounded cord on 10 amp and larger models. U.L. listed AC cord and plug type SPT-2.

PR-10

Voltage Regulators

AC voltage regulators protect your equipment and data from low voltage sags (brownouts), high voltage surges, as well as transient spikes and line noise (RFI and EMI). The LC series automatically regulates and maintains load voltages when commercial (utility co.) input voltage drops (brownouts), regardless of length of brownout. 98% efficient. 2% load regulation from no load to full load. 5% line regulation over input range of 90 to 125 VAC. 0 to 60 C operating range with no derating. 3 cycles max. response time, 1/2 cycle typical. 3-conductor, grounded cord and receptacle. Front panel LED indicators monitor input voltage conditions (Model LC-1800). Attractive beige housing. Completely assembled, ready to use. **Model LS-600:** Output voltage will comply with ANSI-C84.1 specifications with input voltage from 87 to 127V. Output voltage will be maintained at 120V ± 5% with input voltage from 96 to 126 V. **Models LC-1200** and **LC-1800** output voltage will comply with ANSI-C84.1 specifications with input voltage from 87 to 140V. Output voltage will be maintained at 120V ± 5% with input from 96 to 138V. U.L. Listed.

Isolation Transformers

- **Clean, Portable Ground—Eliminates need for dedicated lines**
- **Efficient Operation—Generates less heat than ferroresonant devices**
- **Exceptional low frequency line noise rejection**
- **External Resettable Circuit Breaker**

Isolator provides true line isolation to protect sensitive electronics. Units feature 'faraday shield' design. Shielding between the primary and secondary windings provide superior line isolation as well as exceptional line noise rejection, especially at low frequency. Comes with 6 ft. cord. Output voltage 120 VAC.

Fax/Modem Protection

Type TSB. Offers 100% spike protection for line-to-line and line-to-ground. Suppresses telephone line transients. 1 picosecond response time. **Specifications. Clamping Voltage:** 200V Peak 10%. **Response Time:** less than 1 picosecond. **Peak Transient Voltage:** 12kV, 10 microseconds. **Energy Handling:** 70 Joules. **Series Resistance:** 25 ohms, each line. **Input:** 5 foot cord with type RJ11 modular plug. **Output:** Modular RJ11 jack. **Dimensions:** 7/8″H × 2 1/4″W × 2 3/4″D. **Weight:** 1/4 lbs.

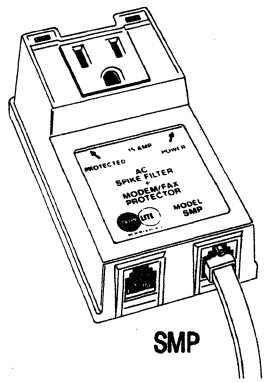
575-3000. Type TSB ..... **EACH 59.95**

Type SMP. Combination CO/AC Line Protector since AC outlet with built-in data line protection plugs directly into AC outlet for easy use. Ideal for FAX machine protection. Rigid RJ11X modular plug and jack. AC protection to 15 amps. **Dimensions:** 3 3/4″H × 2″W × 1 1/2″D. **Weight:** 1/2 lb.

575-3200. Type SMP ..... **EACH 49.95**

Type MP protects modems and data. Completely filters spikes in telephone lines. Uses RJ11 modular jack and plug. **Dimensions:** 7/8″H × 1 3/4″W × 1 3/4″D. **Weight:** 1/4 lbs.

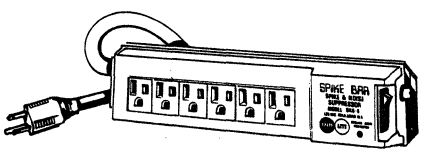
575-3100. Type MP ..... **EACH 19.95**



SMP

Economy Spike and Noise Protectors

Effective, efficient and economical. **High Voltage Spike Protection:** Handles up to 70 joules spikes at current levels up to 9,500 amps. **Initial Clamping Voltage:** 150 VAC rms, 70 watt second capacity. **Clamping Response Time:** within 5 nanoseconds. **Input:** 125VAC rms, 15 amps. **Load Handing:** 1875 watts maximum total load; 15 amps per socket. **Number of Outlets:** 6. **Protection Mode:** Normal and transverse modes.



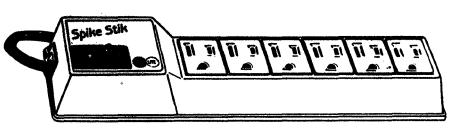
SK6-6

SK6-6. Features a lighted On/Off switch, 15 amp breaker and suppression component indicator light. 6 foot cord. **Dimensions:** 1 3/4″H × 10 3/4″W × 2 1/2″D.

575-0230. Type SK6-6 ..... **EACH 49.95**

SK6-0. Features direct plug-in and two indicator lights: Red to indicate that the power is on, Green to indicate that the suppression components are on. **Dimensions:** 4 3/4″H × 3 3/8″W × 1 1/4″D. **Weight:** 3/4 lbs.

575-0225. Type SK6-0 ..... **EACH 39.95**



SS-6

Spike Stik
Economical, effective 6 outlet spike and noise suppressor. The Spike Stik operates on 125 VAC rms, 15 amps. Handles up to 70 joule spikes at current levels up to 6,500 amps. On/Off switch, 6 ft. power cord. Responds in 5 nanoseconds. UL Listed. **Dimensions:** 1 1/2″H × 2″W × 8 3/4″L. **Weight:** 1 lb.

575-9560. Type SS-6 ..... **EACH 23.95**

The Compact Group

- Size: 8 3/4"L x 2 3/8"W x 1 1/2"H
- Case length (excluding mounting tabs): 7 7/16"
- Maximum rating: 15 A, 125 VAC, 60 Hz. 1875 W continuous duty
- Outlets: 'U' ground
- Seamless steel case with baked-on finish
- Component color: black
- Mounting centers: UL units, 5 13/16"; standard units, 8 1/4".
- Power cord plug: molded onto cord, type 14/3 SJT
- 608 Series has one outlet on end

†Units with the UL prefix are UL listed. *CSA certified.

The Premier Group

► UL listed
► All have circuit breakers
► Maximum rating: 15 A, 125 VAC, 60 Hz, 1875 W, continuous duty
► Outlets 'U' ground duplex ivory
► Seamless steel case with baked or ivory finish
► Power supply cord: 14/3SJT with molded plug, ivory
► Switched models have an ivory switch housing with amber pilot light

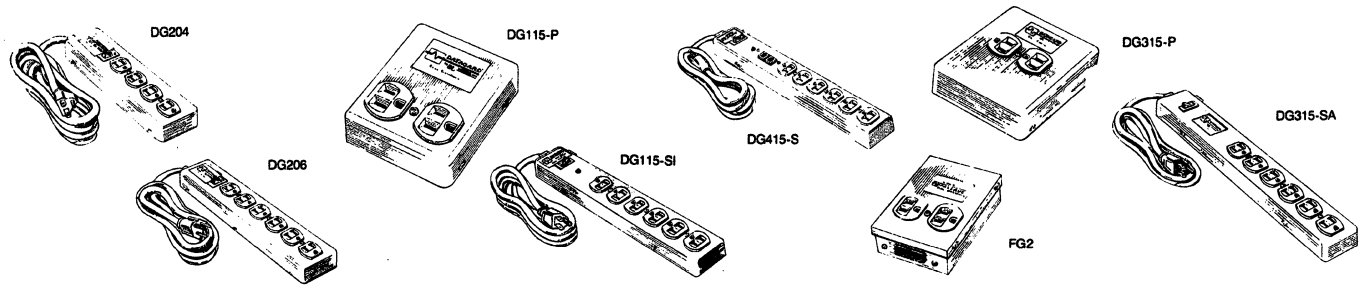
DATAGARD® Surge and Noise Suppressors



- Push-to-Reset 15A Circuit Breaker protection guards against power overloads
- Lifetime Warranty
- 3 Line Voltage Surge Protection insures that equipment is isolated from transients on all incoming power lines
- Tested to UL standard 1449 requirements
- Rating Per UL 1449: 400 V
- Mode of Surge Suppression: H-N, H-G, N-G
- Max. Surge Current: 6500 A
- Clamping Response Time: < 1 nsec
- Maximum Energy Dissipation: 210 Joules (3 × 70)

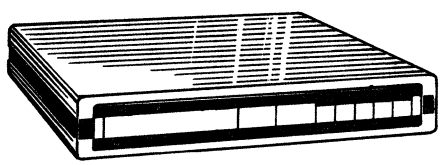
Electronic Power Centers

- Computer and peripheral cable management for up to 5 devices
- Patented 3-stage surge protection
- Clamshell design + PS/2 compatibility
- Circuit integrity/status light
- Meets ANSI/IEEE C62.41-1980 (IEEE 587-1980)
- Buyer Protection Plan
- Rating Per UL 1449: 400 V
- Mode of Surge Suppression: H-N, H-G, N-G
- Maximum Surge Current: 11,505A
- Clamping Response Time: < 5 psec
- Maximum Energy Dissipation: 291 Joules (1/135/155)



Electronic Power Centers™ (EPC) combine an efficient attractive means to manage tangled computer and peripheral cabling together with the best power surge protection available.

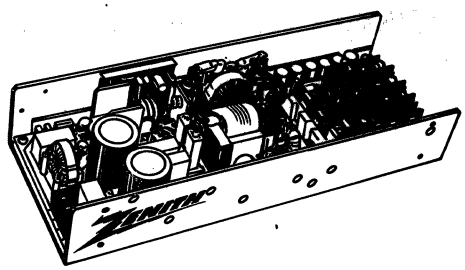
Zenith Model ZPS-150, ZPS-175, ZPS-200, ZPS-250, ZPS-300, and ZPS-400 Switching Power Supplies

Zenith series ZPS-150 through ZPS-400 watt switching power supplies are quad output, high frequency designs utilizing MOSFET and surface mount technologies. A proprietary electronic control startup circuit reduces size and improves efficiency.

The outputs are high current, independently isolated, and tightly regulated. Outputs 2 and 3 are user adjustable within a wide range of 10.0-15.0 VDC with surge current capabilities. These full featured switch mode power supplies offer complete system and unit protection as standard. They are designed to international safety and emissions standards of VDE 0806, VDE 0871/B, IEC 380, IEC 950, UL, and CSA for applications in computer, telecommunications and industrial systems. A 100,000 hour MTBF and two year limited warranty assure performance to specifications.



Standard Features
- ► Models ZPS-150, 175, 200 universal for 115/230 VAC input. User selectable 115/230 VAC input on models ZPS-250, 300, 400
- ► 47-65 Hz single phase input
- ► UL 478, CSA 22.2, IEC 380, IEC 950, FCC Part 15J, Class B, VDE 0806 and VDE 0871/B
- ► 100,000 hours MTBF
- ► Compact design
- ► All outputs ±5% adjustable
- ► Output 2 and 3 strap selectable at 10, 12 and 15 VDC
- ► Parallel Resonant, MOSFET and Surface Mount Technologies on Models ZPS-150, 175, 200
- ► High efficiency regulators on all auxiliary outputs; switching regulators on ZPS-150, 175, 200 and mag amp regulators on ZPS-250, 300, 400.
- ► Independently isolated outputs
- ► Start-up surge current 1½ times rated current on outputs 2 and 3
- ► Power good, remote start, remote sense
- ► Temperature protection, overcurrent protection, overvoltage protection
- ► Reverse voltage protection, short circuit protection
- ► MOSFET, Current Mode Control and Surface Mount Technologies on Models ZPS-250, 300, 400
- ► Bus bars on main output
- ► High reliability patented electronic startup circuit
- ► 70% efficiency nominal input full load
- ► Clearly identified traces and component legends
- ► U-Channel aluminum construction
- ► Two year warranty
- ► 100% cycled burn-in
- ► Comprehensive user's manual provided
- ► Standard off-the-shelf delivery

Optional Feature
- ► EMI cover

Available Early 1990

In addition to the above features, Zenith offers units with adjustable outputs. For the ZPS-250A, 300A, 400A, output 2 is user adjustable within a range of 4.75 to 16.0 VDC, all with surge current capabilities. A 150,000 hour MTBF for ZPS-250A, 300A, 400A and two year limited warranty assure performance to specifications.

Zenith Model ZPS-40, 40 Watt Switching Power Supply

Standard Features
- ► User selectable 115/230 VAC input
- ► 47-65 Hz single phase input
- ► 50,000 hours MTBF
- ► UL 478, CSA 22.2 No. 154, FCC Part J, Class B, IEC 380 VDC 0806 and 0871/B
- ► Compact design
- ► Clearly identified traces and component legends
- ► Board level construction
- ► 90 day warranty
- ► 100% cycled burn-in
- ► Standard off-the-shelf delivery

Zenith ZPS-40 is a 40 watt, triple output industry standard terminal power supply. It is designed to meet international safety and emissions standards of VDC 0806, VDC 0871/B and IEC 380.

Available for new systems design and replacement, the ZPS-40 footprint cross references Astec model 8151, Boschert model XL-40, ACDC model RBT41, and Power One model SPL40.

Freedom 10 Time Delay Relay

► Voltage and Polarity Friendly From 24V to 240V; AC or DC; and 50/60 Hertz
► Time Delay Range of 1 Second to 15 Minutes
► 2 Calibrated Controls: 1-100 Seconds and 0-15 Minutes
► DPDT Relay, Rating 5 Amps, Resistive 1/10 HP @ 120/240VAC
► 1% Repeatability ►CMOS IC Control Circuitry
► −20°C to +55°C Ambient ►Octal or Spade Termination

The Freedom 10 Time Delay Relay operates from any supply voltage from 24 to 240 volts AC/DC, 50/60 Hz. DPDT output contacts rated 5 amps resistive or 1/10 HP motor load at 120/240AC. Timing is adjustable from 1 second to 15 minutes by using the two calibrated controls together in any combination desired. The Freedom 10 is available with either octal or spade termination.

Stock No.	Mfr.'s Type	EACH		
		1-9	10-24	25-49

519-5205	Freedom 10/Spade	49.25	49.00	48.75

4300 Interval Timer

Model 4300 is an interval timer that permits operating voltage to be applied to a load circuit for a preset timing period. The load will operate only once for each application of power for the preset time and then turn off. Should the power be removed during the timing period the load would turn off, and the timing period reset to the start of another cycle. In order for the load circuit to see the full interval of operating voltage, the input voltage must be present for a duration that exceeds the preset timing interval. U.L./CSA listed.

Interval/Single-Shot Timer

Model 4310 can perform as an interval timer, or as a single-shot timer. The difference between interval and single-shot operation is the operation of the initiate switch. If the load is to operate from a continuous closure from the initiate switch, wire the timer with no jumper between terminals 6 and 7. In this mode the Model 4310 will function as an interval timer. If the load circuit is to operate for the entire timing period even if the initiate switch is closed for a short duration, connect terminals 6 and 7 and operate as a single-shot timer. In single-shot operation the power switched to the load cannot be removed with the initiate switch once the cycle has been initiated. **10 amp zero voltage switching.** UL/CSA Listed.

4710 Delay-On-Dropout Timer

The Model 4710 is a Delay-On-Dropout Timer which can control DC loads to 1 Amp or AC loads to 10 Amps with additional heatsinking. Closure of the initiate switch will energize the load. The timing period begins when the switch opens and resets to the beginning whenever it re-closes. To energize the load or reset the time delay, the switch must close for at least 50 milliseconds. All other specifications are identical to the Model 4310 above.

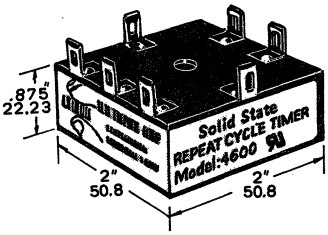
Adjustable Repeat Cycle Timers



Model 4600 can be used in most applications which require a load circuit to "turn-on" for a predetermined period of time, "turn-off" for a period of time, and then repeat the cycle for as long as operating voltage is applied. Can control loads up to one ampere. Controlled by external resistors which establish the "Repeat Cycle Time" and the "Energize Time". Provides a Non-Zero Voltage switching output. UL/CSA listed. **Model 4610** is the high power version of the 4600 Repeat Cycle Timer. Can control loads up to 10 amperes and provides zero-voltage switching. Operates from AC voltage only. UL recognized. UL/CSA listed.

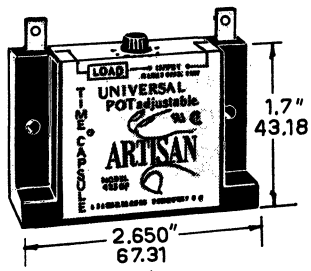
Universal Delay on Make Solid State Timers



Universal Time Capsules®
Each time power is applied, all models of the 438 series remain in the OFF state, permitting only leakage current to flow through the load device for the preset delay period. At the end of the preset delay, the unit switches ON and permits full current to flow and will remain ON for as long as power is applied. When power is removed for at least 50 milliseconds, the 438 will reset, (turn OFF) and be ready to run another timing period when power is reapplied.

Model 438U Universal Time Capsule®
Solid-state timing device will delay any device operating from 24-240 volts AC/DC. Accurate predetermined periods from 1 to 1000 seconds at output current levels up to 1 ampere. Recognized under the component program of Underwriters Laboratories, Inc. **Specifications.** Timing period is controlled by the connection of a resistor across the center two terminals. A short across the RT terminals produces a 1 second delay. To increase the initial time delay add 10K per second of delay required. (Ex: 1000 Sec = 10 Meg.) **Recycle Time:** 200 milliseconds maximum after timing cycle. **Operating Temperature Range:** – 15°C to + 85°C. Off Resistance of capsule during timing cycle is approximately 20K. **Operating Voltage:** 24 to 240 V AC/DC. No need to observe polarity. Repeatability of timing delay is ± 2%. U.L. Component Program Recognized, CSA certified.

Model 438USA Universal Switch Adjustable Time Capsule®
Combines the operating characteristics of Model 438U, above, with ten programmable switches enabling the time delay period to be set from 1 to 1024 seconds without external resistors. **Specifications. Recycle Time:** 200 milliseconds maximum after timing cycle. **Operating Temperature Range:** – 15°C to + 85°C. Off Resistance of capsule during timing cycle is approximately 20K. **Operating Voltage:** 24 to 240 V AC/DC. No need to observe polarity. Repeatability of timing delay is ± 2%. U.L. Component Program Recognized, CSA certified.

Model 438UP Universal Pot Adjustable Time Capsule®
Ideal for air conditioning and refrigeration operations and a wide variety of other industrial applications. All solid state timing module for DELAY ON MAKE control of any load device, such as a relay, solenoid or lamp. Will provide the timing control for any 1 ampere load operating from 19 to 288 volts AC or DC. Adjustable from 0 to 8 minutes by turning the knob on top of the timer to the desired value. U.L./CSA listed.

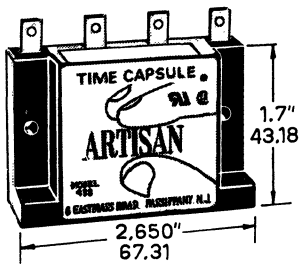
438A Time Capsule



The 438A Time Capsule is an all solid-state timing module for DEALY ON MAKE control of any load device. The timing period is controlled by a fixed or variable resistor connected across the center two terminals of the Time Capsule. Supplied in three timing ranges: (-1) is adjustable from 0.1-30 seconds. (-2) is adjustable from 1-300 seconds. (-5) is adjustable from 30-8000 seconds. To use the 438A over its full timing range, a 10 megohm potentiometer must be connected across the center two terminals. U.L./CSA listed.

AC and DC Flashers

423 DC Flasher. Solid-state device intended for use in electrical and electronic equipment as a flasher for lamp, relay and solenoid circuits and in electronic systems as a power pulser or system clock-driver. Delivers one-half ampere at the operating voltage (24 VDC). Output is fixed at a 50% duty cycle at 1 pulse per second. (60 flashes per minute).

Coto Corporation is the country's leading maker of reed relays for instrumentation and many other industries. The distinctive red Coto relays are manufactured to the most exacting quality specifications using computer automated testing, and advanced SPC techniques. All this adds up to reliability you simply can't find in other relays. So consider Coto the next time you're specifying reed relays.

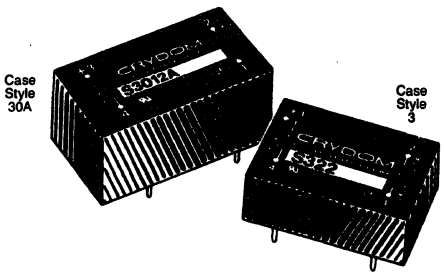
Series 3



AC Output PC Board Mount Solid-State Relays 0.3 to 3 Amps, 120 and 240 VAC

Designed for PCB applications. Units require only 1 sq. in. space on boards. Overall height of 0.45″ on case 3 allows spacing on 0.5″ centers. High current rating. Zero voltage switching.

General Specifications. Control Signal Range: 3.5 to 8 VDC. **(Models S3013A/S3023A:** 3.5 to 18 VDC). **Must Operate Voltage:** 3.5 VDC max. **Must Release Voltage:** 1 VDC min. **Isolation Voltage:** 2500 VAC. **(Models S3013A/S3023A:** 4000 VAC). **Operating Temperature Range:** – 30°C to 80°C.

Series D2W

Solid State Relays Low Cost AC Output 80 To 280 VAC, 2 Amps.

The D2W202F is designed to achieve optimum performance at a record low cost by means of completely automated assembly using labor saving robotics. The package has a hard skin-tight epoxy coating which provides excellent environmental protection and a pinout that matches the Series 6.

General Specifications. Control Signal Range: 3 to 28 VDC. **Must Operate Voltage, max.:** 3 VDC. **Must Release Voltage, min.:** 1 VDC. **Input Current @ 5 VDC max.:** 4 mA. **Input Impedance, min.:** 1500 OHMS. **Dielectric Strength 50/60 Hz:** 2500 VRMS. **Operating Temperature Range:** – 20° to 80°C.

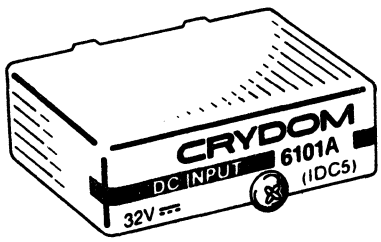
Series 6



AC And DC Microprocessor Input/Output Modules—3.5 Amps, 60 VDC, 120 and 240 VAC

For electrically clean, photo-isolated, noise-free interfacing between logic level programmable controllers, microprocessors and computerized machine controls and power level loads. Input modules accept power level signals and convert them to logic level signals. Output modules accept logic level signals to switch AC or DC loads to 3.5 Amps.

General Specifications—All Models. Dielectric (Input/Output): 4000 VRMS. **Isolation Resistance (Input/Output) @ 500 V:** 10^{10} Ohms. **Capacitance (Input/Output):** 8.0 pF. **Operating Temperature Range:** – 40°C to 80°C.

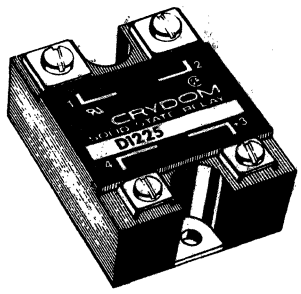
Series 1

► 2.5 to 90 Amp
► 120, 240 and 480 VAC
► SCR AC Output
► Panel Mount
► Solid-State Relays

These Crydom SSRs make it possible to switch AC power loads up to 47 kw. Output circuit consists of inverse-parallel (back-to-back) dual SCRs to meet the most demanding requirements. Features include zero voltage switching, phase control and normally closed models available.



General Specifications
Isolation Voltage: 4000 VAC Std. (Input to Output). **Operating Temperature Range:** –30°C to 80°C. UL and CSA. **DC Input Control Models. Control Signal Range:** 3-32 VDC. **Must Operate Voltage:** 3 VDC Max. **Must Release Voltage:** 1 VDC Min. **Input Current:** 4 mA max. @ 5 VDC. Additional DC input models available upon special order: "Normally Closed"—-B Suffix; "Non-Zero Switch"—-10 Suffix; "400 Hz"—4 Prefix. **AC Input Control Models. Control Signal Range:** 90-280 VAC. **Must Operate Voltage:** 90 VAC Max. **Must Release Voltage:** 10 VAC Min. **Input Current:** 2 mA max. @ 120 VAC.

50 To 90 Amp, 48-530 and 48-660 VAC High Voltage AC Ouptut Solid-State Relays 1000V-1200V Blocking

12

The highest power rated SSRs, up to 59 kw. 4000V of isolation with the highest available blocking voltages (1.2 KV) below which the SSRs will not mistrigger. The wide margin between operating and blocking voltages permits the proper use of transient suppression (MOV) devices on the 480V line. Features include high dv/dt and zero voltage switching.

General Specifications

10 to 75 Amp, 120-240V DC Controlled, AC Ouptput SSRs Feature IC Firing Circuits To Boost Reliability And Performance

Combining integrated circuit technology and the proven Crydom series 1 high power dissipation output system results in superior SSRs. The reduction of control circuit components from 22 to 3 greatly increases life and reliability.

7.0 to 40 Amp, 100 to 500 VDC CMOS—DC Input Solid State Relay

This new Crydom series of DC power SSRs incorporates a power MOSFET as the output device in the classics Crydom package. The input can be driven from most logic circuits, requiring less than 1.6 mA at 5 VDC. **General Specifications. Control Signal Range:** 3.5 to 32 VDC. **Input Current @ 5 VDC:** 1.6 mA max. **Isolation Voltage 50/60 Hz:** 2500 VRMS. **Operating Temperature Range:** 0°C to 80°C.

5 Thru 25 Amp/120 and 240 VAC—Triac AC Output Solid State Relays

Crydom Triac SSRs are quality-made devices designed for general purpose switching applications where performance requirements are less demanding than those offered by SCR output types. **General Specifications. Control Signal Range:** DC Input—3 to 32 VDC; AC Input—90 to 280 VAC. **Input Current:** DC Input—4 mA @ 5 VDC; AC Input—2 mA @ 120 VAC. **Isolation Voltage:** DC Input—4000 VRMS; AC Input—4000 VRMS. **Oper. Temp. Range:** DC Input— – 30°C to 80°C; AC Input— – 30°C to 80°C.

Series 2—8 Amps, 120 and 240 VAC AC Output, Panel Mount Solid-State Relays

General Specifications. Control Signal Range: 3.5 to 8 VDC. **Control Signal Range "221C":** 3.5 to 7 VDC. **Must Operate Voltage:** 3.5 VDC max. **Must Release Voltage:** 1 VDC min. **Must Operate Current:** 12 mA max. **Isolation Voltage:** 2500 VAC. **Operating Temperature Range:** – 30° to 80°C. **Snubber:** Internal.

The Crydom Series 2 solid-state relays combine small size, zero voltage switching and high current rating in a package designed for heat sink or panel mounting. Standard 0.187" push-on terminals allow quick connection and are positioned to provide maximum isolation between control and power circuits.

46 Series DPDT 321 Series

This DPDT switch is two SPDT (series 164) relays mounted together on a common plate with a single solenoid. The connectors are all opposite the mounting surface allowing easy access and flush-mount capabilities. With isolation of 60 dB at 50 MHz and 30 dB at 1 GHz, this low-priced relay is suitable for most general purpose switching applications.

54 Series SPDT 318 Series

At a 150W maximum power rating, these medium size switches accomplish a variety of switching functions. With BNC, TNC or N connectors on the same plane as the power coil, this switch is suited for mounting in various positions. The switches are manufactured to the requirements of MIL-S-3928 with gold-plated silver contacts and two-bladed construction allowing 50 dB isolation at 50 MHz and 30 dB at 4 GHz.

55 Series SPDT 314 Series

Especially suited to panel-mounting, the series 55 has RF connectors mounted with the common port on one side of the RF cavity and the NC and NC ports opposite. At 150 W max. power, these medium size switches are capable of use in many environments. They are made to MIL-S-3928 and have 50 dB isolation at 50 MHz and 30 dB isolation at 4 GHZ, with other RF performance characteristics of equal integrity.

56 Series SPDT 316 Series

With all three (COM, NO, NC) RF connectors mounted opposite the operating coil, the 56 series relay may be mounted for easy access to coax cable hook-up. These medium size switches accomplish various switching functions, and are particularly suited to low power (150 W maximum) applications, although RF performance remains stable up through 5 GHz.

Series 62-110 SPDT—62 Series SPDT 317 Series

The Model 62-110 is a low cost, high performance coaxial relay available with two BNC output connectors and one UHF Common connector for use in mobile or battery operated transmit-receive applications. The 62-110 employs a grounded switching blade for high isolation up to 2.5 GHz. The 62-110 Series is available only with 12 V coil, for battery operation. Isolation is 60 dB min. at 100 MHz. These coaxial relays are also available with all BNC or all UHF connectors, if required.

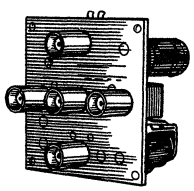
771-6914	62-110	12	UHF/BNC	—	110.77



Series 116 SP4T 323 Series*

This is a small multiple-position switch designed for applications where more than one input/output is needed. Each position has its own actuating solenoid and each port is normally open (non-grounding) or normally closed (grounding). Any one or more circuits may be closed at the same time. RF performance is excellent and remains stable from low levels. Isolation is 60 dB, grounding and 45 dB, non-grounding at 50 MHz.

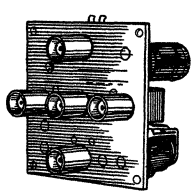
*Please review data sheet for mechanical differences.

164 Series SPDT 315 Series

The 164 series is a small compact relay that has all connectors mounted opposite the mounting plane. Gold-plated contacts provide excellent low-level RF performance (50 dB isolation, .03 dB insertion loss, VSWR 1.03:1). With good performance to 1 GHz, these switches have many general purpose applications.



Stock No.	Mfr.'s Type	Coil Volts	Conn.	Amphenol Model	EACH

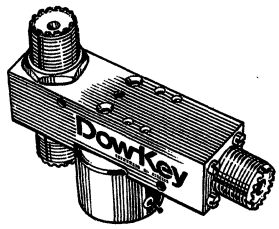
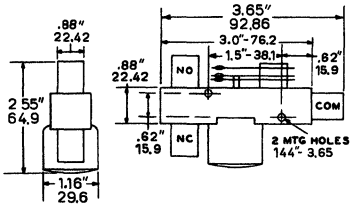
Other Dow-Key Amphenol direct replacement models are available, contact Allied Electronics for Model Number, Price, and Delivery.

Series 60 SPDT Remote Coaxial Relay





Remotely operated, ruggedly constructed, SPDT coaxial relays for operation to one kW. Specifications following for use in a 50-ohm transmission line. UHF connectors not recommended above 400 MHz. Operating time, 25ms max. Gold plated silver contacts. "Has two Form C5A, 115VAC auxiliary contacts. † Has 2C aux. plus high-isolation "G" connector at the NC or receive position, for transmit-receive applications. "G" connector increases the isolation to greater than – 100 dB at frequencies up to 500 MHz, but reduces power rating of the NC connector to 20 watts.

Series 260 DPDT
Series 260B By-Pass

These are ruggedly constructed coaxial relays. There are two basic types: the 260 is a DPDT relay with six connectors. The 260B is similar, except for an internal connection between the NC contacts, leaving only four connectors. The 260B is widely used for inserting a circuit element, such as a power amplifier, between two normally connected elements, such as an exciter and an antenna. Standard coils are 12 VDC (48 ohms), 26.5 VDC (245 ohms) and 115 AC. Operate time at 20°C is 25 mS maximum.

401 Series SPDT

The 401 SPDT switch with SMA connectors operates DC-18 GHz with minimum isolation of 60 dB (85 dB below 1 GHz), maximum VSWR of 1.5:1, and maximum insertion loss of 0.5 dB. Handles up to 200 W CW (25W at 18 GHz). Standard coils on failsafe relays are 12VDC (42 ohms), and 28VDC (260 ohms). Operate time at 20°C is 15mS max. Type 401-2208 is standard. Type 401-230832 has a set of form C indicator contacts. Dimensions (exclude connectors): 1.40″H × 1.34″L × .50″W (35.6 × 34.0 × 12.7mm). Weight: approximately 2 oz.

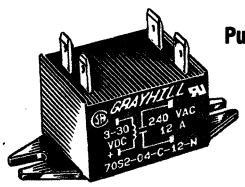
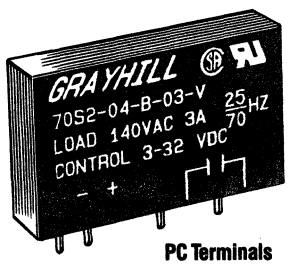
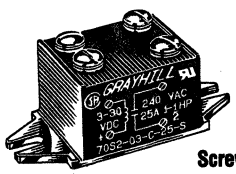
70S2 Series Solid State Relays



Push-on Terminals



PC Terminals



Screw Terminals

- UL Recognized, CSA Certified
- Miniature Size, High Performance
- High Surge Current Protection
- Built-In Transient Protection
- Zero Crossing Switching
- High Thermal Conductivity

Panel Mount Mini-Puck Relays
- Fit/Replacement for Hockey Puck Relays
- Switch Up to 25A in About 1/2 the Space

PC Mount SIP Relays
- Board Area 680 Sq. in.
- Switches .3A With No Additional Heat Sink

Push-On Terminal Panel Mount Relays

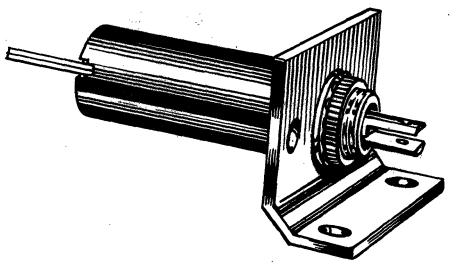
T and TP Series Tubular Solenoids



Tubular solenoids are available in either pull (T series) or push (TP series). TP series dimensions are identical to T series. Notched assembly of shell and bushing permits tightening of mounting nut without damaging coil. **Insulation Material:** Class "A" (110°C). **Termination:** 6" leads. Mounting hardware included. T and TP series recognized under the Component Program of Underwriters' Laboratories, Inc.

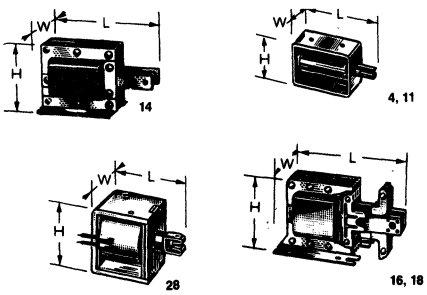
*U.L. Model

Industrial AC and DC Solenoids



Solenoids in a wide selection of sizes for AC or DC applications. Types 11 and 28 are for either AC or DC voltages. Laminated solenoids Types 14, 16 and 18 are for AC operation only. Tubular pull/push are for DC operation only. Intermittent-duty coils should not be energized for more than 3 consecutive minutes or be permitted to rise more than 85°C above 25°C ambient without time for cooling between cycles; continuous-duty types will not have a temperature rise of more than 85°C at rated voltage and ambient.

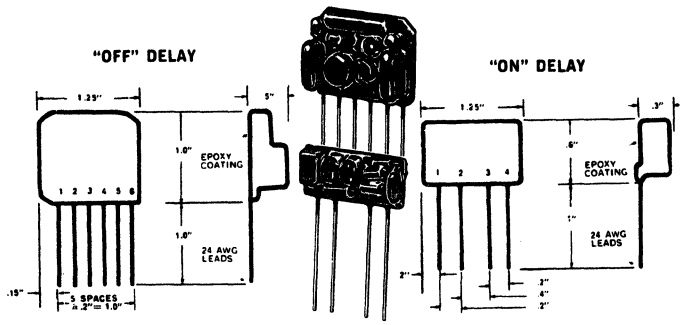
Iscotime KH Series



The **Icsotimer** is a unique solid state time delay which incorporates the most advanced solid state packaging techniques. This miniature unit has all the electrical environmental qualities which are characterized by timers ten times its size and cost. The imaginative design engineer will find the construction of the **Icsotimer** easily adaptable to printed circuit designs, readily incorporated into relay packages, and usable for problem areas where a small timer is required. Compare the parameters and features with the most popular units now available. It will be apparent that the **Icsotimer** is a valuable design tool.

SPECIFICATIONS. Timing Range (adjusted by external potentiometer): .1 to 300 seconds. **Input Voltage:** 12-240 VAC, 12-120 VDC; Tolerance — ±10% of nominal; Frequency — 50 or 60 Hz; Max. allowable DC ripple voltae — 20% peak-to-peak. **Output Voltage:** Load—relay or contactor up to max. current rating; "on delay" max. steady state current—100 milliamperes; "off delay" max. steady state current—500 milliamperes; min. steady state current—10 milliamperes. **Transient Suppression: ±2000 Volts for 100 microseconds. Inverse polarity protection on DC units. Dimensions:** "On delay" overall size, 1.25″L × .6″W × .3″H; "off delay" overall size, 1.25″ × 1″W × .5″H; lead size, #24 AWG solid, tin plated. **Temp. Range:** Operating −10° to 70°C. **Repeat Accuracy:** ±2% under fixed conditions. **Overall Tolerance:** ±10%.

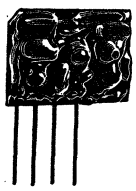
KD Digi Iscotimer



The **Digi Icsotimer** is the second member of the **Icsotime Series.** The **Digi Icsotimer** offers improved accuracy, timing ranges measured in hours and an increased output capability. The construction of the timer is easily adaptable to printed circuit designs and the epoxy coated body offers a tight packaging configuration.

Infrared Timer Control

IR sensing of object presence within a range up to 15 inches. The timer turns on as the object enters the field of view and turns off as the object is removed. A safety cut off time of 90 seconds is also provided. Heavy duty relay with contact rated 1 HP @ 125/250 VAC is mounted on pcb. Sensing head available on the pcb or remote. Consult factory for other time and sensing configurations.

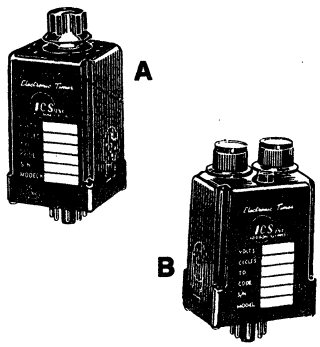
OP4 Timer Series



The OP4 Series Solid State Time/Delay Relays are suited for many automated or semiautomated industrial applications. These units incorporate advanced solid state packaging techniques. The hybrid timing circuitry affords the user a broad range of timing functions, timing ranges and input voltages. Combined with high quality electromechanical relays these hybrid modules offer environmental parameters and transient protection previously available only in expensive timers. Operating temperature range is −10°C to +70°C on all models.

KA3 Series

Small solid state time delay relays feature blade style plug-in mounting base. Remote adjustable (with external resistor). DPDT, 10 amps, resistive. **Overall Tolerance:** ±10%. maximum time delay defined with 1 megohm resistor. Fits 11-Pin blade type sockets. **Size:** 1⅞″ H × 1⅜″ W × 1½″D.

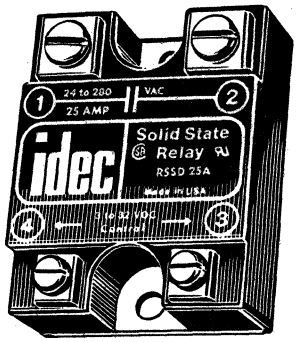
RSS Series Solid State Relays

- DC/AC and AC/AC models
- Photo isolation
- 600 volt blocking voltage
- 4000 volt isolation
- Zero voltage turn-on
- Built-in snubber
- 100% tested at rated current
- High surge capability
- UL recognized (File No. E59804)
- Dual SCR output (40 A)



RSS series relays provide highly reliable means of switching AC loads. Available in both AC and DC input voltage. **Dimensions:** 2.25″ × 1.75″ × .90″

Snap-Mount DIN Rail Sockets

Snap-mount sockets are designed to mount on BND-1000 mounting rail. The built-in mounting clip eliminates mounting hardware and reduces mounting time by eighty percent. For spacing between adjoining sockets, use SA-406 DIN rail spacer. Spacers are .197″ in width. Spacing can be adjusted according to the amount of spacers added. To prevent sideward movement, use BNL-5 end elip at each end of socket row.

To Mount: Place socket on mounting rail and press down.

To Remove: Pull clip out with screwdriver and lift socket.

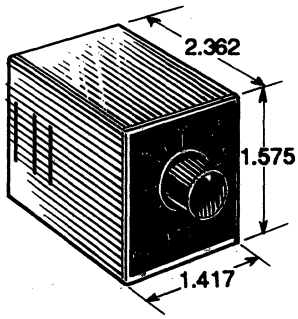
New-RTE Series

Multi-Function/Time Range Electronic Timer



Features

- ► **Redesigned compact housing**
- ► **Multi-function operation: On-Delay/Interval or Off-Delay/Single-Shot**
- ► **Multi-time range settings from 1 second to 10 minutes and 1 minute to 10 hours**
- ► **High repeat accuracy of ±0.25%**
- ► **Standard pin and blade termination**
- ► **UL recognized and CSA certified**

Specifications
Input Voltages: 120V AC + 10% to -20% (50/60 Hz)
12V AC/DC, ± 10%
24V AC/DC, + 10% to -15%
Contact Configuration: 2 Form C, DPDT (Delay outputs)
Contact Load Ratings: 10A Resist @ 240V AC, 30V DC
7A Input @ 240V AC, 30V DC
1/6 HP @ 120V AC
1/3 HP @ 240V AC
Power Consumption: 2.2VA, maximum
Repeat Accuracy: ± 0.25% maximum, 10 ms
Reset Time: 0.1 second, maximum
Dielectric Strength: 1500V AC, 1 minute (Bet. power and output terminal, except bet. contacts of the same pole)
Life Expectancy: Mechanical — 50,000,000 operations
Electrical 250,000 operations

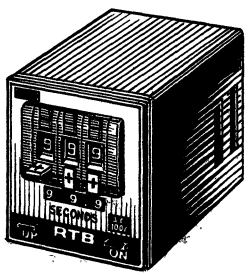
RTB Series Highly Reliable Miniature Electronic Timers



RTB Mini-Timers are electronic time delay relays suitable for use in business machines, medical equipment, vending machines and numerous other industrial applications where highly accurate time delay functions are needed.

All RTB timers are equipped with a time-up and power-on indicator and carry time settings that range from 6 seconds to 100 minutes.

Specifications. Rated Operational Voltage: 120 VAC (50/60 Hz). **Rated Current:** 10A. **Contact Ratings:** 120 VAC/10A. **Power Consumption:** 3 VA/1 W. **Repeat Accuracy:** ± 0.2% or less. **Reset Time:** 0.1 seconds or less. **Electrical Life:** 200,000 operations or more.

- ► **Highly reliable RC-oscillation counting system**
- ► **10 amp rated delayed/instantaneous contacts**
- ► **Time range from 0.2 seconds to 100 minutes**
- ► **Power-On and Time-Up indicator light**
- ► **Operation modes available in Delay-On-Make, Interval-On and On-Off (Flicker)**
- ► **Mounting by DIN rail or flat surface, panel mount adapter also available**

"Time Ranger" SS 6000 Series Solid State Programmable

- 16 Time Ranges In Single Timer
- Pin For Pin Interchangeable With Timers In The Field
- User Sets Time Ranges. No Math Required—Just Flip Switches
- Fine Tune Knob for Precision Timing
- All Timers Operate On Either AC Or DC
- CMOS Digital Circuitry — 0.5% Repeatable Accuracy

Suitable for continuous use. Line transient protected (MOV-10,000 volts / 20 microseconds). Recycle time typically 60mS. **Power Consumption:** 2.5 watts maximum. **Operating Temperature:** −30° to +160°F. DPDT 10 amp (resistive) relay has its own dust cover.

Output: DPDT 10 amp (resistive).
Timing: Programmable, 0.1 sec. to 2 hours.

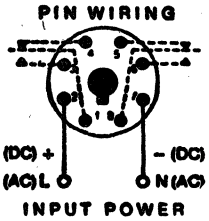
819-1001	SS-60228	24VAC/DC	8-pin octal	40.75	36.68	34.64	32.60
819-1002	SS-60226	12VAC/DC	8-pin octal	40.75	36.68	34.64	32.60

Action: Upon application of control power, time delay period begins. At end of time delay, output switch operates. When control power is removed, output switch returns to normal.

1

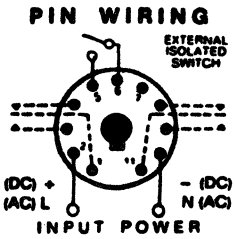


SS 605 Series Interval On

Stock No.	Mfr.'s Type	Input	Pin Wiring (Diagram 1)	EACH 1-9	10-24	25-49	50-99
819-1003	SS-60522	120VAC/DC	8-pin octal	43.35	39.02	37.16	34.68
819-1004	SS-60528	24VAC/DC	8-pin octal	43.35	39.02	37.16	34.68
819-1005	SS-60526	12VAC/DC	8-pin octal	43.35	39.02	37.16	34.68

Action: The relay will operate immediately when the input voltage is applied. At the end of an adjustable interval the relay will release and remain in this state until reapplication of the input voltage.

2

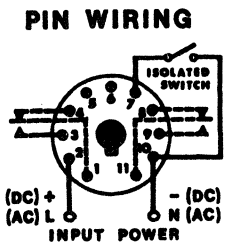


SS 615 Series
Momentary Interval (Single Shot)

Stock No.	Mfr.'s Type	Input	Pin Wiring (Diagram 2)	EACH 1-9	10-24	25-49	50-99
819-1012	SS-61522	129VAC/DC	11-pin octal	45.90	41.31	39.02	36.72
819-1013	SS-61528	24VAC/DC	11-pin octal	45.90	41.31	39.02	36.72
819-1014	SS-61526	12VAC/DC	11-pin octal	45.90	41.31	39.02	36.72

Action: Upon closure of control switch, output switch operates. Upon opening of control switch, time period begins. Any control switch closures prior to end of time period, output switch returns to normal. Continuous power must be furnished.

3



SS 616 Series
Off Delay With Isolated Control Switch

Stock No.	Mfr.'s Type	Input	Pin Wiring (Diagram 2)	EACH 1-9	10-24	25-49	50-99
819-1006	SS-61622	120VAC/DC	11-pin octal	45.90	41.31	39.02	36.72
819-1007	SS-61628	24VAC/DC	11-pin octal	45.90	41.31	39.02	36.72
819-1008	SS-61626	12VAC/DC	11-pin octal	45.90	41.31	39.02	36.72

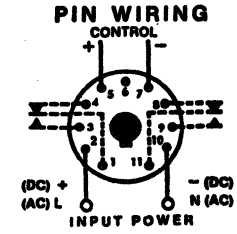
Action: Upon closure of control switch, output switch operates. Upon opening of control switch, time period begins. Any control switch closures prior to end of time period will recycle timer. At end of time period, output switch returns to normal. Continuous power must be furnished.

SS 616-B Series
Off Delay With Isolated Switch-Type B

Stock No.	Mfr.'s Type	Input	Pin Wiring (Diagram 3)	EACH 1-9	10-24	25-49	50-99
819-1015	SS-61622-B	120VAC/DC	11-pin octal	45.90	41.31	39.02	36.72
819-1016	SS-61628-B	24VAC/DC	11-pin octal	45.90	41.31	39.02	36.72
819-1017	SS-61626-B	12VAC/DC	11-pin octal	45.90	41.31	39.02	36.72

Action: Upon closure of the control switch, output switch operates and time period begins. The time period is not affected by duration of the control switch closure. At the end of time period, output switch returns to normal. Continuous power must be furnished to this timer.

4



SS 619 Series
Off Delay with Powered Control Switch

Stock No.	Mfr.'s Type	Input	Pin Wiring (Diagram 4)	EACH 1-9	10-24	25-49	50-99
819-1009	SS-61922	120VAC/DC	11-pin octal	48.45	43.61	41.19	38.76

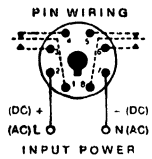
819-1011	SS-61926	12VAC/DC	11-pin octal	48.45	43.61	41.19	38.76

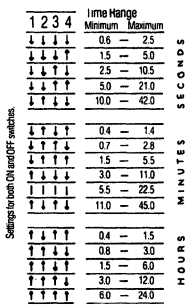
Action: Upon closure of control switch, output switch operates. Upon opening of control switch, time period begins. Any control switch closures prior to end of the time period will recycle timer. At end of the time period, output switch returns to normal. Continuous power must be furnished.

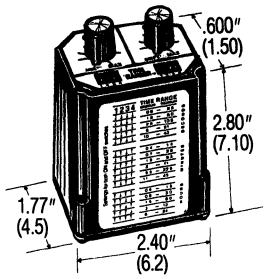
12

New! Programmable Cycle Timers

- ► 16 time ranges in single timer (see charts on front side)
- ► User sets time ranges. No math—just flip switches
- ► Instructions right on unit
- ► Fine tune knob for precision timing
- ► Pin for pin interchangeable with timers in the field—No rewiring
- ► All timers operate on either A/C or D/C
- ► CMOS digital circuitry—0.5% repeatable accuracy
- ► U.L. File No. E68626
- ► C.S.A. File No. LR45565







Suitable for continuous use. Line transient protected (MOV-10,000 volts/20 microseconds). Recycle time: typically 60Ms. **Power Consumption:** 2.5 watts max. **Output:** 10 amp DPDT (Resistive)—relay has its own dust cover. **Operating temp.:** – 30° to + 160°F.

SS 631 Series—Off-Delay Repeat Cycle

Action: Upon application of power "off" time period begins. When "off" time completed, "on" time period begins. When "on" time completed "off" time again begins and cycle repeats until power is removed.

Stock No.	Mfr.'s Type	Input Voltage	Pin Wiring	EACH 1-9	10-24	25-49	50-99
819-6001	SS-63122	120VAC/DC	8-Pin Octal	**55.00**	**49.92**	**46.36**	**43.26**
819-6002	SS-63128	24VAC/DC	8-Pin Octal	**55.00**	**49.92**	**46.36**	**43.26**
819-6003	SS-63126	12VAC/DC	8-Pin Octal	**55.00**	**49.92**	**46.36**	**43.26**

SS 651 Series—On-Delay Repeat Cycle

Action: Upon application of power "on" time period begins. When "on" time completed, "off" time period begins. When "off" time completed "on" time again begins and cycle repeats until power is removed.

Stock No.	Mfr.'s Type	Input Voltage	Pin Wiring	EACH 1-9	10-24	25-49	50-99
819-6004	SS-65122	120VAC/DC	8-Pin Octal	**55.00**	**49.92**	**46.36**	**43.26**
819-6005	SS-65128	24VAC	8-Pin Octal	**55.00**	**49.92**	**46.36**	**43.26**
819-6006	SS-65126	12VAC/DC	8-Pin Octal	**55.00**	**49.92**	**46.36**	**43.26**

SS 661 Series-Single Cycle—Delayed Interval

Action: Upon application of power "off" time period begins. When "off" time completed, "on" time period begins. When "on" time completed timer returns to "off" state and remains there. Power must be removed and re-applied to initiate action again.

819-6007	SS-66122	120VAC/DC	8-Pin Octal	**55.00**	**49.92**	**46.36**	**43.26**

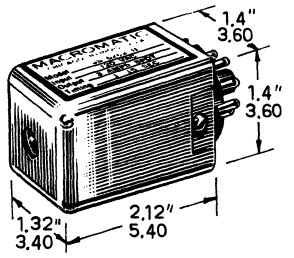
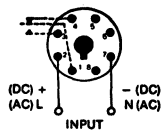
SS 6 And SS 8 Economy Series Solid State Time Delay Relays

- ► Output—3 Amp SPDT
- ► 8 Pin Octal Plug-In
- ► Adjustable
- ► 3 Watts Max. Power Consumption
- ► Operating Temperature °0F to + 130°F
- ► 100mS Recycle Time
- ► 2% Repeatable Accuracy



SS 6 (On Delay)

Action: Upon application of control power, time delay period begins. At end of time delay, output switch operates. When control power is removed, output switch returns to normal.



SS 8 (Off Delay)

Action: Upon closure of the control switch, output switch operates. Upon opening of control switch, time period begins. However, any control switch closures prior to the end of the time period will immediately reset the time. At the end of the time period, output switch returns to normal. Continuous power must be furnished to timer.

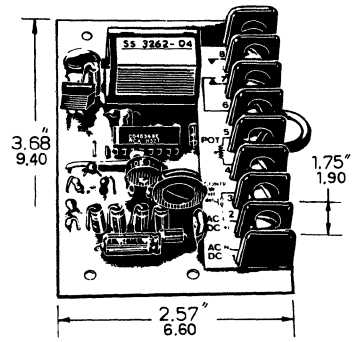
SS 32 And SS 35 Low Cost Digital Circuit Series

- ► Digitally Operated CMOS Circuitry
- ► Repeatable Accuracy ±0.5%
- ► Power Consumption 2.5 Watts Max.
- ► Suitable For Continuous Use At Rated Load
- ► Operating Temp.: – 30° to + 160°F
- ► Glass Epoxy PC Board
- ► Adjustable—On Board or Remote Pot
- ► Line Transient Protected



Output: 3 amp SPDT (resistive). **Input:** 120VAC standard. 12VDC, 24VDC and 24VAC also available. Contact your nearest Allied representative. **Mechanical:** screw-down terminal block wiring. Four holes for user-supplied stand-offs.

Note: For timing chart and action description see SS 6 and SS 8 series above.

*Accepts all Class 388 plug-in relays.

Class 389 General Purpose Relays

Class 389 General Purpose Relays are designed to switch larger contact loads without increasing overall size. It is similar in design to Class 388 relays and features a flange mounted cover. **Contact Materials:** silver cadmium oxide, gold flashed. **Temperature Range:** Operating, – 30°C to + 50°C AC; -30°C to + 65°C DC. **Enclosure:** Clear polycarbonate. Quick connect terminals are 1/4 × .032" and suitable for soldering. **Size (max.):** 2 29/32"L × 1 17/32"W × 1 13/32"H. **Weight:** 3.3 oz UL/CSA E436 41/LR37547.

Series 301 Opto-Isolators

Optical coupling provides high input-to-output isolation. Couplers can be used as on/off switches or as voltage-controlled resistors. Ideal for triggering SCRs and triacs. **Off Resistance:** 10 megohms, min. **Output Voltage:** 250 VAC/DC, 100 VDC or AC peak. **Dielectric Strength:** 1000 V rms between all insulated points. **Insulation Resistance:** 10^9 Ohms. **Operating Temp. Range:** – 40°C to + 60°C.

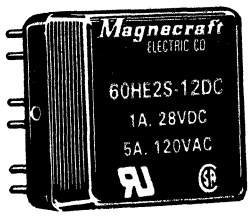
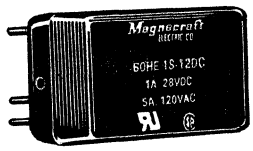
General Purpose Relays

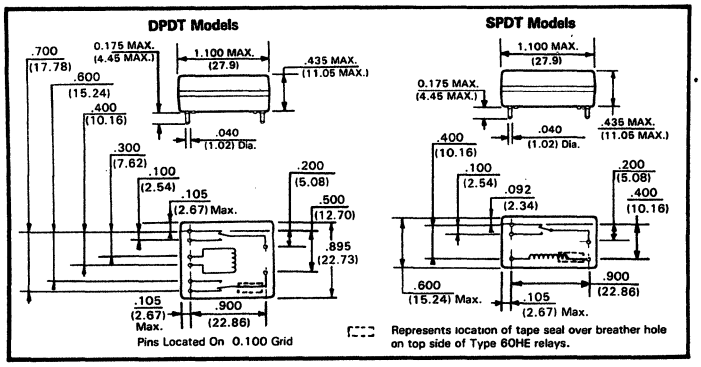


Type 60HE2



Type 60HE1

Mechanical Data



Series 60 Printed Circuit Relays
The installed height of 0.570" max. is ideal for low profile PC board applications. Terminal pins, tightly anchored to the case, can be bent without affecting internal contact adjustment. High contact force plus self-cleaning action assure minimum contact resistance. Series 60 relays are available in SPDT and DPDT models. **Applications include:** business machines, alarm and control systems, communications, and data processing and telephone switching equipment. Can be driven from TTL driver or transistor circuits with 1.50 Ma output. **Operate time:** 5 MS typ. **Release time:** 2 MS typ. **Dielectric strength:** 500 VAC rms between contact and coil. **Contact Ratings (resistive load):** 2 Amp at 24 VDC or .6 Amp at 100 VAC. UL and CSA listed. The 60HE is immersion cleanable with unique tape seal which is removed after wave soldering and cleaning for normal out-gassing of the enclosure. **Standard Coil:** 1 amp. **Sensitive Coil:** 2 amps.

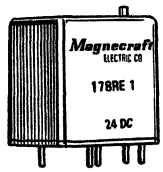
Series 178 SPDT DC Relays



Subminiature relay for printed circuit use. Polypropylene case for handling and reduction of contact contamination from solder flux and degreasing solvents. Positive response to power coil signals as low as .4 Watts. **Life Rated:** 1,000,000 operations, mechanically; 100,000 operations, electrically, min. **Operating Temperature Range:** – 30°C to + 60°C. Contact 3 amps at 28 VDC/120 VAC resistive. **Size H × W × D:** .945 × .669 × .846".

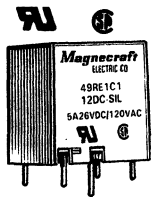
Series 49 SPDT DC Relay



A low-cost, printed-circuit board relay for switching up to 5 Amps in just over 1 cubic inch. Units have dust covers and contact placement furthest away from the PC board. Typical applications are garage door openers, antenna rotor controls, vending machines, automatic toys and games. **Size:** .759 × 1.146 × 1.255". **Temperature Range:** – 55°C to + 85°C. **Weight:** 1.5 ozs. SCO in stock number denotes silver cadmium oxide. **Expected Contact Electrical Life:** 100,000 operations at rated load. **Initial Contact Resistance (max.):** 100 milliohms at 6 V, 1 Amp. Max. **Coil Dissipation:** 2 Watts at 25°C. **Coil Pickup Voltage (max.):** 75% of nominal voltage.

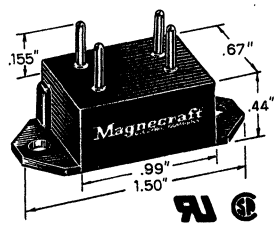
Series 226 Solid State Miniature Relays



Low cost solid state relay designed to switch low to medium current AC loads from low level logic signals. Can be chassis mounted and connected with standard push on connectors. Compatible with TTL logic. Unit is completely potted to resist shock and moisture effects. DC input versions have LED activated optoisolator input. **Operate time:** 8 msec typ. **Release time:** 25 msec typ. **Dielectric strength:** 2500 VAC rms from input to output and case. Units have continuous current rating without heatsink of 0.05 to 1.5 amps; 0.05 to 7 amps with heatsink.

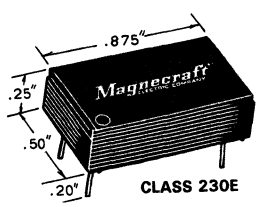
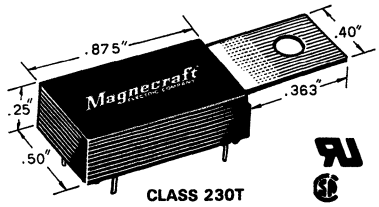
Series 230 Solid State Relays



CLASS 230E



CLASS 230T

The Series 230 are optically coupled solid state relays offering high efficiency and reliability with Zero Angle Firing. Unlike other ZAF types which have high leakage (1 to 5 mA), the 230 features leakage less than 1.0 mA. Units handle 1 cycle surges of 50 Amps and 2 minute overloads of 100%. **Isolation Input/Output:** 4000 VAC. **Operating Temp. Range:** 0°C to + 115°C. UL and CSA pending.

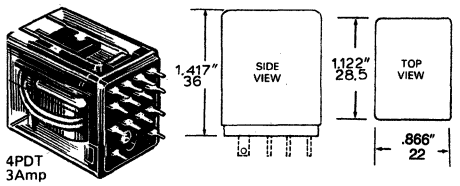
Class 78 General Purpose Industrial Relays



Class 78 relays are the most widely used of all general purpose industrial relays. Slightly larger than one cubic inch, these relays are interchangeable with all comparable types. 4 PDT with 3 amp contacts or DPDT with 10 amp contacts or SPDT with 15 amp contacts. Plug-in, printed circuit, or quick connect terminal. **Dimensions:** 1.4 × 1.1 × .86". Dust-proof enclosures.

Class 88 Open and Octal Base General Purpose Relays

Highly reliable general purpose relay has glass melamine insulation for high dielectric strength and resistance to humidity or temperature change. Modeled nylon bobbin. Hinge-pin armature. Contacts SPDT, DPDT, or 3PDT rated 10 amps. Open styles have tinned solder terminals; plug-in versions have 8-pin octal or 3PDT 11-pin octal base.

Class 21 Power Relays

12

Designed for transportation and traffic control industry. Switches tungsten lamps for traffic signaling, street lighting, and energy controls. Suitable for domestic switching of tungsten lamp loads of 1000 watts at 120 VAC. Mechanical life expectancy is five million operations. Its electrical expectancy is 200,000 operations at rated load.

Mercury Displacement Relays

Mercury Displacement Contactor Tube operates in relative silence, eliminating "knocking" associated with conventional hard contactors. **Specifications. Pull-in Voltage:** 96V typical. **Drop-out Voltage:** 93V typical. **Operate time:** 50 milliseconds typical. **Release Time:** 80 milliseconds typical. **Contact Bounce:** None. ± 10% of rated coil voltage. **Contact Resistance:** 35 amp models, .003 ohm terminal to terminal; 60 amp models, .002 ohm terminal to terminal. **Temperature Range:** – 35°C to + 60°C ambient (operating). **Dielectric Strength:** 2650 rms (1 sec.). **Insulation Material:** Class B (130°C) U.L. approved. **Terminals:** 35 amp models, pressure connectors for AWG6-14; 60 amp models, pressure connectors for AWG 2-8. **Mounting:** vertical ± 10°.

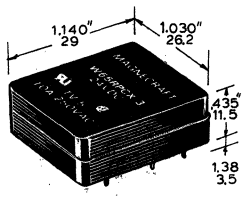
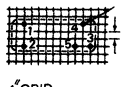
Class 65 SPDT Epoxy Sealed Relay





CLASS 65
FLATPACK

Epoxy sealed relay provides protection during automatic wave soldering and cleaning. Immersion proof — which allows a wide variety of uses and placements. A pierced hole in cover after PCB washing extends contact life and lowers operating temperature. Types W65ERPCX-3 through W65ERPCX-4 are flatpacks. Types W65ERPCX-203 through W65ERPCX-204 are uprights.

Stock No.	Mfr.'s Type	Coil		EACH

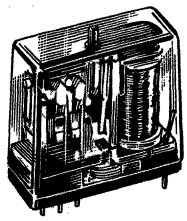
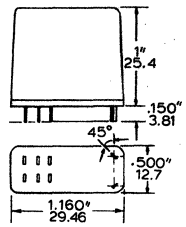
Class 76 Miniature Printed Circuit Relays— Epoxy Sealed





5, 10, and 16 amp general purpose, high current, printed circuit relays. They are versatile, provide long life and reliable performance. Minimum mechanical life of 5,000,000 operations. After soldering and washing process, pierce the hole in the cover.

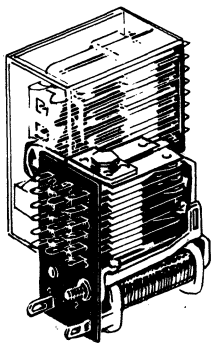
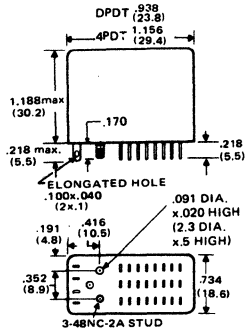
Class 67 Miniature Industrial Relays





Plug-in or solder terminal mount relays with 3-48 NC stud. Single and bifurcated crossbar contacts of silver alloy rated 3 to 5 amps at 32DC or 120VAC resistive load. All relays with plastic dust covers. Voltage specified relays pull-in at 80% of nominal or less. **Resistance values** ± 10% measured at 25°C. **Size:** DPDT, 0.734 x 0.938 x 1.88″; 4PDT, 0.734 x 1.156 x 1.188″; 6PDT, 0.734 x 1.375 x 1.188″; 8PDT, 0.734 x 1.592 x 1.188″. U.L. File No. E52197. CSA File No. LR41729. **CSX or RCSX:** Solder terminals. PCX or RPCX: P.C. terminals.

Reed Relays And Micro-Miniature Relays

Epoxy molded construction modular, completely resistant to standard printed circuit board cleaning processes. **Insulation Resistance (Ohms):** 10^{10} minimum (tested at 100VDC).

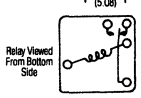
SPDT



Reed Relays

Class 102V 5,000 Volt Reed 1, Form A SPST

Operate in any position. Contacts SPST-NO, rated at 50VA max. at 3A max. or 5000VDC max. resistive. Life rated at 10 million operations. Standard operating temperature range is from – 40°C to + 85°C. Storage Temperature is from – 60° to + 105°C. Operating time is 3 milliseconds. **Capacitance:** (Non-shielded relay) across open contacts is 1.0 pF. Coil dissipation in MW at nominal coil voltage is between 200 and 500. **Size:** 4½″L × 15/16″W × 7/8″H. **Weight:** 3 oz.

850-1566	W102HVX-3	24	400	**68.33**	**59.03**	**53.43**

Class 7 Micro-Miniature Relays

Excellent for fast operating, release time, and RF switching characteristics. Rated for low level to 2.0 Amp switching, it also has low contact resistance. Long life, more than 100 million operations. Footprint compatible with .1″ (2.54mm) grid arrangement. Total volume less than 1cc. Requires .168 inch circuit board space.

Class 211 Time Delay Relays

The Class 211CP Time Delay Relay makes use of hybrid circuitry, combining solid state circuitry for timing function with an EMR for DPDT 10 amperes output switching. Features nylon dust covers, and reverse polarity protection on DC models. **Repeat Accuracy:** ± .1% of setting at nominal voltage at 25°C. **Contact Combination:** DPDT standard. **Reset Time:** 100mS max. **Temperature Range:** Operate, – 10°C to + 55°C; Storage, 55°C to + 85°C. Transient protection of 2000V for 8mS standard.

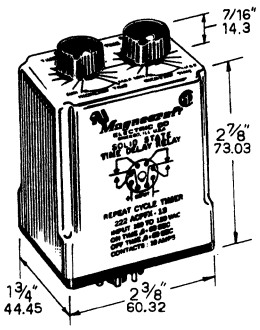
Class 222 Repeat Cycle Timer



Features plug-in mounting, octal style 8-pin terminals, knob adjustable timing and impact-proof dust cover. The Class 222 Repeat Cycle Timer contact combinations are DPDT (2 Form C), with a contact rating of 10A. It has a repeat accuracy of ± .1%, ± 33m/SAC, and ± 10mSDC. The reset time is 100mS maximum. It has a contact life that is 2,000,000 operations at 120VAC, 2 amps resistive. U.L. recognized No. E43641. CSA certified No. LR41729.

12

Class W6 Solid State Relays

All models incorporate opto-isolation between input and output, and zero-voltage switching. Features high transient capability. DC controlled models have an input impedance of 1500 ohms min.; AC models, 60K ohms typical.

G2Q Series General Purpose, Horizontal Mount Relays

Sealed, general purpose, horizontal mount types. Features high international .10" terminal pitch arrangement. **Specifications. Contact. Rated Load:** 110VAC 0.5A, 24VDC 1A. **Carry Current:** 2A. **Maximum Operating Voltage:** 125VAC, 60VDC. **Maximum Operating Current:** 1A. **Maximum Switching Capacity:** 60VA, 30W. **Minimum Permissible Load (reference value):** 5VDC 1mA.

G4W Series High Voltage Upper Mounting Bracket Type

Features impulse withstand voltage of 10,000V between input and output (coil and contact). Creepage distance of .31" minimum between coil and contact fully meets VDE C/250 and dielectric strength of 4,000VAC minimum conforms to U.L., CSA and IEC Class II. Upper mounting bracket type with solder terminal. **Specifications. Contact Form:** SPST-NO. **Rated Load (resistive):** 220VAC 15A. **Carry Current:** 15A. **Max. Operating Voltage:** 250VAC. **Max. Switching Capacity (resistive):** 3750VA. **Minimum Permissible Load (ref. value):** 5VDC 100mA.

G6A Series PC Board-Use Relays

Plastic sealed relay with high surge dielectric for use in telecommunication equipment. High sensitivity. Low profile design for use in 1/2" PC board rack. Surge withstand voltage of 1500 VDC meets FCC Part 68 requirements. Unique moving loop (permanent magnet) armature reduces relay size, magnetic interference, and contact bounce time. DPDT or 4PDT bifurcated crossbar AgPd contacts (Au clad). Rated 2 amps carry current.

G4S Series

Sealed, SPDT relay ideal for applications in household electrical appliances. Construction resistant to flux wicking. Dip soldering is possible. **Specifications. Contact Resistance:** 100 MΩ maximum. **Operate Time:** 15 mS maximum. **Release Time:** 5 mS maximum. **Insulation Resistance:** 100 MΩ minimum (at 500 VDC). Replaces G2U Series.

Ruggedly constructed relay offered with silver contacts, code "Y", rated 5 Amps; and silver-cadmium oxide contacts, code "G" rated 10 Amps. Contact arrangements are available up through 3 form C(3PDT). Expected life exceeds 100,000 operations at rated load. Mechanical life is 10 million operations, minimum. Enclosed in a clear dust cover. U.L. recognized under file E22575. Low cost version of the KRP relay.

KRPA-N Series has an indicator lamp wired in parallel with its coil, making this model ideal for voltage or current monitoring applications. Silver-cadmium oxide contacts are rated 10 Amps. KRPA-N specifications are identical to those of other models in the KRPA series.

Micro Miniature Type HP Relays

Recommended for applications such as TV cameras, dictating machines, desk top computers, copiers, etc. For PC circuit board or socket mounting. Encased in black, high impact dust covers. Non-polarized, non-latching, half-size relay has terminals on .200" grid; for plug-in or soldering. Long-life DPDT gold-plated silver contacts rated low level to 2 amps at 28VDC resist.; 0.5 amp max. at 120VAC. **Insulation resist.:** 1000 megohms min. at 500VDC; breakdown volt; 500V rms. **Size:** .49 × .88 × .48". **Shpg. wt.:** 1 oz.

R10 Series DC Industrial Relays

Transparent enclosures. Solder terminals, for stud or plug-in mounting. **Mechanical Life:** 100 million operations. Y series contacts are fine silver. X series contacts are silver-cadmium oxide. **Operating Temperature:** – 55° to + 72°C. **Size:** 1.187 × .950 (double pole models only) × .735" (3.02 × 2.41 × 1.86cm) max. **Wt.:** 1½ oz. (42.5gm). **Contact Rating:** Y Series 3A; X Series 5A.

R10 Series CMOS-TTL Compatible Relays

Will accept drive directly from many CMOS and TTL ICs—no interface needed. Contacts are .078" in dia. made of fine silver. **Resistive Load Rating:** 28VDC or 115VAC form .01 to 3A max. **Insulation Resistance:** 10,000 meg. at 25°C and 50% R.H. **Typical Capacitance:** Contact-contact, 2 picofarads; coil-frame, 30 picofarads; Coil-contacts, 2 picofarads. **Temperature Range:** – 55°C to 75°C. Has pierced solder terminals. **Weight:** 0.8 to 1.4 oz. **Rated:** 2 Amps Typ. (3 Amps max.).

10 Amp Dual Coil Mechanical Latching Relay

KBP Series latching relay enclosed in a clear polycarbonate dust cover, the KBP is furnished with 11-pin or 20-pin octal-type plugs for socket mounting. Contact arrangements of DPDT, 4PDT and 5PDT are available. Factory rating for contacts: "G" suffix indicates silver-cadmium oxide contacts on movables rated 10 amps @ 120V AC 80% P.F. Coils are rated for intermittent duty operation. Both release and trip coils are the same voltage. One coil operates relay to set latch and other coil releases it. Ideal for memory work and overload applications. Operates on momentary impulse to either coil. **Temperature Range:** – 45°C min. + 85°C max. (intermittent duty). **Weight:** 10.8 ozs. (306 gm).

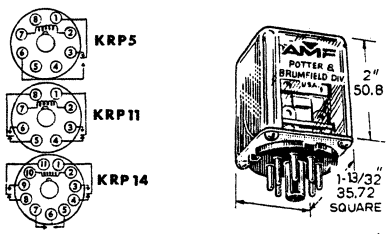
Transparent Plug-in Case — Strong and Dustproof



Enclosed Relays Series KRP and KRP-N

General-purpose relays are enclosed in high-impact transparent, dustproof Polycarbonate case. Coil power at 25°C. DC—1.2 watts; AC—2 voltamperes. **Temperature range:** – 45°C minimum; AC types to + 55°C maximum; DC to + 70°C maximum. **Operate time (approx.):** 15 msec. **Release time:** 10 msec. **Life:** 10 million cycles, mechanical. **Insulation resistance:** 1000 meg-ohms. **Breakdown:** 500 V rms, 60 Hz.

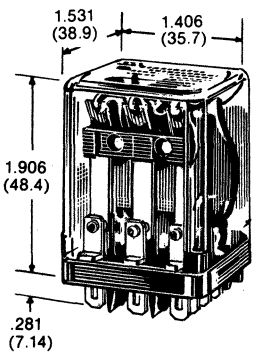
*KRP-N Series includes a lamp to indicate current or voltage availability in power circuits. Lamps lights when coil is energized. Types KRP5 and KRP11 plug into standard octal socket; KRP14 plugs into 11-pin.

KUP Series Enclosed Relays



KUP Series relays are U.L. recognized under File E22575 and CSA certified under File LR15734. They are ideally suited for many diverse applications. "A" in the manufacturer's type number denotes 50/60 Hz coil; "D" denotes DC coil. Relays are socket mountable with these exceptions: types KUP11A25, KUP14A25 and KUP14D25 are socket mountable with push-to-test button for manually actuating contacts. KUP14A35, KUP14D35, KUP11A35 and KUP11D35 types are socket mountable with highly visible neon lamps which indicate the presence of coil power. KUP14A45 is socket mountable with neon indicator and push-to-test button. KUP5A55, KUP5D55, KUP11A55, and KUP11D55 have flange mount cases. Relays have silver-cadmium oxide, 10 amp contacts with .187" (4.8mm) by .020" (0.5mm) quick connect/solder terminals except for types KUP11A11, KUP11D11, KUP14A11, and KUP14D11, which have fine silver, 5 amp contacts with .187" (4.8mm) by .020" (0.5mm) quick connect/solder terminals.

Small, Rugged Relays for AC and DC Operations.

KHU has polycarbonate dust cover; **KHS**, hermetically sealed with metal cover. All models U.L. Recognized. KHS is recognized for class 1 division 2 hazardous environments. Silver contacts, rated 3 amps at 30VDC, or 120VAC res. Solder term, 3-48 mtg. stud. 2 oz. (57gm) KHU type replaces KHP. All fit KH Series sockets.

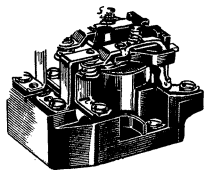
PRD Type Heavy Duty Power Relays



PRD relays are interchargeable with PR relays; same size and mounting holes. Improved design allows use of power screwdrivers on terminals. All models are U.L. and CSA listed and have silver contacts. Model PRD-3AY0 is rated 40 amps, all other rated 25 amps. **Mounting:** two .188″ dia. holes on 1.875″ centers. **Weight:** 11 oz.

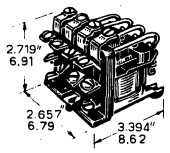
* Auxillary switch with 5 amp contacts.

PM17 4DPT 25-Amp Power Relays



4PDT for polyphase and heavy-duty switching. Contacts are silver-cadmium-oxide. Rated at 25 amps, 240V, 50-60 Hz, non-inductive. 1 HP per moveable arm at 120 or 240V single-phase. Mount by keyhole and 2 channels for 8-32 screws on 2 × 2 1/2″ triangular centers. Screw term. 2 45/64 × 2 31/32 × 3 23/64″. **Weight:** 1 lb. UL, CSA listed.

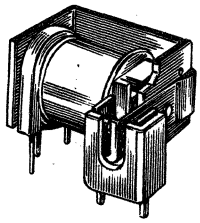
T90 Series Low Cost, 30 AMP, DC Coil PC Board Relay



UL File E22575
CSA File LR15734

T90 printed circuit board relays provide an inexpensive means of switching loads up to 30 amps. While these small, low-cost relays are designed primarily for the appliance industry and heating, ventilating and air conditioning markets, they are also well suited for load management automotive and other applications. The T90 is available with either silver or silver-cadmium oxide contacts in 1 Form A, or C arrangements. A plastic, snap-on dust cover is available for the open-style T90, but must be ordered separately. See below. Mechanical life expectancy of T90 relays is 10 million operations. Electrical life expectancy is 100,000 operations at rated loads.

Coil Data. Temperature, Max.: 130°C. **Insulation Class:** B. **Insulation Resistance, Initial:** 10 megohms, minimum, at 25°C, 500 VDC and 50% relative humidity. **Breakdown Voltage, Initial:** 1500 V rms, contact to coil. **Operate Data. Must-Operate Voltage:** Less than 75% of nominal voltage @ 25°C. **Must-Release Voltage:** More than 10% of nominal voltage @ 25°C. **Operate Time (Including Bounce):** 15 milliseconds, maximum; 9 milliseconds, typical. **Release Time (Including Bounce):** 10 milliseconds, maximum; 7 milliseconds, typical. **Environmental Data. Ambient Temperature Range:** Storage— – 55°C to + 105°C; Operating— – 55°C to + 85°C. **Vibration:** .065″ maximum excursions from 10 to 55 Hz. **Resistance, Initial:** 50 milliohms, maximum. **Breakdown Voltage, Initial:** 1500 V rms, contact to contact. **Expected Life:** 10 million operations, mechanical; 100,000 operations at rated load.

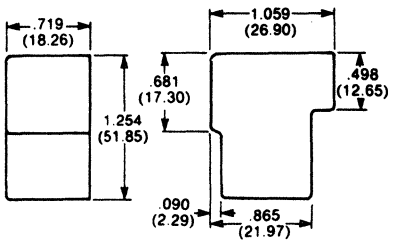
Snap-on dust cover

OUTLINE DIMENSIONS



Dust Cover For T90N Relay

A plastic dust cover for use with Potter & Brumfield's T90N, open-style, miniature, power relay. The cover is a snap-on unit, open on the printed circuit board side of the relay. the dust cover is designed to be snapped into place by the customer after the relay has been assembled to the printed circuit board.

T82N Series Miniature DIP PC Board Relay

T82N series low profile, ultra-miniature relays are designed for printed circuit board mounting. These 2 Form C (DPDT) relays feature dual in-line packaging (DIP) with terminals on a .100″ × .300″ (2.54 mm) grid layout. This configuration permits terminal mating with a 16-pin-DIP socket. The T82N is enclosed in a sealed PBT cover. Choose from single or bifurcated contacts rated up to 2 amps.

T82N is specifically designed for immersion cleaning applications using freon, alcohol or water. Although the plastic case is bonded to relay base, it is not hermetically sealed. Therefore, if the PC board on which the relay is soldered is to be cleaned by immersion, cleaning time must not exceed two minutes. Type D113 denotes single, gold overlay silver-palladium alloy contacts. Type D114 denotes bifurcated, gold overlay silver-palladium alloy contacts. **Weight:** 0.18 oz.

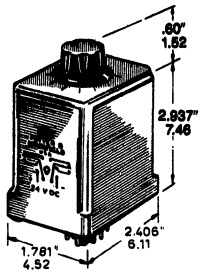
CG Series Time Delay Relays

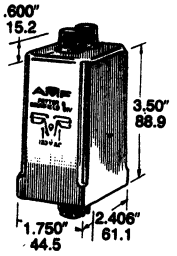
- **All are Knob Control Types**
- **Delay On Operate**
- **All use 8-pin octal sockets**

CMOS integrated circuit controls an internal DPDT relay having contacts rated 10 amps @ 240VAC resistive. Repeatability, including first cycle of operation, is typically 0.1% for AC units. The relay contacts will not transfer if timing cycle is momentarily interrupted. Weight is approximately 8 ozs. (227gm).



Stock No.	Mfr.'s Type	Time Delay	Input Volt	EACH 1-24	25-49
886-0059	CGB38-70010M	1.0-10 Min.	120VAC	105.00	99.75
886-0060	CGB38-70100M	10-100 Min.	120VAC	105.00	99.75

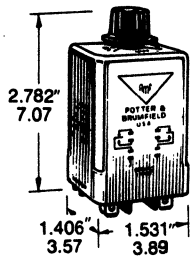
CR Series Recycle Timers



Two independent control knobs for adjusting ON and OFF delays from 1.8 to 180 seconds. The recycling sequence is initiated by applying power. When the first pre-set delay is complete, the contacts transfer from normally OFF to energize ON, at which time the ON delay begins. If power is removed during any part of the operate cycle, the CR will revert to its OFF state (Contacts open). **Repeatability:** ± 2%. **Delay on Operate and On Release.**

Stock No.	Mfr.'s Type	Time Delay (Sec.)	Input Voltage	EACH 1-24	25-49
886-0097	CRB48-70180	1.8-180	120VAC	110.25	104.74

CUB51 Time-Delay Relays



Knob-adjustable delay-on-operate time delay relays. DPDT contacts 10A at 28VDC resis., or 120V, 60 Hz AC. 80% power factor. Cal. dial. **Tol.:** adjust., – 0, + 20% of max. specified at high end; min. specified or less at low end. **Release:** 150 msec. **Recycle:** 150 msec. **Transient Protection:** 1000V. Polarity protected. Operate room temp. Timing intervals adjust, over timing ranges *1 to 10 secs. or †1 to 120 secs. 1.53 × 1.406 × 2.78″ (3.87 × 3.57 × 7.07mm) (including knob). 120VAC. 3½ oz.

Stock No.	Mfr.'s Type	EACH 1-24	25-49	50-Up

KUL Magnetic Latching Relays

Continuous duty single coil types. Uses a permanent magnet in parallel with normal magnetic circuit, requires only half the space of mechanical interlock types. Continuous latch condition even during loss of power. Contacts rated 10 amps at 28VDC or 120VAC, 80% power factor. **Temp. range:** – 45° to 75°. All are DPDT. **Av. wt.:** 3½ oz.

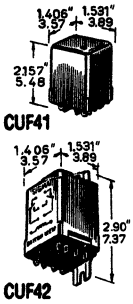
CU Series Adjustable Time Delay Relays



Delay-on-operate, resistor adjustable tolerance of ± 10%. For vending equipment, machine tool control or process controls. Internally-mounted 10-amp DPDT relay. Type CU-41 uses KUP series socket. Type CU-42 enclosures have flanged cases for chassis mounting. Units with adjustable time delay require external resistor for operation. Yellow Polycarbonate case. 120VAC.

Resistor-Adjustable Delay Types (Less Resistor)

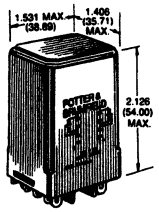
*Resistance indicated in table below are for maximum delay time.

KUR Series Hybrid Impulse Relay



Alternate direction-action, impulse employs permanent magnet latching relay plus flip-flop circuit that switches on leading edge of applied pulse. Recommended for pulse operation or alternate energizing of two loads, has permanent memory, alternate action features. Transfers DPDT contacts when specified input pulse (25 msec. min. duration and 1200 PPM max.) 100 msec. min. and 600 pulses per min. for AC coil units is recieved. Holds mode with or without power. Controlled from single source. **Contacts:** fine silver rated 5 A @ 28 V DC, or 240 V AC, 80% P.F. **Expected Life:** 100,000 operations at rated load, 10 million operation mechanical. **Terminals:** .187″ (4.75 mm) Q.C./solder, fit standard KU sockets. Has yellow plastic dust cover. **Weight:** 3.5 oz. (99 gm) approx.

Time Delay Relays

R16 time dealy on operate is available in the timing range of 2.0 to 30 seconds. A potentiometer is used to set the timing values. All components are mounted on a .062″ printed circuit board with .250″ quick connect termination. Contacts have a life expectancy in excess of 10 million operations, mechanical, and at least 100,000 operations at full load @ 28VDC. Board mounts with #8 screws. **Repeatability:** ± 3%. **Contact Arrangement:** DPDT.

BU AC-Operated Buzzers

The BU is an AC operated coil with a spring steel armature which buzzes when the coil is energized. Used extensively in test equipment, laboratories and a host of other applications where a small lightweight, dependable buzzer is required. The BU meets U.L. component requirements as an audible signal appliance U.L. file number S1154, and has CSA certification, File 26606. **Mounting:** #6-32 tapped core. **Model BU-24AC** rated 50 ohms, **BU-120AC** rated 1250.

Specifications. Breakdown Voltage: 1,500 volts rms 60 Hz coil to armature. **Ambient Temperature Range:** –45° to +55°C. **Weight:** 1.625 ozs. **Operate:** 85% or less of nominal voltage @ 25°C. **Duty:** Continuous or intermittent. **Terminals:** Two pierced solder terminals that accept two 18 AWG wires each.

Input/Output Modules

Slim Line Input/Output Modules

Slim line input/output modules provide interfacing between microprocessor- or computer-based control systems and external input devices and loads such as switches, sensors, valves and motor starters. Offered in four photo-isolated versions: AC input, AC output, DC input, DC output. Units are color coded and have high isolation and noise immunity. Packaged in a 0.4" enclosure for replacement without disturbing wiring. On modules of the same voltage, output is compatible with input of the input module. Ideal for series operation. 1 Form A (SPST-NO).

Solid State Input/Output Modules

A reliable interface between microprocessor- or computer-based control systems and external input devices and loads, these photo-isolated modules feature excellent isolation and transient immunity. On modules of the same voltage type, AC or DC, the output of the output modules is compatible with the input of the input modules, making them ideal for series operation. Modules are color-coded and packaged in industry standard plug-in enclosure. Units interchange easily without disturbing wiring. Maximum load current derating for output modules is linear from 3 amps to 0.8 amps between + 25°C and + 80°C except for the OAC-A which is linear from 1.0 amp to 0.28 amps between + 25°C and + 80°C. UL recognized, CSA certified. Order mounting boards separately below.

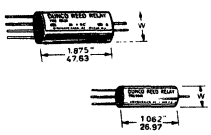
Type MRR and RR Relays with Axial Leads



Reed switches, coils, and axial leads are rigidly epoxy molded into one-piece units which provide max. mechanical protection. Leads may be soldered directly to terminal studs or supporting wiring or bent at right angles for PC use. Wrap-around metal cans provide magnetic shielding. MRR Types rated 10 Watts with 0.155" grid spacing. RR Types rated 15 Watts with 0.02" grid spacing. **Temp. Range:** – 20°C to + 55°C.

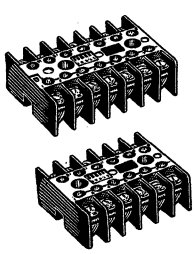
* Available in 120VAC only.



12 and 14 Pin Sockets

Type 27390. Twelve terminal socket accepts types 311,219,236,237,255,349, and RSX alarm relays. Overall dimensions $2^{21}/_{32} \times 2^{3}/_{16} \times {}^{27}/_{32}$". **929-2030** ..... **EACH 6.85**

Type 33377. Fourteen terminal socket for 219 series 4 and 6 pole relays. **Dimension:** $2^{5}/_{64} \times 2^{3}/_{16} \times {}^{27}/_{32}$". **929-2035** ..... **EACH 9.09**

Type B255, 12 Pin Latching Relays

This is a two-coil latching version of the Type 219 relay. When the operate coil is momentarily energized the relay mechanically latches in the energized position even if power is interrupted. The second coil provides electrical reset. All contacts operate from a common armature to prevent contact overlapping, coils are rated for continuous duty. **Insulation:** 1/4" surface; 1/8" air. **Dielectric:** 1500 Volt test. **Oper. Time:** 25 ms max. **Release Time:** 20 ms max. **Temp. Range:** −10°C to +60°C. **Life Expectance:** 10 million mechanical operations. **Cover:** Clear Polycarbonate. Uses socket #27390. **Dimension:** $2^{5}/_{8} \times 1^{15}/_{32} \times 3^{3}/_{4}$".

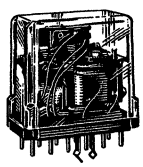
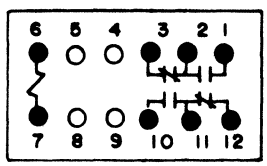
Type A311, Sequencing Relay



A311XBXP
A311XBXPR



A sequencing version of the Type 219 relay. Contacts transfer on each impulse. XBXP type transfers contacts when coil is energized. XBXPR type transfers contacts when coil is de-energized. 5 amp coil. Gold diffused SCO contacts. Uses base #27390. **Insulation:** 1/4" surface; 1/8"air. **Dielectric:** 1500 Volt test. **Temp. Range:** −10°C to +60°C. **Dimension:** $2^{5}/_{8} \times 1^{15}/_{32} \times 2^{19}/_{32}$".

Type RSX1800, 12 Pin Alarm Relay

Relays consist of a pair, 2 pole relays under a transparent cover wired to a 12 pin industrial type plug. All external wiring is connected to the screw terminals of the #27390 socket. Either sustained or momentary alarm condition instituted by an external trouble switch energizes an alarm. The alarm can be manually silenced or will continue until the alarm condition has been corrected, at which time the relay will reset automatically. Gold diffused SCO contact 5 Amps. **Insulation:** 1/4" surface; 1/8" air. **Dielectric:** 1500 volt test. **Oper. Time:** 25 ms max. **Release Time:** 20 ms max. **Cover:** Clear Polycarbonate. **Temp. Range:** −10°C to +60°C. **Dimension:** $2^{5}/_{8} \times 1^{15}/_{32} \times 2^{19}/_{32}$.

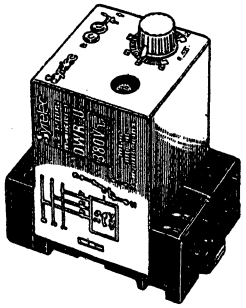
Phase Control Relay Model PWRU



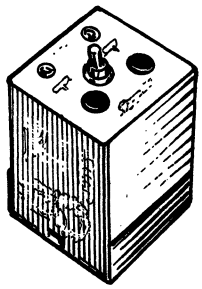
- ► Monitors:
- — Phase Sequence
- — Loss of any phase even if induced voltage reaches 95% of nominal voltage.
- — Under and over voltage
- ► LED Relays Status Indicator
- ► SPDT 10 Amp Relay Output

If the phase sequence and the symmetry of the three phase power supply is correct, the output relay is energized. The relay will also stay energized if the value of the three phase voltages remains within + 10% of the value displayed by the top mounted potentiometer. **Mounting:** P-8 pin Plug-in; D-DIN- Rail; L-11 pin Plug-in.

Stock No.	Mfr.'s Type	Voltage	EACH
793-5009	PWRU	3 × 220 VAC	50.00
793-5010	DWRU	3 × 220 VAC	51.25
793-5011	LWRU	3 × 220 VAC	50.00

JR/JRS Series

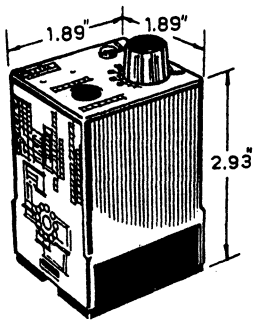
- ► Duplex Alternating Control
- ► SPDT or DPDT Control Relay
- ► 10 Amp Rated
- ► Externally Controlled



The electronic alternating relay is designed to replace mechanical style devices used in control applications requiring a duplexing or alternating action of the control circuit to operate pumps, compressors, etc. This is achieved by activating a control switch which is common to one side of the input control voltage. The output contact of the relay(s) change state when this switch is opened (on de-energization of the control circuit). When the control initiate switch is actuated and released or opened, the relay will change state. The next time the initiate switch is actuated, it will change back to its original state. Two red LEDs located on the top of the dust-resistant enclosure provide the status of the relay. The JRS Series offers a three position switch to select normal operation (alternating) or manual selection of lead or lag load.

Stock No.	Mfr.'s Type	Description	EACH
793-2008	LJR2	11 Pin Plug In, DPDT, 110 VAC	37.75
793-2009	PJR	8 Pin Plug In, SPDT, 110 VAC	37.75
793-5528	LJRS2	11 Pin Plug In, DPDT w/Switch, 110 VAC	42.75
793-5529	PJRS	8 Pin Plug In, SPDT w/Switch, 110 VAC	42.75

NRU Series Liquid Level Control Pump Up
NR Series Liquid Level Control Pump Down

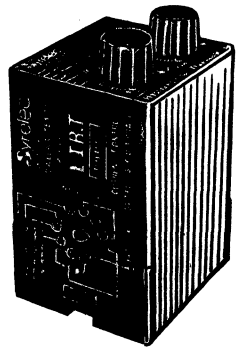


- ► LED Relay Indicator
- ► 8-Pin Plug-In Style
- ► Pump Up Control
- ► 4.7KΩ to100KΩ Sensitivity

Control of conductive liquids (tap water, sea water, sewage, chemical solutions, coffee, ice cream, etc.).
The relay is energized when the level falls below the low level probe. It de-energizes when the high level probe is reached. The NRU will also control a single level. In this case, a single probe is used, and the relay operates when that probe is not immersed.
In either case, a common electrode is needed if the container is nonconductive.

Stock No.	Mfr.'s Type	Description	EACH
793-2011	PNR	8 Pin Plug in, 110 VAC, Pump Down	34.00
793-2012	PNRU	8 Pin, Plug in, 110 VAC, Pump Up	36.00

Current Control Relays IR.T and IAR.T Series



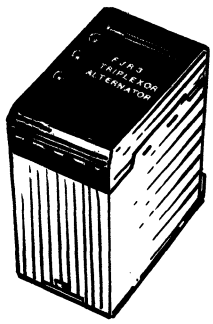
- ► Automatic or Manual Control
- ► Start-up Inhibit
- ► Adjustable Hysteresis
- ► Multiple Voltages
- ► LED Relay Status Indicator

IR.T Series will monitor current ranges of 5mA up to 10A, and can be set for latching or non-latching operation. The IAR.T series monitors 5A to 100A (Peak to Peak) with the addition of a TIXP3 Current Transformer. **Specify input power for both units:** 24VDC, 24VAC, 48VAC, 110VAC, 220VAC, or 240VAC.

Stock No.	Mfr.'s Type	Description	EACH
793-5519	LIR.T	11 Pin Plug-In	53.00
793-5520	DIR.T	DIN Rail Mount	54.25
793-5521	LIAR.T/TIXP3	11 Pin Plug-In w/current transformer	70.00
793-5522	DIAR.T/TIXP3	DIN Rail Mount w/current transformer	71.25
793-5523	TIXP3	Additional current transformer	25.00

FJR3 Series

3 or 2 Stage Alternator

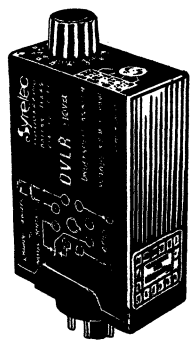


- ► Triplex or Duplex Mode Selectable
- ► Compact Size
- ► SPST 5 Amp Output

The FJR3 is primarily designed to control multi-pump systems. Three pumps can be controlled and given approx. the same amount of run time while running only the number of pumps needed. For maintenance purposes or for two pump systems, Output 3 can be locked out. **Specify input power when ordering:** 24 VAC/DC, 110VAC, 220VAC.

Stock No.	Mfr.'s Type	Description	EACH
793-5524	FJR3	DIN-Rail Mount Triplexor	120.00

VLR/OVLR Series Underspeed Monitors



- ► Start-Up Inhibit Time
- ► Adjustable Time Ranges
- ► Multiple Inputs
- ► Monitors Speeds up to 300Hz

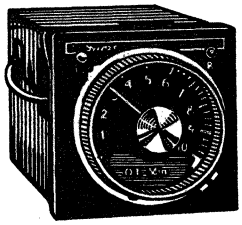
The input information sensor for both models can be a proximity switch, voltage level, or contact closure. Start-up inhibit time on the VLR is adjustable from 0.1 to 20 seconds. The OVLR is factory set at a fixed eight seconds. Output for both models is SPDT 10A rated relay. **Specify input power for both models:** 24VAC, 24VDC, 48VAC/DC, 110VAC, or 220VAC.

Stock No.	Mfr.'s Type	Description	EACH
793-5525	DVLR	DIN Rail Mount	47.00
793-5526	LVLR	11 Pin Plug-In	47.00
793-5527	OVLR	8 Pin Plug-In	40.00

12

Multi-Function Model GLR2U

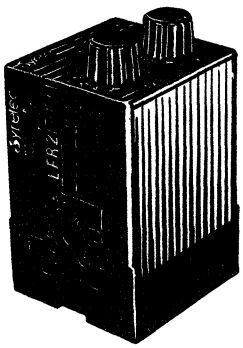
- 4 Functions in one unit
- Multi Time Range (0.1 sec to 10 hrs.)
- DPDT 10 Amp Relay Output
- LED Indicators — Power/Relay Status



Four Function Timer: delay on make, single shot, delay on break, interval timer. Slide switch selects time range in seconds, minutes, or hours. Easy to set dial for direct reading. Fits standard 11-pin sockets. Also available in DIN-rail version (FLR2U). Other voltages available on special order.

Stock No.	Mfr.'s Type	Voltage	EACH
793-5004	GLR2U	110 VAC	50.00
793-5005	FLR2U	110 VAC	51.25

Delay On Make/ Delay On Break Combination Model FR2



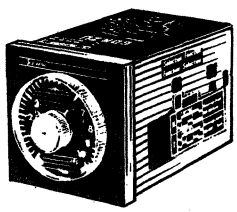
- Two Functions
- 10 Amp DPDT Output
- Four Mounting Options

When initiate switch is closed, a delay on make function begins. At the end of this delay (T1), the relay output is energized. When the initiate switch opens, a delay on break function begins. At the end of this delay (T2), the relay output is de-energized. The opening of the initiate switch during (T1) or the closure of the initiate switch during (T2) will reset the timer. **Time range:** B = .06 secs.-160 secs. 110 VAC. Other time ranges and voltages available on special order.

Stock No.	Mfr.'s Type	Description	EACH
793-5508	DFR2-B	DIN Rail Mount	55.25
793-5509	LFR2-B	11 Pin Plug-In	54.00
793-5510	PFR2-B	8 Pin Plug-In	54.00

Repeat Cycle Timer Model DR2U

- Large Dial Face with Independently Adjustable "ON" and "OFF" Time Range
- 10 Amp DPDT Relay Output
- LED Relay and Power Status Indicators
- Dual Voltage

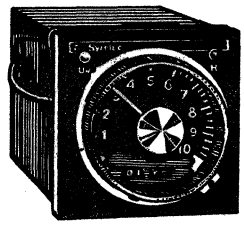


Selection of the time ranges (.1 sec. to 10 hrs.) is made by slide switch on the front of the case. "On" or "Off" time first is also switch selectable. Inner dial selects "On" time; outer dial selects "Off". 48 × 48 mm size for easy panel mounting. Dual voltage feature is identical to CHRONOS series. 110 VAC.

Stock No.	Mfr.'s Type	Description	EACH
793-5514	MDR2U	8 Pin Plug-In	68.00
793-5515	GDR2U	11 Pin Plug-In	68.00

Delay on Make Model MAXR2U

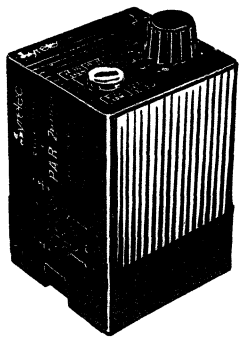
- 2 Delayed SPDT or 1 Delayed SPDT and 1 instantaneous SPDT
- Multi Time Range (0.1 sec to 10 hrs.)
- 48 × 48 mm
- LED Indicators — Power/Relay Status



Selection of the two functions is programmed by a slide switch on the side of the timer. Easy to set dial for direct reading. Fits standard 8-pin sockets. Also available in DIN-Rail (FAXR2U), or 11-pin plug-in (GAXR2U). Other voltages available on special order.

Stock No.	Mfr.'s Type	Voltage	EACH
793-5006	MAXR2U	110 VAC	49.50
793-5007	FAXR2U	110 VAC	52.50
793-5008	GAXR2U	110 VAC	49.50

Delay On Make Model PAR2



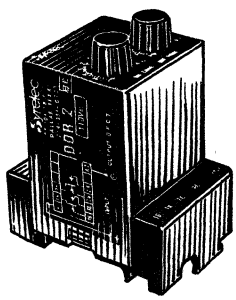
- Two Timing Ranges
- 10 Amp DPDT Relay
- LED Relay Status Indicator

When input power is applied, the relay delays the preset time period prior to energizing. Interrupt power to unlatch the relay. **Time range:** B = .06 secs.-160 secs. Other time ranges and voltages available on special order.

Stock No.	Mfr.'s Type	Description	EACH
793-5511	DAR2-B	DIN Rail Mount	33.75
793-5512	LAR2-B	11 Pin Plug-In	32.50
793-5513	PAR2-B	8 Pin Plug-In	32.50

Repeat Cycle Timer Model PDR2

- Selectable ON or OFF Start
- 10 Amp DPDT Relay Output
- LED Relay Status Indicator
- Three Mounting Options



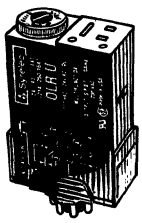
Where T1 is the adjustable "Off" time and T2 is the adjustable "On" time, specify T1 or T2 first in the part number according to the state of the relay desired when input power is applied. T1 and T2 can be any combination of time ranges. **Time Range:** BB = .06 sec.-160 sec. **Input Power:** 110 VAC. Other time ranges and voltages available on special order.

Stock No.	Mfr.'s Type	Description	EACH
793-5516	PDR2-BB	8 Pin Plug-In	51.00
793-5517	LDR2-BB	11 Pin Plug-In	51.00
793-5518	DDR2-BB	DIN Rail Mount	52.25

12

The new CHRONOS series of Timers is now available from Syrelec that will make ordering a much simpler process. Time setting and testing is simplified by the dial face and direct reading capability. Featured below are the five models including, Multifunction, Repeat Cycle, Delay on Make (two versions), and Delay on Break. CHRONOS Timers feature dual voltages in the following combinations: 48 VAC/DC or 24 VAC/DC.....110 VAC or 24 VAC/DC...220 VAC or 24 VAC/DC. 12 VDC is also available on all CHRONOS models on special request.

CHRONOS Multi-Function Model OLRU



OLRU

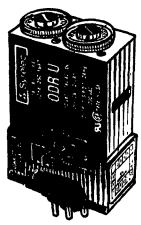
BLRU

- ► 4 Functions in one unit
- ► Multi Time Range (0.1 sec to 10 hrs.)
- ► SPDT 10 Amp Relay Output
- ► LED Indicators — Power/Relay Status

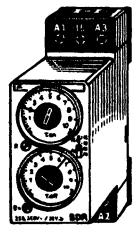
Four Function Timer: delay on make, single shot, delay on break, interval timer. Slide switch selects time range in seconds, minutes, or hours. Easy to set dial for direct reading. Fits standard 8-pin sockets. For DIN-rail mounting, order Model BLRU.

Stock No.	Mfr.'s Type	Voltage	EACH
793-5000	OLRU	110 VAC or 24 VAC/DC	44.00
793-5001	BLRU	110 VAC or 24 VAC/DC	45.25

CHRONOS Repeat Cycle Model ODRU



ODRU

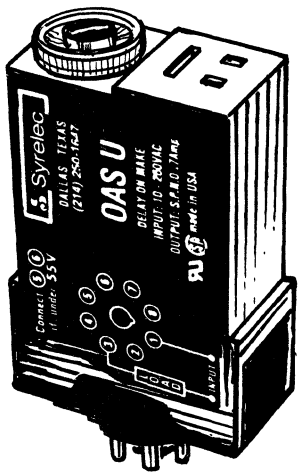


BDRU

- ► Multi Time Range (0.1 sec to 10 hrs.)
- ► SPDT 10 Amp Relay Output
- ► LED Indicators — Power/Relay Status
- ► Individual "on" and "off" settings

Time range selection is made by dip switches on the case. T1 is the adjustable "off time" for relay R and T2 is the adjustable "on time". When input power is applied, the relay will alternate between "off and on" according to the preset times selected. For DIN-Rail mounting, order Model BDRU.

Stock No.	Mfr.'s Type	Voltage	EACH
793-5002	ODRU	110 VAC	49.50
793-5003	BDRU	110 VAC	50.50

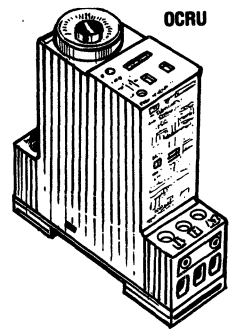


CHRONOS Delay on Make Model OARU/OASU

- ► Multi Time Range (0.1 sec. to 10 hrs.)
- ► SDDT 10 Amp Relay Output OARU or SCR Solid State Output OASU
- ► LED Indicators—Power/Relay Status OARU

For the relay output version OARU, when input power is applied, the relay delays the preset time period prior to energizing. The model OASU, delays the solid state output for the preset time period prior to turning on. Next timing cycle begins when the input power is re-applied. Fits standard 8-pin sockets. For DIN-rail mounting, order models BARU or BASU.

Stock No.	Mfr.'s Type	Voltage	EACH
793-5500	OARU	110VAC or 24VAC/DC	30.00
793-5501	BARU	110VAC or 24VAC/DC	31.25
793-5502	OASU	10-260 VAC/DC	22.50
793-5503	BASU	10-260VAC/DC	23.50



OCRU

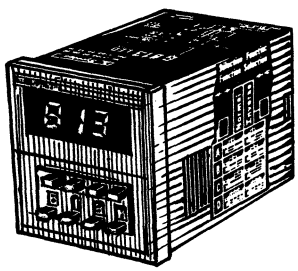
CHRONOS Delay on Break Model OCRU

- ► Multi Time Range (0.1 sec. to 10 hrs.)
- ► SPDT 10 Amp Relay Output
- ► LED Indicators—Power/Relay Status

Input power is continuously supplied to the timer. When an external initiate switch is closed, the output relay is energized. Timing begins when the initiate switch opens. At the end of the delay time, the output is de-energized and the timer is ready for another cycle. Fits standard 8-pin sockets. Order BCRU for DIN-rail mounting.

Stock No.	Mfr.'s Type	Voltage	EACH
793-5504	OCRU	110VAC or 24VAC/DC	35.00
793-5505	BCRU	110VAC or 24VAC/DC	36.00

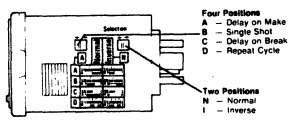
813 Series Multifunction Timer with LED Display

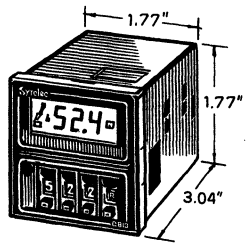


Identical to the 813 Series adjacent, with the exception of LED Display in lieu of Liquid Crystal Display. For certain applications, the LED display will offer much greater visibility.

Stock No.	Mfr.'s Type	Description	EACH
793-5506	M813LED HV	8 Pin Plug In, 24-240VAC	110.00
793-5507	M813LED LV	8 Pin Plug In, 12-48VDC	110.00

813 Series Multifunction Timer





- ► 8 Modes of Operation
- ► LCD 0.3" Display
- ► Multirange Timing
- ► Crystal Oscillator
- ► Push-button Presetting

The 813 Timer is a multifunction control available in three different configurations. The basic control is the M, F, or G mounting with one of four modes of operation slide switch selectable: Delay on Make, Single Shot, Delay on Break, and Repeat Cycle are standard. Normal and inverse relay operation is also slide switch selectable.

Stock No.	Mfr.'s Type	Description	EACH
793-2003	M813HV	8 Pin Plug In, 24-240VAC	75.00
793-2004	M813LV	8 Pin Plug In, 12-48VDC	75.00

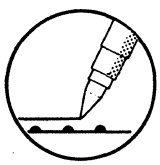
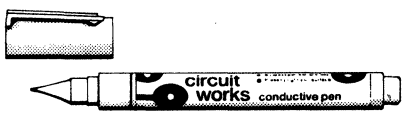
Circuit Works Conductive Pen

Draw conductive silver traces, with a pen

13



New Product



circuit works
conductive pen

Features

- **Makes instant conductive silver traces**
- **Dries in minutes at room temperature**
- **Valved pen tip for easy application**
- **Can be soldered at low temperatures**
- **Use where conductive traces are needed**
- **Lower the cost of PCB fabrication and repair**
- **Speed prototype and design of PCBs**
- **Cut rework time and materials**

Circuit Works brings together valved pen and conductive polymer technologies. This pen applies solderable electronic traces, jumpers and shielding as easy as writing.

Draw from point to point and in minutes have highly conductive silver traces. Use Circuit Works pens on printed circuit boards (PCBs) to link components, repair defective traces, make smooth jumpers and shield delicate electronics. Professionals and hobbyists alike are finding ways to save time and money with their Circuit Works Pens.

Electrical Engineers and printed circuit board developers, designers and manufacturers in particular will find Circuit Works pens cut rework time and speed project completion.

Circuit Works liquid conductor is a specially formulated silver bearing thermoplastic polymer designed to make low cost shielding, terminations and traces. Circuit Works conductor dries in minutes at room temperature and adheres to all printed circuit board materials.

Solderable terminations are possible using a 250°F cure for fifteen to twenty minutes after application. Tin, lead, or silver solder can be used but should not exceed 350°F for more than five seconds. Hand soldering is not recommended.

Each Circuit Works pen comes filled with enough silver conductor for 100 feet of shielding, traces and connections. Normal writing pressure opens the valve tip and the liquid conductor flows easily. When not in use the spring loaded tip closes to prevent drying.

1990 IC Master
A Hard Copy, Interactive Data Base of Integrated Circuits and Related Products

Volume One

► **New Categories on RISC Processors and Microcontrollers**

► **New Power Supply Circuits Section**

► **New Categories on NVRAMs and EPROMs**

► **New Breakdowns on RAMs Including Cache, Multiport, Video Devices, and Modules**

Contains Master Selection Guides to over 80,000 commercially available integrated circuits. Arranged in a parametric search format, these guides provide sufficient data to lead you to the precise IC needed to solve a design problem. The selection guides are listed by functional categories including digital, microprocessor, interface, linear and memory ICs. Also contains a Military Parts Directory that lists MIL-38510 QPL products by function and provides a three-way commercial/M38510/DESC drawing cross reference index. Other valuable sections include a basic part number index, part numbering guide for each manufacturer, application notes, and an Alternate Source Directory to over 150,000 pin-for-pin replacement ICs.

Volume Two

Contains hundreds of detailed manufacturer-supplied spec sheets and other technical data listed alphabetically by advertiser. An Advertisers Product Index refers you to both the IC listing in Volume One and the manufacturer-supplied data pages in Volume Two. In addition, a Manufacturers Directory provides a listing of all IC companies, including addresses and phone numbers. For advertisers, it also includes a listing of all Sales Offices and Representatives & Distributors.

Volume Three

► **New Section on Programmable Logic Devices with Expanded Data**

This systems-level volume contains detailed directories of custom and semicustom ICs, including gate arrays, cell-based ASICs, and a greatly expanded section on Programmable Logic Devices. A Design Automation Section provides you with a guide to the CAE and CAD tools you need for custom ASIC and systems-level design. Also included are sections on microcomputer boards and microprocessor development systems. Manufacturer-supplied data sheets and other technical information relating to these products and systems are also included in this volume.

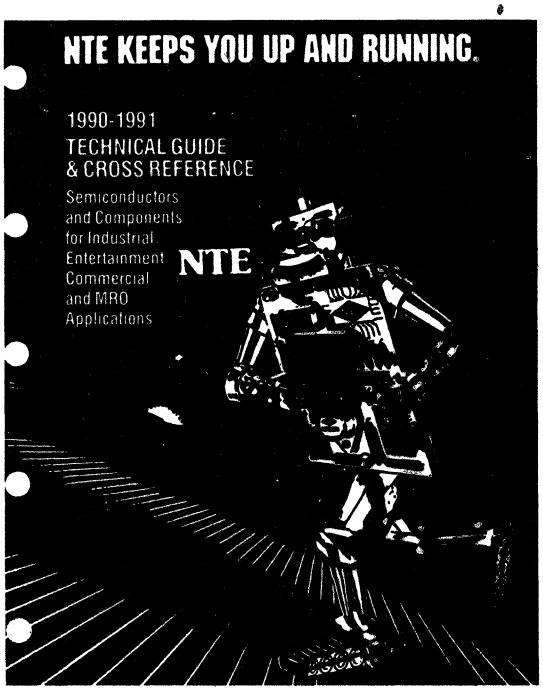
NTE Selection Guide



► **Over 250,000 Devices Replaced with 3500 NTE Numbers**

This guide contains 3500 NTE devices which replace over 250,000 parts. Tested for use specifically as replacements for solid state devices in original equipment. Each NTE transistor, TRIAC, silicon controlled rectifier (SCR), integrated circuit, thyristor or microprocessor can be used to replace a broad variety of devices used in electronic equipment. Electrical characteristics are equal to or better than originally specified components.

The easy to use cross reference section enables you to locate the exact replacement needed for over 250,000 solid state devices.

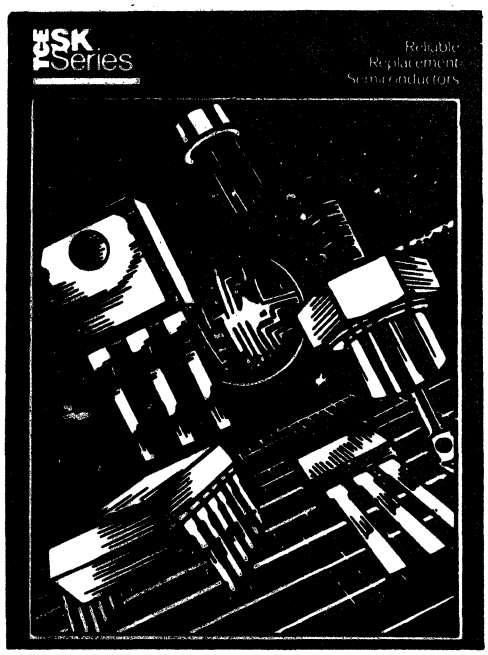
Thomson Consumer Electronics SK Replacement Guide



► **Quick and Easy Source to Find Semiconductor Parts and Hardware**
► **Almost 220,000 Solid State Devices**
► **Replaced with Only 3,000 SK Numbers**

This guide contains 3,000 SK devices which replace almost 220,000 parts. Tested for use specifically as replacements for solid state devices in original equipment. Each SK transistor, TRIAC, silicon controlled rectifier (SCR), integrated circuit, thyristor or microprocessor can be used to replace a broad variety of devices used in electronic equipment. Electrical characteristics are equal to or better than originally specified components. The easy to use cross reference section enables you to locate the exact replacement needed for almost 220,000 solid state devices.

Microprocessor Crystals

All essential parameters are controlled for normal applications. Frequencies from 1.0000 MHz to 100 MHz can be supplied. Standard holders available are HC18/U and HC33/U; frequencies below 2.000 MHz are available in HC33/U size only. Standard crystals below 8.0000 MHz are supplied with a 20 pf load calibration; crystals at 8.0000 MHz and above are calibrated at series-resonance.

In assessing system frequency tolerance requirements, full consideration must be given to the frequency effects of the oscillator circuit as well as the crystal tolerance. Part to part and lot to lot variations of ICs, PC boards and discrete components all contribute to establishing the frequency of the systems. Digital oscillator circuits comprised of gates or inverters can cause the crystal to operate either above or below series-resonance, depending on circuit configuration. The amount of frequency deviation from series-resonance is usually a function of frequency because of the frequency dependent nature of most ICs. These factors must be considered in specifying the required load for frequency calibration.

Specifications. Holder: HC18/U or HC33/U. **Frequency Tolerance @ 25°C:** +.005%. **Frequency Stability:** −20°C +70°C — +.01% of 25°C value. **Maximum Series Resistance** — See frequency listing. **Oscillation Mode:** 1.00-24.00 MHz Fundamental; 20.00-60.00 MHz Third Overtone.

Series CG, CG2 and PMT3 (310)

- **Fastest surge arresting response.**
- **High peak surge current capability.**
- **Lowest interelectrode capacitance.**
- **Rugged ceramic construction.**
- **Available on tape and reel for automatic insertion for some product types.**
- **Hermetically sealed.**
- **Meets the requirements of REA PE-80, IEEE 587 and CCITT K12.**
- **UL recognition on some products.**

Clare surge arrestors protect personnel and equipment from damaging high-voltage surges from lightning. Inductive switching, nuclear electromagnetic generation, or electrostatic discharge. Through ongoing research and engineering improvements, Clare has developed a family of surge arrestors that offer impressive characteristics for a variety of applications.

Engineering Specifications	CG/CG2	PMT 3 (310)

AC Current 11 cycles 60 Hz (A)	20	180
Insulation Resistance 100 VDC, except 50 VDC for units with DC breakdown less than 150 V (MOhms)	10000	10000
Temperature-Stabilize at temp for 1 hour then measure DC, IR, Impulse Minimum operating temp Maximum operating temp	 – 65°C + 125°C	 – 65°C + 125°C
Weight	1.0g	2.0g

Nonvolatile Static RAM

- Data retention in the absence of Vcc
- Data is automatically protected during power loss
- Directly replaces SRAM or EEPROM
- Unlimited write cycles
- CMOS — low power operation

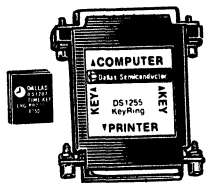
Security Products

DS1255C Software Authorization Cookbook Kit



- DS1207 Time Key
- DS1204U Electronic Key
- DS1255 Key Ring
- Cookbook 1 and 2 floppy disks
- DS1207 data sheet
- Application note 12

Software Authorization Kit DS1255C locks up PC application software in less than four hours with Electronic Key and "Cookbook." The kit permits rapid evaluation of Dallas Semiconductor's Electronic Key and provides a Key Ring, the DS1255, that fits into any IBM PC, XT or AT. This user-insertable key fits into the KeyRing, which is inserted into a PC's parallel port without interfering with the printer's operation. The "Cookbook", stored on a floppy disk, holds the "recipes" for hardware-based software authorization.

617-0012. DS1255C.....EACH 60.00

Integrated Battery Backup

Nonvolatile Controller

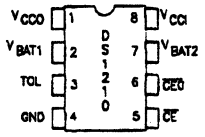
- Converts CMOS RAM into nonvolatile memory
- Unconditionally write protects when Vcc is out of tolerance
- Automatically switches to battery when power fail occurs
- Consumes less than 100 nA of battery current
- Tests battery condition on power up
- Provides for redundant batteries
- Selectable 5% or 10% power fail detection

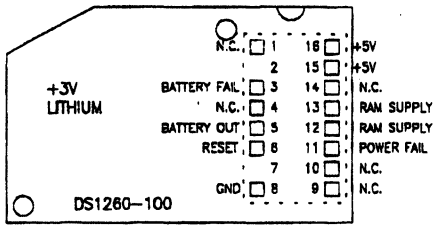
Stock No.	Mfr.'s Type	EACH		
		1-24	25-99	100-999
671-0202	DS1210 8-Pin DIP	3.70	3.25	2.95

Smart Battery

- Encapsulated lithium energy cell with shelf life over 10 years
- Energy capability of 1000 mAH @ 3 Volts
- Plugs into standard 16-pin DIP
- Lithium cell electrically disconnects from exposed pins upon command: automatically reconnects when Vcc is applied
- Vcc fail signal interrupts processor or write protects memory
- Exhausted energy cell warning signal
- Uninterruptible supply for CMOS and portable devices

Stock No.	Mfr.'s Type	Energy Capacity	EACH		
			1-24	25-99	100-999
671-0204	DS1260-100	1000 mAH	15.00	13.25	12.00





DS1213C SmartSocket 64/256K

Accepts standard 8K × 8 and 32K × 8 CMOS SRAMs; Embedded lithium energy cell retains RAM data; Self-contained circuitry safeguards data; Data retention time is greater than 10 years with the proper RAM selection: Less than 1 μA standby.

Stock No.	Mfr.'s Type	Organ.	EACH		
			1-24	25-99	100-999
671-0206	DS1213C	8K/32K × 8	10.00	8.85	8.00

Processor Supervision

Power Monitor

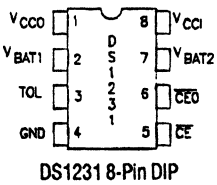
- Warns processor of an impending power failure
- Provides time for an orderly shutdown
- Prevents processor from destroying nonvolatile memory during power transients
- Automatically restarts processor after power is restored

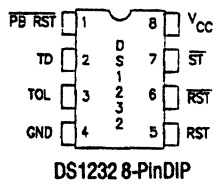
Stock No.	Mfr.'s Type	EACH		
		1-24	25-99	100-999
671-0208	DS1231-20 8-Pin DIP	3.70	3.25	2.95

Micro Monitor

- Halts and restarts an out-of-control microprocessor
- Holds microprocessor in check during power transients
- Automatically restarts microprocessor after power failure
- Monitors pushbutton for external override
- Selectable 5% or 10% microprocessor power supply monitoring
- Eliminates the need for discrete components

Stock No.	Mfr.'s Type	EACH		
		1-24	25-99	100-999
671-0210	DS1232 8-Pin DIP	3.70	3.25	2.95





Timekeeping

DS1216E SmartWatch

With a SmartWatch any system can tell time and report the year, month, day and hour down to the hundredth of a second. What's even more amazing is its simplicity. The DS1216E fits into existing systems by sandwiching between an EPROM and the printed circuit board.

Stock No.	Mfr.'s Type	Organ.	EACH		
			1-24	25-99	100-999

671-0006	DS1216E	8K/32K × 8 28-Pin DIP	17.90	15.80	14.35

DS1286 Watchdog Timekeeper

Keeps track of hundredths of seconds, seconds, minutes, hours, days, date of the month, months and years; Watchdog Timer restarts an out-of-control processor; Alarm function schedules real time related activities; Embedded lithium energy cell maintains time, Watchdog, user RAM and alarm information; Greater than 10 years of timekeeping in the absence of Vcc; 50 bytes of user NV RAM.

Stock No.	Mfr.'s Type	EACH		
		1-24	25-99	100-999
671-0220	DS1286 28-Pin DIP	17.50	15.00	13.75

DS1287 RealTime Clock

Drop-in replacement for IBM AT computer clock/calendar; Pin compatible with the MC146818A; Totally nonvolatile with over 10 years of operation in the absence of power; Self-contained subsystem includes lithium, quartz and support circuitry.

Stock No.	Mfr.'s Type	EACH		
		1-24	25-99	100-999
671-0010	DS1287 24-Pin DIP	14.20	12.50	11.35

Soft Microcontrollers with Timekeeping

- Compatible with industry standard 8051 instruction set and pinout
- 8 or 32K bytes of high performance nonvolatile RAM for program and/or data memory storage
- Capable of modifying its own program and/or data memory in end use
- Maintains all nonvolatile memory for 10 years in the absence of Vcc
- Orchestrates orderly shutdown and automatic restart on power-up/down
- Executes encrypted software to prevent unauthorized disclosure
- Incorporates real-time clock/calendar
- DS5000TK Evaluation Kit allows immediate evaluation of DS5000T in existing application; interfaces to PC serial port; includes demonstration software.

Std. breakdown voltage: ± 10% tolerance. "A" suffix: ± 5%. "C" suffix: Bi-directional.

Power MOSFETs, SCR, TRIAC, Diode Bridges, DC Motor Speed Controls and Solid State Relays

The patented Powertherm® manufacturing process expands conventional current-carrying limits of a single structure hybrid to those of the semiconductor. Copper-alloy lead frame provides a non-stop method of connecting to the exterior and to the power-generating semiconductors while providing heat diffusion; acts as a path for high currents including surges while serving as a base for semiconductors.

Power Hybrid MOSFETs, IGBTs

These Power Hybrid MOSFET and IGBT modules are designed for high power applications that demand superior performance, quality, and reliability. This is insured by Gentron's patented Fused-Copper™ Process, which allows metals to be fused to ceramics without intermediate materials or solders. These compact packages allow for simple installation, reduced EMI, and low inductance paths to semiconductors. The following MOSFET and IGBT module index covers an individual item or series of items having a common circuit but different current and voltage ratings. Standard voltage ratings are 100V, 200V, 400V, 500V, 800V, and 1000V.

Powertherm® Products

The patented Powertherm® manufacturing process expands conventional current-carrying limits of a single structure hybrid to those of the semiconductor. Copper alloy leadframe provides a non-stop method of connecting to the exterior and to the power-generating semiconductors while providing heat diffusion; acts as a path for high currents including surges while serving as a base for semiconductors.

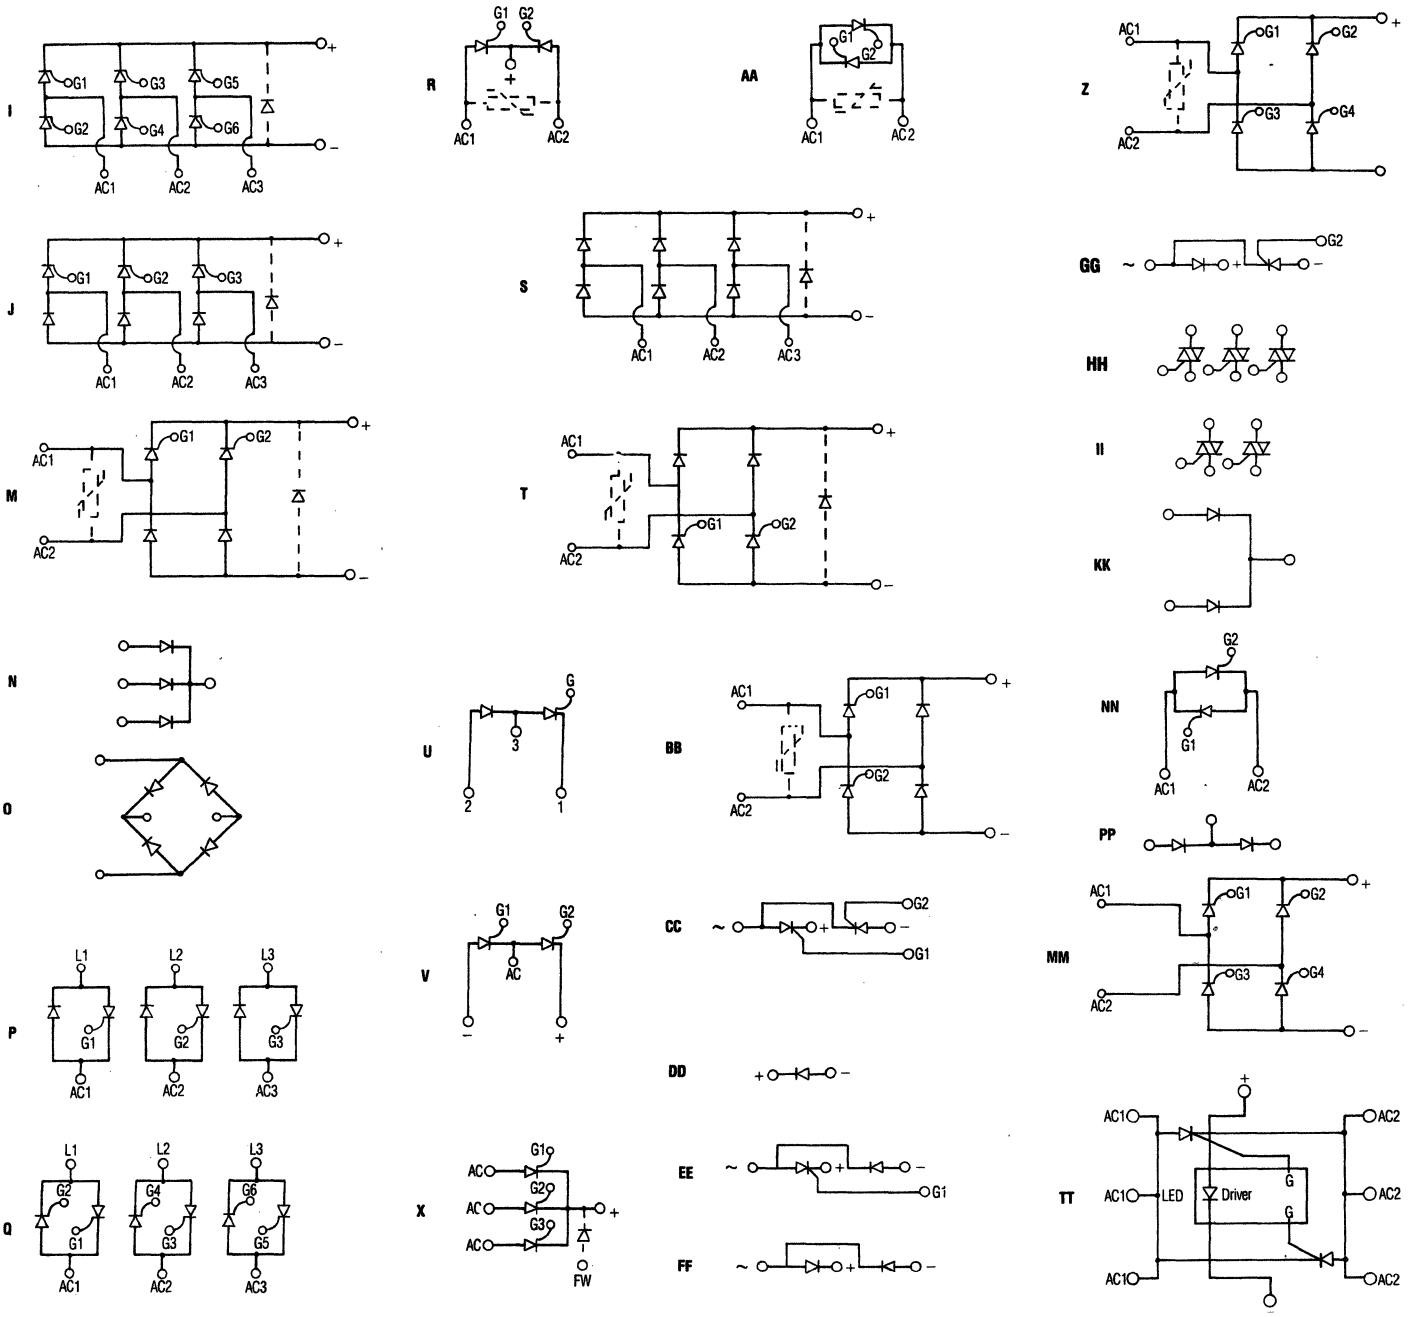
Schematics



Precision Thermistors ±0.2°C from 0°C to 75°C

Keystone precision units are the designers' choice for low cost, close-tolerance temperature measurement. These ultrastable thermistors are accurate to ±0.2°C from 0°C to 75°C. They are widely used in OEM applications because they offer close-tolerance temperature measurement without requiring individual calibration. A protective coating is standard for all precision thermistors listed in the table below. In applications where the coating is not necessary, the A,B, and C dimensions can be reduced by 0.050″ (1.40 mm).

PTC Thermistors

Positive temperature coefficient thermistors are characterized by an extremely large resistance change in a small temperature span. Temperature at which resistance begins to increase rapidly is referred to as the transition temperature (°C).

Cryogenic Thermistors

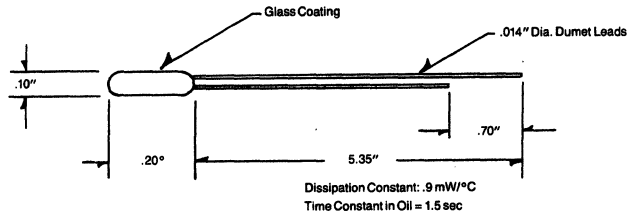
Keystone cryogenic thermistors are extremely useful for liquid level detection in various cryogenic liquids. In this application, the thermistor is slightly self-heated by passing a small current through the unit. The heat generated in the unit is more easily dissipated when the thermistor is immersed in cryogenic fluid than when the fluid level falls below the thermistor. the resulting change in thermistor temperature is easily detected by the change in resistance.

Dissipation Constant in mW/°K

Electrical Input (mW)	O_2	N_2
1.0	2-4	2-7
10.0	5-15	4-14

Stock No.	Mfr.'s Type	For Operation in Liquid	Nominal Resistance (Ω)	Approximate Temperature Coeffiecient (%/°K)	EACH	
					1-99	100
837-5150	RL1004-10K-0-S1	Oxygen (90°K)	10.0K	− 8.4	27.00	23.75
		Nitrogen (77°K)	31.5K	− 10.4		
837-5155	RL060628-31.7K-0-S1	Oxygen (90°K)	31.7K	− 8.4	27.00	23.75
		Nitrogen (77°K)	100.0K	− 10.4		

High Temperature Thermistors



- Stable high-temperature characteristics
- High temperature coefficient provides high temperature detection accuracy
- Short thermal time constant
- Rugged design

Stock No.	Mfr.'s Type	Resistance	Beta (°K) ±3%	Maximum Operating Temperature	EACH 1-249

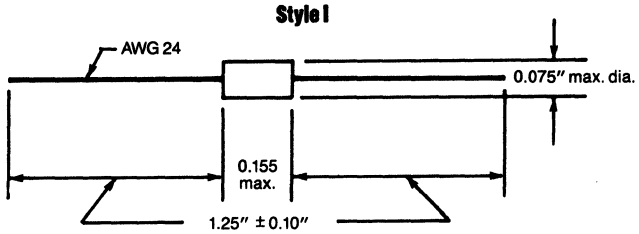
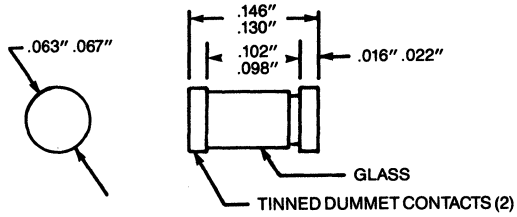
Glass Encapsulated Thermistors

Style I



Style II (Surface Mount)*



- Temperature Range: −50°C to +204°C
- Dissipation Constant: 2.0 mW/°C
- Time Constant: 3 sec.
- Tolerance: ±10% @ 25°C

Keystone glass encapsulated NTC thermistors are tiny pellets of thermistor material hermetically sealed in glass bodies. The hermetic seal makes these parts extremely stable in applications up to 204°C (400°F).

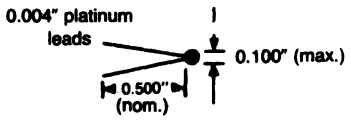
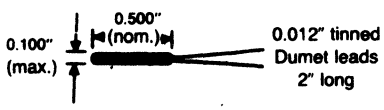
Glass Beads and Glass Probes

GLASS BEAD (Model G1)



Time Constant 16 sec. Dissipation Constant 0.75 mW/°C

GLASS PROBE (Model G15)



Maximum Operating Temperature = 260°C
Time Constant 17 sec. Dissipation Constant 1.20 mW/°C

Glass bead thermistors are exceptionally stable because the glass seal protects the thermistor from hostile environments.

Device Suffix Designators

Bipolar Analog

Suffix	Definition
A, B	Improved device, followed by package suffix
A	14 pin dual-in-line-plastic (N, NE, ULN prefix only)
B	16 pin dual-in-line-plastic (N, NE prefix only)
B	Automotive temperature range, followed by a package suffix
C	Commercial temperature range, followed by a package suffix
CDT	DPAK SOIC package suffix (regulators only)
D	SOIC package suffix
D, DS	When used after package suffix, indicates "Better" level screening
DW	Wide-body SOIC package suffix
FN	PLCC package suffix
G	Metal can package
H	Metal can package
J	Ceramic dual-in-line package suffix
K	Metal power (TO-3 type)
L	Dual-in-line ceramic
N	Dual-in-line plastic
P	14, 16, 18, or 24 pin dual-in-line plastic
P	3 pin plastic transistor package (TO-92)
P1	8 pin dual-in-line plastic
P2	14 pin dual-in-line plastic
R	Metal power package (TO-66 type)
R2	Tape and reel (13" reel), used only following CDT, D, DW, or FN package suffix
RA	Tape and reel for TO-92 package
RB	Tape and reel for TO-92 package
RE	Tape and reel for TO-92 package
RP	Ammo pack for TO-92 package
T	3 pin plastic transistor package (TO-220)
U	8 pin dual-in-line ceramic
V	8 pin dual-in-line plastic (NE prefix only)

CMOS, HMOS, NMOS Microprocessors

FN	Plastic Lead Chip Carrier
L	Ceramic, side-brazed, for lead counts greater than or equal to 48-pin DIP, L refers to select plate tin finish on leads
LC	For lead counts greater than or equal to 48-pin DIP, LC refers to full gold finish
P	Plastic package
R	Pin grid array package (select plate tin finish leads)
RC	Full gold finish leads
S	Cerdip package (microprocessors only)
Z	Chip carrier package
ZB	Leadless chip carrier package

Bipolar Logic

A, B	Improved device, followed by package suffix
D	SOIC package suffix
D, DS	When used after package suffix, indicates "BETTER" level screening
DW	Wide body SOIC package suffix
FN	PLCC package suffix
J	Ceramic dual-in-line package suffix
L	Ceramic dual-in-line package suffix
N	Plastic dual-in-line package suffix
P	Plastic dual-in-line package suffix
R1	Tape and reel (7" or 13" reel), used only following D, DW or FN package suffix
R2	Tape and reel (7" or 13" reel), used only following D, DW or FN package suffix

13

General Purpose Wideband Hybrid Amplifiers

50Ω TO-39 (Case TO-39)

The MWA Series features excellent gain versus frequency flatness, temperature stability and are cascadable for high gain lineups. Construction techniques include thin film gold metal circuitry and hermetic TO-39 package.

General Purpose Wideband Hybrid Amplifiers

50Ω — 100Ω Wideband Amplifiers (Case 714-02)

The general purpose hybrid amplifiers listed are for broadband system applications requiring superior gain and current stability with temperature. The 50 to 100 ohm input and output impedances help simplify designs.

UHF and Microwave Oscillators

The transistors listed below are for UHF and microwave oscillator applications as initial signal sources or as output stages of limited range transmitters. Devices are listed in order of increasing output power.

Stock No.	Mfr.'s Type	Test Conditions		P_{out} mW Min.	f_T MHz Typ.	Package	EACH
		f MHz	V_{CC} Volts

HF Bipolar Power Transistors

1.5-30 MHz, HF/SSB Transistor

Designed for broadband operation, this device features specified Intermodulation Distortion at rated power output. Applications include mobile, marine, fixed station, and amateur HF/SSB equipment, operating from 12.5, 13.6, 28 or 50 volt supplies.

Stock No.	Mfr.'s Type	P_{out} Output Power Watts	P_{in} Input Power Watts	G_{PE} Power Gain dB Min.	V_{CC} Supply Voltage Volts	Case Style	EACH

14-30 MHz, CB/Amateur Transistor

This HF transistor is designed for economical, high-volume use in CW, AM and SSB applications.

858-8062	MRF454	80.0	5.000	12.0	12.5	211-11	20.12

30-200 MHz VHF AM/FM Transistors

Designed for Military Radio and Commercial Aircraft VHF bands.

Small-Signal Transistors by Package

In small-signal RF applications, the package style is often determined by the end application, or circuit construction technique. To aid the circuit designer in device selection the Motorola broad range of RF small-signal amplifier transistors are organized by package.

Silicon Photodetectors

A variety of silicon photodetectors are available, varying from simple PN diodes to complex, single chip 400 volt triac drivers. They are available in packages offering choices of viewing angle and size in either economical plastic cases or rugged, hermetic metal cans. They are spectrally matched for use with Motorola infared emitting diodes.

Slotted Couplers/Interrupter Module

Slotted couplers consist of an infrared emitting diode facing a photodetector in a molded plastic housing. A slot in the housing between the emitter and the detector provides a means of interrupting the signal. A wide selection of standard and custom housings and detector functions is available. All IREDs and photodetectors in the miniature Case 349 (see Silicon Photodetectors) can be used in these housings.

Optocoupler/Isolators

An optocoupler consists of a gallium arsenide infrared emitting diode IRED, optically coupled to a monolithic silicon photodetector output device in a light-shielding package. Motorola offers a wide array of standard devices in the popular 6-Pin DIP package and encourages the use of special designs and selections for special applications. All Motorola optocouplers are UL recognized per File Number 54915.

General Purpose Tuning Diodes

The voltage capacitance diodes listed are designed for RF applications in all bands through UHF as well as general purpose electronic tuning and control. The product portfolio features plastic and hermetic glass packages, close tolerance units, hyperabrupt devices, duals and AM tuning diodes.

Fiber Optic Devices

Fiber Optic devices available from Motorola include photoemitters (IREDs) and photodetectors compatible with existing standard fiber optic cables and fit directly into standard OPTIMATE and SMA fiber optic connector systems. The devices are small and rugged. They are designed to simplify efficient optical coupling with fiber cable. Typical applications include computer, M6800 microprocessor systems, industrial controls, security systems, medical electronics and peripheral equipment, etc.

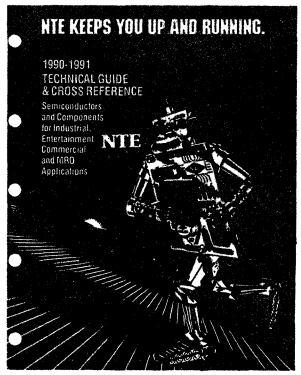
NTE Selection Guide



► **Over 250,000 Devices Replaced with 3500 NTE Numbers**

This guide contains 3500 NTE devices which replace over 250,000 parts. Tested for use specifically as replacements for solid state devices in original equipment. Each NTE transistor, triac, silicon controlled rectifier (SCR), integrated circuit, thyristor or microprocessor can be used to replace a broad variety of devices used in electronic equipment. Electrical characteristics are equal to or better than originally specified components.

The easy to use cross reference section enables you to locate the exact replacement needed for over 250,000 solid state devices.

Thermo-Pads

NTE's THERMO-PADS do away with the old fashioned and messy mica wafer and conductive grease method of mounting power semiconductors. These thermally conductive insulators offer low heat transfer resistance while still providing high electrical isolation between the parts of the assembly. The elastomeric material combines the electrical isolation of rigid insulators with the ability to conform to rough surfaces and reduce contact resistance in much the same manner as thermal greases. Proper selection and use of these thermo-pads results in a securely-mounted power semiconductor and minimum resistance to the heat transfer between it and the heat sink.

Typical Properties
Color: .009 Inch Thickness—Gray; Test Method—Visual. **Breaking Strength, Lbs./Inch:** .009 Inch Thickness—100; Test Method—ASTM D 1458. **Elongation, percent:** .009 Inch Thickness—4; Test Method—ASTM D 412. **Volume Resistance Ohm Metre Minimum Normal:** .009 Inch Thickness—1.0×10^{13}; Test Method—ASTM D 257. **Volume Resistance Ohm Metre Minimum Moist:** .009 Inch Thickness—1.5×10^{10}; Test Method—ASTM D 257. **Breakdown Voltage, Minimum Normal:** .009 Inch Thickness—5000; Test Method—ASTM D 149. **Breakdown Voltage, Minimum Moist:** .009 Inch Thickness—2500; Test Method—ASTM D 149. **Dielectric Constant 1000 Cups (HZ):** .009 Inch Thickness—5.5; Test Method—ASTM D 150. **Continuous Use Temp. °C:** .009 Inch Thickness— – 60 to + 180. **Thermal Conductance W/m-k:** .009 Inch Thickness—0.7. **Thermal Vacuum Weight Loss Percent (TML) Maximum as manufactured:** .009 Inch Thickness—.40; Test Method—NASA. **Thermal Vacuum Weight Loss Percent (TML) Maximum Post Cure 24 Hrs @ 400°F:** .009 Inch Thickness—.25; Test Method—SP-R-0022A. **Volatile Condensable Material, Percent, Maximum (CVCM) as Manufactured:** .009 Inch Thickness—.11; Test Method—NASA. **Volatile Condensable Material, Percent, Maximum (CVCM) Post Cure 24 Hrs @ 400°F:** .009 Inch Thickness—.07; Test Method—SP-R-0022A. **Hardness, Shore A:** .009 Inch Thickness—85; Test Method—ASTM D 2240. **Specific Gravity:** .009 Inch Thickness—2.0-2.1. **Thickness (Expressed in Inches):** .009 Inch Thickness—.009 (+.002, –.001). **Thermal Resistance (TO-3 transistor) °C/watt:** .009 Inch Thickness—.50.

Insulator Kits

(Each Kit includes Mica Insulator and Nylon Bushings)

Stock No.	Mfr.'s Type	Description	EACH
935-9413	NTE413	Insulator Kit for TO-3 Style Package	**1.78***
935-9414	NTE414	Insulator Kit for TO-36 Style Package. Includes Lock Washer, Solder Lug, Nut and Plastic Insulating Tube	**1.78***
935-9415	NTE415	Insulator Kit for TO-66 Style Package	**1.72***
935-9422	NTE422	Insulator Kit for TO-220 (Plastic TO-66) Style Package	**1.74***
935-9438	NTE438	Insulator Kit for DO-4 and TO-64 Stud Package. Includes Flat Washer, Solder Lug and Nut	**0.64**
935-9439	NTE439	Insulator Kit for DO-5 and TO-48 Stud Package. Includes Flat Washer, Lock Washer, Solder Lug and Nut	**0.68**

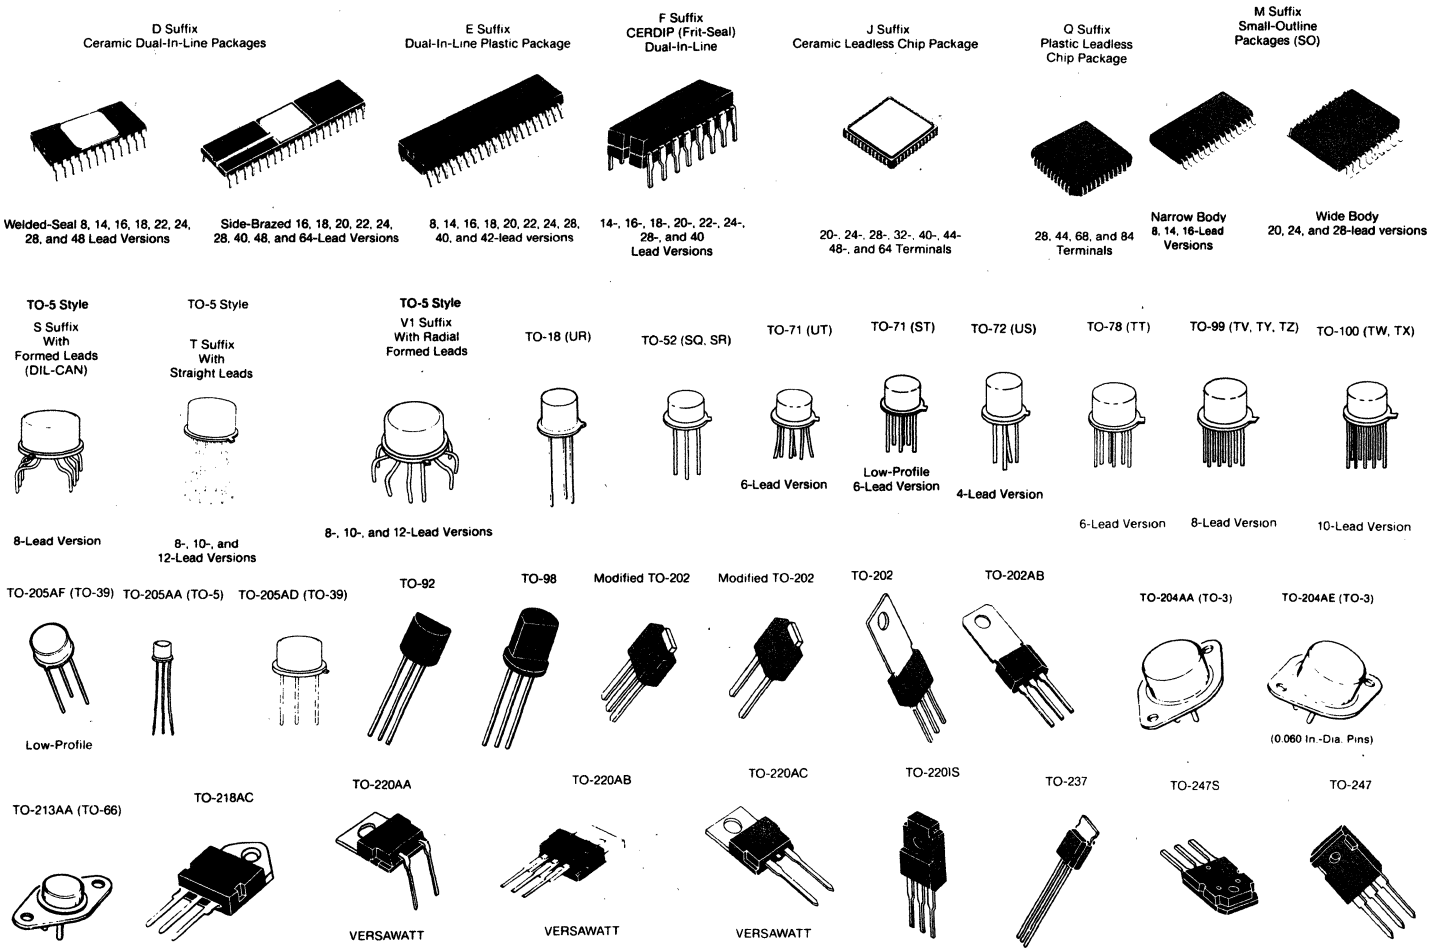
NOTE: Power dissipation of transients not to exceed 0.2, 0.25, 0.4, 0.6, 1.0 watts for sizes 5, 7, 10, 14 and 20 mm respectively. *Energy rating for impulse duration of 30 milliseconds minimum to one half of peak current value. †10 mA dc test current. ‡Also rated to withstand 24V for 5 minutes.

13

Package Information



Prefix CA: Linear Integrated Circuits

Suffix (First Letter)—Test Specification Designator
Not always present—absence indicates that the device adheres to standard GE databook specifications.
A = Premium tested
B = Premium tested (best specification)
C = Commercial temperature range (0 to 70 degrees C)

Suffix (Last Letter)—Package Style Designator
D = Dual-in-line size-brazed or welded-seal ceramic
E = Dual-in-line plastic
F = Dual-in-line frit-seal (CERDIP)
M = Small outline ("Surface Mount")
Q = Quad-in-line plastic
S = Dual-in-line formed lead TO-5
T = TO-5

Prefix CD74: CMOS Digital Integrated Circuits

Operating Temperature Range Designator
74 = −40 to +125 degrees C

Logic Speed and Input Voltage Level Compatibility Designator
AC = Advanced CMOS logic; compatible with input voltage levels
ACT = Advanced CMOS logic; compatible with TTL input voltage levels
HC = High-speed CMOS logic; compatible with CMOS input voltage levels
HCT = High-speed CMOS logic; compatible with TTL input voltage levels

Suffix (First Letter)—Basic Device Type Designation
A two-, three-, or four-digit number sometimes followed by a letter indicating the revision level (A = 1st, B = 2nd)

Suffix (Last Letter)—Package Style Designator
F = Dual-in-line frit-seal (CERDIP)—CD54 only
E = Dual-in-line plastic—CD74 only
EN = Same as "E"
M = Small outline package ("Surface Mount")—CD74 only

Prefix CD1 through CD4: CMOS Digital Integrated Circuits, Standard Logic

Suffix (First Letter(s))—Supply Voltage and Input Buffering Designator
A = Absolute maximum DC supply voltage is 15 volts
B = Absolute maximum DC supply voltage is 20 volts
UB = Same as 'B' plus inputs are unbuffered

Suffix (Last Letter)—Package Style Designator
D = Dual-in-line side-brazed or welded-seal ceramic
E = Dual-in-line plastic
F = Dual-in-line frit-seal (CERDIP)
K = Flat pack
M = Small outline package ('Surface Mount')
T = TO-5

CMOS Logic Integrated Circuits

Single Level NOR/NAND, OR/AND Gates

Stock No.	Mfr.'s Type	Description	Package	EACH 1-24	25-49	50-99	100-Up
902-3399	CD4001AE	Quad 2-input NOR gate	14E	.58	.54	.51	.48
902-3400	CD4001BF	Quad 2-input NOR gate	14F	.85	.80	.75	.71
902-3401	CD4001BE	Quad 2-input NOR gate	14E	.41	.39	.37	.35
902-3402	CD4002BE	Dual 4-input NOR gate	14E	.41	.39	.37	.35
902-3500	CD4011AE	Quad 2-input NAND gate	14E	.69	.52	.44	.39
902-3411	CD4011BE	Quad 2-input NAND gate	14E	.41	.39	.37	.35
902-3501	CD4011BF	Quad 2-input NAND gate	14F	.99	.82	.74	.59
902-3502	CD4011UBE	Quad 2-input NAND gate (unbuffered)	14E	.49	.42	.34	.29
902-3412	CD4012BE	Dual 4-input NAND gate	14E	.41	.39	.37	.35
902-3423	CD4023BE	Triple 3-input NAND gate	14E	.41	.39	.37	.35
902-3425	CD4025BE	Triple 3-input NOR gate	14E	.41	.39	.37	.35
902-5654	CD4068BE	8-input NAND/AND	14E	.41	.39	.37	.35
902-3471	CD4071BE	Quad 2-input or gate	14E	.49	.42	.34	.29
902-3475	CD4073BE	triple 3-input and gate	14E	.49	.42	.34	.29
902-3476	CD4078BE	8-input NOR gate	14E	.49	.42	.34	.29
902-3481	CD4081BE	Quad 2-input and gate	14E	.49	.42	.34	.29
902-3482	CD4082BE	Dual 4-input and gate	14E	.49	.42	.34	.29
902-3905	CD40107BE	Dual 2-input NAND buffer	14E	1.39	1.20	1.09	.89

Buffers/Inverters

Stock No.	Mfr.'s Type	Description	Package	EACH 1-24	25-49	50-99	100-Up
902-3771	CD4503BE	Hex buffer (3-state, non-inverting)	16E	.79	.72	.60	.49
902-3406	CD4007AE	Dual pair plus inverter	14E	.58	.54	.51	.48
902-3407	CD4007UBE	Dual pair plus inverter (unbuffered)	14E	.41	.39	.37	.35
902-3409	CD4009UBE	Hex buffer/converter (inverting, unbuffered)	16E	.79	.72	.60	.49
902-3410	CD4010BE	Hex buffer/converter (non-inverting)	16E	.79	.72	.60	.49
902-3449	CD4049UBE	Hex buffer/converter (inverting, unbuffered)	16E	.59	.51	.47	.35
902-3450	CD4050BE	Hex buffer/converter (non-inverting)	16E	.59	.51	.47	.35
902-3469	CD4069UBE	Hex inverter (unbuffered)	14E	.49	.42	.34	.29

Multifunctional/AOI

Stock No.	Mfr.'s Type	Description	Package	EACH 1-24	25-49	50-99	100-Up
902-3430	CD4030BE	Quad exclusive-OR gate	14E	1.49	1.30	1.19	.99
902-3448	CD4048BE	Multifunction expandable 8-input gate (3-state)	16E	1.49	1.30	1.19	.99
902-3470	CD4070BE	Quad exclusive-OR gate	14E	.49	.42	.34	.29
902-3473	CD4077BE	Quad exclusive-NOR gate	14E	.49	.42	.34	.29

Schmitt Triggers

Stock No.	Mfr.'s Type	Description	Package	EACH 1-24	25-49	50-99	100-Up
902-3493	CD4093BE	Quad 2-input NND Schmitt trigger	14E	.59	.51	.47	.35
902-3904	CD40106BE	Hex Schmitt trigger	14E	.79	.62	.54	.49

Interface Circuits

Stock No.	Mfr.'s Type	Description	Package	EACH 1-24	25-49	50-99	100-Up
902-3907	CD40109BE	Quad low-to-high level shifter	16E	1.09	.92	.84	.69
902-3914	CD40116E	High-speed 8-bit bidirectional, CMOS/TTL interface level counter	22E	13.99	12.98	12.09	11.29

Multivibrators

Stock No.	Mfr.'s Type	Description	Package	EACH 1-24	25-49	50-99	100-Up
902-3447	CD4047BE	Monostable/astable multivibrator	14E	1.09	.92	.84	.69
902-3498	CD4098BE	Dual monostable multivibrator	16E	1.09	.92	.84	.69
902-3776	CB4538BE	Dual precision monostable multivibrator	16E	1.19	1.05	.99	.89

Flip-Flop

Stock No.	Mfr.'s Type	Description	Package	EACH 1-24	25-49	50-99	100-Up
902-3413	CD4013BE	Dual 'D' flip-flop	14E	.41	.39	.37	.35
902-3427	CD4027BE	Dual J-K flip-flop	16E	.59	.51	.47	.35
902-3472	CD4076BE	4-bit 'D' flip-flop (3-state)	14E	1.09	.92	.84	.69
902-3503	CD4013AE	Dual 'D' flip-flop	14E	1.19	1.05	.99	.89
902-3945	CD40174BE	Hex 'D' flip-flop	16E	.99	.82	.74	.59

Latches

Stock No.	Mfr.'s Type	Description	Package	EACH 1-24	25-49	50-99	100-Up
902-3443	CD4043BE	Quad 3-state NOR R/S latch	16E	.99	.82	.74	.59
902-8910	CD4099BE	8-bit addressable	16E	1.09	.99	.89	.69
902-8908	CD4508BE	Dual 4-bit	24E	2.69	2.49	2.29	1.69
902-8912	CD4724BE	8-bit addressable	16E	2.19	1.99	1.79	1.39

Registers

Stock No.	Mfr.'s Type	Description	Package	EACH 1-24	25-49	50-99	100-Up
902-8914	CD4006BE	18-stage static shift register	14E	.99	.89	.79	.59
902-8920	CD4014BE	8-stage static shift register	16E	1.09	.99	.89	.69
902-3415	CD4015BE	Dual 4-state static shift register	16E	.99	.82	.74	.59
902-3421	CD4021BE	8-stage shift register	16E	.99	.82	.74	.59
902-8916	CD4031BE	64-stage static shift register	16E	4.39	3.89	3.39	2.79
902-8924	CD4034BE	8-stage static shift register	24E	3.59	3.19	2.79	2.28
902-8922	CD4035BE	4-stage parallel in/out shift register	16E	1.09	.99	.89	.69
902-3474	CD4094BE	8-stage shift and store bus register	16E	1.09	.92	.84	.69
902-3903	CD40105BE	4 x 16 FIFD register	16E	2.19	2.02	1.89	1.79
902-8918	CD4517BE	Dual 64-stage static shift register	16E	2.09	1.89	1.69	1.39

Counters

Stock No.	Mfr.'s Type	Description	Package	EACH 1-24	25-49	50-99	100-Up
902-3417	CD4017BE	Decade counter/divider	16E	.94	.82	.74	.59
902-3418	CD4018BE	Presettable diide-by-'N' counter	16E	1.09	.92	.84	.69
902-5656	CD4020BE	14-stage binary ripple	16E	.99	.82	.74	.59
902-3424	CD4024BE	7-stage binary counter	14E	.69	.52	.44	.39
902-3429	CD4029BE	Presettable up/down counter	16E	.99	.82	.74	.59
902-3440	CD4040BE	12-stage binary/ripple counter	16E	.99	.82	.74	.59
902-3505	CD4017BE	Decade counter/divider	16E	2.09	1.89	1.69	1.59
902-3506	CD4022AE	Divide-by-8 counter/divider	16E	.99	.82	.74	.59
902-3774	CD4516BE	4-bit binary up/down counter	16E	1.09	.94	.84	.69
902-3765	CD4518BE	Dual BCD up counter	16E	1.09	.92	.84	.69
902-5658	CD40192BE	4 bit BCD	16E	1.99	1.75	1.59	1.39
902-5660	CD40193BE	4 bit binary	16E	2.19	1.95	1.79	1.49
902-3900	CD40103BE	Presettable 8-bit binary down counter	16E	1.39	1.20	1.09	.89

Multiplexers/Demultiplexers

Stock No.	Mfr.'s Type	Description	Package	EACH 1-24	25-49	50-99	100-Up
902-3504	CD4016AE	Quad Bilateral Switch	14E	1.19	1.05	.99	.89
902-3416	CD4016BE	Quad Bilateral Switch	14E	.59	.52	.48	.39
902-3451	CD4051BE	Single 8 Channel	16E	.99	.82	.74	.59
902-5662	CD4052BE	Differential 4 Channel	16E	.99	.82	.74	.59
902-5664	CD4053BE	Triple 2 Channel	16E	.99	.82	.74	.59
902-3465	CD4066AE	Quad Bilateral Switch	14E	1.19	1.05	.99	.89
902-3466	CD4066BE	Quad Bilateral Switch	14E	.59	.52	.44	.39
902-3773	CD4512BE	8 Channel	16E	.99	.82	.74	.59

OP-Amps and Comparators

Stock No.	Mfr.'s Type	Description	Package	EACH 1-24	25-49	50-99	100-Up
902-5650	CA124E	Quad OP-Amp	14E	1.89	1.69	1.49	1.29
902-5502	CA158T	Dual OP-Amp	8T	3.39	3.09	2.79	2.19

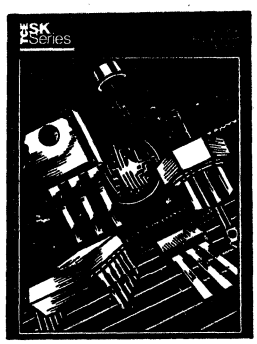
Thomson Consumer Electronics SK Replacement Guide



- ► Almost 220,000 Solid State Devices
- ► Replaced With Only 3,000 SK Numbers
- ► Quick and Easy Source to Find Semiconductor Parts and Hardware

This guide contains 3,000 SK devices which replace almost 220,000 parts. Tested for use specifically as replacements for solid state devices in original equipment. Each SK Transistor, Triac, Silicon Controlled Rectifier (SCR), Integrated Circuit, Thyristor or Microprocessor can be used to replace a broad variety of devices used in electronic equipment. Electrical characteristics are equal to or better than originally specified components.

The easy to use cross reference section enables you to locate the exact replacement needed for almost 220,000 solid state devices.

SIOV™ Metal Oxide Varistors

The SIOV will fit applications requiring protection at operating voltage levels as low as 11 volts and as high as 1100 volts with energies rated up to 15000 Joules, depending on the device selected.

Typical Protection Applications:
- ► Protection of semiconductors (diodes, transistors, thyristors, ICs, etc.)
- ► Appliances connected to 110V or 220VAC.
- ► Industrial equipment vulnerable to transients on the AC power line (computers, traffic controls, motor controllers, etc.)
- ► Protection of equipment connected to telephone or signal lines, such as security systems, railroad equipment, fire alarm systems, etc.
- ► Arc suppression across relay and switch contacts.
- ► Protection of instrument input terminals from accidentally connected high voltages.
- ► Power control equipment for power distribution lines.
- ► GFI(Ground Fault Interrupters).

Features:
- ► Nanosec. Switching Response Time, < 15 nsec., with minimal lead length.
- ► High Transient Current Capability (up to 100,000 Amps).
- ► No Extinguishing or Follow-on Current Limitations.
- ► Small Size for Compact Designs.
- ► Wide Operating Temperature Range −40 to +85 Degrees C.
- ► Compatible with Automatic insertion. Tape and reel configuration available on S05, S07, S10 and S14 series.
- ► Excellent Clamping Characteristics.
- ► Low Standby Power Consumption.

Benefits:
- ► Eliminates Dangerous Voltage Transients.
- ► Lowers Overall System Costs by Reducing Downtime and Maintenance Costs.
- ► Improves Component and System Reliability.
- ► Reduces Lightning Effects.
- ► Reduces EMP/RFI Interference.
- ► Promotes Personal Safety.

SVP—Surge Voltage Protectors

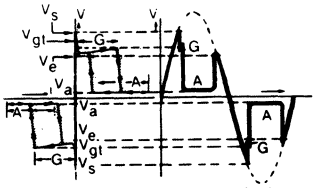
- **High Surge Current Capacity at 20KA Maximum**
- **High Insulation Resistance at $\geq 10^{10}$ Ohm**
- **Low Capacitance — Down to 1 pF**
- **High Breakdown Speed**
- **Small Size**
- **Low Cost**
- **Designed to Meet Industry Specifications**
- **Proven Performance: Millions in Service**

Surge Voltage Protectors. SVPs are gas discharge tubes, hermetically sealed, composed of 2 or 3 electrodes properly spaced by insulators and filled with a rare gas. SVPs mainly serve to provide a conductive path for unwanted, excessive transients, which prevents the transient energy and associated voltages from damaging sensitive equipment and components, and from harming personnel. Designed for rapid switching at a specific voltage level (breakdown voltage) from a non-conductive state to a conductive state (arc mode) when subjected to an excessive voltage transient. The SVP momentarily carries very high currents during conduction. After discharge of the transient, the circuit allows the SVP to restore itself. In the restored conduction, the high impedance of the SVP causes very little loss. Normal AC or DC operating circuit voltages may cause the SVP to remain in a conducting mode after the transient has passed, unless the following precautions are taken: For AC Applications — the AC follow current must not be exceeded. For DC Applications — if the normal operating voltage across the tube is greater than the glow voltage, and the current into the SVP while in arc mode, (10-20V across the SVP) does not exceed 0.2A, a 0.68 μfd. capacitor placed in parallel with the tube will cause it to extinguish. If the DC current is greater than the given values, current must be momentarily interrupted.

Environmental Specifications

Operating and Storage Temperature Range	– 55°C to + 130°C
Thermal Shock Humidity	MIL-STD-202E, Method 107D, Condition B MIL-STD-202E, Method 103B, Condition D
High Temp. Storage Explosion	MIL-STD-202E, Method 108A, Condition D MIL-STD-202E, Method 109B
Seal Shock	MIL-STD-202E, Method 112B, Condition D MIL-STD-202E, Method 213B, Condition F
Vibration Terminal Strength	MIL-STD-202E, Method 204C, Condition D MIL-STD-202E, Condition A (1kg)

The SVP is bipolar and has a symmetrical V-I characteristic as shown below.



Voltage-current characteristic and voltage variation across the protector

V_s striking voltage V_e extinguishing voltage
V_{gt} glow voltage G glow range
V_a arc voltage A arc range

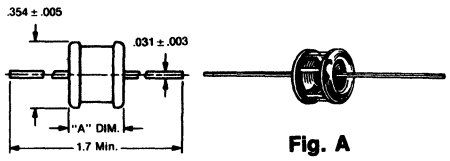


Fig. A

Button Type SVPs. Compact medium-duty 2-electrode tubes provide protection for most circuit applications. Features high breakdown speed by means of a patented process. Economical; easily mounted onto PC boards.

Special Button Type SVPs. Special types for AC applications undergo AC burn-in to guarantee good extinguishing characteristics at high follow currents — excellent for CATV amplifiers and other applications where AC Voltage is present.

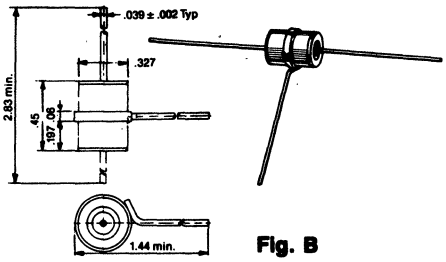

Fig. B

Three-Electrode Type SVPs. Developed and refined through experience gained from actual use in telecommunications equipment. These units are designed to meet or exceed parameters specified in REA Specification PE-80.

Surface Mount Discrete Semiconductors

- ► Full Parameter Tested and Guaranteed
- ► Passivated Chips for High Reliability
- ► Chip Protection Comparable to Standard Packaging Styles for Reliable Handling, Shipping and Performance
- ► High Power Dissipation for Package Size
- ► Small Substrate Space Requirement
- ► Ideal for Thick and Thin Film Hybrid Circuits
- ► Compatible with Chip Assembly
- ► Standardized Rigid Lead Dimensions Eliminates Lead Forming
- ► Automated Assembly Equipment Compatible

These microminiature semiconductors represent the latest packaging technology and are ideal for circuit miniaturization, automatic assembly, or as an alternative to chips. They are available for a wide range of applications from audio to microwave, in amplification, mixing, switching, detection and high voltage functions.

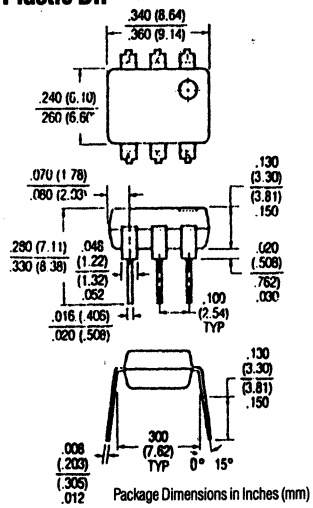
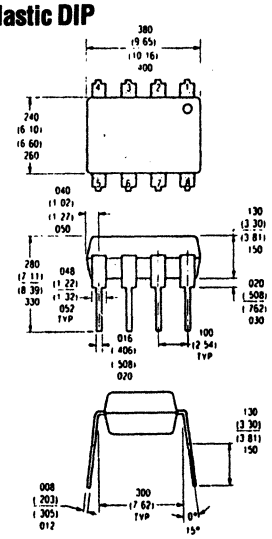
Optocouplers

6 Pin Plastic DIP



Package Dimensions in Inches (mm)

8 Pin Plastic DIP



Package Dimensions in Inches (mm)

Siemens offers couplers in single, dual, quad, and small outline surface mount packages. In addition to our true surface mount couplers, most of the standard couplers can be ordered with optional gull wing, surface mount butt lead bends. Among the couplers offered are high reliability, high voltage, and high current transfer ratio types All couplers are Underwriters Lab approved #E42744 and most VDE approved #0883.

1 = Photoxtr. output. Low cost industry standard. Single channel 6 pin DIP. **2** = Bi-directional 3:1 CTR matching Two IR Phoxtr. **3** = Photoxtr. output Dual channel 8 pin DIP. **4** = Photodarlington output. High gain. **5** = Photodarlington output. Low cost. Industry standard Single channel 6 pin DIP. * IF = 1 mA.

13

Intelligent Display® Devices

Siemens introduced Intelligent Display devices in 1977. These are LED alphanumeric displays with built-in CMOS drive circuitry for easy interface with microprocessors.

Stock No.	Mfr.'s Type	Character Height	Color	Description	EACH		
					1-99	100-249	250-999

735-5014	SN7409N	(w/open collector)	0.29

Positive OR, NOR Gates

735-2073	SN7423N	Dual 4-input NOR	0.56
735-2091	SN7432N	Quad 2-input OR	0.49
735-5016	SN7425N	Dual 4-input NOR	0.31
735-2013	SN7402N	Quad 2-input NOR	0.49

AND-OR-Invert Gates

735-5018	SN7454N	4-wide 2-input	0.29
735-5020	SN7451N	Dual 2-wide 2-input	0.36

Buffer and Interface Gates w/Open Collector Outputs

735-2020	SN7407N	Hex	0.31
735-2057	SN7417N	Hex	0.69
735-2017	SN7406N	Hex inverter	0.38
735-2049	SN7416N	Hex inverter	0.69
735-2077	SN7426N	Quad 2-input NAND	0.49
735-2096	SN7438N	Quad 2-input NAND	0.69
735-5022	SN7433N	Quad 2-input NOR	0.29

Buffers/Drivers w/3-State Outputs

735-2092	SN74367AN	Noninverting	0.47
735-5024	SN74366AN	Inverting	0.47
735-5026	SN74368AN	Inverting	0.47
735-5028	SN74125N	Qd. w/ind. controls	0.54
735-5030	Sn74-126N	Qd. w/ind. controls	0.54

Line Driver

735-2033	SN74128N	Quad 2-input NOR	0.64

Buffers, Clock/Memory Drivers

735-7195	SN7437N	Quad 2-input NAND	0.29

Flip-Flops

735-5034	SN7476N	Dual pulse-trigger	0.42
735-2106	SN7474N	Dual D-type	0.34
735-2060	SN74174N	Hex D-type, Q output	0.78
735-2061	SN74175N	Quad D-type, Q/Q output	0.78
735-2083	SN74276N	Quad JK, Q output	2.78
735-2095	SN74376N	Quad JK, Q output	1.55
735-2080	SN74273N	Octal 2-state w/clear	2.44

Monostable Multivibrators

735-5036	SN74122N	Single retriggerable	0.69
735-2031	SN74123N	Dual retriggerable	0.73
735-2030	SN74121N	Single Schmitt-Trigger	0.69
735-5038	SN74221N	Dual Schmitt-Trigger	1.00

Latches

735-5040	SN7475N	4 Bit	0.42
735-2087	SN74279N	Quad 2-state SR	0.84
735-5044	SN74116N	Dual 4 Bit	1.58
735-5042	SN74259N	8 Bit Addressable	2.44

Arithmetic Operators

735-2107	SN7482N	2-bit binary adder	3.02
735-2088	SN74283N	4-bit binary adder	1.44
735-2054	SN74167N	Decade multiplier	3.55
735-5046	SN7486N	Quad 2-in OR w/T-pole	0.58
735-2034	SN74136N	Quad 2-in OR w/OC	0.78

Multiplexers

735-2042	SN74150N	16-to-1 2-state	1.35
735-5048	SN74151AN	8-to-1 2-state	0.49
735-2045	SN74157N	Quad 2-to-1 2-state	0.64

Demultiplexers

735-2044	SN74154N	4-to-16 3-state	1.80
735-2046	SN74159N	4-to-16 w/OC	2.00
735-5050	SN7442AN	4-to-10 BCD-to-decimal	0.60
735-5052	SN74156N	Dual 2-to-4 w/OC	0.78

Priority Encoders/Registers

735-5054	SN74147N	Full BCD	1.35
735-2041	SN74148N	Cascadable octal	0.88
735-2085	SN74278N	4-bit cascade w/reg.	3.09

Open Collector Display Decoder/Drivers

735-2103	SN7445N	BCD-to-decimal(30V)	1.00
735-5056	SN74145N	BCD-to-decimal(15V)	0.98
735-5058	SN7446AN	BCD-to-7-seg.(30V)	0.86
735-2104	SN7447AN	BCD-to-7-seg.(15V)	1.07

(w/Counters/Latch)

735-2037	SN74143N	BCD-to-7-seg.	4.44

Clock Generator Circuits

735-2027	SN74120N	Synchrenous dual pulse	1.67

Shift Registers

735-2070	SN74198N	8-bit parallel bidir	1.67
735-5060	SN7496N	5-bit parallel in/out	0.71
735-5062	SN74195N	4-bit parallel in/out	0.95
735-2051	SN74164N	Serial-in/parallel-out	0.84
735-2052	SN74165N	Parallel-in/serial-out	0.91
735-2053	SN74166N	Parallel-in/serial-out	1.00

Other Registers

735-2058	SN74172N	8 × 2 bit reg. file	5.55
735-5064	SN74173N	Quad bus buffer	1.22

Synchronous Counters

735-2050	SN74161N	Sync. 4-bit binary	0.84
735-2067	SN74191N	Asyn. 4-bit bin. up/down	0.95
735-2068	SN74193N	Asys. 4-bit bin. up/down	0.95
735-2111	SN7497N	6-bit bin. multiplexer	2.07

Asynchronous Counters (Ripple Clock)

735-2109	SN7490AN	Decade(set-to-9 load)	1.28
735-5066	SN74176N	Decade('yes' load)	1.07
735-5068	SN74196N	Decade('yes' load)	1.07
735-5070	SN7493AN	4-bit binary(no load)	0.62
735-5072	SN74177N	4-bit bin.('yes' load)	1.07
735-2089	SN74293N	4-bit bin.(no load)	1.44
735-5074	SN7492AN	Divide-by-12(no load)	0.64
735-2098	SN74390N	Dual decade(no load)	1.84
735-2099	SN74393N	Dual 4-bit bin.(no ld.)	1.84

For a complete listing of all Xicor E² memory products, call Allied Electronics.

Series 5802, 5803, and 5807 Slide-On Heat Sinks

Just slide the heat sinks on your DIPs and a locking catch prevents the DIPs from being dislodged. No gluing operation is needed. Unique design has 2 separate conduction paths, top and bottom of the DIP. Slotted fins minimize the boundary layer effect. Double spring action brings top and bottom surfaces into parallel with the DIP for a snug fit regardless of DIP thickness. Designed with staggered fins to help maximize the forced convection thermal performance (all Series except 5802). Used with or without sockets. Aluminum alloy.

619-0200	5010B	Black Anodize	Aluminum Alloy	.28	.22	.16	.13

Series 5087, DIP Heat Sink (40 Pins)

Designed for 24, 28, 40, and 64 pin counts. No additional board space required. May be added before or after final board assembly. The series can be bonded to the top surface of the package with Ther-o-bond 1500 or 1600 or equivalent before or after final board assembly. These heat sinks do not require additional board space. They are offered in black anodized finish. Per MIL-A-8625 Type II.

Press On Coolers (TO-5 Case)

Series 3225, 3226
These are low cost, easily installed heat sinks. May be installed after assembly and takes up little additional board space.

Stock No.	Mfr.'s Type	Finish	Material	EACH			
				1-24	25-99	100-499	500-Up

Space-Saving Expandable-Collar Heat Sink

Series 5792 for TO-66 and TO-8
Heat sink saves board space, takes virtually same footprint as TO-66 and TO-8. Collar expands to slip onto TO-66 or TO-8 easily, grips hat to provide excellent thermal contact. No extra hardware needed. (Patent Pending)

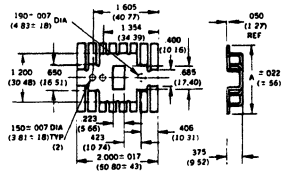
Series 5060, 5061 Economy Low Profile Circuit Board Cooler (TO-3 and TO-66 Case)

5060/5061



These are low profile heat sinks for high density circuit board packaging applications. The universal hole pattern accommodates both the TO-3 and TO-66 device case styles. The total height of the heat sink is only 0.375″, perfect for mounting to printed circuit boards with .50″ centering between boards.

5700
5900

Series 5700, 5900 Labor-Saving Plug-In Heat Sinks for TO-220s

TO-220s are quickly plugged in, eliminating time consuming fastening. Superior plug-in design features spring action that assures a tight fit between semiconductor and heat sink—for maximum metal-to-metal thermal contact. Styles available for horizontal and vertical mounting. Choice of three heights. Furnished with tinned tabs for soldering. Can be soldered directly to PC board. (Patent Pending) Aluminum alloy. Black anodized.

Ther-O-Bond 1500 Thermally-Conductive Epoxy Adhesive

Ther-O-Bond is a 2-part thermally-conductive epoxy adhesive system that also has good electrical insulating qualities. It bonds readily to metal, ceramics, glass, plastics and many other materials. An easy-to-spread thixotropic paste, it offers high heat transfer, low shrinkage, and a coefficient of thermal expansion comparable to that of copper and aluminum. It cures overnight at room temperature, or in 2 hours at 65°C. Pot life is about 60 minutes.

Typical Properties—Series 1500. Color: Black. **Thermal Conductivity, Btu/ft.²/hr./°F/in.:** 9.0. **Tensile Strength, psi @ 25°C:** 9800. **Dielectric Strength, Volt/Mil:** 600.

619-0005	Ther-O-Bond 1500-Q	Can (Resin), Bottle (Hardener)	1 Qt.	36.98

Ther-O-Link 1000 Thermally-Conductive Compound

Ther-O-Link Series 1000 compound was developed to reduce the high thermal resistance of the air gap otherwise present between mating surfaces of a heat sink and semiconductor.It provides an excellent thermal path by displacing the air gap between the two mating surfaces. Ther-O-Link provides a low thermal resistance of only 0.05° C/W when using a 0.001″ film on a one-inch square area. Ther-O-Link will not become hard, and retains its viscous consistency even after continuous operation up to 200°C. It has the consistency of a viscous hand lotion and will wet-out the surfaces and displace more air than heavier compounds. Ther-O-Link is easily brushed on to the mating surfaces of semiconductor devices. When applying, spread or brush the compound evenly over the entire mating surface. For maximum performance, proper torque should be used when mounting stud-mounted devices. The compound can easily be removed with a damp cloth using any commercially-available clean-up solvent.

Typical Properties—Series 1000. Specific Gravity: 2.1-2.1. **Viscosity:** Paste. **Thermal Conductivity, Btu/ft.²/hr/°F/in.:** 5.2. **Thermal Resistivity, °C in./watt:** 52. **Volume Resistivity, ohm-cm:** 10^{15}. **Dielectric Strength, volts/mil:** 250. **Weight Loss, % after 24 Hours at 200°C:** 0.6.

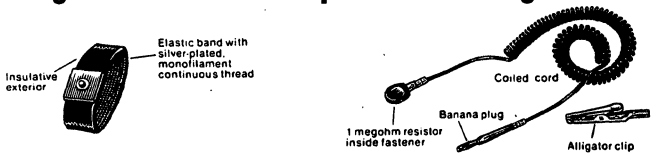
Charge-Guard® Wrist Straps and Grounding Cords



The wrist strap consists of a wrist band and a grounding cord. Grounding cord length is the extended length for the coiled cords. The molded cap on the grounding cord that snaps onto the wristband contains a 1 megohm resistor.

Stock No.	Mfr.'s Type	Description	EACH
617-2003	2212	Medium Size (5 1/2"-7 1/4") band 5' coiled cord	21.00
617-2004	2213	Large (larger than 6 1/2") band 5' coiled cord	21.00
617-2026	2214	Adjustable band, 5' coiled cord	21.40
617-2027	2224	Adjustable band, 10' coiled cord	26.60
617-2000	2202	Medium (burgandy) wrist band only	8.30
617-2001	2203	Large (blue) wrist band only	8.30

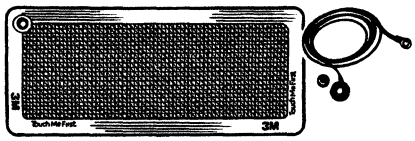
617-2028	2204	Adjustable wrist band only	8.80

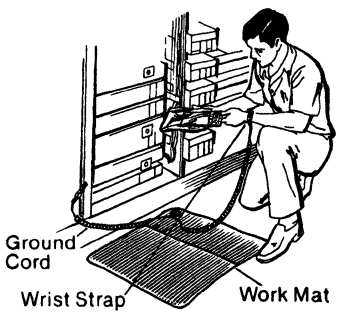
First Touch™ Static Control Computer Pad



One of the best ways to protect your computer is to create a static-safe environment using a First Touch Static Control Computer Pad. Especially formulated using a 3-layer construction, the computer pad drains away static charge instantly with your first and every touch. **Size:** 9 1/2" × 23 1/2"—includes 10 ft. grounding cord, resistor and connector.
617-2013. 920213-R. Brown 23 1/2" × 9 1/2" keyboard pad. . . . . **EACH 39.95**

Portable Field Service Grounding Kit

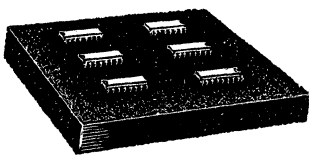
Use this kit to protect installed electronic components from static damage as a result of normal handling during field maintenance and repair. Two convenient storage pouches contain wrist strap and ground cord. Pouches also may be used for components and extra static shielding bags. Folds neatly to fit most any briefcase or tool kit. **Size:** 2' × 2'—includes wrist band, ground cord and alligator clip.
8501. Field Service Kit
617-2009. . . . . . **EACH 52.70**



First Touch Static Control Keyboard Strip

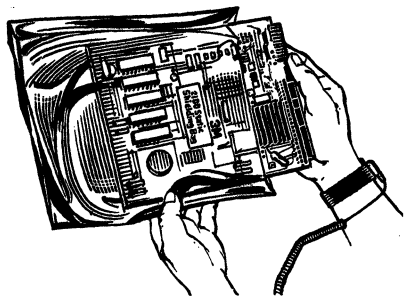
Adhesive-backed strip mounts on keyboard and prevents garbled data, loss of memory, lock-up, and other problems caused by static electricity. Static charge drains harmlessly from operator's body each time hand contacts strip. Includes 7 ft. grounding cord.
617-2014. Keyboard Static Control Strip . . . . . **EACH 20.00**

Velostat® Electrically Conductive Foam



This crosslinked polyethylene foam provides both physical and electrostatic protection for sensitive microelectronic parts. Conductive qualities are compounded directly into the material using a carbon impregnation process.

Static Shielding Bags



Transparent Static Shielding Bags 3-mil wall thickness. First dimension is the bag opening size. Dimensions are inside dimensions.

Transparent Static Shielding Bags

Static sensitive electronic components must be protected from electrostatic discharge while in storage, shipping and transport, as well as during assembly and handling operations. Static shielding bags ensure that static electricity will have a controlled, nondestructive path to ground, independent of environmental factors. By using static shielding bags, premature product failure, due to static related damage, can be eliminated. **SPECIFICATIONS. Thickness:** 3.1 mil(79 microns), ASTM D374. **Tensile Strength:** 9700 lbs/in.^{2} (67 N/mm^2), ASTM D882. **Seal Strength:** 5 lbs/in.^{2} (870 N/m^2), ASTM D882.

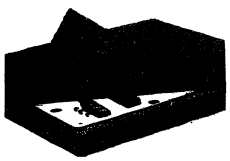
Conductive Foam



Conductive foam protects static-sensitive electronic devices in-plant and during shipment. Two types, cushioning and semi-rigid are both non-corrosive. **Cushioning (CFC):** Low density spongy material for delicate parts subjected to rough handling. **Semi-Rigid (CFSR):** High density design protects IC leads from static damage and deformation. **SPECIFICATIONS. Cushioning (CFC). Polyurethane Density:** 2-2.5 lbs/ft^3. (32-40 kg/m^3). **Semi-Rigid (CFSR). Polyurethane Density:** 2-2.5 lbs/ft^3 (40-48 kg/m^3). Both Products. **Surface Resistivity:** 10^3 – 10^4 Ohms per unit square. **Volume Resistivity:** 10^3 – 10^4 Ohms-cm. Test Standard-ASTM D257.

Portable Field Service Service Grounding Kit

Now you can remove and prevent static build-up during field service of electronic systems with this portable kit. Components include: One portable grounding work surface made of static dissipative vinyl 24 × 18″ with reinforced edges and corners. This surface provides two integral pockets 11 × 6″ as well as two male ground snaps and an interconnect snap (AIS-1). One (AWCC) wrist strap with coiled ground cord (max. extension 5 ft) and one (AGC-18-15) straight ground cord.

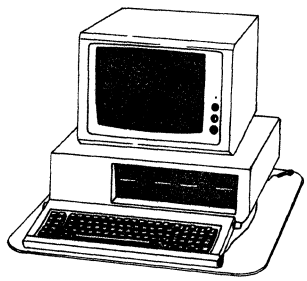
Electronic Equipment Terminal Mats

Protects you from:

- **Loss of Critical Data**
- **Garbled Printouts**
- **System Shut Down**
- **Personnel Discomfort**



Electrostatic discharge can cause costly breakdowns and malfunctions of your electronic systems. Terminal mats overcome static problems while providing the protection electronic systems require. The terminal mat is a flexible mat apparatus to serve as a safe, non-destructive ground path for static. **SPECIFICATIONS. Thickness:** 3/32″. **Weight:** 1 lb/ft^2. **Surface Resistivity:** 10^9 Ohms per unit square. **Volume Resistivity:** 10^9 Ohms-cm. **Static Decay Time:** Less than 0.05 seconds.

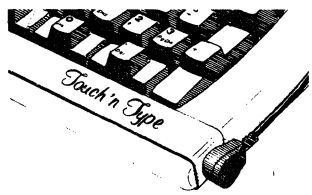
Touch'n Type

Ideal for:

- **Word Processors**
- **Computers**
- **Electronic Cash Registers, Scales, & Typewriters**
- **Teletype Machines**
- **Photo Copiers**



The Touch'n Type™ strip is the best method available to quickly route dangerous static electricity away from electronic equipment. Electronic memories can be modified or erased completely and entire computer system failures can be caused by static electricity discharges. Easily mounted on electronic equipment. As soon as the operator makes contact with the Touch'n Type™ strip, the static is safely drained away. **SPECIFICATIONS. Thickness:** 3/64″ (1.2mm). **Surface Resistivity:** 10^9 – 10^{11} Ohms per unit squares. **Volume Resistivity:** 10^{10} – 10^{12} Ohms-cm. **Static Decay Time:** Less than .05 sec. **Dimensions:** 3/4 × 30 × 3/64″. Includes 15 ft. ground cord, alligator clip and extra ring terminal.

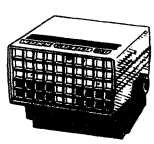
Work-Guard™ and Work-Guard B™ Air Ionizers



Work-Guard™

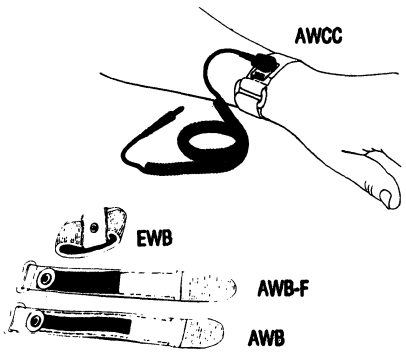
Work-Guard B™

Work-Guard™. Ends static problems in work areas. The standard is a non-blown ionizer that generates ions through corona discharge at two needle points. Propagation to the work area is done by coulomb repulsion. **SPECIFICATIONS. Power Input:** 110VAC (also available with 220VAC adapter). **Ion Output:** Positive and negative. **Induced Voltage:** <100V on 10 pf object 12″ from unit. Below computer/microprocessor interference. **Dimensions:** 4 × 4 1/2 × 1 1/2″ (101.6 × 114.2 × 38.1mm). **Weight:** 1.5 lbs.(680.5g).

Work-Guard B™. Ionizer with blower, operates on the same principle of ionization as the standard Work-Guard . Low velocity air stream increases the effective area of operation. **SPECIFICATIONS. Power Input:** 110VAC or 220VAC. **Ion Output:** Positive and negative. **Induced Voltage:** 100V on 10 pf object 12″ from unit. EMI-RFI; below computer/microprocessor interference. **Dimensions:** 6 × 6 1/4 × 3 1/4″ (152 × 158.8 × 82.6mm). **Weight:** 3.1 lbs. (1420g). Available with or without heater.

Stock No.	Mfr.'s Type	Description	EACH
725-0175	ION-1	Non-fan-blown air ionizer	292.00
725-0180	ION-B	Fan blown air ionizer	442.00
725Q0185	ION-BH	Fan blown air ionizer w/heating element	500.00

Wrist Straps



ESS wrist straps safely remove static electricity from personnel who handle static-sensitive devices. The strap is worn on the wrist of the user, and a ground cord is attached to the strap, thereby serving as a drain path for static electricity. The wrist strap is available in light blue velcro material and is adjustable to fit most wrist sizes. It features excellent skin contact, washability and operator comfort. Ground cords are available in both straight and coiled cord models and in a variety of lengths and termination configurations. All ESS ground cords have a one megohm resistor built into the cord for user safety.

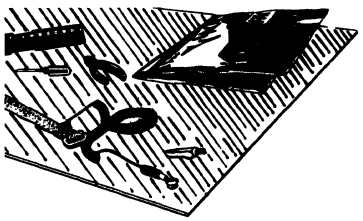
Note: All of the above wrist strap-cord combinations also include an alligator clip for grounding flexibility. All ESS ground cords have a one megohm resistor built into the cord for user safety.



Flexible Table Mats

- **Permanently Static Dissipative**
- **Eliminates Capacitance Surge (Common in Laminated Material)**
- **Humidity Independent**
- **Durable and Flexible**
- **Will Not Curl on Work Surface**
- **Heat- and Flame-Resistant**
- **Acid- and Alkali-Resistant**

ESS work surface table mats provide a static dissipative surface to protect sensitive electronic components from damaging electrostatic discharge (ESD) during manufacturing. Static charges from personnel and conductive objects placed in contact with the mats are quickly and safely drained to ground. Because the mats are static dissipative, sparking electrostatic discharge is eliminated, reducing the electrostatic damage and discomfort to personnel. **SPECIFICATIONS. Thickness:** 3/32 In. (2.4mm). **Unit Weight:** 1 lb/ft² (4.9 kg/m²). **Surface Resistivity:** 10^9 Ohms per unit square. **Color:** Computer Grey (custom colors available on request). Rigid mats also available.

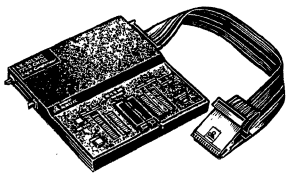
AR-90LMC Logic Comparator & Monitor



- **State of the art design allows logic comparison to 20 MHz**
- **Monitor mode increases units versatility**
- **TTL/CMOS autodetect means only one model for both lofic families-better value**
- **Latch mode allows unattended operation without missing errors**
- **Unique user selectable 'Deglitch' time lets user select interval before timing errors are detected.**
- **Easy to use pull-out instructions are always handy.**
- **Advanced, custom IC design means no extra power leads just attach test clip and proceed with testing.**

The AR-90LMC is a small, 20MHz, 28-channel logic comparator that also provides a logic monitoring function. Its innovative custom IC design provides features and performance that far out perform competitive models.
The AR-90LMCs unique logic-type autodetection circuitry allows the use of a single model for both TTL and CMOS circuits. The unit also automatically detects I/O connections to the full operational bandwidth of 20MHz. Switches are provided to set power and ground pins.
In compare mode, the AR-90LCMC will detect a single 50nS timing error.
The devices that the unit will test (28-pin maximum) include:

- **TTL digital (N, LD, S, ALS, F, HC, HCT, ACT, & FACT)**
- **CMOS digital**
- **PAL, HAL, PLA, FPLA, EPLD, & Gate Arrays**
- **SRAM, DRAM, ROM, PROM, EPROM, EEPROM, & FIFO**
- **SSI-VLSI chips (one LS load drive capability).**

Accessory IC Test Clips
Specifically for use with the AR-90LMC Logic Comparator, ARI supplies several sizes of IC Test Clips. These may be easily used by simply unplugging the existing test clip from the ribbon cable that is supplied with the AR-90LMC, and then plugging the new test clip onto the cable per the supplied instructions.

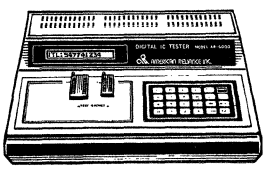
AR-6000 TTL/CMOS Digital IC Tester



Applications

- **Manufacturing**
- **Incoming inspection**
- **Field service**
- **Repair Service**
- **Engineering R&D/prototyping**
- **Parts salvage and surplus dealers**
- **Computer and supply dealers**

The microprocessor-based AR-6000 is a high speed IC tester designed to fill the void between basic component testers and costly ATE systems. It can test and identify more than 1800 CMOS/TTL digital ICs (Up to 28 pins). In addition to its use as a valuable R&D tool, this affordable tester will help you control costs in manufacturing, inspection and service functions. When power is turned on, the AR-6000 has a self-diagnostic function to ensure reliability for memory, I/O ad all functions. Use 'GO', 'AUTO' & 'LOOP' test for general applications, and use 'SEARCH' to identify unknown ICs. Just spend a couple of minutes with the manual and you'll see how easy it is to use and how useful for your job. **KEY FEATURES.** ► Bench-top, portable, ideal for field use. ► 16 × 1 character 5 × 7 dot matrix LCD display. ► Full message display such as 'UNIDENTIFIED', 'PASS', 'ERROR'. ► Easy to operate with 14 function an 10 numeric keys. ► Capable of testing and identifying more than 1800 different types of ICs (up 28 pins). ► High speed test cycle (about 10 milliseconds). ► Following IC series under 5 Volt functional testing: (1) Texas Instruments 54/74. 55/75 TTL series. (2) Motorola 14000 and RCA CD4000 CMOS series. (3) ICs compatible with above devices. ► Can distinguish 'Open Collector', 'Totem Pole', 'Tri-State' output circuits of digital TTL ICs. ► 'Auto Search' identifies the unknown ICs. ► 'Auto Test' checks the same ICs without any presses. ► 'Loop Test' examines the durability of ICs. ► Audio tone sounds in case of 'ERROR'. ► Overcurrent protection built-in. ► Auto Vcc & ground fail detection. **SPECIFICATIONS. Display:** 16 × 1 character dot matrix LCD. **Test Socket:** (1)One piece 24 pin IC socket, (2)One piece 28 pin IC socket. **Operating Keys:** (1)14 function keys-CMOS/TTL, AUTO TEST, BACK SPACE, CLEAR, A-F; RESET, LOOP TEST, SEARCH, GO.(2)10 numeric keys(0-9) **Test voltage:** 5 VDC, **Alarm:** Audio tone sounds in cast of 'ERROR', **Power:** 110/220VAC, 50/60 Hz (120/240VAC Optional), **Operating Temperature:** 39.6°F to 184°F(– 10°C to 70°C) **Measurements:** 13″(W) × 11.8″(D) × 4.3″(H) (330 × 330 × 110mm). **Weight:** 6.05 Lbs. (2.75 kgs)

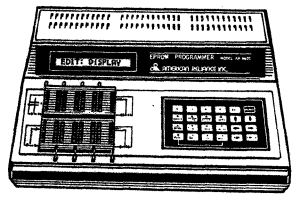
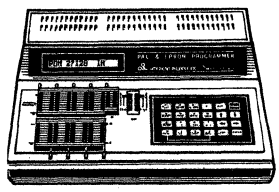
AR-9800 Gang Programmer



The AR-9800 is a compact, high-volume EPROM and EEPROM programmer, which can program up to eight devices at once. It may be operated either as a stand-alone programmer, or used in conjunction with a standard PC with the software supplied with the unit, via the built-in RS-232 port. **SPECIFICATIONS. Programming Functions:** Copy, Read, Write, Verify, Erase, and Blank Check. **Data Editing Function:** Display, Delete, Insert, Modify, Move, Copy, and Fill. **Device Check Functions:** Blank, Verify, Over Current, Reverse, Check Sum, and Device Present. **Programming Algorithms:** Traditional (TRAD), Intel Intelligent (IN), Fast Pulse (FP), Quick Pulse (QP). **Device Programmed:** EPROMs — 2532, 2564, 2716, 2716B, 2732, 2732A, 2732B, 2764, 2764A, 2712B, 27128A, 27256, 27256D, 27512, 27513; EEPROMs — 2816, 28C16, 2816A, 2817, 2817A, 2832, 2864, 28C64, 2864A. **Internal RAM:** 72K bytes (756K bits). **Serial Interface:** Complete programmer control via Standard RS-232 serial port (25-pin type "D" connector). 75, 150, 300, 600, 1200, 2400, 4800, 9600 baud. Intel hexadecimal format. **GENERAL INFORMATION. Sockets:** Eight high-quality, zero-insertion-force sockets. **Display:** 16-character. 5 × 7 dot-matrix Liquid Crystal Display. **Keyboard:** 24, tactile-feedback pushbutton, protected by polycarbonate overlay. **Self-Test:** ROM, RAM, I/O, LCD, Speaker. **Electrical Requirements:** Operating Voltage — 110/220 VAC, ± 10%; Frequency Range — 50/60 HZ; Power Consumption — 3.5 Watts. **Dimensions:** (H × W × D) 4.5 × 13.4 × 11.8 inches **Weight:** 7.7 pounds.
952-9800. AR-9800 ..... **EACH 1195.00**

AR-9820 GANG Programmer



The AR-9820 PAL, EPROM, and EEPROM Programmer is functionally identical to the AR-9810, but adds the ability to program multiple EPROMS. Using high-quality zero insertion-force sockets, the AR-9820 will program up to 8 EPROMS at once. The unit also programs 2816, 2832, and 2864 type EEPROMS. A separate 24-pin socket is used for reading and programming PAL devices. **AR-9820 SPECIFICATIONS. Programming Functions:** Copy, Read, Write, Verify, and Blank Check. **Data Editing Functions:** Display, Delete, Insert, Modify, Move, Copy and Fill. **Device Check Functions:** Blank, Verify, Over Current, Reverse, Check Sum, and Device Present. **Programming Algorithms:** EPROMs, EEPROMs — Traditional (TRADI), Intel Intelligent (IN), Fast Pulse (FP), Quick Pulse(QP), User Defined (UD); PALs — MMI and NS standard programming algorithms. **Devices Programmed:** EPROMs — 2532, 2564, 2716, 2716B, 2732, 2732A, 2732B, 2764, 2764A, 27128, 27128A, 27256, 27256D, 27512, 27513; EEPROMs — 2816, 28C16, 28C16A, 2817, 2817A, 2832, 2864, 28C64, 2864A; PALs (AMD/MMI, TI, NS, and EQUIVALENTS) — 20-pin · 10H8, 12H6, 14H4, 16H2, 16C1, 10L8, 12L6, 14L4, 16L2, 16L8, 16R8, 16R6, 16R4, 16 × 4; 24-pin · 12L10, 14L8, 16L6, 18L4, 20L2, 20C1, 20L10, 20 × 10, 20 × 8, 20 × 4, 20L8, 20R8, 20R6, 20R4. **Protection:** Reverse Insertion , Null Insertion. **Internal RAM:** 72K bytes (756K bits). **Serial Interface:** Complete programmer control via Standard RS-232C serial port (25-pin type "D" connector) 75, 150, 300, 600, 1200, 2400, 4800, 9600 baud. **GENERAL INFORMATION. Sockets:** Nine high-quality, zero-insertion-force sockets. **Display:** 16-character, 5 × 7 dot matrix Liquid Crystal Display. **Keyboard:** 24, tactile-feedback pushbuttons, protected by polycarbonate overlay. **Self-Test:** ROM, RAM, LCD, Speaker and I/O. **Environmental Specifications:** Operating Temperature—10° to 40°C (50° to 104°F); Storage Temperature—0° to 50°C (32° to 122°F); Relative Humidity— < 80%, non-condensing; Altitude— to 4,500 meters (14,763 feet). **Electrical Requirements:** Operating Voltage—110 or 220 VAC, ± 10%; Frequency Range—50 to 60 Hz; Power Consumption—3.5 Watts. **Dimensions:** 11.5 × 34.0 × 30.0 cm, H × W × D (4.5 × 13.4 × 11.8 inches). **Weight:** 3.5 kilograms (7.7 pounds)

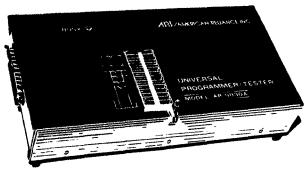
AR-9830A Pin Programmer



The AR-9830A is an all-in-one 40-Pin Programmer/IC Tester, able to program E/EEPROMs up to 1 megabytes, Bi-Polar PROMs, PALs, FPLs, GALs, PEELs, EPLDs, 8748/8751 Series Microcontrollers as well s Z-8 Series Microprocessors. The PC based device is controlled from IBM compatible PC/XT/AT, plus 386 based machines up to 24 MHz. Any of several file formats and programming algorithms are available. Standard features also include an IC Tester/Auto Identifier, which automatically identifies and tests TTL/CMOS Digital ICs, SRAMs, DRAMs, PLDs and Gate Arrays. Moreover, custom digital ICs are tested by utilizing user-written test programs. Unit comes standard with PC interface card, module interconnect cable and software. **Specifications. Devices Programmed:** EPROMs — 2716-271024 by any manufacturer. EEPROMs — 2816A, 2817A, 2864A; PALs — 20 and 24 Pin, FPLs, GALs, S-GALs, PEELs, EPLDs, 22V10; Bi-Polar PROMs — AMD/MMI, NS, TI, SIG. **Memory:** 64K or 128K bytes. **Serial Interface:** Complete Programmer Control via standard RS-232C Serial Port (25-Pin Type "D" connector). **Programming Functions:** DIR, Upload/Download, Save, Edit, Debug, Manufacturer, Type, Blank Check, Program Read, Compare, Auto, Verify. **Programming Algorithms:** 50 mS, 10 mS, 5mS, Intelligent, Interactive, Quick Pulse. **File Formats Supported:** Binary, Intel Hex, Motorola S1/S2, Tektronix Hex, Hex, Extended Hex and JEDEC. **Devices Tested:** (TTL) 54/74 STD Series, S, LS, H, L, HC, HCT, F; (CMOS) CD40/45 Series, 4164 and 42256 DRAMs, and 2114, 6116, 6264, 6256 SCRAMs. **System Requirements:** IBM PC/XT/AT or compatible, or 286/386 based MS-DOS machines up to 24 MHz, one floppy drive, 384K RAM Memory, one open slot for interface card, PC-DOS or MS-DOS 2.0 or higher operating system and debug. Com Program.

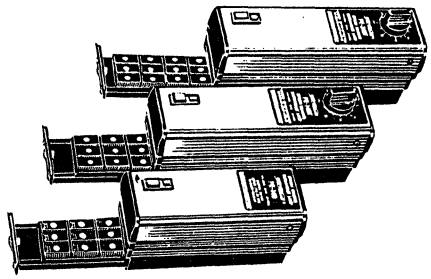
- **Efficient and Complete Erasing in as Little as 11 to 13 Minutes, Depending on the Model**
- **Type PE-240T Erases 12 Chips, Type PE-140 and PE-140T, 9 Chips**
- **CSA Approved**



PE-140, PE-140T, and PE-240T are desktop lamps specifically designed for personal and small system users. They are the perfect choice for fast and complete EPROM erasure. The PE-140 and PE-140T use a single 4 watt UV tube, while the PE-240T uses two 4 watt UV tubes. Tube life is rated at 6,000 hours. Safety features include fully shielded UV tubes with UV-absorbing light indicators to signal when tubes are lit. The PE-140T and PE-240T feature the added convenience of a 60-minute timer for automatic unit shut-off.

- **Compact and Economical**
- **Erases up to 30 Chips**
- **Efficient and Complete Erasing in as Little as 11 Minutes**
- **Accepts PC Boards up to 4″ × 9″**

PL-265T is ideal for data processing centers and other medium volume EPROM users. This unit uses two 6-watt UV tubes. Tube life is rated at 6,000 hours. The PL-265T lamp erases up to 30 EPROM chips or will accept PC boards up to 4″ × 9″. A specular aluminum reflector assures maximum intensity. The loading drawer contains a removable tray insert which is adjustable to varying heights to ensure optimum exposure. Safety features include UV-absorbing light indicators to signal when tubes are lit. A 60-minute timer automatically shuts off unit at the end of each erasing cycle.

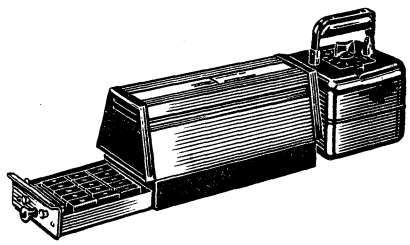
PR-Series Lamps

- **PR-125T Erases 25 Chips**
- **PR-320T Erases 42 Chips**
- **Medium Capacity, High Intensity**
- **Complete Erasing in as Little as 6 Minutes**



PR-125T and PR-320T are designed for medium to large volume EPROM users. The PR-Series features high intensity UV grid tubes that provide maximum irradiance uniformity, for extremely fast and efficient erasing. Grid tube life is rated at 5000 hours. They can completely erase EPROMs on PC boards up to 4″ × 9″. The PR-125T can hold up to 25 EPROMs while the PR-320T accommodates up to 42 individual EPROMs. A specular aluminum reflector assures maximum intensity. The loading drawer contains a removable insert which is adjustable to varying heights to ensure optimum exposure. Safety features include UV absorbing light indicators to signal when tubes are lit. Other features include a 60 minute timer which automatically shuts-off the unit and a carrying handle to ease portability.

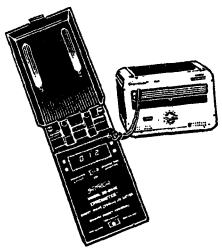
Digital Ultraviolet Radiometers



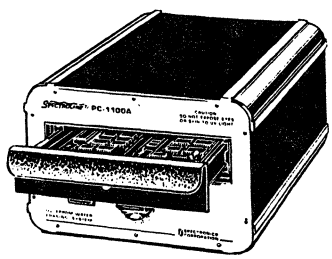
- **Measures UV Intensity with ±5% Accuracy**
- **Reliable Solid State Circuitry**
- **Calibrated to NBS Standards**
- **Perfect for Calculations**
- **Durable Plastic Case**

DM-254X and DS-254E precisely measure the UV output of EPROM erasers. They make erase time calculations easy and accurate, and are perfect for monitoring the useful life of your eraser's UV source. The DS-254E not only measures UV irradiance, but actually calculates proper erasing time. Both units feature 4½ digit LED display, measuring range 0-19, 990μW/cm² with accuracy of ±5%. The sensors are calibrated to NBS standards. Both come complete with four non-rechargeable, 1.5V alkaline batteries.

Stock No.	Mfr.'s Type	Description	EACH
986-0245	DM-254X	Digital UV Radiometer	**525.00**
986-0254	DS-254E	EPROM Meter/Calculator	**795.00**

PC-Series Cabinets

- **Large Capacity, Ultra-High Intensity**
- **Complete Erasing in Less than 5.5 Minutes**
- **Erases from 84 to 336 Chips Depending on Model**
- **Accepts PC Boards from 8″ × 12″ to 32″ × 12″**



PC-1100A, PC-2200A, PC-3300A, and PC-4400A Erasing Cabinets are specifically designed for high volume production requirements. In as little as 5.5 minutes, their high intensity UV grid lamps completely erase programmed memories. Quartz grids are mounted on a specular aluminum reflector, providing uniform irradiance with a typical peak intensity of 18,500μW/cm². The 8″ × 8″ modular assemblies feature a special drop-in design making replacement quick and easy. As well as erasing individual EPROMs, these cabinets will accept various quantities of PC boards, wafers, and metric cards. The PC-3300A and PC-4400A will accommodate open face stocking tubes. UV absorbing light indicators signal when grids are lit. Chamber temperature is controlled by powerful internal cooling fans, maintaining maximum UV intensity and prolonging grid life, which is rated at 5000 hours. Also features adjustable tray to ensure optimum exposure.

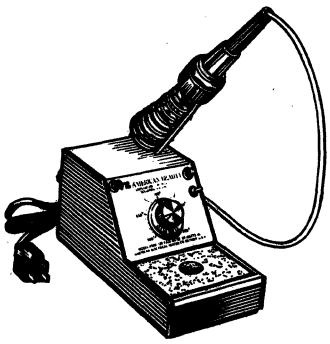
Soldering Stations

5000 Series Temperature Controlled Soldering Stations



Three 50-watt all-electronic stations. Each utilizes a different mode of temperature selection to meet different needs.

► **Holds temp. to within ± 5°F (9°C) or less.**

► **Zero cross-switching, total grounding of the station's iron and all-metal housing to protect sensitive work.**

► **Iron equipped w/ Paragon Quality tip No. 646 (chisel).**

► **Iron completely isolated when idling in station's spring-type holder.**

► **Deep-well, self-moistening tip cleaner.**

► **Meets or exceeds MIL SPECS, including DOD-2000-1B.**

► **120V AC, 60 Hz. 3-wire cord, NEMA plug.**

Overall Size: Length, 8⅞″; width, 3¾″; height, 8¼″ (22.54 x 9.53 x 20.95 cm) including soldering iron holder.

Model 5100. Specifications similar to Model 5000 except temperature selection limited to four most used settings: 600°, 650°, 700°, 750°F (316°, 343°, 371°, 399°C).

Model 5200. Specifications similar to Model 5000 except that this model has no external temperature controls. Temperature set by supervisor by means of selector control inside of cabinet. Settings limited to 600°, 650°, 700°, 750°F (316°, 343°, 371°, 399°C). Replacement sponges and Paragon Quality® tips are available from your Allied Distributor.

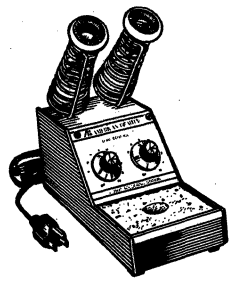
V-3500 Variable Voltage Dual Soldering Station **NEW**



Gives the operator simultaneous, independent control of two soldering irons for special purposes such as:
a) alternate use of two irons to compensate for large heat requirements.
b) when different size irons are needed by the same operator.
c) controlling iron output during idle situations.

► **Output voltage infinitely variable from 0% to 100% of line voltage.**

► **Accepts miniature and pencil-type irons up to 60 watts.**

► **3-conductor power outlets for two irons. (Irons not included. Order separately.)**

Model S-330 Ultrasonic Cleaner

- **Makes Jewelry and Coins Sparkle Like New**
- **Clean Components and Small Instruments**
- **Stainless Steel**
- **100% American Made**

The small size and simple operation of this ultrasonic cleaner makes cleaning practical at work bench or lab table. Completely self-contained and self-tuned with solid state circuitry for dependability and long life. Stainless steel tank with stainless steel tank cover. One pilot-lighted on/off switch. No radio-frequency interference. Virtually indestructible lead zirconate titanate transducer. **Capacity:** 1/2 gal. (1.8 liters). **Tank size:** 5 1/2" x 6" x 4" (14.0 x 15.2 x 10.2 cm). 50W cleaining power. 75 W input. Shpg. weight: 7 lbs.

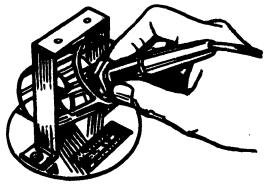
Safety Soldering Iron Stands

No. 575 Automatic Open and Close

Closes with iron in place. Opens when iron is lifted straight up. For Little Dandy and other miniature irons.

709-3575. ..... **EACH 21.00**

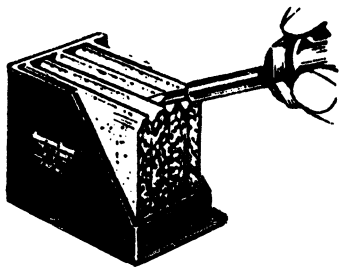


No. 576 Holds tip in molten solder

For intermittent soldering. Prevents over-heating at idle, keeps tip tinned, ready for instant use. Accepts all miniature irons.

709-3576. ..... **EACH 21.00**

One-Pass Tip Cleaner



- **Handiest Way to Clean Tips**
- **Eliminates Cleaning Problems**

One pass between wet cellulose sponges cleans entire tip. Eliminates the former cleaning problems of tip-plate damage, linting, stray solder pellets. Water-well (3/4" deep) keeps sponges wet and ready to use all day. The high impact styrene holder has a non-slip, rubbberized base, bored for bench mounting. Ideal for workroom, classroom, and hobbyist.

Stock No.	Mfr.'s Type	Description	Size	Wt.	EACH

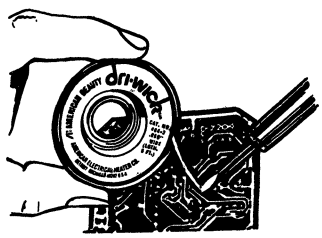
Dri-Wick® Fine De-soldering Tool on a Spool



Tested, proved . . . and backed by American Beauty. Dri-Wick is used in U.S. space program, at flight centers and by subcontractors. Proved most efficient for de-soldering, re-work, salvage.
Any place you can put solder, you can remove it in a second with Dri-wick. Lay Dri-wick on joint and apply tip of hot soldering iron. Capillary action draws out all solder, leaves joint clean, ready for salvage or rework. Specially woven copper, each strand coated with water-white resin. Packaged 5 ft. per spool, 25 spools per carton. (No. 484-6, 2 1/2 ft. spools.) Six widths. Test quickly indicate best width to use. Table below gives general guidance.

Stock No.	Mfr.'s Type	Width	EACH
709-4841	484-1	.025" (.63 mm)	**1.70**
709-4842	484-2	.050" (1.27 mm)	**1.70**

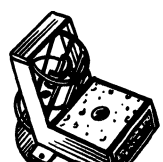
709-4846	484-6	.200" (5.08 mm)	**1.70**

Combined Safety Stand/Tip Cleaner



Ideal for pencil-type irons used intermittently, with long periods of "idling". Pool of molten solder surrounds tip of racked iron. Keeps tip tinned, ready for use. Prevents overheating. Self-contained tip cleaner stays moist for days. Wipings from solder tip drop into well, leave sponge free of contaminants. Stand and guard, heavy gauge cadmium plated steel; cleaner is stainless steel and hi-impact, no-burn plastic. **Overall size:** 4 1/4" x 5 1/4" x 4 1/8".

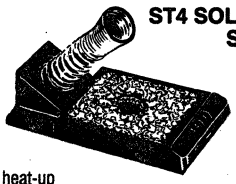
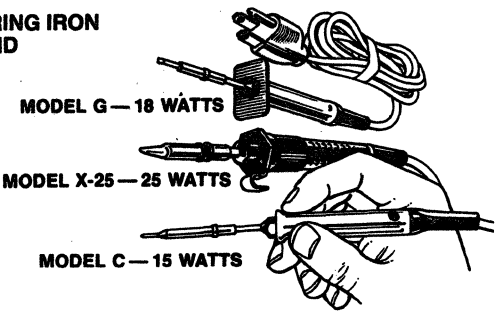
Soldering Irons for Microelectronic Circuits

- Long-lasting Elements — Designed for Production Line Service
- Heat to Full Operating Temperature in Seconds . . . Hold Constant Tip Temperature
- Safe for Delicate Components
- Maximum Heat Transfer Efficiency with Slide-on Replaceable Tips
- All Models Meet OSHA Standards for Safety
- 3-Wire Ground Plug



ST4 SOLDERING IRON STAND



Soldering irons ruggedly built for long-lasting, heavy-duty service and production line use. Fast heat-up and recovery time, efficient heat transfer assure steady tip temperature and superior performance in all microelectronic soldering applications. Low current leakage and near-infinite insulation of heating elements from tip eliminate risk of damage to transistors, integrated circuits and other delicate components, and assure safety of the operator. Interchangeable tips in a variety of sizes and shapes cover a full range of soldering requirements. No set screws to freeze and break. Three models, three power ranges: 15 watts, 18 watts, 25 watts. Cords are ultra-flexible for easy handling. For 110-120 V, 50-60 Hz AC.

Spirally Cut Cable Wrap

U.L. Recognized Heli-Tube® is a spirally cut, expandable plastic cable harness. Bundles wires, cables or hoses firmly but allows flexibility. Wraps on like tape, can be re-used, quickly and simply. Resists abrasion and insulates. Clamps bundles to standoffs. Dampens vibration. Can have wire breakouts in any orientation. Wires can be routed or re-routed after Heli-Tube® is in place; either new wires or replacement wires. Stocked by Allied in 100' spools of Clear Polyethylene, Black Polyethylene, and Black Fire-Resistant Polyethylene. The Clear Polyethylene is a low cost material ideal for general applications. Not affected by ordinary solvents and extremely resistant to abrasion. **Maximum Operating Temperature:** 101°C to 215°F. **Minimum Operating Temperature:** – 76°C to – 105°F. **MIL Spec. and Approvals:** Fed. Spec. LP390, MIL 1631D, MIL P26692. The Black Polyethylene is ultra-violet-resistant which permits it to be used in direct sunlight for long periods of time. Same temperature range and MIL spec. as Clear Polyethylene. The Black Fire-Resistant Polyethylene is self-extinguishing. **Maximum Operating Temperature:** 93°C to 200°F. **Minimum Operating Temperature:** – 19°C to – 1°F.

Desoldering Tools

Low Static Potential Desoldering Tool

Model AS196. Designed for low static work stations to protect components from effects to static electricity. Low static electrical characteristics providing ground path via operator, reducing discharge to susceptible components. Special material protects operator from a direct electrical short or shock. Static conductive construction reduces sensitive component damage.

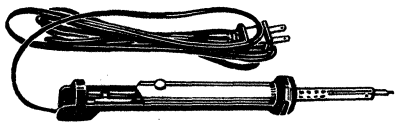
Solder Popper



The Solder Popper combines the popular snap-vacuum solder removal tool with a soldering iron for fast, one-hand operation, and is an excellent tool for field repair or production work. Has a tightly sealed vacuum pump that snaps up all of the solder quickly. A removable reservoir stores solder and cleans out in seconds. The 30-watt iron melts solder rapidly and features a long-life tip that unscrews for easy replacement.

Solder Wick (Pure Copper)

GC/3S Wick is a superior solder absorbing wick for complete solder removal. Wicking starts faster than with conventional wicks due to a unique rosen. Faster wicking means for less trouble with excessive heat that damages components and PC board traces. Available on 25 ft. or 5 ft. spools.

Portasol Professional™

► Soldering Iron ► Blow Torch ► Heat Gun

Pocket size butane soldering iron, blow-torch and miniature heat gun. The Portasol Professional is the big brother of the popular standard Portasol and has the additional capability of both heat-gun and blow-torch functions. The Professional may be used for all conventional electronic soldering (adjustable equivalent to 10-60 watt irons) and a wide variety of other uses such as heating shrink tubing (hot blow tip) or even soldering or thawing copper water pipes (blow torch tip). The Professional's slightly larger diameter yields a greater butane capacity that will last for up to 90 minutes of soldering. **Included with the Professional are:** 2.4 mm Standard soldering tip, 1.0 mm Fine (PCB) soldering tip, Hot-blow tip, Blow-torch tip, Tip cleaning sponge, Formed wire hot iron stand, Unbreakable plastic case, Lighter included in cap. At only 7″ long and ¾″ in diameter, the Professional is a pocketable size. The entire set is only 3″W × 9″L × 13/16″D.
797-0230. Complete kit w/butane. P-1K-B Kit ..... **EACH 41.25**

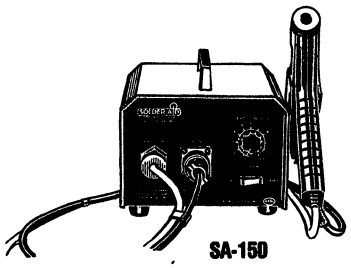
Temperature Stations and Rework and Repair Systems



SA-150

Fixed Temperature Station

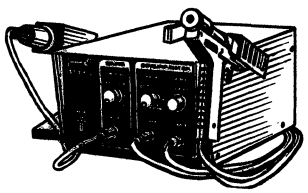
- Powerful suction capability and fast rise time.
- Easy cleaning and filter replacement
- Tip Temperature: 700°F (370°C)

The SA-100 Fixed Temperature Desoldering Station features a self-contained, high volume vacuum pump. Compact and lightweight for complete portability, yet with power to spare for the most difficult thru-hole applications. Equally suited for production as well as prototype and laboratory use. The SA-100 also features a convenient pistol grip handpiece, trigger activated operation, no-clog straight flow design, easy collector cleaning, and a handy tool holder built into the control unit. Designed for long life and low maintenance. Supplied with 0.039" tip, tip cleaning sponge, tip cleaning pins, and spare filters.

Variable Temperature Station SA-150

- Powerful suction capability and fast rise time.
- Removes solder easily even on multilayer boards
- 50% more vacuum than competition
- Non-clog straight-flow solder path design
- Efficient handpiece—trigger activated for easy use
- Lightweight, cool and comfortable handpiece
- Zero voltage heater switching and grounded tip

The SA-150 Variable Temperature Desoldering Station enables the user to control the temperature for a wide variety of applications. The unit is completely self-contained with a high volume vacuum pump. The SA-150 features no-clog straight-flow soldering path design and an easy trigger-activated operation. Designed for production as well as prototyping and laboratory use. The SA-150 comes with a handy tool holder built into the control unit. Supplied with 0.039" desolder nozzles, tip cleaning sponge, tip cleaning pins and spare filters.

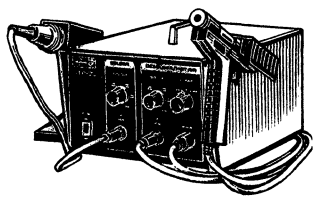


BTR-25-115

Desolder Rework and Repair Systems

- Spike-free operation
- Quick rise, efficient vacuum
- Ergonomically designed pistol grip desolder tool
- High power heating elements for fast heat recovery

These new BTR and SA desolder systems are designed with high heat capacity tips providing a greater "volume" of heat for desoldering multi-layer boards or boards with high thermal masses. BTR units provide excellent temperature control with closed loop thermocouple temperature sensing.



BTR-35-115

Solder/Desolder Rework and Repair Systems

- Ergonomically designed pistol grip handpiece
- Independent solder and desolder temperature control
- Zero voltage heater switching
- Quick rise, high efficiency vacuum.

This new range of OK Industries solder/desolder systems feature high wattage heating elements for very quick heat recovery and high mass tips with extra heat capacity for desoldering difficult multi-layer PCBs. The BTR models feature unique and accurate closed loop thermocouple control.

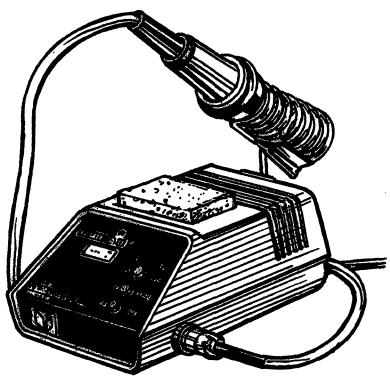
Soldering Stations and Irons

SA-10 E. Series Tri-Temperature Soldering Stations

Meets All DOD STD-2000-1B/WS6536E Requirements



SA-10-115

The SA-10-E is a temperature controlled tri-temperature soldering station designed to meet the rigid performance specifications of DOD-STD-2000-1B and WS6536E. An ideal production unit, the SA-10-E has a rotary switch used to change temperature settings. The set temperature corresponds with one of three color-coded lighted displays and can easily be viewed by production supervisors from a distance. The SA-10-E offers EDS safe or standard housings as well as a choice of three different iron wattages. CMOS safe.

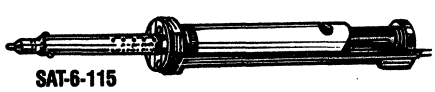
Desoldering Iron



SAT-6-115

Model SA-6-115. Electric desoldering iron combines the ease and profitability of a hand-held, manual desolder pump, with performance of an industrial desolder station. AC powered tool with one-hand desoldering eliminates the need for separate soldering iron and desolder pump. No shop air required. Vacuum chamber is easily removed for cleaning or replacement. **Input Voltage:** 115VAC 50/60 Hz. Supplied with SAT-6-059 tip. **Replacement tips:** SAT-6-059, .059" (1.5mm) diameter; SAT-6-070, .070" (1.77 mm) diameter.

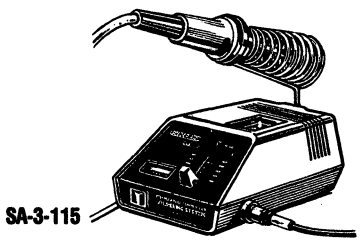
SA-3 Series Variable Temperature Soldering Stations



SA-3-115

The variable temperature SA-3 Series soldering stations provide a wide range of temperature settings to address a variety of soldering applications. A special tip mounted sensor and sophisticated control circuitry ensure fast response and exceptional stability over the broad range of 210° to 930°F (SA-3-30 210° to 850°F).

- Variable temperature adjustment from 210° to 930°F
- Type K thermocouple sensing provides accurate temperature control
- Meter indicates temperature at tip
- 24 volt, low leakage irons for operator and component safety
- Lighted power and heater indicators
- No burn silicone rubber soldering iron cord
- Modular design for easy repair.

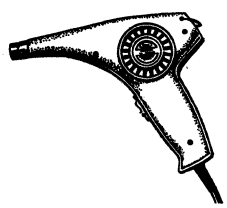
6966C Heat Gun



Ruggedly constructed, yet weighing only 13 oz., the 6966C is comfortable to the grip, easy to use, and the handle remains cool to the touch even after extended use. There is a convenient 3-way switch at the trigger position. A 3/8" air stream from the nozzle directs the heat to the exact area desired. Air flow temperature at the nozzle reaches approximately 750°F to 800°F in seconds. A 6 ft. 3-wire cord assures maximum operational flexibility. **Specifications:** Temperature 750°-800°F, 120 volts AC, 3-wire grounded plug, 6 foot cord. Includes heat gun, 6 foot cord, suspension ring, and shrink tubing reflectors, reducing baffle, precision reflector. **6965A Heat Gun Stand.** This optional accessory holds the gun within reach for immediate use and positions the gun for hands-off operation.

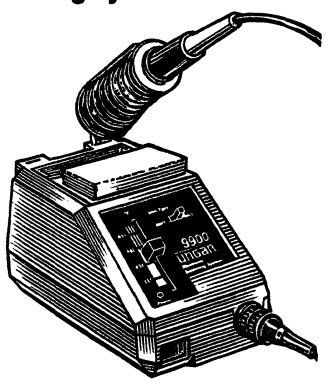
9900 Series Soldering Systems



Temperature is electronically controlled with a closed loop feedback circuit. This circuit induces transient spikes of less than 2 mV. This makes the 9900AS ideal for soldering CMOS and other voltage sensitive devices. Three interchangeable soldering irons fitted with quick lock plugs make tailoring to specific job requirements easy. Available irons include the 9911AS micro-size iron for fine work, the 9921AS macro-size iron for standard work and the 9931AS high capacity iron (macro in size) with the capacity to handle thick multi-layer boards, heavy ground planes and other tough tasks. The temperature is variable from 450°F to 850°F. An optional temperature control lock allows the temperature controller to be locked at a specific temperature. The conductive case has a surface resistivity of $< 10^5$ ohms/□. The anti-static handles have a surface resistivity of 10^6 ohms/□. Power Base and irons sold separately.

Electric Soldering System 9000

The temperature-controlled System 9000 is the no-compromise choice for soldering CMOS and other sensitive electronic components. Lightweight micro-size handle soldering iron with Ungar's Thermo-Duric heating element operates at 24 volts for superior temperature control. The ruggedly constructed control unit houses a sophisticated electronic system which automatically regulates the temperature of the soldering iron to within ± 10°F through an adjustable 20-step range of 420°F to 800°F. Easily calibrated at the work station, the operating temperature of the soldering iron is displayed on the bright LED bar graph which can be seen several feet away. Switching is done electronically with a zero crossover network which reduces transient spikes to less than 60 mV. Long-life, iron-clad, chrome-plated tips provide maximum heat transfer between heating element and tip, as well as optimum control response to variations in tip load. And the tips are fully grounded. The control unit may be used in the base with the sponge and spare tip tray, or mounted separately at a work station. Also, the iron holder is reversible for right-handed or left-handed operators. **SPECIFICATIONS:** 120 V input, 2.0 amps 24 V soldering iron with heat-resistant cord, three-wire grounded tip. **Dimensions:** 6 × 5.9 × 7.6″. **Weight:** 5 lbs. Includes system module, base, micro-size handle with Ungar's Thermo-Duric heater, 1/16″ screwdriver tip (9012), tip tray with sponge, iron holder, and operating instructions.

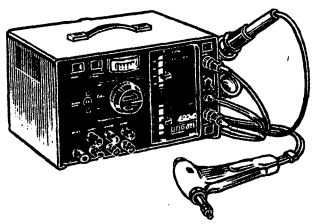
Desoldering/Rework Stations

Model 4924

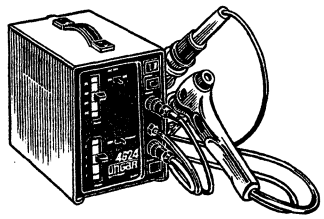
Self-contained service center handles virtually all repair and rework applications. Temperature is controlled for either of two desoldering handles and any one of four quick-connect 24 VAC soldering irons. Desoldering vacuum may be switched to positive air flow for heat gun applications. A power supply with three voltage ranges permits the use of a broad range of tools. The machine center can be powered continuously or by means of a foot pedal. **SPECIFICATIONS:** 500°F-1000°F Desoldering mode. 450°F-850°F Soldering mode. 3-wire grounded, 120 V input, 60 Hz. **Dimensions:** 6.66″H × 10.6″W × 7.5″D. **Net Weight:** 11.9 lbs. Soldering Mode meets following Military Specifications: DOD-STD-2000-1B, MS-6536E, MIL-S-45743E.



972-9424. Model 4924 ..... **EACH 1191.20**

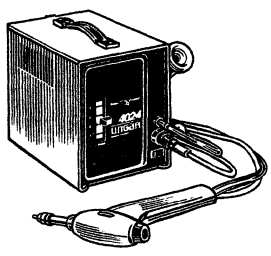
Model 4624

Self-contained desoldering system operates either pencil or pistol-grip style handles for electronic repair, rework or modification. Selector switch allows unit to control any one of four 24 VAC quick-connect soldering irons. Heat-up and vacuum response is rapid for increased production. **SPECIFICATIONS:** 500°F-1000°F Desoldering Mode. 450°F-850°F Soldering Mode. 3-wire grounded, 120 V input, 60 Hz. **Dimensions:** 6.66″ H × 5.12″ W × 7.50″D. **Net Weight:** 6.9 lbs. Soldering Mode meets following Military Specifications: DOD-STD-2000-1B, WS-6536E, MIL-S-45743E.



972-4624. Model 4624 ..... **EACH 840.70**

Model 4024



Variable temperature, electronically controlled desoldering system is a totally self-contained unit with a diaphram type pump.
Operates pencil or pistol-style desoldering handle. Selector switch allows unit to control any one of four quick-connect soldering irons. **SPECIFICATIONS:** 500°F-1000°F Desoldering Mode. 450°F-850°F Soldering Mode. 3-wire grounded, 120 V input, 60 Hz. **Dimensions:** 6.66″ H × 5.12″ W × 7.50″ D. **Net Weight:** 6.6 lbs. ESD Precision Electrostatic-Free Soldering Stations

These electrostatic free soldering stations eliminate stored static charges by grounding the station's housing and hand piece with a separate flexible conductor. You get a higher standard of hand soldering safety with the U.L. approved safety features of these ESD units. All stations meet MIL-spec DOD-STD-2000-1. For detailed descriptions of EC Series Stations see facing page.

Stock No.	Mfr.'s Type	Description	EACH

Thermolock™ Soldering Station

Get precise temperature control of the iron tip by simply inserting a speciffically marked key into the handpiece. Each key is precisely calibrated and laser trimmed to deliver tip temperature to within 10°F. To change temperature control, insert another calibrated key of the required temperature rating. Zero voltage circuit, driving a solid state thyristor, eliminates switching transients on the iron tip. All models have lightweight high impact handle design with tapered, self locking replaceable tips that enhance response time.

DS600 Portable Desoldering Station

This self-contained system requires a 120 volt 60 Hz AC power source for operation. The desoldering operation is controlled with a pushbutton to regulate the vacuum pulse. The pushbutton, built into the handle of the iron, allows either left or right-handed operation. The desoldering head design is provided with positive sealing to prevent vacuum loss. The desoldering head is temperature controlled to 700°F (371°C) by the reliable 'Magnastat' closed loop temperature control system. The desoldering iron heating element and pushbutton control circuit are electrically isolated from the 120VAC power supply through a 120/24 volt step-down transformer. A 24 volt signal from the pushbutton activates a photo-isolator circuit which turns the 120 volt compressor motor on and off. Prevents voltage spikes from the motor or pushbutton reaching the desoldering iron tip. The desoldering iron tip is grounded to prevent damage to voltage sensitive components with DS110T tiplet.

SMT Desoldering Accessories

CSF tips for surface mounted devices make quick work of flat or quad-pack desoldering without the risk of damaging leads on the circuit board. A temperature controlled frame spontaneously melts the solder of all connected leads. Then, the component is gently lifted when the vacuum switch is activated.

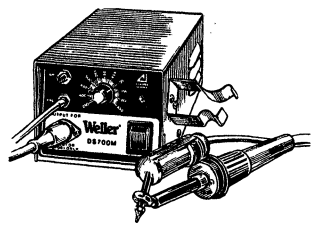
DS700M Miniature Desoldering Station



- Lightweight, Compact, Reliable, Portable
- LED Signal Display
- Interchangeable, Self-Sealing, Tapered Tiplets
- U.L. Approved Transformer

The DS700M is a lightweight, compact, reliable, portable desoldering station that fits in tight spaces. It's ideal for all your sensitive work. And it provides a full range of convenience features especially for the electronics workplace, from finger tip control to the LED indicator signal that flashes when the calibrated temperature is reached. The accuracy is ± 10°F control in a range of 350° to 850°F. Eight self-sealing tapered tiplets, in eight sizes, deliver good heat transfer. They interchange without recalibration of the power unit.

DS2000

DS2000 Elecronically Controlled Soldering/Desoldering Station

This fully electronic, complete soldering/desoldering station utilizes high precision electronic systems to control soldering and desoldering tip temperatures. Digital temperature setting and readout for both soldering and desoldering. Tools use precision platinum sensors and can be unplugged and replaced without affecting accuracy of the station. Fast, noise-free temperature control and dynamic response. Zero crossing or optically isolated electronic circuitry is used throughout the unit. Detects proper air flow in the desoldering intake line. Station indicates tiplet restriction or low vacuum when flow is not within acceptable limits. Allows you to create a vacuum with internal vacuum pump or external shop air. Supplied with soldering tool EC1201P and pistol grip desoldering tool. 120V, 165W, 60Hz.

Soldering Equipment

Model EC4001. The EC4001 soldering station has three-digit LED readout for the temperature setting and the tip temperature (resolution and setability of 1°F or 1°C). All tip temperature readings are made by setting the selector switch to "read". The tip temperature (variable from 350°F to 850°F) remains at set point by feedback from the sensor in the tip. The operator controls, selects, and locks in all temperatures. A thyristor control is used to ensure against any high voltage spikes or magnetic fields on the soldering tip. A transformer isolates the EC power unit from the AC line; 24 VAC isolated voltage drives the heating element. 24 Watts. The irons are interchangeable on EC units and do not require recalibration. EPH101 tip is included.

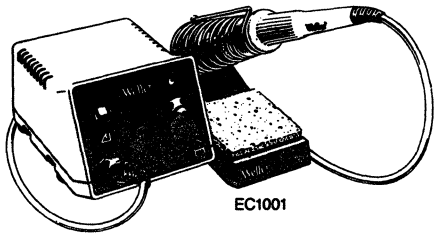
EC2001



EC1001

Soldering Station with Digital Readout

Model EC2001. Temperatures are electronically controlled, selected and locked in by the operator. Temperature settings and readings are shown on a large three digit LED digital display. Continuously variable tip temperature from 350°F to 850°F. Positive temperature coefficient sensor inside tip provides temperature feedback to maintain tip temperature at set point. Zero crossing control of heater current to eliminate RFI/EMI and accurate time proportioning to reduce tip temperature hysteresis are features of the control circuit. Plug-in soldering irons with positive plug lock, ground tip, and room temperature compensation are interchangeable with all EC power units without recalibration of the temperature settings. Temperature adjusting control can be locked at any desired temperature. Power unit provided with extra large sponge, iron holder tip holding tray, solder drip shield, over current protection (circuit breaker) and lighted on/off switch. Instantaneous tip temperature readings are available by setting a selector switch to "read" position.

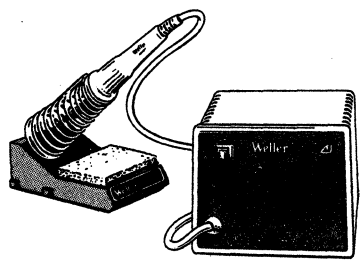
- **Impact-Resistant Case**



WTCPS

Model WTCPS. This closed-loop, low-voltage circuit automatically controls output and temperature in three ranges: 600°F (315°C), 700°F (371°C), and 800°F (427°C). The operator selects temperatures by changing grounded, heat-sensing tip with the knurled thumbscrew. This unit's lightweight iron has locking designs for interchangeability and a nonburnable silicone rubber cord. The power unit is in an impact-resistant case and has a unitized on/off rocker switch with indicator light, nonheat-sinking iron holder, storage tray for extra tips, and tip cleaning sponge. **Cord:** 3-wire 4.5 ft. (1.4 m) long. **Tip:** 1/16" (1.58 mm) screwdriver tip 700°F (371°C) PTA7 furnished. U.L. Listed. Features the TC201P iron and is safe for IC soldering.

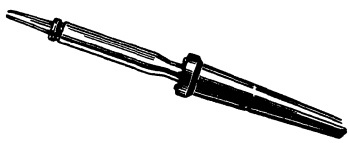
Soldering Irons with "Temperature Sensing" Tips



Model W60P 60-Watt Soldering Iron. Temperature-sensing device in tip automatically maintains correct soldering temperature. Does work of conventional 15 to 100-watt irons. Never overheats; saves current when idling. Reaches full heat quickly, gives rapid heat transfer. Much less tip redressing is required. Tips are easily removed and replaced by loosening tip nut. Only 2-½ oz. Length, 7-¼". 700°F. 1/16" screwdriver tip. 120VAC.

Solder

► For Faster Instant Action Soldering

Kester "44" Resin Core Solder is designed for electrical and electronic work. Its flux residue is completely non-corrosive and electrically non-conductive. It makes soldering faster than ever before and provides a stronger, longer lasting bond. Available on 1-lb., 4-lb. and 5-lb. spools in diameters of (.093) 3/32", (0.62) 1/16" and other diameters. Available in alloys (tin/lead) such as 40/60, 50/50, 60/40, etc.

Wire Core Solders With Rosin Flux

Multicore wire solders are uniquely manufactured with multiple, independent cores of high grade Ersin rosin Flux. Combination of 5 core construction, purity of metals and fluxing activity insures fast wetting even on partially oxidized surfaces. All alloys also available in solid wire solder.

Advantages of 5 Cores

► Ultra thin wall of solder between flux and heat source results in instant flux flow for rapid wetting . . . much more rapidly than possible with single cores.
► Soldering iron dwell time is minimized because of rapid surface preparation and wetting. Result, heat conduction and radiation are minimized.

► Eliminates flux voids common to single cores. Also, because of precision manufacturing controls required to achieve 5 cores, uniform flux to metal ratio is maintained as required by QQ-S-571e.

Standard Alloys. QPL. QQ-S-571e.

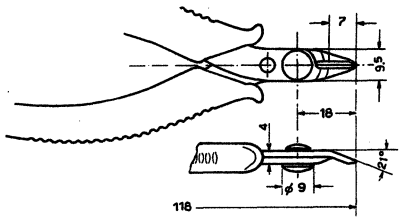
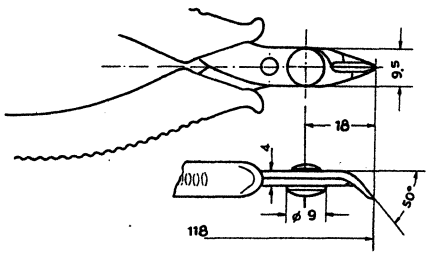
14

TR-20-M



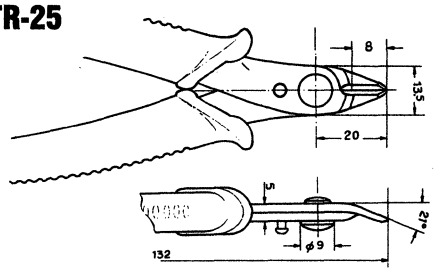
Micro Clean Cut Nippers. Anatomically formed. They are used for delicate work. Cutting capacity up to 20 AWG.
959-2000. TR-20M. . . . . **EACH 9.95**

TR-20-50-M



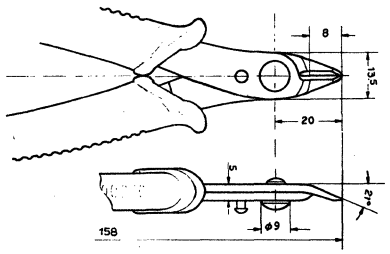
Clean Cut Micro-Nippers, particularly studied to cut leads located in difficult places. 20 AWG.
959-2050. TR-20-50-M . . . . . **EACH 9.95**

TR-25



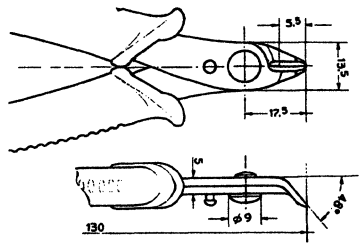
Clean Cut Nippers, light weight, easy to handle, exceptional cutting ability, particularly finished in consideration of its use in the electronic field and for thousands of finishing cuts of leads. 16 AWG.
959-2500. TR-25 . . . . . **EACH 9.95**

TR-25-L



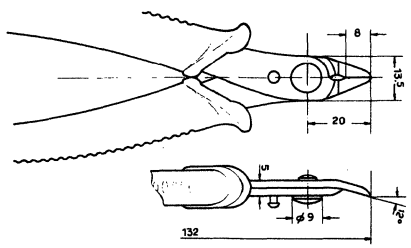
Same as TR-25 but with long handles.
959-2501. TR-25-L. . . . . **EACH 9.95**

TR-25-50



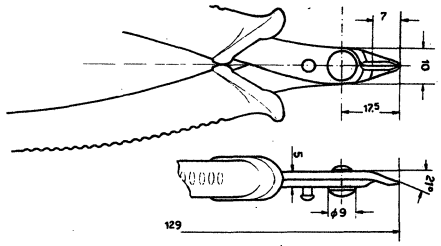
Clean Cut, particularly studied to cut leads located in difficult places. 16 AWG.
959-2551. TR-25-50. . . . . **EACH 9.95**

TR-25-15



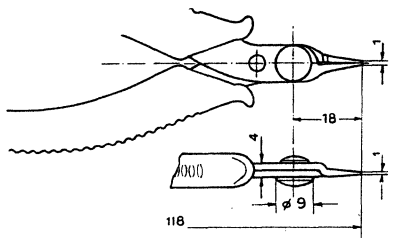
Clean Back-Cut Nippers allow to cut leads at 1,5 mm. from the level of projection. 16 AWG.
959-2515. TR-25-15. . . . . **EACH 9.95**

TR-25-P



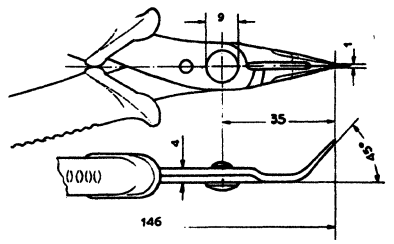
Clean Cut Nippers with very sharp cutting edges for very delicate workings. 18 AWG.
959-2502. TR-25-P . . . . . **EACH 9.95**

PN-20-M



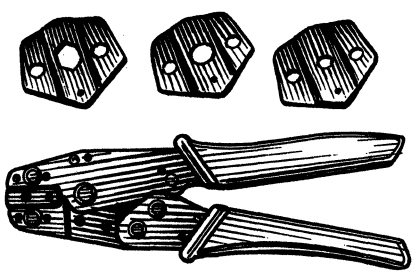
Micro Pliers light weight, easy to handle. They are used for delicate work.
959-2001. PN-20-M . . . . . **EACH 9.95**

PN-2002-PM



Bent Long Needle Nose Pliers with rounded off external edges for very delicate work.
959-2002. PN-2002-PM. . . . . **EACH 9.95**

Premier Crimp Tools



The **Premier Crimp Tool** has been designed to give maximum comfort and reduce operator fatigue. With the erogonomical design of the handles and the smaller size of the full cycle compound leverage frame. You achieve crimp compression to meet MS39012 and UL Standards. Built in Safety Release. The frames are made of high quality steel and the dies are a hardened tool steel for long life. The **Premier Frame** is built to cycle over 100,000 crimps. Dies are available for the **Premier Series** to crimp Hex type BNC/TNC connectors, open barrel pins and sockets, insulated terminals for connectors from Trompeter, Kings, Panduit, T & B, AMP, ETC, Molex, Ideal, Amphenol, Waldom and many others.

Premier Crimp Tool

RG58 and 59 BNC/TNC HEX coax connectors — three cavities .213, .255 and .068.
954-5004. 80-5004 . . . . . **EACH 69.50**

Premier Replacement Die Sets

RG58 BNC/TNC HEX crimp die set — two cavities .213 and .068.
954-6001. 81-6001 . . . . . **EACH 27.00**

RG59/62AU BNC/TNC HEX crimp die set — two cavities .255 and .068.

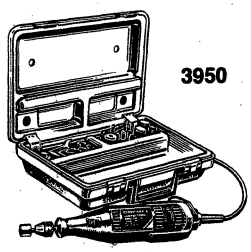
Moto-Tools and Kits

- ► 30% More Power
- ► New Tapered Housing Shape
- ► New Thrust Bearing for Greater Drilling Capacity
- ► Double Insulated Motor - No Grounding Required
- ► 6 Foot 2-Wire Cord - Requires No Adapter Plug



3950

Model 3950 Variable Speed Moto-Tool Kit

5,000 to 30,000 RPM; 5 speeds. Ball bearing motor construction reduces friction. Replace bits quickly with keyless chuck, up to 1/8" shank bits. Also uses collets from 1/32" to 1/8". Comes in deluxe storage/carrying case. **Kit contains:** 6 Cut-Off Wheels, 7 Standing Discs, 2 Mandrels, 1 Collet (3/32"), 1 Drill (1/8"), 1 Cup Brush, 1 Paste Brush, 1 Wrench, 1 Dressing Stone, 1 Keyless Chuck, 2 Engraving Cutters, 2 Felt Polishing Wheels, 1 Polishing Wheel, 3 each Silicon Carbide and Aluminum Oxide Grinding Stones, 3 Sanding Bands, 1 Drum Sander, and 3 High Speed Cutters.
772-3950. Model 3950 ..... **EACH 104.00**

285

Model 395 Variable Speed Moto-Tool

Tool only; no kit. **Motor Specification:** 115V, 50-60 Hz, AC, 1.15 Amps.
772-0395. Model 395 ..... **EACH 93.50**

Model 2850 Two-Speed Moto-Tool Kit

2 speeds: 15,000 and 28,000 RPM. Features long life lubricated bronze sleeve bearing motor for smooth operation. Keyless chuck for fast bit replacement, up to 1/8" shank sizes. Also uses collets from 1/32" to 1/8". Comes in deluxe storage/carrying case. **Kit contains:** 6 Cut-Off Wheels, 3 Sanding Discs, 2 Mandrels, 1 Collet (3/32"), 1 Drill (1/8"), 1 Cup Brush, 1 Paste Brush, 1 Wrench, 1 Dressing Stone, 1 Keyless Chuck, 2 Felt Polishing Wheels, 1 Polishing Wheel, 2 each Silicon Carbide and Aluminum Oxide Grinding Stones, 1 Drum Sander, 2 Sander Bands, 1 High Speed Cutter, and 1 Engraving Cutter.
772-2850. Model 2850 ..... **EACH 83.50**

275

Model 285 Two-Speed Moto-Tool

Tool only, no kit. **Motor Specification:** 115V, 50-60 Hz, AC, 1.15 Amps.
772-0285. Model 285 ..... **EACH 71.50**

Model 2750 Single Speed Moto-Tool Kit

28,000 RPM. Long life lubricated bronze sleeve bearing motor for smooth operation. Comes with Accessory/Bit holder. **Accessory/Bit Assortment includes:** 1 each Aluminum Oxide and Silicon Carbide Grinding Stones, 1 Wrench, 1 Cup Brush, 1 Drill (1/8"), 2 Mandrels, 3 Cut-Off Wheels, 3 Sanding Discs, and 2 Felt Polishing Wheels.
772-2750. Model 2750 ..... **EACH 56.00**

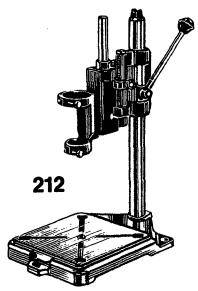
Kit for 2750

Model 275 Single Speed Moto-Tool

Tool only; no kit. **Motor Specifications:** 115V, 50-60 Hz, AC, 1.15 Amps.
772-0275. Model 275 ..... **EACH 47.50**

Model 212 Drill Press

6" sq. work surface. 0" to 3" adjustable tool carriage. 3" throat depth. Table slotted for guides, hold-downs. Use with Moto-Tools 395, 285, and 275 only.
772-0212. Model 212 ..... **EACH 42.75**



212

Model 225 Flex Shaft

36" long cable; use with Moto-Tools 395, 285, and 275. Features cool-running, 1/2" dia. pencil-like hand piece.
772-0225. Model 225 ..... **EACH 28.50**

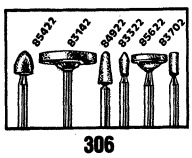
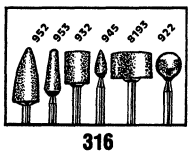
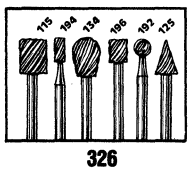
90349



306



316



326

Each accessory set is packed in a convenient reusable plastic storage case that organizes and protects the bits when not in use. Dremel reserves the right to substitute accessories of equal value for all bit sets subject to availability.

Model 602. 6 piece (Bits 613, 650, 615, 654, 614, 610) high speed router bit set. Rout, inlay, and mortise wood and other soft materials. For use with Dremel Router Attachment No. 230.
772-0602 ..... **EACH 32.95**

Model 9925. 5 piece (Bits 9901, 9903, 9905, 9908, 9912) tungsten carbide cutter set. Engraves, carves, and shapes wood, ceramic, and metals.
772-9925 ..... **EACH 34.95**

Model 90349. Assortment of 34 general purpose accessories for a variety of applications.
772-9034 ..... **EACH 40.90**

Model 306. 6 piece (Bits 83142, 85422, 84922,83322, 85622, 83702) silicon carbide grinding stone set. Grinds on hard steel, ceramic, glass, and other hard materials.
772-0306 ..... **EACH 9.95**

Model 316. 6 piece (Bits 952, 953, 932, 8193, 922) aluminum oxide grinding stone set. Sharpens, deburrs, and grinds metal.
772-0316 ..... **EACH 9.95**

Model 326. 6 piece (Bits 115, 194, 134, 196, 192, 125) high speed cutter set. Carves, shapes, and hollows most woods, metals, and plastics.
772-0326 ..... **EACH 19.95**

Moto-Tool Accessories

- ► Popular Drill Press Allows Precision Shop Work

(A) #230 Router Attachment. Allows fingertip guidance, superior visibility. Integral guide bars provide excellent depth adjustment. Can be used portably or in permanent bench-mounted position.
772-0229. Shpg. wt. 1 lb ..... **EACH 29.75**

(B) #2217 Moto Tool Holder. Designed to hold the Moto-Tool while leaving hands free to control work piece. Sturdy swivel base can be mounted to the work surface.

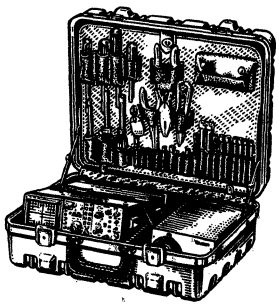
600 Series Zipper Cases

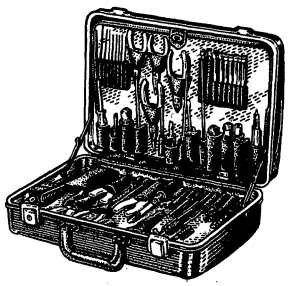
Model 640 zipper case is the 'new look' in field service cases. Made of rugged Dupont Cordura®, the 640 features a soft leather wrapped handle, one large pocket on one side and two smaller pockets on the opposite side. Points of stress have been reinforced to assure longlasting durability. 15 1/2 × 11 1/4 × 2 1/2" O.D. The 640 holds most commonly used tools needed for servicing computer and office products. Everyday punishment is no match for this ruggedly crafted tool case. It's compact, sturdy and attractive. Made for those fast action service calls. Brown. (Tools and accessories not included). **Model 627** measures 12 1/2 × 10 1/2 × 2 1/2". **Model 629** measures 15 1/2 × 11 1/4 × 2 1/2", with retractable handles. Both of vinyl.

8300 Series High Density Polyethylene Cases



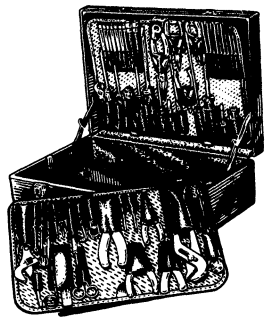
8300 Series cases are made from high density polyethylene which can withstand years of rugged use. The case features a tongue and grove aluminum valance, a full length continuous hinge, deep drawn ribs for improved strength, and molded bumpers which protect two chrome plated key lock latches. The ideal case for air, rail, or vehicle transportation of delicate & expensive equipment. The 8300 Series is available in several models. See chart below. (Tools and accessories are not included.)

9000 Series Injection Molded Industrial Cases



Model 9001 combines rugged injection molded polypropylene with double wall construction. Convenient removable pallets in the lid and bottom. Distinctly comfortable padded steel core handles and reinforced molded feet can withstand virtually unlimited bumping and banging around. Hardened, steel ball bearing lid stays. (Tools and accessories not included). 18 × 13 × 5 1/2" I.D. **Model 9002** eliminates the old method of notching with the new, continuous valance. Polyethylene liners repel most commonly used chemicals and solvents. Inner walls are constructed with sturdy plastic. Durable lid stays and cushioned steel core handles. (Tools and accessories not included). 18 × 13 × 6 1/4" I.D. Charcoal gray.

9800 Series Wood Vinyl Field Service Cases

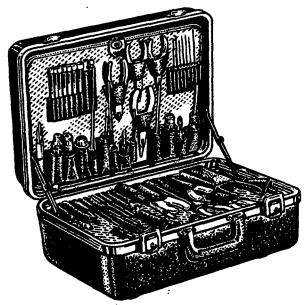


Model 9810 computer field engineer service case is an oversized case designed to carry the large selection of tools and test instruments necessary to service the computer and electronic industries. This case is also capable of carrying an extra large supply of spare parts. Has two removable tool pallets with partitioned areas in bottom of case. Space allotted for three plastic parts boxes. Lid has pocket for literature and service order pad. Each case has a solid wood frame construction, with mahogany paneling and dovetailed corners. Outer finish is MARVELON covering, a practically scuffproof material with the rich toned appearance of leather. (Tools not included). 17 7/8 × 12 1/2 × 4 1/2" I.D. Classic brown. **Model 9811** extra deep computer service case. Same as Model 9810 with dimensions of 17 7/8 × 12 7/8 × 7 3/8" I.D.

9100 Series High Impact Tool Cases

Model 9100 includes hardened steel ball bearing lid stays and deluxe handles, designed to withstand punishment of customer calls. Wider valance provides increased depth in base and elegant appearance. Injection molded. Two removable pallets supply ample storage area for spare parts and tools. (Tools and accessories not included). 18 × 13 × 6 1/2 I.D. Charcoal gray. **Model 9102** extra deep case. The old method of notching is replaced with a new method of forming the inside radius of the valance. Injection molding allows controlled corners and consistent wall thicknesses for added protection. Withstands field abuse and the rigors of traveling. (Tools and accessories not included). 18 × 13 × 7 1/4" I.D. Charcoal gray.

9200 Series High Density Polyethylene Molded Cases



The 9200 Series cases are molded from high density polyetheylene for heavy duty protection. Designed with an extra rugged 'plano hinge', the 9200 has all the features of a top flight case. The lid also features ball bearing locked stays. Deluxe handles are equipped with padded steel cores. Chrome keyed latches are standard. The 9200 cases also have molded-in protective legs on both the bottom and base. Available in **9201** thin style (17 3/4 × 12 3/4 × 6") or **9202** deep style (17 3/4 × 12 3/4 × 8"). Both cases feature two removable pallets with numerous pockets for tool storage and extra heavy duty extruded valance. (Tools and accessories not included). Also available as 6" or 8" deep ether foam filled case (see chart below).

Note: Tools and Accessories Not Included. For Tools see Section 14.

Tool Kits

(A) Alignment and Specialty Tool Kit. This kit contains a selection of popular alignment and service tools in a handsome carrying case, ideal for the technician and engineer. Each tool's application is described on inside of case. The kit, containing 44 tools, includes: five hex tools, three hex wrenches, four screwdrivers, eight aligners, three Tel-A-Turn tools, wirestripper, wrench kit, inspection mirror, K-Tran tool, Neo-Lite tester, Lo Volt tester, fuse puller, tweezers, TV channel tuning tool, capacitor tool, two 2-IN-1 tools, oiler, reamer tool, heat sink, solder probe, brush/scraper tool, ruler, burnishing tool, transistor tool, and double end tool.

796-5060. Type 5050 ..... **EACH 71.96**

(B) GC Type 9200 Alignment Tool Kit. Wall mounting kit includes 27 most needed radio-TV alignment tools. Housed in sturdy, 3-color steel panel with 2-hole mounting. Precision made of the finest materials including low-loss plastics and extra-hard bone fiber; tips are hardened spring steel. **Includes:** various length alignment screwdrivers; special short tools; alignment wrenches; channel tuners; core aligners; oscillator adjust tools; trimmer, IF aligners; solder probe; nylon replacement tip for long reach aligner; hex tools; etc. Panel is 9 3/4" high and 18 3/4" wide.

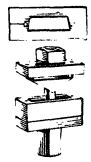
799-2060†	7216	—	147.34

† Punch and Die Set includes all of above; does not include draw studs.

RS-232 Panel Punch

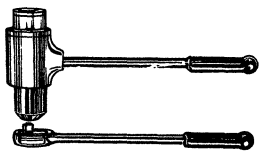


Fast and accurate panel punching for 25 pin D subminiature connectors. You only need to drill one 7/16" pilot hole. For manual wrench or hydraulic operation. Universal size punch for front or rear mounting of TRW Cinch, and ITT cannon type DB-25P and DB-25S or equivalent connectors.

799-2075. Model RS-232 ..... **EACH 209.89**

Quick Draw™ Hydraulic Punch Driver

Punches 1/2" through 1 1/4" conduit plus 17/32" oil tight holes in one punching operation. Also punches 1 1/2" and 2" conduit size holes in two steps using 3/4" draw stud. Includes special adaptor that converts standard 3/4" knockout punches to use 7/16" draw stud for one-step punching in 14 gauge mild steel. Develops 8 tons of hydraulic force for easy punching. Compact, lightweight design. Includes hydraulic driver, 3 draw studs and adapter.
799-2070. Model 7804SB ..... **EACH 324.00**

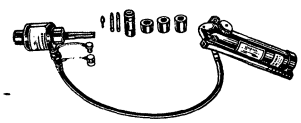


Ratchet Knockout Driver

Requires 50% less effort than conventional ratchet drivers while punching holes 8 times faster than the wrench method. Punches up to 3" conduit size holes in 10 gauge mild steel, excellent for NEMA 12 enclosures. Unique design eliminates stud rotation, lowers strain on studs. Ratchet action lets you work in confined areas. For use with standard knockout punches or Slug-Splitter heavy duty punches. Includes driver and 4 draw studs in metal case.
799-2065. Model 1904 ..... **EACH 334.00**

Hydraulic Knockout Punch Driver

With hand pump. Drives both standard and Slug Splitter™ Knockout punches. For all sizes, from 1/2" through 5". Punches up to 10 gauge mild or stainless steel. Includes powerful 11 ton hydraulic Ram, 767 hand pump and dies. Use with 730, 730M, 730S, 730T, 731M and 731S punches. Packed in carrying case. **Weight:** 25 lbs.
799-2080. Model 7646 ..... **EACH 407.04**



Round Metal Punches

Standard punches for clean, true holes. Cuts through up to 16 gauge metal. Model 112AVBB ball bearing drive screws are for easier hand operation on round chassis punches.

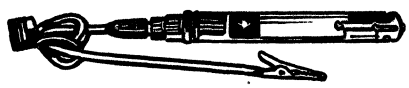
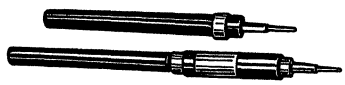
Continuity Tester



Pocket-size tester (5 1/2" long) checks continuity grounds on conduit systems and identities wires in multi-wire cables. Its light signal indicates completed circuit. For use on electrical control equipment, panel-board wiring and various other applications. 4-foot removable cord with alligator clip included. Powered by two AA batteries, not included. Not for use on live circuits.

988-6130. 61-030.....**EACH 13.95**

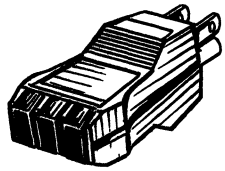
Test-Glo™ Circuit Tester



Use this industrial-quality tester for safe, easy checking of electrical circuits, sparkplugs, motors, fuses, and more. Resistors between each test prod and lead reduce voltage reaching the leads. Long thin handles allow deep probing with 'no-slip' safety rings. Neon lamp at front of prod for easy spotting. 24" lead (rated 10,000V) allows wide-span usage. Dust-proof and moisture resistant. Use with 80 to 600V, AC or DC.

988-6140. 61-040.....**EACH 13.95**

E-Z Check™ Receptacle Circuit Tester



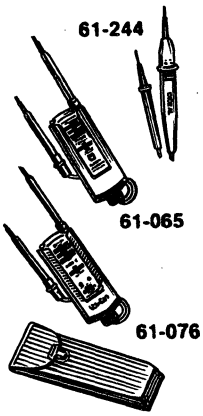
Type 61-035 identifies faults in 3-wire, 125V receptacles. Checks for open ground, reverse polarity, open hot, open neutral, hot and ground reversed, hot on neutral and hot open. Safer push-pull shape. Easy-to-read indicator lights. Yellow color for safety.

988-6135. 61-035.....**EACH 12.95**

One tool performs 8 tests. Quickly and easily checks 7 common wiring conditions, plus also tests the integrity and operation of any GFCI protected circuit or outlet.

988-6151. 61-051.....**EACH 25.95**

Voltage Testers



Durable, safe and versatile voltage tester provides long-life service. Tests for 110 to 600VAC or VDC. 25 to 60Hz. AC or DC identification, blown fuses, grounding and leakage. Two separate voltage indicators for double protection. UL listed and CSA certified.

988-6165. 61-065.....**EACH 25.95**

Voltage/continuity tester functions as a heavy-duty voltage tester (up to 600V, AC, or DC), low voltage indicator (low as 6 volts), and non-switching continuity tester. Tests for circuit continuity, identification of AC or DC, 24 to 60Hz, DC polarity, blown fuses, grounding and current leakage. UL listed and CSA certified.

988-6176. 61-076.....**EACH 47.95**

Leather Case and Leads for 61-076 and 61-065

Contact Connector Insertion and Removal Tools

Designed for use on connectors conforming to MIL-C-38999 standards. Precision engineered for maximum efficiency. **Insertion:** Tapered nose tools permit contact to be inserted from the rear, allowing the tines in the retaining clip to lock behind the contact shoulder. **Removal:** Contacts are removed from the rear by sliding the tip into the clip while straddling the wire. The tip holds the tines away from the contact shoulder while it is pulled out by the wire. Color code optional. Genuine leather-zippered cases.

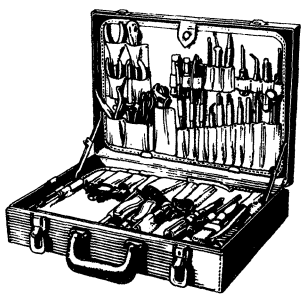
52-Piece Instrumentation and Computer Tool Kit



TK-300. Kit contains virtually all basic tools used for adjusting, maintaining and servicing all types of computers, electronic instruments, radar and other electro-mechanical devices. Tools may be used to service complex data processing and electronic equipment. Tools are precision made and individually mounted on 2 removable boards for ease of service. Extra-large space for more tools and papers. Tools can be modified or exchanged to suit your requirements. All tools are mounted on 2 removable boards in rough-duty, leather-finish case. Kit weighs only 13 lbs. and measures 14 × 18 × 4¾″ deep. Includes pliers, screwdrivers, wrenches, and tweezers of various sizes. Also included are solder (rosin core), solder aid, inspection mirror, adjuster spring, crimper and cutting tool, circuit tester, tension gauge, vinyl electrical tape, and contact cleaner spray.

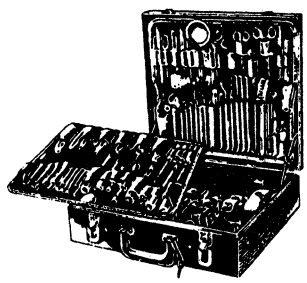
78-Piece Universal Tool Kit



TK-500. Now with just one kit you can install, adjust, service and maintain central office systems (inside and outside plant), telecommunication systems, switchboards, R & D, production, general repair (work of precise nature in labs and service shops for all industries). Designed especially for on-the-spot service, adjustment and maintenance in any location. No loss of time for lack of certain tools. Contains removable boards for instant selection of all tools. Extra pockets for your favorite tools and separate compartments for your notes and papers provided. All 76 tools are securely mounted in individual pockets in a highly durable, scratch resistant Barco case. Complete kit weighs only 16 lbs. and is 5½H × 18¼W × 16¼″D. Kit includes spring adjusters, wrenches, screwdrivers and blades, nutdrivers, pliers and tweezers of various sizes. Also included are soldering equipment, test probe, circuit tester, crimping and cutting tool, hand magnifier, penlight and wire stripper.
